The clipper-ship San Francisco, Captain Setzen, 106 days from New York, in beating up the harbor yesterday morning, when opposite Fort Point, on the north shore, missed stays and struck on the rocks, carrying away her bowsprit and opening her entirely in the bows. A portion of the cargo, in the between decks, has been saved and brought to the city. The vessel, and a portion of her cargo, will be a total loss.

The wreck as she lies with the portion of her cargo that was insured, was sold yesterday to Capt. J. T. Wright, of the Goliah, for $12,500. It is stated the *San Francisco* has on board between twenty or thirty thousand dollars worth of cargo, which is not insured, and on which the purchaser is entitled to salvage, if saved by him. It is thought that the loss caused by the wreck will exceed $400,000. Should the storm continue as violent as at the time of writing, it is possible that the purchase will not prove a very profitable one.

Wreck of the Ship Staffordshire of Boston, and loss of near two hundred souls.

Halifax, Tuesday, Jan. 3, 1854.

The clipper-ship Staffordshire, Capt Richardson, of and for Boston, from Liverpool, struck on Blond Rock, south of Cape Sable, about 1 o'clock on Friday morning, the 30th ult., and almost immediately went down, carrying with it about 180 persons.

The Staffordshire had a valuable cargo, and is insured for $100,000, about equally divided between New York and Boston.

The following despatch relative to the loss of life, was received by Messrs. Train & Co., of Boston, owners of the vessel:

"The first and second mates and 17 seamen reached Cape Sable; the third mate, boatswain and 12 others were picked up and landed at Shelbourne, N. S., and Capt. Richardson and the remainder on board, about 180 persons mostly Irish emigrants, went down in the wreck immediately after striking."

Chinese Salutations.—The question, "How do you do?" is expressed in Chinese by "Have you eaten rice?" To take a meal is to "eat rice."

Correspondence of the Friend.

New York, Dec 20, 1853.

Dear Sir:—The President's Message and the Reports of the several officers of Government are before the people and give general satisfaction. They indicate peace and a high state of national prosperity.

The treasury has a large surplus. Lately some have felt the screws of a few weeks of commercial pressure; but this is about over, the banks are discounting freely, and the tide of business rolls on. The influx of gold from California started the speculating spirit of 1835—6, and nothing but a continued supply has saved us from the recurrence of the financial wrecks following those years. Since the discovery of the mines we have received over two hundred millions of dollars in gold, seventy five millions of which we have exported, leaving more than one hundred and twenty five millions in our Banks and in circulation among the people. The farmer now gets in this market for his best flour, beef, butter, potatoes, and wood, $9 per barrel, 15 and 31 cents per pound, $1,00 per bushel, and $10 per cord. The mechanic gets $2,25 per day, or more, and almost any Irishman, who can handle a shovel, or carry a hod, pockets as many pennies per day as he weighs pounds. We are growing fat and luxurious too fast.

But in beneficence and spiritual progress we have so many eddies and counter-currents as greatly to retard us. Still in these things there is much that is pure and lovely and of good report. The announcement of several noble bequests of late, for beneficent purposes is making a good impression on the popular mind that money is valuable only as it is employed in good. The late Anson G. Phelps of this city has left three hundred thousand dollars to the Bible, Foreign, and Home Missionary Societies—$100,000 to each: and enough to other objects to make half a million. Nor did he fail to bless the world by his gifts during his life time.

A little more than a year since the Congregational Churches, prompted by the gift of $10,000 by one of our merchant princes, raised by contributions over $50,000 for church erection and church extension purposes particularly in our new settlements. This gave the hint and heart to the Presbyterian Churches to follow their example; and the present promise is that at least $100,000 will be thus raised for a similar purpose.

These in connection with other things indicate spiritual improvement, and mental enlargement. Doubtless many little souls are yet to be born, to eat bread awhile and then die; the world no better for their being in it, and not sorry for their leaving it; yet I am fully persuaded that we are now entering an age of manly piety and manly acts; an age in which the *plowman shall overtake the reaper, and the treader of grapes him that soweth seed.*

At our wharf now lies the largest ship in the world—the "Great Republic;"—may she be the type of a multitude of great souls engaged in carrying the blessings of civilization and christianity through the world.

Very truly yours,

J. S.

Facts from the Census.

The immense labor of footing up, analysing and putting the statistics into a tangible shape, can only be appreciated by those who have examined the piles of returns in the office of the minister of Public Instruction. That labor is progressing with all possible despatch, but some considerable period willyet elapse before it is completed. We are enabled to present our readers with the following details in regard to the foreign population of the first district of Oahu, which includes Honolulu and vicinity, and is believed to be accurate. This census was taken the last week in December, 1853.

Native Countries.	No.	Males,	Females.
United States,	371	291	80
G. Britain and Ireland,	259	189	70
Australia,	*26	16	10

East Indies,	3	2	1
China,	22	22	
Hawaiian Islands,	8	4	4
Total,	131	121	10

Polynesian Feb. 25.

NAVAL.—While the Plymouth lay at anchor in Port Loydd's (Bonin Islands), she encountered a dreadful Typhoon, during which she had four anchors down, and then dragged into three and a half fathoms water. Just before the gale commenced, Mr. Matthews, one of her Lieutenants, was out in a boat accompanied by fourteen men, on a fishing party. They were all blown off, and notwithstanding the most diligent search for four days by the boats of the Plymouth and those from an American whaler in port, no traces whatever of them could be found. The Plymouth then started on a cruise to look for them, but it was of no use, and she returned here, (Hongkong,) stopping at Loo Choo and reported their loss. Mr. Matthews came out here as Master of the Susquehanna, and was made a Lieutenant after we arrived on the Station. He was very much liked on board of our vessel and will be missed by all, but his loss will be most felt by those he left at home, as I hear he was married shortly before our vessel sailed. Some of the best men, too, among the Plymouth's crew, were in the boat at the time.

☞Our Honolulu readers will recollect the visit of the "Wanderer," in the autumn of 1850, and the subsequent melancholly intelligence of the death of Mr. Boyd, at ——— island.—See page 23.

DEATH OF THE HON. JOHN AVERY PARKER. This gentleman, long known as one of the wealthiest and most enterprising of our merchants, died at his residence in this city on Friday evening about 9 o'clock, after an illness of a few weeks. He was eighty-four years and three months old, but notwithstanding his advanced age, he has attracted daily to his immense busines conoerns, until seized by his last illness. Mr. Parker's fortune is estimated at $1,200,000.

He was the last of the richest men of New Bedford,—of those who have been the most prominent representatives of our wealth, and most intimately connected with the prosperity of the city. Samuel Rodman, Isaac and Gideon Howland, Wm. Rotch, Jr., George Howland, and John Avery Parker, will long be remembered as men whose energy, enterprise and success rendered them conspicuous in the commercial affairs of New Bedford, and whose industry and skill accumulated fortunes of no ordinary magnitude.—*N. B. Shipping List, Jan. 4, 1854.*

DELIRIUM TREMENS.—Twenty or thirty years ago, say our best physicians, no such disease as mania potu, or delirium tremens, was known. The disease is caused principally by the poisonous drugs with which all wines and liquors of the present day are so abundantly dosed.

☞ Our special acknowledgments we would tender to the well known Poetical contributor, for magazines and newspapers writing from Hartford Ct., over the time honored signature of "L. H. S." We are also rejoiced to receive another communication from our old New York correspondent, "J. S."

Munificent Bequests.

Anson G. Phelps, an old resident of N. Y. City, died in Dec. last, aged 73. He has left princely bequests to the religious and benevolent institutions of New York. The total amount is $371,000 distributed as follows:—

American Bible Society,	$100,000
American Bible of Commissioners for Foreign Missions,	100,000
American Home Mission'y Society,	$100,000
For literary and theological education in Liberia, Africa, subject to the control of the Executors,	50,000
Union Theolog'l Seminary, N. Y.,	5,000
Institution for the Blind,	5,000
N. Y, State Colonization Society,	5,000
Auburn Theological Seminary,	3,000
Half-Orphan Society,	1,000
Congregational Church, Simsbury, Conn., for the use of the poor,	1,000
Colored Orphan Society,	1,000
Total,	$371,000

CHINA.—Dr. Bridgman says that the last census of China which he saw in print, was for the year 1813, which made the population of the Empire more than 361,000,000. He is confident that the present population cannot be less than 400,000,000.

☞ The papers announce the death of Mrs. Opie, the author of the well known work on "lying." She died at the advanced age of 85 at her residence in Norwich, England. Would it not be advisable to republish her work on "white lies ?" If we are not mistaken, it contains many valuable hints, for the present as well as past generation.

JAPAN.—The Emperor of Japan, is reported to have recently deceased, and that in consequence, all negotiation (with outside barbarians, e. g. Yankees,) must be deferred for three years, unless Commodore Perry can in some diplomatic way, obviate the difficulty.

☞ By a late N. Y. paper, we learn that already $20,000 has been deposited in the "Six-penny" Savings' Bank. We yet live in hope of seeing a Savings' Bank in Honolulu. It might take some months, or even years, to get such an institution well established but before the clipper can report a quick trip, she must be built and launched. Who will commence the foundation of a well regulated Savings' Bank ?

☞ Dr. Nott, who has been the President of the Union College, N. Y, for 50 years, has made over to that institution the enormous sum of $610,000, thereby endowing 9 professorships, 6 tutorships, 68 scholarships, and otherwise placing the college upon a pecuniary foundation equal to any in the U. S. Fifty years labor, and 600,000 ought surely to entitle him to the rank of *noble benefactor !*

Tobacco.

Fitchburg, Mass. April, 1852.

Dear Sir,—I have been engaged nearly two years in lecturing, and collecting Statistics, on the Nature and Effects of Tobacco. I have visited several States, lectured in many cities and villages, and wish to spread before you a few thoughts, simply as deductions from Statistics now lying before me.

It is quite manifest that the Tobacco crop is rapidly increasing over the land; the demand is enormous and frightful, and cultivation keeps pace with the demand; so that the most productive soils, to a wide extent, are desecrated by the growth of this poison.

The expenditure for Tobacco is fearful in amount. The cost for education, or religion or government, bears a very humble comparison! It costs the nation some thirty millions of dollars annually, and if the calculations of wise men are correct, it costs the American Church some five millions annually. The Cigar bill of many a student, clerk and stripling, exceeds his board bill. It is estimated that under-graduates in some colleges pay from six to eight thousand dollars for this vile luxury annually.

Tobacco and alcohol live in endearing friendship in each others bosom. If Satan ever had twin sons, here they are. I propound two or three questions: Do you know of one drunkard that does not use Tobacco? Do you know of one reformed drunkard who has apostatized, whose apostacy may not, in part, be attributed to Tobacco? Do you know of one drunkard who did not use Tobacco previously to becoming an inebriate on alcohol? It is to be feared that laws, however stringent against intemperance, will by and by prove little better than cobwebs, unless this terrible Tobacco mania with the young is put back in its destructive march.

Tobacco evidently can do well men no good. It is a material poison; portions of it lodge upon the tissues of the system, discolor the skin, derange digestion, and so debilitates the various functions of life, that not less than 20,000, it is said by physicians, annually die by its instrumentality.

Its ultimate effects on the mind are significantly mournful. It exerts a fearful power on the nervous arrangements, and thereby shakes and shatters the intellect as asylums for the insane, far and near, eloquently testify. Its use, in an eminent sense, is a fleshly lust, that wars against the soul. In many instances it invades the province of the religious affections, becomes an idol, usurps the place of God, enslaves the soul, thereby ruins millions.

It is a compeer with alcohol. The few use alcohol—the many use Tobacco. The one victimizes thousands—the other tens of thousands; the one inflicts the greater social injury—the other, the greater personal injury; the one begets violence and crime, and loads society with pauperism, the other is a dark, insidious, and stealthy demon, which works slowly, secretly, but surely. Were the evils of the one as well known as those of the other, families would fly to arms, and hurl the nuisance from their borders.

The chief sources of alarm are these: American youth, to a wide extent, are becoming narcotized, and of course sensualized, by this poison. They are mighty to use cigars, all up and down the land. This state of things is proceeding from bad to worse; the evil is congenital; the devotees to the weed will transmit a race in their own similitude, and health, patriotism, and religion may, in the end, perish under the tread of this demon. The Tobacco crop is spreading; Cigar shops are multiplying—shops which boast of supplying young gentlemen with fifty to au hundred and fifty varieties; Cigar agents I meet on every hand, going to and fro, establishing depots to disseminate nuisance and ruin. While this is going on, I find but little conscience in State or Church respecting the evil.

Those who use Tobacco, are in the majority; they are in some degree, narcotized and drugged on the poison. Those who never used it are ignorant of its potent witchery, and hence it comes to pass that the mass of men have no just appreciation of its fatal power, and little or no zeal to stop its ravages.

The evil is great. Is there no remedy? Some men of much repute despair, believe the case is hopeless, and that two or three generations will run the nation down into complete sensualism on this and other narcotics. I think otherwise. I think reform indispensable and practicable. Let colleges and schools of every kind, receive due attention, and precious youth will be rescued from this deceptive evil; let clerical, medical, and reformatory associations be visited, and the claims of the cause be suitably impressed on their attantion; let the Pulpit, the Sabbath School, and Lyceum denounce Tobacco-using as uncleanly, unhealthy, and expensive—a public nuisance—and light and love will work changes here, as well as in other spheres of benevolent activity.

I am yours, sir, with much esteem.

George Trask.

Massacre at Hall's Island.

A late San Francisco paper says that the brig Rosa, while on a trading voyage among the South Pacific Islands, stopped at Tauroa, where she was attacked by about one hundred and fifty savages from the north end of Hall's Island. Joseph Maiden, chief surviving officer, thus narrates the fight:—

The captain was also on deck; he, (Mr. Maiden) took several clubs from the savages. He then went to the main hatch to speak to the men left in the hold, when he received a severe blow on the head from a club, which knocked him down the hatchway. While in the act of falling he saw two natives attacking Wm. Sheen, a cooper, who shipped at Sydney. The war whoop was then raised and Maiden recovering from the effects of his blow, and not being injured by the fall, directed the men in the hold to make for the cabin, there being a door through the bulkhead, with a view to getting arms. They could not find any ammunition for some time; at length Emmanual Ramose discovered a keg of powder, and aftewards a parcel of shot. Having now loaded some musket, they shot some natives from the cabin sky light, and Maiden, standing at the foot of the companion ladder, and seeing the King's son passing on the deck, ran him through with a bayonet. They then left the cabin and attempted to rush the natives overboard. Two natives were struggling with the captain, one with the cook's hatchet and the other with a piece of sharpened iron, like a long knife. Maiden raised his musket at the men, but it missed fire, and he killed one of them with his bayonet. In falling the native dropped the hatchet on Maiden's foot, which cut severly; both in the struggle went down the hatchway together, till the savage was overpowered and killed.—Maiden afterwards shot another native. By this time many of the natives were driven overboard, and having hoisted the jib and cut the cable, the vessel stood off from the land. After getting the vessel under weigh, Maiden found that the captain, the boatswain, the cooper and one of the seamen, were lying on the deck, their bodies being mutilated in a horrible manner, by wounds from the hatchets and clubs. The steward, also, was lying on deck, almost dead. He then stood N. E. to endeavor to fetch Tauroa, with the hope of finding the schooner Black Dog, and getting assistance to navigate the vessel. The current however, drove the vessel to the Westward, and eventually Maiden bore up for Sydney, under the circumstances detailed in our report of the wreck. The murdered men were buried at sea.

The following is a list of the crew at the time of the massacre, showing those saved and those killed: Capt. Jacomo Ferreo, Italian; Emanuel Pancho, boatswain, Italian; Wm. Sheen, cooper, Englishman; —all killed: Chas. Temmins, chief mate, American; Henry Wilson, seaman, American—missing, either killed or left among the natives; Joseph Maiden, second mate, Englishman; Michael Black, seaman, Irishman; Emanuel Ramose, seaman, Chilian; San Francisco, cook, Portuguese; Eugenio Carbone, steward, Italian, and Joe, a native —all now in Sydney.

The Schoolmaster Abroad.

This phrase originated with Lord Brougham, whose eloquence is as notorious as his eccentricity. In his speech on the elevation of Wellington, "a mere military chieftain," to the premiership, after the death of Canning, Brougham said:

"Field Marshal the Duke of Wellington may take the army—he may take the navy—he may take the great seal—he may take the miter. I make him a present of them all. Let him come on with his whole force, sword in hand, against the Constitution, and the English people will not only beat him back, but laugh at his assaults. In other times, the country may have heard with dismay that 'the soldier is abroad.' It will not be so now. Let the soldier be abroad if he will; he can do nothing in this age. There is another personage abroad—a personage less imposing—in the eyes of some, perhaps, insignificant. The schoolmaster is abroad; and I trust to him, armed with his primer against the soldier in full military array."

Wheat Crop of Ohio.—The wheat crop of Ohio is estimated to average 25,000,000 bushels a year, or 13,000,000 bushels more than is consumed within the State. Only about 1-5th of the land in the State is under cultivation.

RACE DECIDED.—The American clipper ship Nightingale, Mather, and the British ship Challenger, Capt. Kellick, left Woosing, below Shanghae, on the 8th of August for London. The Challenger reached Gravesend on the 26th of November, and the Nightingale at Deal, on the 28th—the former won the race by about two days. On the departure of the vessels from China much interest was created, and heavy bets were laid on the issue.

☞ We copy the above from an American paper. Brother Jonathan must keep a sharp look out, or John Bull will take the wind out of the sails of the clippers, on which he has boasted so much.

The following remark from the London Shipping Gazette is quite sufficient however to account for Brother Jonathan's vain glory, "The empire of the seas must before long, be ceded to America."

The Wanderings of the Wanderer.

Mr. John Webster, who was the companion of poor Boyd during all his cruisings amidst the splendid islands of the Pacific, is about to proceed to England for the purpose of publishing under this title a narrative of the voyage. It was first contemplated to issue this work in Sydney, but the great cost of production has been found an insurmountable barrier. As to the intended plan of the work itself, we know nothing; but treating, as it must do, of lands which, although within a comparatively short distance from this colony, are as yet almost wholly unknown, it cannot but be deeply interesting. We have, however, seen the drawings from which the illustrations of this work are to be copied. They are twenty-five in number, splendidly executed in water colors by Mr. G. F. Angas, and taken from the original sketches made by Mr. Webster amidst the scenes which they so vividly represent.—Five of these drawings are of birds and fish, the latter distinguished, like the coral groves among which they wander, by the most brilliant hues. Three others contain portraits of various islanders, including those of four natives of San Christoval, four natives of Guadalcanar, and a handsome group of three Kingsmill islanders—man, woman and child. Another drawing contains the portrait of a man of Stewart's Island, and the representation of several native utensils. The remainder are all sketches of scenes in various parts of Polynesia—the Hawaiian Archipelago, the Kingsmill group, the Solomon Islands, and Stewart's Island. Among them are very graphic representations of the attack upon the Wanderer by the natives of Guadalcanar, after the murder of Mr. Boyd, and the subsequent destruction by the Wanderer's crew of the native village and canoes, after their unsuccessful search for the remains of that unfortunate gentleman.—*Sydney Herald, Sept.* 20, 1853.

NORTH CAROLINA.—It is said that North Carolina produces within its boundaries the staples of every other State in the Union, and is the only one that does it.

GREAT PRICE FOR CATTLE.—An association formed in Kentucky for the purpose of importing the best stock, recently sold a number of pure-blooded, short-horned cattle at extraordinary prices. One bull brought $6,001, another $4,850, and another $4,525. Of seven others, the lowest brought $1,000. One cow brought $3,050. Of thirteen others, the lowest was sold for $815. Cotswold bucks brought $1,010, and Southdowns $745. At a recent sale in England of the late Earl of Ducie's stock of cattle, from 300 to 700 guineas were given for bulls; one cow sold for 600, and another for 700 guineas.—The proceeds of the first day's sale amounted to nearly ten thousand pounds sterling. A number were purchased by American gentlemen.

PRODUCTS OF THE UNITED STATES.—The value of the crops in the United States, for 1850, was as follows: Wheat, $143,000,000; Indian corn, $391,200,000; hay, $190,275,000; oats, $70,840,000; potatoes, $73,125,000; cotton, $129,000,000. The value of the whole crop was $1,752,583,000. The animals slaughtered annually are worth $183,000,000.

MORE GIANT TREES.—The California *Pacific* says that in the neighborhood of the "mammoth tree," within the circumference of half a mile, there are twelve immense trees still standing, the smallest of which is 65 feet in circumference at the base, and 320 feet high. A dead tree which has fallen to the earth, is 400 feet in length, and 110 feet in circumference; 250 feet from its base it is 12 feet in circumference.

AN OLD PROHIBITORY LAW.—Eliot, the missionary to the Indians, more than 200 years ago, petitioned the General Court of Massachusetts that a law might be passed, prohibiting white men from selling rum to the Indians, and such a law was enacted.

TO SEAMEN AND STRANGERS.—The Seamen's Chapel is open for Public Worship every Sabbath, at 11 A. M., and 7 1-2 P. M. Seats free.

Seamen belonging to vessels (of all nations) visiting this port are invited to call at the Chaplain's study, in Chaplain street, where they will be gratuitously supplied with copies of the Friend and other reading matter. It will be most convenient for the Chaplain to receive calls from Seamen during the afternoon of each day.

A weekly religious conference and prayer meeting is held on Wednesday evening at the Vestry, and also at the same place, every Sabbath afternoon, at 3 1-2 o'clock. Seamen are particularly invited to attend.

Public services at the New Court *H*ouse at 11 A. M. and and 7½ P. M., and also, Native Churches on Sabbaths, commence at 9 1-2 A. M. and 2 1-2 P. M.

The Seamen's Reading Room is open at all hours of the day. Strangers arriving and having late foreign papers are respectfully invited to aid in keeping said room supplied with useful reading matter.

Donations are respectfully solicited for the support of the Chaplaincy and the publication of the Friend. An anuual report of all donations is made to the Am. Seamen's Friend Society in New York. Any person contributing $50 is entitled to become a Life Director of the Society, and $20 to become an Honorary Life Member. tf.

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4, 5, 6, 7 and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

REV. C. M. BLAKE'S SELECT

BOARDING SHOOL FOR BOYS,

AT BENICIA, CALIFORNIA.

In this school thorough education in the English Ancient and Modern languages, and mathematics, is afforded to a limited number of pupils, under the care of experienced Teachers:

The course of study is calculated to fit the scholar for active business pursuits, and also to prepare such as desire to enter college.

The location at Benicia, has been chosen as remarkably healthful and accessible; and the arrangements of the family are such, that pupils will find the comforts of home.

Music is taught by an experienced master.

The Academic year begins with August 1st, and is divided into four quarters of eleven weeks each.

Terms per quarter including all charges, $150, payable in advance.

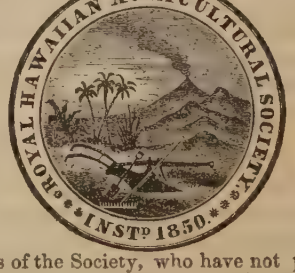
BIBLES! BIBLES!

JUST RECEIVED and for sale at the Chaplain's Study, BIBLES of various sizes and styles of binding. These books are imported by the Hawaiian Bible Society, and sold at the American Bible Society prices in New York, with the additional charge of actual expenses.

Barnes' Notes!



FOR SALE at the Chaplain's Study, complete sets of Barnes' Notes on the New Testament, Isaiah and Job.

Also a few copies of the cheap edition of UNCLE TOM'S CABIN.

Also Webster's Spelling Book.

☞ Any sailor unable to read, and desirous of learning, will be supplied with Webster's Speling Book gratuitously, unless he prefers paying for it.

R. H. AGRICULTURAL SOCIETY.

Members of the Society, who have not paid their subscriptions, will please call and settle with the undersigned, at the store on Fort street, next to the premises of C. Brewer, Esq.,

Copies of the "Transactions" No. 4, on hand and for sale, price 50 cents each; members being entitled to them without charge. GEO. WILLIAMS,

Honolulu, Dec. 23d, 1853.-4m-33 Treasurer.

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for cash, goods, or Bills on the United States.

The Friend sent abroad.

By paying in advance the subscription price, the Friend will be sent by the earliest opportunities, to the United States, England, China, Sydney, or any foreign country.

Poetry.

For the Friend.

To the Sandwich Islands.

Hail, Islands of the distant main!
Whose towering mountains rise,
And through the solemn clouds maintain
Communion with the skies—

No more shall dark, polluted rites
Your rescued realm debase,
Nor heathen ignorance and vice
Enslave your rising race,

For sweet church bells o'er cliff and dale
Like angel warnings glide,
And knowledge for your children flows
A free, translucent tide.

And lo! with mission zeal inspired
Ye breathe Salvation's sound,
And to the sad Marquesas send
The gospel ye have found,

And hang on Micronesian skies
That symbol of the Cross,
By which to heavenly joys we rise
And count the world as dross.

Though many a league of dark, blue sea
Divides us strand from strand,
So that we see not face to face
Nor grasp the greeting hand;

Yet Christ's dear love hath made us one,
And by its blessed chain
The fervent prayer for you shall rise,
Isles of the distant main.

Hartford, Connecticut, U. S. A. L. H. S.

Hawaiian Imports and Exports for 1853, at Honolulu.

Whole amount Imports paying Duties	$1,160,355,13
Amount Merchandise imported free Duty,	79,402,80
Value of Goods entered in bond 135,309,03	
This amount drawn for consumption,	16,284,35
Imports at Lahaina and other places,	25,908 90
	$1,281,951,18

Three fourths of this amount, ($954,919,-93) came from the United States, the remaining fourth came from near twenty different nations and places.

Whole amount of Exports for 1853	$372,996,83
Including Exports or Staple Products for 1853.

Hawaiian Bible Society.—Mr. G. B. C. Ingraham, Life Member, $10 00.

MARRIED.

On the 30th ult., by the Rev. T. E. Taylor, Mr. John Fey to Mrs. Elizabeth Millett, all of Honolulu.

DIED.

Killed by a whale, Jan. 1, 1854, at Magdalena Bay, California, Capt. E. Dexter, master of bark Oscar of Mattapoisett. The Oscar has proceeded home in command of the mate, having taken cargo from the James Maury.

In New Bedford, Oct. 26th, Henry Lindsey, Esq., Editor of "The Whalemen's Shipping List," aged 36.

In Honolulu Feb. 9th, Antonio Sylva, a Portuguese resident of many years at the islands.

At Waiohinu, Hawaii, 17th December, 1853, Harriet Sophia, infant daughter of the Rev. H. Kinney, aged 7 months, and 23 days. The Missionary Station at Waiohinu, is the most remote of any on the Island. The parents of the deceased were called to bear their affliction alone. Knowing what we do about their remote and lonely situation, we know full well that they were called to experience some of the "real" trials of missionary life, but we doubt not, they were ready to say, as they bid their precious child farewell:

"She is not dead,—the child of our affection,
But gone unto that school
Where she no longer needs our poor protection,
And Christ, himself, doth rule."

In Honolulu, on the 21st inst., of consumption, Wm. Layden, aged 31 years, a native of the State of New York, but late of San Francisco. He was one of the firm of Layden & O'Meara, printers.

PASSENGERS.

By the Schooner Restless, for San Francisco.—W. F. Dow, J. R. Dow, Capt. Avery, H. Rhodes, Mrs. Harris and child, R. Love, wife and three children, F. Patterson, W. Dickson, Capt. Webster, Mr. Burchker, T. Welch, L. R. Lull, E. Dennis, wife and daughter, W. Franklin, W. Lynch, J. Conley, C. F. Robinson, R. Spencer, H. T. Fitch, D. Gun. —27.

By the Corea, for New Bedford.—Chas. Wing.

By the Brig Zoe, from San Francisco.—Col. Wm. M. Smith, Capt. John Morris, Messrs. J. T. Waterhouse, H. Dickinson, C. E. Flanders, G. T. Walker, Anchong.

By the Brig Leander, from Bremen.—D. Wicke, J. Fergensen, E. Hoffmann, H. Bischoff, E. Chemintz.

By the John Wade, from San Francisco, J. Connely, Messrs. Lynchley and Furguson.

By bark Belvidera, from San Francisco,—W. R Fring, P. B. Dexter, J. G. Lewis, P. Saunders and Servant, P. Kennedy, N. H. Halsey; P. W. Graves, Geo. Peirce, G. Huther, J. Randon.

By sch. Rialto, from San Francisco.—W. M. Fulton, H. Ausley, E. Ehle, E. E. Chever.

By the Brigantine Senorita, from San Francisco.—Mrs. Porter, Drs. Wilson and Sturges, Messrs. Allen, Affogue, Allegg, Grequor, Allen, Carver, Lee, Whitfield, Patterson,—13; all bound on to Sydney in the Senorita.

By the Nile, for Puget's Sound.—Messrs. Williams and Mitchell.

By the Luika, for Puget's Sound.—Mr. Eames.

By the N. B. Palmer, from San Francisco.—R. Coady, lady and child, Miss Stevens, Miss Hastings, Messrs. Cotter, Biggs, Cummings, and Dr. Chapin.

By ship Waverly, from Boston.—Mr. Spencer, Mr. and Mrs. Hutchinson, Mrs. Hussey, Mr. Chamberlain, Misses M. J. and M. A. Chamberlain, Miss A. E. Clark and Miss Knapp.

Information Wanted.

Respecting Samuel Hopkins, son of Samuel P. Hopkins, of Dyerville R. I., who left Fair Haven on board whaleship Joseph Maxwell, Capt. Howland in June 1848.

Should this notice meet his eye, he is requested to communicate immediately with his friends or the Seaman's Chaplain, Honolulu.—tf.

Information Wanted.

Respecting Frederick Hubbard, who sailed from New Bedford on board the ship "Harrison," when commanded by Capt. Hathaway. He was discharged at Honolulu and worked for a time in the Polynesian printing office, but subsequently went to California. Should this notice come under his observation he is requested to communicate with Cyrus W. Chapman of New Bedford, his friends at Pittsfield Mass. or the Seaman's Chaplain, Honolulu.

"OFF AND ON."

SHIP-MASTERS AND SEAMEN belonging to vessels lying "off and on,,' can be supplied gratuitously with copies of the FRIEND, by calling at the Chaplain's Study, from 12 M. to 3 o'clock P. M.

Bound volumes on hand and for sale.

S. C. DAMON, Seamen's Chaplain,
Honolulu, March 1, 1854.

To Masters of Whale-Ships visiting the Hawaiian Islands.

YOUR attention is called to the followiing facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Sept. 1, 1853—6m-19

CHARTS.

JUST received by the undersigned, via Panama, a lot of superior Charts, of the North and South Pacific Oceans, extending from the Equator to 65° N. and 65° S. latitudes, embracing all the latest surveys and observations for the year 1853, drawn and engraved by Chas. Copley, New York.

THE FRIEND.

HONOLULU, APRIL 1, 1854.

Three Strange Things.

1. It does appear strange to us, that men claiming to be reasonable beings, will go on drinking rum, gin, brandy and a numberless variety of spirituous liquors, when they know that these liquors are hurrying them to the drunkard's grave; there is Mr. Thus-and-so, that may live two years, but not over it; Mr. Good-nature, that is traveling the same road; and Mr. Fast-living, that is sure to go unless he reforms. All these wish to enjoy life and fear death, yet they drink, drink, drink—This seems strange to us.

2. Another thing seems strange too, that is, that men professing to be sensible and respectable, will uphold rum selling—a business destructive of public morals, domestic peace, and individual happiness. This seems strange to us.

3. The third thing which seems strange, is this, that temperance people or teetotallers, should be ridiculed, and loaded with all manner of bad names, when they merely abstain from drinking poisonous drinks and aid to reform those addicted to habits of intemperance. This seems strange to us.

By the way, there is one other thing which seems most passing strange, and more unaccountable than all the others, it is this: that persons professing to know what liquors are, and priding themselves that they take nothing but the "very best," are continually pouring down the vilest compounds of acids and other poisons that the apothecary's shop affords. This is true, if Honolulu doctors and physicians elsewhere, speak the truth. Yes, we believe if a rum seller were to offer a man a bottle of sulphuric acid, undiluted, some smart young man would drink it all down, and call it first-rate old Jamaica.

Such things seem strange to us. Reader, how do these things appear to you?

"Women Rule in Martha's Vineyard."

Sometime since we noticed a paragraph going the rounds of the newspapers, stating that temperance had achieved a triumph, on the little island of Martha's Vineyard. No spirituous liquors were to be obtained except at the apothecary's shop. Dukes' county jail was tenantless, while the judge of the criminal court might as well remain at home, for his office had become a sinecure. It was our fortune recently, to meet a ship master from that favored spot, and we made special enquiries in regard to the truth of the above reports. He said they were substantially true, while even the half, we found, was not stated in regard to the good effects of temperance principles. In course of our conversation our informant remarked: "The women rule in Martha's Vineyard." To confirm this assertion, he stated many interesting facts. Now, if it be true that temperance principles prevail, in consequence of the women bearing sway, we go in, most heartily, for woman's rights. On this point let them rule; they have suffered most deeply from the fatal effects of the poison, now let them banish it, if possible, from the world as a beverage—let them chain the monster—let them effectually arrest his hateful sway. Too long has he marched through the world, robbing the affectionate wife of her husband's affections, and dooming the drunkard's children to misery; too long has the vile monster reigned over the family circle and domestic fireside. When men plead for liquor licenses to be freely granted, and the sale of liquors to be made more general, we do wish they would occasionally visit the drunkard's nome, the alms houses, the prisons and the hospitals, aye, and the cemetries of the land and world. Men may gloss the matter over, and may apologize for the business of rum making, selling, and drinking, there is one thing which they cannot do—they cannot deny that intemperance has been and is now, among the worst evils and direst curses that afflict our race.

☞ We occasionally meet with newspaper articles in which the idea is strangely set forth, that the "Maine Law" will never, *can never* be enforced in a country like England. A late number of the "Era," contained something of this nature, in the shape of a long extract from a late London paper. Even supposing that "teetotalism" and the "Maine Liquor Law," are as ridiculous as there represented, it will not follow that even in Old England, ere long, there may not be enforced a law even more stringent than the "Maine Law." History teaches some curious lessons respecting the change of public measures. There was a time, and that not many years ago, when even Englishmen bought and sold men not having a color like their own. There was a time, and that not many years ago, when Englishmen entertained very different ideas from what they new do, about "Corn laws," "Navigation laws," "Schools laws," "Church-rate laws," "Poor laws," and many other kind of "laws;" now it is our belief, opinion, idea, or notion, or whatever you may choose to call it, that Englishmen go for good laws, and once convince John Bull that the "Maine Law" is a good law and our word for it, that law will become the law of the three kingdoms, the "Times" to the contrary, notwithstanding. This is not a stand-still age. The people in this age are not going to sea in "tubs," because their fathers did, but they demand "clippers." Let facts and statistics, make plain the point that one half of the taxes of England are the result of spirit drinking, and is it to be supposed that sober-minded, money-loving, and sensible thinking Englishmen, will refuse to enact a law similar to the "Maine Law?" Times have changed. The leaven of free enquiry is abroad. A few years alter the face of things amazingly. He who goes to sleep and wakes up after a few years, will see greater changes than did "Rip Van Winkle." It seems but as yesterday, since church members in good standing manufactured rum, officiating deacons bought and sold it, while some of the parsons with their people drank it; but those days have fled. Let our neighbor of the "New Era" keep a sharp look-out or he may find himself representing an "old era."

Washington Territory.

To some of our readers, the name of a Territory, by name of Washington, will appear altogether new and strange. Such a territory has however been organized and is now rapidly progressing, as may be inferred from the following communication :—

WASHINGTON TERRITORY, OLYMPIA, }
PUGET SOUND, 9th Jan'y, 1854. }

DEAR SIR: * * * *

To commence, then, I have been here on the Sound, this last time, about three months, having arrived from San Francisco in the latter part of October. I am at present engaged in the lumber business; my health has been tolerably good since I left the Islands, having had but one illness since that time—of no serious nature, however.

This is destined at some future day, to be a great country; one that, in my opinion will exert a great and important influence on the face of this almost too great continent.

This town, Olympia, the Capital of the Territory, is situated at the head of the Sound, and of navigation, about 180 miles from the mouth of the Straits of San Juan de Fuca, the entrance. Of all the countries for timber this goes a *leetle* ahead of anything I have ever seen. In some of these immense forests it is not uncommon to see a pine tree running to the height of 250 feet without a limb, carrying its size—say four feet through, at the butt—150 feet. This you will say is rather a tough one, but nevertheless, it is true as "holy writ." The country is new and of course sparsely populated, as yet; there is, however, a tide of emigration setting this way, that in a few years will vie with our oldest states in point of numbers and wealth. This town now—but about a year since the first inhabitant settled here—contains at present, over 400, all or nearly so, having crossed the Plains since '52. There are no less than six saw mills and two grist mills in operation, supplying the market of San Francisco with a large amount of the best lumber that is used there. The quantity of wheat this year is small, not enough for home consumption; but next year, God willing, there will be some to spare. The country abounds with game and the water with fish, in abundance. I have heard somewhere of immense prairies, extending as far as eye could reach—and a little further—well, we have none such in this country, but we have, notwithstanding, plenty for all purposes of agriculture; and for richness of soil, it can beat the world and not brag; such potatoes, onions, cabbages, turnips and cucumbers—oh! you may think twice and then not begin to guess their size. I saw, a few days ago, a cabbage-head when dressed fit for cooking, weighing 54 lbs. 6 oz.!! this too, grown on a piece of ground that never had a plough in it, merely burnt over and dug up with a spade. If that is not "some cabbages," I should like to know the reason why. I have secured 320 acres of land on one of the best locations on the Sound, under the Government grant, have got it recorded and surveyed, it costing me altogether $45. I am confident that in five years from this time it will be worth more than that an acre. I have already been offered $2,500 for my location. There is a large quantity of the best of coal on it, and it is so near the beach that a vessel can be loaded from the bank; it has also, some of the finest timber that ever eye looked upon, with about 50 acres of prairie, plenty of water and abundance of wild fruit. I spent when I first came here, about four weeks exploring, going to every part of the Sound, and finally alighted upon this spot. The timber business engages every one here at present. The rainy season has fairly set in, and business is rather dull; I am of opinion that next summer will be one of stirring importance; San Francisco depends wholly upon this country for her square timber and piles; the extension of which city—six hundred feet beyond its present limits—will cause an immense exportation from here; it will be "all hands ahoy!" about the first of April, and if I do not make "my pile," it will be no fault of mine. I have now 27,000 feet of square timber, and about 18,000 do. do. piles, enough to load three good sized vessels—valued at almost $4,000 here; I do not owe more than $600 for labor, which I can pay at any moment it is called for. I have worked hard, in fact I have been obliged to or have nothing. Every body is obliged to work here, as in all new countries, and as all are at work, there is very little chance for amusements.

I must give you a slight sketch of the tribes who inhabit this clime. You are aware, I suppose, that these straits are lined with savages—numerous are the tribes and numerous the tongues spoken by them. There are seventeen, I think, distinct tribes, on these shores, the Flatheads being the most numerous. I will not attempt to give you the names of them for the very good reason that I cannot do so, suffice it to say that, as far as I have seen, they are harmless and inoffensive, except in cases where the white man deals out the "deadly poison" to them, when in some instances they have been known to behave badly—killing one another, but seldom injuring any white man or Bostons—as they call the Americans—King Georges, the English. The Hudson Bay Company have trading posts at numerous places on the Sound and straits, the nearest one to this place, called Nasqually, being about 13 miles. This Company have made immense sums of money out of the poor Red man, buying their furs, etc., for a mere song, and charging them exorbitant prices for every thing they purchased. The Americans, however, have told the Indians better; now the Indians will neither hunt or trap for them, they can get so much better paid for their labor by working for the timber men. I have understood that the Company are about breaking up some of their heretofore most important posts, Nasqually among the number, in which case our people will be the gainers. They occupy a great deal of good land which will be vacated, giving emigrants a chaece to choose good locations. ☞

☞ We are in doubt, whether the following is intended as a statement of facts, or a hoax!

A MYSTERIOUS DISCOVERY.—Thursday afternoon, as the workmen were engaged in digging a hole upon the Common, in which to set a tree, they came upon a brick arch, which, upon opening, and waiting a while for the nitrous gas to escape, one of the workmen descended to explore the cave. It was about ten feet deep, fifteen feet in length, and six feet wide. Upon the north side was an iron door, from which issued a flight of stone steps. This door was nearly decayed with rust. The brick were of a very quaint mould differing entirely from any that we have ever seen or heard of before, being of a semi-circular shape. Four small earthern jars or pots, of a curious form, with uncouth heads moulded upon them, were found in one corner of this vault; one of which was filled with amorphous pieces of silver, covered with a yellowish brown mould or rust. The other three contained a motley assortment of jewelry, of the most singular shape and make—consisting of heavy gold rings, elaborately wrought with chasings of beads, and antique armour, entwined in scroll work and flowers; bracelets, buckles, earings, &c. In a crevice between the bricks was stuck a dagger, which, upon touching, the blade immediately crumbled to pieces being completely eaten up with rust. The handle, upon a little rubbing proved to be of fine gold, set with six costly diamonds.

Here is a problem for antiquarians to solve. The only clue or key to this strange affair is the inscription found engraven upon the handle of the dagger, which some of our learned pundits are now trying to translate; it read thus: —'LO. OF. L. IRP. A."

The articles have been deposited in the City Hall; and the cave will remain open to-day for the examination of the curious.—Boston Post.

Marquesas, Island of Fatuhiva.

Letters have been received from our native missionaries at Fatuhiva dated about the first of February. Those of your readers who have taken an interest in this mission may be glad to hear from this new field. The brethren have commenced teaching the children, but attendance is irregular. A few attend worship. I send a few extracts from Kekela's letters. E. W. CLARK.

"We have received a letter from Mr. Parker at Tahiti by way of Nuhiwa, by the hand of the Catholic Teacher, Mr. Loane, who formerly resided at Uapou. He is now dwelling at Fatuhiwa with the Hawaiian Catholics engaged in teaching their religion.

We are quite comfortable here at present, none of us are sick. We are living in peace, without fear of molestation from the people. We can go about in any part of this valley without fear of injury.

But the people of this Island are by no means dwelling in peace. There are many chiefs, but they are much like the common people. Every one does what is right in his own mind. Fighting is, therefore, by no means uncommon. To this they are much inclined. Since Mr. Parker left, four persons have been killed in these contests between the different tribes,—one belonging to this valley and three to another valley. And these wars are by no means at an end. Matunui is unable to keep the island in peace. This depends on the different tribes. Yet he can go, without fear of being killed, in all parts of the island. This, no other person can do. The people are abundantly supplied with muskets powder and balls, procured

with hogs from California ships. No one is without a gun. This is a serious evil.

This is a nation of idolaters. Their gods and tabus are very numerous as it was in Hawaii formerly."

The following are extracts from a letter to Mr. Emerson from Kekela.

"There are six tribes on this island. Their names are as follows:—

Name of tribe.	Name of valley.
Anainoa, (their tribe,)	Oomoa.
Kaiuna,	Maunaoa.
Owau,	Hauaui.
Oi,	Kooi.
Ewaewa,	Ewaewa.
Mooka,	Hanawawe.

There are many things here which hinder the progress of our work.

1. Catholic teachers have set up their worship. Their method is to give cloth to any one who will attend their worship. If a person forsakes the church, the cloth is taken away. They have also numerous Jews-harps brought with them from Nuuhiwa. They endeavor to prejudice the people against our work. There are ten or more of them. One foreign teacher from Uapou. They teach in the Nuuhivan dialect, which is quite different from the language of this Island.

2. Another obstacle is anarchy. There are a great many chiefs, yet no one has sufficient authority to keep the island in peace. Therefore wars are frequent; and there is no time of peace or quiet.

3. Heathen priests are another obstacle. Their work is like Hewahewa's at Hawaii, when Mr. Bingham arrived.

4. The tabus of their gods are very numerous. These relate to the men—to the women—to children—to food, to clothes &c. There is no man not tabued, and no one—without some god. Certain fish are tabued, and certain birds, &c., &c.

5. Another obstacle is *rum*. Drunkenness abounds. The people have been taught by foreigners to distill rum from the sap of the cocoanut, the same as at the King's Mill Group and Ascension.

6. Another obstacle is the course pursued by Matunui. He has not forsaken his old tabus and former gods. He does not afford us help in teaching the right way; but shows much unbelief. He remarked, "Jehovah must be a death god. I barely escaped death at Oahu." Referring to the prevalence of the Small Pox, when he left. He came to us and requested us to lay aside our work and observe the days made tabu by his god. We declined, saying that we observed the tabus of Jehovah. On another tabu day, he came again with the same request, but we refused. He said, "how is it I observe your tabu days, but you will not observe mine." He seems to take very little interest in our work; yet he is not unkind to us. He furnishes us with food, and manifests attachment to us. He is pleasant in conversing with us, and is not displeased at our refusing to listen to his requests.

We have no fears for our safety, and are not disheartened by these obstacles. Our trust is in Jehovah, believing that he will afford us his help in this dark land, amid these obstacles. We would say with Nehemiah, "The God of Heaven, he will prosper us, therefore, we, his servants, will arise and build."

We are much favored in having Mr. Bicknell here. He affords us help in a great many ways."

A long letter has been received from Kawealoha, and printed in the Elele. I cannot give extracts now.

Society Islands,—Raiatea.

☞ We are confident many of our readers will peruse with interest the following letter, relating to the political and domestic state of affairs on the island of Raiatea in the South Pacific.

Raiatea, Jan. 4th, 1854.

Dear Sir:—Seeing various reports concerning Raiatea in different papers which reach us from your part of the world, and opportunity offering by a whaler, I thought it would be well to give you a short account of things as they are on the island. As your paper circulates most among the shipping, they are the most interested in knowing, who are seeking supplies from the islands, to enable them to prosecute their labors upon the ocean. From the past state of things, there is, at present, little to be obtained but wood and water, of that there is abundance, and a secure harbor for coopering their oil.—Just emerging from a prostrated civil war,—which has destroyed all improvements, and not completely settled, it will be some time ere much produce will be obtained. They have commenced planting.

The dissensions which led to the civil war commenced in 1852—in consequence of the King's taking some of the privileges belonging to the leading chiefs, pretending they had been given him by two of their number. The others said they might present their own; but, they should give theirs. One of the leading chiefs making use of his privileges, those which the King claimed, he was brought to trial. His office and honors taken from him. He said, as he had no office he would retire to his own place and cultivate. He went, and was immediately followed by all the inferior chiefs of his district. Having to pass through another district before he reached his own, the chiefs detained him. This was in effect saying, that they embraced his cause. The leading men of Tahaa, hearing of this sent messengers to him, and gave in their adherance. The King's party found they had gone too far, and offered to restore the chief. The proposals not being accompanied with what the chiefs required, were rejected. Such insolence, as the King's party considered the rejection to be, was not to be borne. They immediately prepared to go, and chastise such insolence, and drive them all into the sea. They went in great force, and were repulsed with great loss, the King himself was wounded; the chiefs did not follow. A truce was proclaimed. The King granted the chiefs all they desired. A new Constitution was established, by which many were restored to the land, of which they or their proprietors had been deprived, many portions changed hands. They reinstated the king in the new government, as King; but all the lands which he or his family or forefathers had taken under pretence of delinquency in the former possessors he had to restore, and was confined to his own hereditary possessions. His son had enjoyed a piece of land, which he wished to enjoy again, but the parties in possession denied his having any claim to it, and would not give it up. He told them he would be a plague to their government. He retired to his own place, and many who had been ousted out of their possessions, united themselves to him at his own place. After that they declared themselves to belong to the old constitution and would not submit to the laws of the new. Little notice was taken of them, being few and at a distance. At length the King influenced by his relations on Tahiti, joined them. The chiefs said as he had forsaken them they would not acknowledge him. Both parties prepared for battle, neither party, for a long time would commence action; both declared they did not wish to fight, they desired peace; but neither would come to terms on which they could agree. At length they fought. The King was beaten and taken prisoner, and banished with his family. One of the opposing chiefs was chosen King in his stead. The government is not firmly established, but there has never been a republic, as stated in some of the papers received from California; what may take place hereafter we cannot foresee. The people are still unsettled, and the new king's influence is not sufficiently strong to settle the pretensions of the dissatisfied.—It is a death blow to all improvements. Some say that by ardent spirits they will upset the Church!—They have no connection with Tahiti, nor with Pomare, as represented in some newspapers. She has no influence on Raiatea except on her own relations. She is niece to the old king, and her husband nephew, being sisters children. Sisters of the old king. I mention these things to correct the wild statements which appear in the papers, concerning these Islands. Civil war is awful at best, more especially in such a small community as this, when fathers fight against sons, and sons against fathers, and brothers against brothers, as was the case here. With their contentions they have opened the floodgates to evil, which with all their influence they cannot now shut. It is possible that in the end the flood may carry themselves away.

An Eye and Ear Witness.

The Mate of the American Schooner Flirt, commanded by Capt. Gibson. who was so vilely treated by the Dutch Authorities in Batavia, is in prison at the same place, on charges that have been proved unfounded by the courts of that country. A correspondent of the Tribune says that his case has been brought to the notice of both Mr. Crampton and Mr. Marcy. He is an Englishman by birth, but an American sailor by choice. Mr. Marcy, it is said, refuses to interfere, because he is an Englishman; Mr. Crampton, because at the time of his seizure, he was in the American service. If this be true, neither functionary represents the humanity of his country. As he is an American sailor, was serving on board an American vessel when he was arrested, and was in fact, "domiciliated" under our stars and stripes, Mr. Marcy, even if no "political capital" is to be made out of it, ought to look into the case; and if he is unjustly imprisoned, demand. There will be little inducement for foreigners to enlist in our naval or mercantile service, if the are to be regarded as outcasts from its protection.—National Era.

Safe Travelling.—Each of the four steamers of the Collins line have crossed the Atlantic about forty times, conveying in the aggregate from fifty to sixty thousand persons, and not a life has been lost by neglect, carelessness, or accidents.

His Majesty's Birth-day.

The Anniversary of His Majesty's Birth was celebrated yesterday, the 17th, with much spirit and patriotism.

It is impossible to specify in detail all the forms of enjoyment and rejoicing adopted by the population of Honolulu on this interesting occasion. Riding and feasting were entered into with much spirit by the natives very generally. Places of business were shut, after being open a few hours in the morning, and it seemed quite like a holiday. The troops were reviewed on the plain by H. R. H. Prince Liholiho; the manœuvers of the Artillery were highly creditable.

The Foreign Diplomatic corps, consisting of H. B. M.'s Consul General, the Commissioner of France and the Commissioner of the United States, called at the Palace, at 11 A. M.

As the Senior Member of the Corps Her Britannic Majesty's Consul General, for his colleagues and himself, congratulated the King, on the occasion of His birth-day, and stated that they and he were cordially united in the wish that Providence would afford them opportunities to offer His Majesty, the same felicitations on many future anniversaries, that His Majesty's health might be preserved many years, and that His Kingdom might prosper.

Afterwards the Minister of Foreign Relations presented to His Majesty, Mons. Marion Landais, the Chancellor of the Consulate of France, who arrived on the 16th, in the schooner "Restless."

The Consul of Bremen and the Consul of the United States, also called to felicitate His Majesty. I consequence of the omission in the circular notice, other Consuls did not attend, which is regretted.

A brilliant soiree was held in the evening, which was most numerously attended by the elite of Honolulu, including many strangers. A large number of ladies graced the occasion by their presence, and, "all went merry as a marriage bell."

May His Majesty have many returns of the anniversary of his birth.—Polynesian, 18 March.

☞ His Majesty's birth-day was celebraed last Friday in a spirited and becoming manner.

At 8 o'clock in the morning, all the shipping in the harbor and the different Diplomatic and Consular offices were decorated with their appropriate buntings. Guns were fired; the Engine Co. No. 2, "Mechanic," paraded the city with their splendid engine; the troops were reviewed on Waikiki plains, by His Majesty in person, accompanied by H. R. H. Prince Liholiho and Staff. The promptness and precision of the military is highly praiseworthy, and the Artillery, under Lieutenant Bingham, deserves great credit for the celerity and expedition of their exercise.

The Foreign Diplomatic Corps called at the Palace at 11 A. M.

In the evening a soiree was held at the Palace. The rooms were literally crowded and an eager desire manifested by all to be presented and tender the compliments of the day to His Majesty. We do not remember having seen a larger or more splendid circle of ladies on any one occasion in Honolulu. [New Era.

Lay Sermon, No. 1.

"Let not your heart be troubled; ye believe in God, believe also in me."

Who is this, then, that dares, in human form and with human voice, to command peace in the troubled sea of the heart of man?

The words are uttered in sight of the towers of Jerusalem—and along the streets beneath, in a few brief years the "wrath of God" is to be poured, making the blood of Jew and Roman to flow in rivers, piling the ground with corpses, and trampling Jerusalem itself into the dust beneath the feet of the Gentile. Those to whom they are uttered are men not merely suffering under public oppression and private wrong, with such destruction in the future for themselves or their children just revealed to them; but their hearts now are touched with a deeper sadness by reason of the words they have just heard. He, their best friend, their only hope, is to be taken from them. They are no more to see his "heaven-eyed" countenance beaming with love and pity. His familiar voice is no more to make their hearts burn within them as they journey along the roads of Judea. No conceivable circumstances could well occasion a profounder and more rational sadness. Who is He, that there ventures to proffer belief in himself as peace and rest?

Why is it, that to us too, those words seem to address themselves with such unearthly and peace-giving power, as it were awing us with the presence of a heart calm as the gaze of the stars of heaven—yet profound and pitiful as the love of God.

He who speaks them stands there, a man among men, with no outward marks of distinction save the native dignity of his presence, and the gentleness of his look. Yet, if his words be true, they bespeak a might, which no earthly monarch, no finite power could justly arrogate. For just precisely this is it which all earthly power has failed to command, all human experience failed to attain.

Restlessness is the great burthen of the epic of our human life. Like "a wild and sweet, but sad and terribly moving music," the sound of it comes up to us from all places and parts of man's existence:—till we might affirm that it is our common doom "to wander through barren places, seeking rest and finding none." The whole history of literature and of action declares it; our own observation and daily experience attest it. How constantly do we ourselves rise on the wings of hope and aspiration but that we may with the greater zest grovel in the mire. How frequently do we seek truth and knowledge but that we may shut our eyes to the light, and say of the darkness, "how good is it!" How often do we grasp the apples of joy but to find them changed upon our lips into ashes of sadness.

We dream of an angelic existence, that "through the dateless revolutions of eternity" chants "without break or bar or fall or cadence," one peaceful song of Holy, holy, holy—but not upon that level is our life, and not for our lips are those eternal Holies.

For all of us the words of the heathen poet have, at times, the charm of *truth*—

> "What weary woe, what endless strife,
> Bring'st thou to mortal man, O Life!
> Each hour they draw their breath.
> Alas! the wretches all despair
> To flee the ills they cannot bear,
> But through the gates of death."
>
> "Lo! all is full of pain and dread;
> Bedrenched in tears for ever shed;
> The darkness rendered worse
> By gleams of joy—and if by Heaven
> A blessing seemeth to be given,
> It changes to a curse."

Dissatisfaction, unrest, sadness, is it all; yet hearken to that voice!—

"Let not your heart be troubled; ye believe in God, believe also in Me."

Let us ponder those divine words; let us contemplate the person of Him who utters them, and see if there be not indeed there the peace of God and the love of Jesus—if we too may not become partakers of that Love, and heirs of that Peace.

"The Whaleman"—This is the title of a new weekly sheet to be published at New Bedford, "by the good people of the Whaling District." No. 1, has been handed us by Capt. Smalley, of the Isabella. It appears that "the good people of the New Bedford Whaling District," are aroused to the importance of publishing a weekly sheet for the especial benefit of Whalemen, "ten thousand" of whom sail from that port, making it the "oil factory of the world," and so enriching it, that "New Bedford owns nearly half of all the whaling interest in the country."

Being somewhat acquainted with the cruising ground, in and about New Bedford, it is with no little degree of interest that we welcome "The Whaleman." We have carefully examined the Shipping articles to learn who had gathered around the "Whaleman," and discover that various clergymen, merchants, and ship owners, of New Bedford are among the number. They appear to be resolved to do all in their power "to exercise a moral and religious influence" over whalemen sailing from New Bedford. They recognize the principle in their prospectus, that "sailors are men with souls as well as bodies; with minds as well as hands and feet." Most joyfully we welcome "The Whaleman," to the fraternity of laborers in behalf of seamen, and especially that class sailing from New Bedford. We hope to receive its numbers as they successively appear. Some paragraphs we should transfer to our columns, if the paper had not fallen into our hands just as our sheet was going to press. A future time will answer as well.

"The Harpers."

Among book readers in the English language, "The Harpers" are well known and familiar friends. Their publishing house in New York, has acquired a world-wide reputation. To most of our readers it is well known that in December last, their large establishment was destroyed by a fire which in a few hours consumed an immense quantity of books and printing materials. The loss was estimated at over one million of dollars.

The January No. of their Magazine has reached us, and its opening article contains a statement of facts, that we presume will not fail of interesting our readers. The following is an extract:

"It would be affectation in the Publishers to pretend any degree of insensibility to this misfortune. The pecuniary loss is very heavy; but this can be repaired by the same means which rendered it possible. Some six hundred persons, having parents, brothers and sisters, or wives and children, dependent on their labor, have been for a time thrown out of employment, though this suspension of their resources will be but temporary. The large circle of booksellers and book-agents scattered throughout the United States, who, to a greater or less extent, have looked to this establishment for their books, will find that supply cut off; but the lapse of a few weeks will, it is hoped, remove this check on their business pursuits. All these losses, serious as they are, can be repaired, and may, therefore, be contemplated with a courage made cheerful even by the sense of energy and vigor which the efforts to repair them calls forth. But the establishment itself, with its large collection of machinery, its complete arrangements for applying the perfected methods of art in all its branches to the production of books and its vast accumulation of printed volumes, which they had come insensibly to regard as at once the result and the monument of their united labors in this wide field of public usefulness and of private enterprise, has been swept by the blaze of an hour from the face of the earth. This loss is one which time can not repair, for it is a loss of time itself. The labor and energy which would have contributed to its enlargement, must now be devoted to replacing it. The task is one not wholly pleasant; but as the proprietors of the establishment have not learned from the lessons of life to indulge largely in the luxury of unavailing complaint, they are inclined to regard it with any feeling but one of dismay.

The establishment of Harper and Brothers, it is believed was the largest of its kind in the world—that of Brockhaus, in Leipsic, ranking next. It differed from that and from all others in the fact that it combined all the departments of labor necessary for the production of books in the most perfect form. Upon the Continent of Europe, books are mainly sold in sheets, furnished simply with paper covers; and in England the binding of books is carried on as a distinct business, having no connection with their printing. The establishment embraced a bindery as well as printing offices, arranged upon a scale commensurate with their general business. They occupied nine five-story buildings, five upon Cliff, and four upon Pearl Street, and covering the entire space between those avenues. These buildings were devoted to the various branches of their business—to type-setting, stereotyping, and electrotyping; to press-work, drying, folding, stitching and binding; to storing the vast quantities of books which constantly accumulated, and to the various transactions involved in their sale and delivery.

"This is scarcely the place for any very minute account of the processes and results of their business; and yet the readers of the Magazine may be interested in a brief statement of the leading facts connected with it.

"The house was established by the two senior partners James and John Harper, who opened a small book and job printing-office in Dover street, in 1817. Their first employer in book printing was Mr. Evert Duyckinck, a leading bublisher of that day, to whose order, on the 5th of August, they delivered two thousand copies of Seneca's Morals; on the 3d of December, twenty-five hundred copies of Mair's Introduction to Latin; and on the 7th of April, 1818, five hundred copies of Locke's Essay on the Human Understanding. These were the first books they printed. In 1823, the third brother, Joseph Wesley Harper, became a partner in the establishment, and in 1826, the fourth, Fletcher Harper, entered as a member of the firm. At that time their printing office had become the largest in the city, though it employed but fifty persons, and did all its work on ten hand presses. In 1825 the firm removed to Cliff street, where they purchased two buildings, numbers 81 and 82, and entered more largely upon the publication of books on their own account. In 1830 they began to stereotype their works, and from that time forward they have printed mostly from stereotype plates, which were stored away in fire-proof vaults for subsequent use, and which, in the course of their business had accumulated to the value of half a million of dollars. The public demand for books has increased faster even than the facilities for supplying it. The improvements in machinery, of which they have endeavored to avail themselves to the utmost, enabled them to multiply copies of their books to an almost incredible extent; and yet they were constantly under the necessity of enlarging their limits, and adding to their facilities for the supply of the reading public. At the time of the destruction of their establishment, they kept in constant operation thirty-three Adams power presses, of the largest and best description, twelve of which were employed, sometimes by night as well as by day, upon the Magazine—and four new ones had just been put up for the new monthly series of Harper's Story Books, of which twenty thousand copies had already been printed. Each of these presses averaged about six thousand impressions, or 190,000 16mo pages, a day. Sixteen of the presses had been built expressly for working wood-cuts; giving employment to ten persons considered the best workmen in the country, and occupied exclusively in making ready and elaborating the illustrated forms of the Magazine and other pictorial publications. The progress made during the last thirty years in this department of the business may be inferred from the fact, that when the senior partner of the house was learning the trade, and working at press, it took two men to do one tenth part of the work which a single power press, fed by a boy or girl, now performs; and in 1837 the Harpers had but twenty-four hand-presses, employing thirty-persons, each press doing one seventh of the work performed by each of their thirty-three Adams presses, managed by seventy persons. At the time of the destruction of their establishment, the second and third stories of three buildings on Pearl street were used as press-rooms."

Uncle Tobey's New Work on Tobacco.—We have never read or seen this work, but from the newspapers we learn that it has reached a 5th edition, in the U. States. The following is an extract from a preface to the work. Most truly glad are we to learn that somebody has taken up his pen to warn the world, in regard to the insidious evils of tobacco.

PARENTS, PATRIOTS, CHRISTIANS AWAKE!

Tobacco is the twin demon of alcohol. Very many of our young men and fine boys are being ruined by its power. The evil is coming upon the nation like a flood. Twenty thousand of our fellow citizens, say physicians, are killed by it annually. The nation, it is believed, pay about $30,000,000 and the church about $5,000,000 in its yearly consumption. Its *affinities* are many and alarming. Its tendencies are all bad. It leads to idleness, poverty, strong drink, vice, disease, delirium and death. It is an *insidious* enemy, usually assailing the well being of individuals and the body politic, in a slow and stealthy form. I have been a victim to the seductive power of this vile poison, and personal experience of sorrows inflicted, bids me do what I can to draw attention to its mischievous doings. Thus moved, I publish this little book. It is intended for juvenile libraries, and schools of every grade. I claim for it but one excellence, only one, which is that it is adapted to youth, for whom it was designed. It aims to forestall iniquity, to nip the evil in the bud, and I am happy to believe, that with thousands of youth it has achieved this end, having proved the "ounce of prevention," in an eminent sense. In view of its adaptation to emergencies far and near, I cannot but wish it had universal circulation.—George the Third, though our fathers branded him a a tyrant, had some clever streaks in his character. In the exuberance of his good wishes one one occasion, the monarch said, "I wish every poor man in my kingdom had a chicken in his pot." I am not a king, nor the son of a king; I am nothing more than simple-hearted Uncle Toby, but I wish that every poor boy in the land, had my book in his hand, and also a chicken in his father's pot.

Reader, take this little manual, give it to a son, nephew, or some young friend, and he may be rescued from the first step on the road to fashionable vices and ruin. Said the late Amos Lawrence, of Boston, pre-eminent as a merchant and philanthropist, "I owe my present position in society under God, to the fact that I never used Rum or Tobacco." And in the fulness of his heart, a few days before his death he said, "I shall give this book to every boy in the State of any size, that each may become an Anti-Tobacco agent."

Poetry.

For the Friend.

The Cross of Christ.

The Saviour's cross! of cruelty,
This was the type in Rome;
But standeth now on Calvary,
To guide the ransomed home:
Oppressed with grief, the Prince who bore,
Its weight up Calvary;
A crown of thorns submissive wore,
And gave his life for me.

The Saviour's Cross! on this our Priest,
His precious blood hath shed,
That men from sins might be released,
And rescued from the dead:
Pierced with nails, as on it hung,
The bleeding Lamb of God;
My sins,—his groans of anguish wrung,—
Were the afflicting rod.

Victorious Cross! when on thine arms,
The blood of Christ was stained;
Satan claimed victory to his arms,
But Christ the triumph gained:
Henceforth the Cross will Standard be,
For Saints, where'er they dwell;
Where they unfold it sin will flee,
Or louder curses swell.

Thrice blessed Cross! on thee our King,—
The Prince of Glory—died;
That all his children he might bring,
Safely though Jordan's tide:
Thou givest a life of peace below,
To all who to thee fly;
Immortal life, thou wilt bestow,
Heirship with Christ on high.

Mysterious Cross! I fail to know,
What part the God-head bore;
In sufferings, whence such blessings flow,
To those who Christ adore:
Enough for me,—I know and feel,
Thou art earth's dearest prize;
Alone, thou canst all sorrows heal,
Dry up all weeping eyes.

Oh precious Cross! within my heart,
Impress thy healing power;
Thy pard'ning love and faith impart,
In every future hour:
Be thou my guide, be thou my trust,
Until life's storms are o'er;
And when my flesh returns to dust,
My soul to heaven restore.

E. S. C.

Things are not as they once were.

A few years since, it was very fashionable for English tourists in America, having hurried over the country, to return home and publish their reflections, interspersing censure and comments which were far from giving a favorable impression of either the country or its inhabitants. There is a tendency now to the other extreme. The following remarks are from the pen of Wm. Chambers, Senior Editor of the "Edinburgh Journal." Mr. Chambers enjoys a world-wide reputation for moderation, candor and common-sense:—

On the eve of departure for Europe, he addressed a letter to the N. Y. Tribune, from which we make the following extract.

I leave the United States with much regret. I carry with me the conviction that a good and splendid future is before them. Contrary to the opinion of most travelers from England, I have seen here a young but rapidly growing nation, offering an example to the oldest communities in Europe. It is far from my wish to flatter; but what do I not feel vast delight in seeing? I am overcome with the stupendous proportions and capacity of the country—its far stretching fields for human subsistence and happiness, of the American people, so little understood, and so often misrepresented. I candidly own that their remarkable love of order, their energy and perseverance, their love of independence, the self-respect of even the humblest classes among them, their striking sobriety, their admirable educational system, their excellent libraries, and universal fondness for reading, their press free from fiscal exactions, their flourishing religious institutions untramelled by civil polity, their economically and spiritedly got up railways, now pushed half-way to the Pacific, the neatness of their dwellings, their wonderful—and to an Englishman—alarming, progress in the mechanical arts, the marvellous growth of their cities, and I will add their *civility to strangers*—I say all this gives me unqualified pleasure; and when I contrast their cities free of pauperism and vice in its most loathsome forms, with what meets the eye in London, Edinburgh, Glasgow, and other large cities in Britain, I feel that travelers from the old country have little reason to speak disdainfully of America, or to exaggerate faults, which at the most are only partial and of no sort of account.

Such being my impressions, it will be my duty to represent in my own poor way at home, things, as they deserve to be spoken of. Nor shall I fail to speak of the advantages to be derived by an emigration of the laboring classes generally to this country—fleeing, as they will do, from a perishing and unimprovable condition to a state of comfort and boundless prospects of well-doing.

We have italicized the remark, "civility to strangers," because, 1, the Americans have been hitherto censured upon that point, and 2d, because it is an indication of the highest civilization.

China and Japan.

The following extract contains more of a matter-of-fact and common sense statement than we have seen for a long time respecting either China or Japan. There is no question but too high and exaggerated accounts of the prospective trade of Japan have gone abroad, even if Commodore Perry should succeed in opening commercial relations with that nation. To whom to credit these observations, we know not, and can merely state that he is an American in China:

"As to the trade and resources of Japan, its population and general civilization, the most exaggerated opinion appears to have been believed. One parade of figures make the population fifty millions, and the trade of this fifty million average $4 a piece; and all this trade of two hundred million dollars is going straight into the pockets of merchants, as soon as the country is opened to their ships. It is a mistake to reckon on such data. I judge from the extent of the arable land and habits of the Japanese; their love of hunting and sports which augur large areas of forest and mountain lands—their ranges of mountain and other data that twenty million of people is a high figure for a group of islands not much larger than Great Britain, and not so well governed or secure, or fertile or civilized.

The trade of these islands will be of slow growth, for they need nothing of us, and copper and camphor, and perhaps laquered ware, and silk are the only articles they have got for us, and ten ships a year will supply the world with these. Even here, in China, after a trade of two centuries, the people are so indifferent to *every sort of goods* brought here (except opium) that there are now between fifteen and twenty million dollars worth of English and American corgoes unsold, which they will not buy in these troublous times, while our merchants are all alive at the apprehension of a short supply of tea and silk, and prices are constantly rising for these two articles, although money is only to be had at 5s. 10d. and 6s. per dollar, and even 8s. at Shanghai. The Chinese care really very little for cottons and metals, as they can supply themselves, while Englishmen cannot do without tea and raw silk, nor their government get on if the tea revenue be cut off.

The Japanese and we will perhaps be tickled to exchange a few curiosities, but a healthy growing trade results from mutual wants, and a knowledge of what other nations can supply, and this interchange comes slowly. I hope Japan will be ready to meet the Americans peaceably, and consent to remove her ridiculous seclusion as soon as she sees it can safely be done; for, by so doing, she will avoid, perhaps, a worse evil. But the benefits from a change in her policy will come slowly, and perhaps serious evils will come first, among which will be the opium trade, which English and American merchants here will push as far as they can, sacrificing even present gain to future hopes, in order to urge on this cursed traffic. Times and seasons are rapidly changing the appearance of these Eastern nations, and all for the hope of seeing them receive the Gospel. Does one wish to be among these changes, and assist in every way he can?

The Importance of a Savings Bank.

We do wish that it were in our power to arouse the attention of some few, at least, in Honolulu, to the importance of taking immediate steps for the organization of a Savings Bank. We have not a doubt of its final success, could it be once fairly established. It would serve as a most important agent in elevating and benefitting persons with a smal income and little capital. Will not the matter be taken up and the subject brought before the coming legislature? Who will start?

In regard to the practical working of such an institution we would call the reader's attention to the following paragraphs from a late No. of the N. Y. Tribune:

The Sixpenny Savings Bank.—This institution is gaining favor with the people beyond

the most sanguine expectations of its projectors and most ardent friends. It is one of the best "Children's Aid Societies" ever established. It is an aid to all reform movements. It teaches frugality, the advantages of saving, and it draws many a sixpence away from the bar room and other sinks of waste. It makes children proud of being "depositors in bank." There is something attractive in the very name; and the class for whom it was established, as fast as they find it out, flock there every deposit night in small droves.

Last Saturday night there were fifty-five new depositors; and these, with a few of the old ones, at this dullest part of the season, deposited *sixteen hundred dollars*; making up the total amount deposited since the bank was opened in July, $53,963 79, by 2,243 depositors. This is a gain of 625 new depositors and $22,579 22 since our notice of the institution in November.

The evenings of deposit are Mondays, Thursdays and Saturdays, but if the business continues to increase as it has lately, it will become necessary to keep open all the time, day as well as evening, as many of the depositors are women and children and small boys, and we noticed while present Saturday evening that many of them came from far up town.

One lady and three little girls came to deposit $129 for the use of the children.

"My husband," said she, "started for California to-day, and left this sum with me for spending money. I want to put it where my children can have the advantage of it if I should be taken away from them before he returns."

Two bright manly boys came from a distant street to make an addition to the little sum already in bank. As they retired, we heard one of them say, "Now, Sis," and a sweet, modest little girl of nine or ten came forward and said, "Please sir, will you take this and give me a bank book?" and she held out her hand with 28 cents. "Certainly my dear, if it was not a quarter as much. What is your name? Ah, you are sister to those boys." "Yes Sir, she is our sister, and she heard us talk about the Savings Bank, and she said, why can't I save my money too, and so she came down with us."

These cases of the force of example are exhibited every day.

We noticed only three drafts made while we were present, one lad drew fifty dollars. It was the savings of several months.

"Will you please to give it to me in gold, Sir."

"Certainly, but why do you draw it out."

"I am out of work now, and I am going home to my mother, and I thought I would take it to her all in gold; it is not often she sees that much in the country. And besides, I want to show the boys, and tell them how and where I kept it, for they take the papers up there, and have read about the "Sixpenny Savings Bank.

R. H. AGRICULTURAL SOCIETY.

Members of the Society, who have not paid their subscriptions, will please call and settle with the undersigned, at the store on Fort street, next to the premises of C. Brewer, Esq.,

Copies of the "Transactions" No. 4, on hand and for sale, price 50 cents each; members being entitled to them without charge. GEO. WILLIAMS,

Honolulu, Dec. 23d, 1853.-4m-33 Treasurer.

TO SEAMEN AND STRANGERS.—The Seamen's Chapel is open for Public Worship every Sabbath, at 11 A. M., and 7 1-2 P. M. Seats free.

Seamen belonging to vessels (of all nations) visiting this port are invited to call at the Chaplain's study, in Chaplain street, where they will be gratuitously supplied with copies of the Friend and other reading matter. It will be most convenient for the Chaplain to receive calls from Seamen during the afternoon of each day.

A weekly religious conference and prayer meeting is held on Wednesday evening at the Vestry, and also at the same place, every Sabbath afternoon, at 3 1-2 o'clock. Seamen are particularly invited to attend.

Public services at the New Court *House* at 11 A. M. and and 7½ P. M., and also, Native Churches on Sabbaths, commence at 9 1-2 A. M. and 2 1-2 P. M.

The Seamen's Reading Room is open at all hours of the day. Strangers arriving and having late foreign papers are respectfully invited to aid in keeping said room supplied with useful reading matter.

Donations are respectfully solicited for the support of the Chaplaincy and the publication of the Friend. An anuual report of all donations is made to the Am. Seamen's Friend Society in New York. Any person contributing $50 is entitled to become a Life Director of the Society, and $20 to become an Honorary Life Member. tf.

To Masters of Whae-Ships visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Sept. 1, 1853—6m-19

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4, 5, 6, 7 and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

Information Wanted.

Respecting Samuel Hopkins, son of Samuel P. Hopkins, of Dyerville R. I., who left Fair Haven on board whaleship Joseph Maxwell, Capt. Howland in June 1848.

Should this notice meet his eye, he is requested to communicate immediately with his friends or the Seaman's Chaplain, Honolulu.—tf.

Information Wanted.

Respecting Frederick Hubbard, who sailed from New Bedford on board the ship "Harrison," when commanded by Capt. Hathaway. He was discharged at Honolulu and worked for a time in the Polynesian printing office, but subsequently went to California. Should this notice come under his observation he is requested to communicate with Cyrus W. Chapman of New Bedford, his friends at Pittsfield Mass. or the Seaman's Chaplain, Honolulu.

A CARD.

The Subscriber takes this method of returning his sincere thanks to Admiral Feborier Des' Pointes, commanding His Imperial Majesty's Naval Forces in the Pacific and to Capts. Sowle, Mc'Cleave, Jagger, Little, Hampton, Hathaway, Edwards, Hall, and Wing, and to the officers and crews, of their respective ships, for the very timely assistance rendered to his ship the Benj. Tucker, of New Bedford, which, having become suddenly becalmed in going out of this harbor, would have been drawn upon the reef by the currents and totally wrecked had they not favored him with the aid of their boats, and personal exertions. As it is she has suffered the loss of her false keel, and having struck several times upon the Reef she has suffered more or less injury.

JOHN R. SANDS.

Tahiti, February, 1854.

CHARTS.

JUST received by the undersigned, via Panama, a lot of superior Charts, of the North and South Pacific Oceans, extending from the Equator to 65° N. and 65° S. latitudes, embracing all the latest surveys and observations for the year 1853, drawn and engraved by Chas. Copley, New York.

Nov. 22d, 1853.—29 D. N. FLITNER.

"OFF AND ON."

SHIP-MASTERS AND SEAMEN belonging to vessels lying "off and on,,' can be supplied gratuitously with copies of the FRIEND, by calling at the Chaplain's Study, from 12 M. to 3 o'clock P. M.

Bound volumes on hand and for sale.

S. C. DAMON, Seamen's Chaplain,

Honolulu, March 1, 1854.

J. WORTH

"Ka Nu Hou,"—(The News)—This is the name of a newspaper recently started in Honolulu, and published in the Hawaiian language. Mr. J. W. Marsh is the Editor. Such an enterprise should have been started long ago. There are probably 40,000 readers among the Hawaiians, and hitherto they had no other sheet besides the small paper published at the mission press. It has long been our opinion, that one half of the "Polynesian" should have been published in the Hawaiian language. The "Nu Hou," will doubtless answer the purpose. It is political, and news telling, being edited with much spirit. Some think it provokingly controversial—if so, its columns appear to be open to rejoinders. Some say it goes for "annexation," others deny it; most heartily we say, success to the "Nu Hou." Our idea is, let all have their say, provided what is said shall be expressed in the spirit of truth, candor, liberality, and good nature.

☞ Thanks to our correspondents for their valuable commuuications, from various parts of the world, and to be found on the inside of our sheet.

☞ The price of oil at New Bedford, Jan. 17th, was, for sperm $1.31, and whale 63½ cents. Bone 42 cents.

The Ladies of the Strangers Friend Society are again placed under obligations to their friends by the following donations:

Mr. Bailey, (of Wailuku,) $20 00.
A Lady—a friend to the suffering, 10 00.

A. P. HILLIBRAND,
Treas.

Education.

Astonishment and grief at the folly, especially in times like the present, of those parents who totally forget, in the formation of their children's habits, to inspire that vigorous independence which acknowledges the smallest possible number of wants, and so avoids or triumphs over the negation of a thousand indulgences, by always having been taught and accustomed to do without them. "How many things," said Socrates. "I do not want." JOHN FOSTER.

Free Will Offerings,

For the Seamen's Chapel, (seats free) supported by gratuitous contributions; and the Friend, one thousand copies of which are distributed gratuitously among seamen in the Pacific Ocean.

Names.	Chapel.	Friend.

Per Saratoga, at Hilo.—Capt. Comstock and lady.

By the Restless, from San Francisco.—Messrs. M. Landois, B. F. Standefer, H. C. Payne, Ed. Carter.

By the "J. Wesley," for San Francisco.—Mrs. H. M. Whitney, 2 children and servant, Mrs. Hernandez and child, W. St. Clair, N. Tanner, Achew, G. McLean, H. Dimond, Capt. G. W. Ryan, Mr. H. Dickinson, Mr. C. A. Taner, Mr. Fergueson. *Steerage*—Turner, Shaw, Scott, Lascar and wife, Barnard, Johnson, Peterson, Chinamen, Dewberry, Christholm.

DIED.

On the 5th of Sept. 1853, Mr. John Fiddes formerly of Great St. Helens, Bishopsgate Street, London

At Lahaina, Feb. 1, of Consumption, Edward Henry, aged 26 years, of Yolo County, California, formerly of McLean Co. Indiana, U. S. A.

Killed by a whale, Jan. 1st, 1854, Capt. Dexter, of bark Oscar, of Mattapoisett.

In this city on the 6th inst., of consumption, Mr. Edmond P. Hutchinson, of Pepperel, Mass., aged 28 years, and 7 months.

Mr. H. arrived here in the Waverly, from Boston, but two weeks ago, as it appears in the last stage of the disease of which he died. After crossing the line in the Pacific, he continued to decline until his death. He leaves a young wife here, and a large circle of friends at home to mourn his early eath.

In this city, of consumption, on the 23d inst., Miss Sarah A. D. Stevens, aged 23 years and 10 months, of Brownville, Jefferson Co., N. Y. Miss Stevens came to this city a passenger in the N. B. Palmer, three weeks since, and had resided for the past four years in Union City, Almeda Co., California.

Drowned at Hilo, March 1854, John Key, belonging to the bark Isabella. He leaves a wife and child in Dover, N. H.

At the U. S. Hospital, March 1854. Mr. Martin Oakley, 3d officer of the whale ship Mary and Martha. He belonged to Hobart Town, Van Dieman's Land, having left that port in the "Flying Fox," and is reported to have been wrecked among the Kingsmill group.

In this city, of consumption, on the 20th inst., Orson F. Jepson, aged 26 years. He was formerly of Missouri, but latterly from California, from whence he arrived about 5 months ago, in search of lost health.

Drowned Feb. 19th, by falling overboard, Ricurd Zeeh, aged 17 years, a seaman belonging to the whale ship Joseph Hayden. This melancholy disaster occurred eight days before the vessel arrived in port He belonged to Saatfeld.

At Globe Hotel, Honolulu, Feb. 13th, Edward McGovern, aged 40 years, late from California, and formerly from New Orleans, but a native of Dublin, Ireland.

At the U. S. Hospital, of consumption, March 1854, Charles Grant, aged 18 years, a seaman from the whaling bark Valparaiso, and belonging to Martha's Vineyard.

On board whale ship Brunswick, off Falkland Islands, Oct. 1853, of consumption, Jeremiah Reynolds, belonging to Dartmouth, Mass.

THE FRIEND.

HONOLULU, MAY 6, 1854.

NEWS FROM JAPAN!

☞ We copy from the "Polynesian Extra" of May 1st, a summary of the news respecting the negotiations with Japan. The time has not arrived for a full account of the expedition, for although a treaty has been signed by the Commissioners of Japan and the United States, still the document must receive the sanction of the government at Washington before it can be made public. While the negotiations were in progress, many interesting incidents occurred.

The Japanese finally met Commodore Perry, not as an enemy, but friend. There was no display of soldiers or military parade. It will be recollected that at the interview in July last, the Japanese Commissioners were attended by several thousand of their soldiers.

The Japanese made particular inquiries respecting Capt. Cooper, who commanded the American whaleship "Manhattan," when she visited the Bay of Yedo, in the spring of 1845. An account of his visit was originally published in "The Friend," of Feb. 2d, 1846, having been prepared with much care by Dr. Winslow.

An officer of the "Saratoga" remarked thus, that the influence of American whale ships had probably been very great in inducing the Japanese to open their ports. It appears that the Japanese have been close observers of whale ships, cruising about their islands. The Japanese informed the Americans, that they had counted 180 American whale ships, in one year, passing thro' the Matsmai, or Sangar Straits.

While the fleet lay in the Bay of Yedo, a Marine died, belonging to the steamer "Mississippi." Although, at first much against the wishes and prejudices of the Japanese, Commodore Perry obtained permission to bury the man on shore, under military honors, and attended by the chaplain, observing all the rites of a christian burial. On the monument erected at the grave, it was stated that the deceased was born in Ireland! This circumstance rather confused the minds of the Japanese. They did not understand how an American could be born in Ireland! This incident led to an explanation of our naturalization laws, which rendered it possible for an American, to be born in Japan!

The officers of the "Saratoga" report that they saw no cattle, no sheep, no goats, no swine, but very good horses. They saw growing, crops of wheat, rice, oats, barley, millet, and tobacco. The land was well cultivated. The Japanese have a very good plough, and fanning machine.

We understand that trade is not to be opened until March 1855. To facilitate trade, hereafter, the Japanese received specimens of American coins, and furnished specimens of Japanese coin, for the purpose of having their relative value ascertained.

On the part of the Japanese Commissioners, it was, at first much insisted upon, that the U. S. Government should allow a treaty stipulating that no American lady should ever visit Japan! So preposterous a demand was not countenanced, for a moment, by the gallant Commodore. Who can imagine the ferment which would have been excited in the U. States, had an article of this nature, been inserted in the treaty? The news—"No white ladies allowed to visit Japan," would have been the occasion of fitting another expedition to Japan! Ladies themselves, would have commanded the expedition, and the Japanese would have been taught what they now seem partially convinced of, that Ameriea is a great country!

It has been referred to, as a matter of surprise, that the Japanese should have understood the policy of the U. States, in regard to Mexico, and the Mexican War. This circumstance surprised the Japanese, that after the Americans had conquered the country, they then surrender it, even purchasing a portion from the conquered people and paying for the same, a large sum of money.—This was not the usual method pursued by conquerors! We hope the Japanese may never have occasion to entertain a different idea of American policy and American magnanimity. Would that no Americans, or foreigners of other nations, should ever visit Japan, for other purposes than lawful and honorable commerce, or some object of genuine philanthropy; then might we reasonably hope, that the Japanese would become an enlightened people. If the Japanese could be persuaded to pass the "Maine Law," and an "Anti-Opium Law," what incalculable evils it would prevent. We hope the frown and indignation of the civilized world will be visited upon the first Yankee, who carries thither intoxicating liquors. Let the mark of Cain be stamped upon him; let him be treated as an outlaw among the nations; let him be classed among pirates, for he would deserve no other punishment than that of a murderer of the Japanese! Other interesting items respecting the Japanese have come to our knowledge, but our want of room prevents us from additional remarks in this number of our paper.

Ackowledgements.—The editor has received files of late papers from Adams & Co's Express Office, in San Francisco, from James Ludlow, Esq., San Francisco, and from those newspaper offices exchanging with the Friend. He is happy to add to the list of exchanges, the "N. Y. Courier and Enquirer." He would also acknowledge from Senator Seward, a speech of Senator Chase, on the Nebraska bill. A valuable bundle of papers and pamphlets, for distribution among seamen, from the Rev. E. Bond, Kohala.—Such donations are always acceptable.

A Good Suggestion.—If there is a class of men on these Islands who need the sympathy of the christian community, it is the seafaring class of native sailors, who it is feared go to sea, 9 out of 10, without a Bible, or any religious publication whatever. Surely they have souls to save.

For the Friend.

Lay Sermon, No. 2.

There have been theories of transmigration of souls, and poets have figured magic metamorphoses of bodies. There is a metamorphosis of souls going on, on every hand, about us, which, could we but look through the external appearance and see it as it is, would startle us with its fearfulness more than could any representation of it by the pen of a Dante, or the pencil of a Michael Angelo,—souls *metamorphosing themselves*, and in all stages and phases of the process!

Look at the extreme result in the case of one particular indulgence—that in alcoholic drinks. Look at the body, bloated with disease, at the expressionless features and lacklustre eye of the habitually and grossly intemperate, and consider what has taken place there.

That body had, or might have had, a soul in it. Perhaps it might have been the *intelligent soul*, as Lord Bacon calls it, "that mould in which to cast a pattern of the universe," with an almost godlike power of discerning the end from the beginning; of deciphering from the rocks the history of ages, stored up there for the after times of Man contemplative of the footsteps of his Maker; of comprehending the movements of the spheres, putting an end to darkness and searching out all perfection; or even of following along that path of its own conscious and immortal being, which "no fowl knoweth, and the vulture's eye hath not seen."—Perhaps it was the *imaginative soul*, capable of bodying forth the forms of things, and giving them substance and a name for its own qualifications and that of others; enjoying with a high and human enjoyment, the products of others' creative genius, and transmitting its own ideals of beauty to far lands and times, to be "a joy forever."

Perchance it was the *inventive and adaptive soul*, capable of putting forth its hand upon the rock, and overturning the mountain by the roots, cutting out rivers among the rocks, and binding the floods from overflowing, compelling the lightning to do its bidding, and blessing the world with the manifold products of ingenuity and skill.

It might, at all events have been the *affectionate soul*, filling the family and the social circle with the kindly affections that sweeten life and make it a blessing instead of a curse.

Certainly it might have been the *virtuous soul*, filling up its round of duty with regular industry and conscious integrity, in content and peace. It might have been all or some of these, but can you find any of them *there*? Is there not in their stead a single insatiate appetite, a constant or periodical animal desire, with intervals of conscious self-degradation, remorseful or malignant feeling, or brutal passion?

That soul has been its own Circe,—has itself waved the enchanted wand and uttered the magic spell; and lo! the *man* is gone, and a brute, or an incipient fiend, alone is left.—The soul is lost; with all its potence of life and power and love,—*gone*, metamorphosed into an appetite. The warrior in the Iliad of life, the sailor on life's sea, has vanished; and there remains only a beast wallowing in the mire.

Most mysterious is the change, and the process which leads to it. Mysterious as Nature,—nay, as mysterious as evil,—dark and fearful as an object of thought; how terribly startling as a *fact*, as a process, perchance, to some extent going on in our own souls; for to such a result, in a greater or less degree, *all intemperate indulgence*, of whatsoever kind, tends; such *loss of soul* it brings about.

If such be the effect of resigning our authority over the body and its appetites, should we not guard well our prerogative of freedom and self-control? Should we not beware of all and every form of indulgence at variance with the soul's life; and especially of those which not only hold their sway by the power of habit, but insure their murderous effect by organic and increasing cravings?

Is it not the height of madness to dally with temptation, to say with regard to each indulgence, "a little more sleep, a little more slumber," while the soul's "poverty cometh as one that travelleth," and its want, indeed, "as an armed man?" Is it not madness and folly combined to give way to that morbid curiosity for experiencing some unknown and fancied pleasure, which so often lead us where conscience and judgment refuse their sanction? That knowledge of evil which comes by doing evil, is an evil knowledge.—That knowledge of the power of habits of self-indulgence which comes by yielding to them, is a knowledge far better unknown than known. There is no health in it, to soul or body. It is a worse than negative quantity, for it not only diminishes, but *vitiates* the sum of every character into which it enters.—Could any one of us this day hold up his hand before his Maker, and say "I have never weakened one iota the strength of my will, or diminished one tittle the vigor of my intellect—I have never sullied the purity of my desires and my purposes—I have never unstrung the sinews of my aspirations, by any base subjection of myself to the blind impulses and passions of the body, beyond the bounds of reason and self-imposed law. My soul is this day as vital, and as symmetrical as the life my Maker gave it would allow;" think you that one would not be of larger heart and freer head than he could have been by any wayward or wilful trial of this or that sensual joy,—by telling himself go, absorbed in this or that appetite where neither health of body or mind required it: even though he had ranged through all possible experiences of sensual delight. Such experience belittles. Such knowledge brings with it the ancient curse, of a will just in that proportion enslaved, of a soul just in that proportion *lost in the flesh*.

Indeed, in relation to the matter of temperance and intemperance of body, there are but two courses possible; either the soul must subordinate, and take up and use for its own life, the life of the body with all its appetites, and wants, and passions; the will using it, by controlling it, and thereby gaining strength; the mind using it by knowing and appointing its metes and bounds, and thereby gaining knowledge. Or else, the body, just in the proportion that the other is not done, will absorb the soul into the flesh; bringing the soul's energy of life into its now lawless and insatiable desires,—finally to leave it a soul transformed into flesh—a soul striving to fill itself with the body—struggling to realize its immortal life in the low sphere of fleshy delight, of brutal appetites. "Cursed is it above any of the beasts of the field: upon its belly shall it go, and dust shall it eat, all the days of its endless life."

Island of New Caledonia.

Discovery—Description—Inhabitants—Census Missions—New French Settlement—Commercial and Political Importance.

The following description of New Caledonia is from the latest authority, its author being a captain in the English navy, John Elphinston Erskine, in command of Her Majesty's ship Havannah. The island, as our readers have been informed, has lately been taken possession of by the French, for the purpose of establishing a colony there:

"The important island of New Caledonia, writes Mr. Erskine, which from its position and the excellence of its harbors, may be considered as comanding the communication of Australia with India, China, Panama and California, was discovered by Captain Cook on the 2nd of September, 1774, when after exploring the New Hebrides, verifying the discoveries of Quiros, and completing the survey of that archipelago, he was returning to refit and refresh the crew at New Zealand.

"New Caledonia is about two hundred miles long and twenty-five broad; a central rocky ridge of considerable elevation extending along its whole length, and a barrier coral reef surrounding, with the exception of a very few miles, the entire coast, both on its northern and southern sides. This reef, which is distant from the shore from two to twelve miles, with many openings allowing the largest ships to enter, forms a continuous channel around the island, in almost every part of which anchorage may be found in from twenty to twenty-five fathoms. A continuation of the reef almost connects the south-east end of New Caledonia with the Isle of Pines, and stretches out fully one hundred and fifty miles from the north-west point, occasionally dotted with islands, some of which are inhabited.

"The New Caledonians, who have no name for their whole island, are a fine intelligent race of men, resembling in physical characteristics the Feejeans, although in religion and language they differ entirely. Capt. Cook, who passed eleven days in the port of Balad, on the north-east coast, give them unqualified praise for honesty and good nature, in which quality, he says, they exceed all the nations he yet met with. La Billardiere, the historian of d'Entrecasteau's expedition thinks that Cook much overated the goodness of their disposition, and the French certainly obtained convincing proofs of their addiction to cannibalism.

"The population has been so differently estimated from 15,000 to 60,000, that we can only make a guess at its amount, and may perhaps set it down at 25,000. The London Mission Society occupied a station for a few years at Tualo, a village near the south-east end of the island, but have abandoned it for the time, as have also the French Roman Catholics, who occupied two neighboring districts, about 1845. They have now retired to the Isle of Pines, whence they are said to contemplate a return to their former quarters. We could not ascertain that they had made much impression on the minds of the natives; nor it did appear that they had

left behind them any traces of their language, although the people have a singular aptitude for the acquirement and pronounciation of English words.

"The island, though picturesque, is not productive; but the inhabitants in some places practice irrigation very skillfully and appear to be a people capable of much improvement."

The Sydney papers state that the French have taken possession of the group of islands called the New Caledonia. The French war steamer Phoque arrived there from Tahiti, on the 23d of September, and on the 54th the Admiral landed at Berade, and hoisting the French flag, formally took possession of the "Island of New Caledonia and its dependencies," in the name of His Imperial Majesty Napolean III., Emperor of the French. The American barque John H. Millard was immediately despatched to Sydney for stores and supplies on a large scale, and it was stated that three French frigates would follow the Phoque, with troops to insure the possession of the island. The Sydney Herald says:

"We have reasons to believe that the immediate object of the French Government is to establish a penal settlement on the island; but coupled with the systematic extension of French influence over the Society Islands, the Pomotou Group and the Marquesas, this occurrence assumes a great importance in a political point of view, and is indicative of well considered designs on the part of the French Emperor.

In a commercial point of view, the colonization of New Caledonia, even by the French. may appear at first sight advantageous to the interest of this city: but such a consideration is entirely secondary in importance and sinks into insignificance by the side of the moral, social and political consequences attached to the occupation of one of the most splendid islands in the Pacific by a rival nation, whose aims and objects are so dissimilar, not to say opposite, to those which have for many years been earnestly contemplated by the most intelligent colonists of Australia and of New Zealand."

Intelligence from Ascension.

MATALANIM, BONABE, }
Aug. 22d, 1853. }

REV. S. C. DAMON:

Dear Sir, I am happy in reporting to you as having anchored in the Bonatik Harbor of Bonabe, on the 20th of July, the Clara, Capt. J. L. Smith, of New Bedford, with 650 bbls sperm oil, 14 months out, and just off the New Holland grounds, where he reports many whales and where he has done well. He sailed July 30th for the Kingsmills.

August 19th the Hamilton, Capt. Keller, displayed the Chinese Imperial flag in our harbor. We are much indebted to her captain for the mail from the Sandwich Islands, which has gladdened our hearts.

I must now communicate the painful intelligence that Mr. Corgat, our friend, the pilot of the Rono Kittie Harbor, is dead. He died on the 14th of this month, Sabbath, about 7 o'clock in the evening, The disease was an inflamation of the bowels, with which he was attacked very acutely about Friday noon. He was treated by Mr. Sturges with great efficiency and discretion. Mr. S. himself, came the whole distance to Matalanim to consult me on Saturday. For the last three or four months he has been troubled with a low sub-acute inflammation which on a sudden has burst into a flame and destroyed him.

He had just erected a house near to Mr. Sturges' residence where he might be near his children who are with Mr. S. His purpose was now to endeavor to live a civilized life and to lay up money for the complete education of his children, in whom his whole soul seemed centered. His friends and relations abroad will be pleased to know that kind friends were with him to the last and smoothed his dying pillow, and wept bitter tears over his grave.

We scarce know what we have lost in him, but we shall begin immediately to learn. It is painful for us to think on the subject.—Without him, it is impossible to say what might have been the past history of our residence here. With him, we have lived in the most perfect security during the most critical period of our mission. Our weeping hearts ask why he might not yet longer have been spared to us and to the cause of missions in Micronesia.

We have some reason for hoping that his trust in Christ was a Scriptural one, though his mind was still far from being fully enlightened. His uniform reverence of all holy things, and devoutness of aspect in attendance on religious services was a cordial to our souls. Till three or four years since he was among the most dissipated of the whites, but the effects of a serious illness roused him to religious thoughtfulness and to reform. We hope this external reformation may have progressed to an internal.

It may be difficult for some, unacquainted with him, to understand how it should be that one we had so recently met, and so distant from the ordinary range of missionary intimacies, should be mourned by us as a loved friend. But such need only be told of his unusal energy of character, his strict honesty, his noble generosity his ready ear for every sufferer, and his gentlemanly manner, with his more than external devoutness. He had his frailties and faults which were sufficiently palpable, but which could not eclipse his unusual excellencies. How rare a character for one of these distant, heathen islands of the Pacific!

Before he died he left all his property to Mr. Sturges to be taken care of for his two children and his wife, in such ways as Mr. S. might think best. But I am grieved to tell you and the public, how shamefully four of Mr. Corgat's professed friends have acted since his death. I only withhold their names from you in the hopes that they may regret their outrage and make the best amends they can. Instead of allowing Mr. Sturges to take the direction of the little property Mr. Corgat left, they have appropriated the most of it to themselves. They made the Nanakin drunk and so induced him to join in their robberies. They indeed desired Mr. Sturges to take charge of the few things *they said* belonged to Captain Varanus Smith; but Mr. S. did right I think in refusing to have the least part in the matter unless they would, according to Mr. Corgat's wish, resign all into his hands. The result is that one has taken his house, another his boat, and so on. These persons had no right of partnership in any of these things. We trust there is justice somewhere that will watch over the interests of these orphan children; and is there not also a kind benevolence that will remember them for their father's sake?

I will endeavor to procure from Mr. Sturges for your paper a sketch of Mr. Corgat's life which I think will be well worthy of publication.

I send accompanying, a Table of the Exports and Imports of Bonabe for the year ending April 1st, 1853. I collected the data from Mr. Corgat last spring and I am confident it gives quite a correct approximation to the truth. I ought to remark first that much of the produce shipped from the harbors of the Kittie and Matalanim tribes comes from the three northern tribes, Jekoits, Nut, and Wanga. 2nd. I suppose that the Matalanim averages to be the same same with those of Kittie.

I also send you the latest edition of the Map of Bonabe. I am confident it will now be found quite correct in all essential points.

Yours Ever,

L. H. GULICK.

CORKING THE JUG.—A correspondent to the Philadelphia Sun, written from Cohasset Mass., relates a good anecdote of a physician residing in that place, which he says is a fact and the best temperance lecture he ever heard. Some thirty years ago this doctor was addicted to hard drinking, and neglected his professional duties to such an extent, that the people were obliged to send to Boston for a new physician, a younger man, whom they colonized amongst them. Things went on very well for a time, the old doctor losing patients, and the new doctor finding them. At last this brace of pestles met in the town store, "the old doctor purchasing a jug of rum," and the "young doctor buying a barrel of flour." Some invidious remark of a bystander called forth a sneer from the younger and more flourishing of the two doctors. This was noticed and interpreted by the old one, who with a calm and deliberate air, put the cork into the jug of rum, and turning the sneering opponent he said, "I have put the cork into that jug, and I will never take it out again until I have starved you out of the town of Cohasset." He kept his word, and in about a year from that time he had regained all his old patients and friends and obliged the young doctor to evacuate, for fear of starving.

☞ Look out reader, and keep your jug corked.

Illustrious Trio of Nations out of Debt.

"It is rather remarkable, says the correspondent of the Boston Atlas, that the only governments of the world which have an excess of their receipts over their expenses are republics; the United States and Switzerland.

Mr. Atlas, please add the Hawaiian Government, for according to the just published report of the Minister of Finance, in the 31st Dec. '53, the amount of cash on hand was $70,591,41.

Lahaina Correspondence.

LAHAINA, April 28, 1854.

REV. S. C. DAMON:

DEAR SIR—An opportunity occurring to send this evening, I will make a few statements for the Friend. The whole number of ships that have visited this port since January, is 88, of which 2 are still in port. This is a much larger number than visited us a year ago. Besides these, two merchantmen, the N. B. Palmer and the Waverly have been here for freight. In speaking of the business prosperity of Lahaina this season, let me deprecate that excess of a spirit of rivalry, which would lead the people either of Lahaina or Honolulu to underrate the advantages or overrate the disadvantages of the other port. We may in fair and loving competition, all live as brethren, glad to do our whaling friends all the good for body or soul, that lies in our power.

A movement is made in the Legislature to grant two or three spirit licenses in this place. None, except one wholesale license, now exist. Still, a considerable quantity of liquor is retailed at the different shops. Many, who are undoubtedly friends of temperance, believe that this illegal traffic will be chiefly suppressed by licensing two or three shops, and through their influence, the bill may pass. My experience does not suffice to enable me to form a decided opinion; but the question arises, how shall licensed dealers in liquors, however much interested to secure the monopoly which the law will give them, be able to overcome those difficulties attending the detection of this illegal traffic, which have hitherto frustrated its suppression? We desire to have as little brandy sold here as possible, and to have that law enacted which will most nearly effect this. Every man will desire this who regards the business interests of Lahaina, every one who loves virtue, or his fellow-men.

Some of us enjoyed a very interesting occasion, the week before last. The examination of Mr. J. Kaukau, and his ordination as pastor of the church at Kaanapali, took place on the 12th inst. K. is the district north of Lahaina, commonly called Canterbury by foreigners. The council called for the occasion, Messrs. Baldwin, Andrews, Pogue, Green, and myself, arrived together at the place of meeting by eleven o'clock. This was about eight miles from Lahaina, at the pastor's house. No suitable house of worship being at the place, it was decided to hold the examination of the candidate in his own house, and the services of ordination in a neighboring cocoa-nut grove. The examination of Kaukau was held jointly with that of two candidates for licensure, Messrs. Joseph Mawae and D. Nahiuu. The former of these two persons is laboring in the field occupied by the lamented David Malo; the latter is an assistant instructor in the Lahainaluna High School. The examination lasted for three hours, and drew forth a good exhibition of theological attainments on the part of the candidates. It was observable, that while they appeared well equipped with the *facts* which the Gospel declares, they generally failed in solving the *metaphysical difficulties* connected with those facts; and yet many acute and discriminating replies were made to proposed objections. I believe that the answers of Mr. Kaukau would compare most favorably with those of most young candidates for the ministry in the United States His manifestation of simple, clear, ardent piety, most interested us. We look to see the Lord's work prosper in his hands.

After the examination, all proceeded to the grove, and in the solemn presence of some of God's most majestic works, ordaining hands were laid on His servant, and His weighty trust committed to him. Brother Andrews preached the sermon, Bro. Alexander made the ordaining prayer and gave the right hand of fellowship, and Bro. Green the charge.

With fraternal regard, yours,
S. E. BISHOP.

Taken at Last.

Our readers will doubtless recollect the narrative published in the year 1851, respecting the whale ship "Ann Alexander," Capt. Dublois, being stove by a sperm whale in the Pacific ocean. Recently Capt. D. visited Honolulu. He now commands the "Vigilant." We learned from him many striking and remarkable circumstances respecting the attack make by the whale upon his ship. He saw the whale approaching the vessel. He supposed the whale must have been coming at the rate of 15 miles, and his vessel going about 5 per hour. The whale's head came with full force, against the ship's bows, and stove in several feet square. He attempted to go, immediately, into the forecastle to ascertain what damage but was prevented by the rush of waters. Without repeating the story we would state, that about five months subsequently, the same whale was taken by the "Rebecca Sims" Capt. Jernegan. Two harpoons were discovered in the whale, marked "Ann Alexander." The whale's head was found seriously injured, and contained pieces of the ship's timbers. He had lost his wildness and ferocity, being very much diseased; but upon being taken yielded 70 or 80 barrels, if we recollect correctly.

French Brandy tabu to Tahitians.

To us, outsiders, it is amusingly interesting to watch the oscilliatory policy of the French authorities at Tahiti, respecting the sale of brandy among the natives. One vessel arrives and we hear the report, that brandy is sold freely and that the natives are all drunk. A few days pass and another report comes, that the French have restricted the sale altogether among the natives, except, in quantities so large, as to amount to a prohibition. The latter is the last report. We cannot imagine what the next will be. The truth seems to be about this. The French doubtless, wish to sell as much brandy as possible, for sake of trade, but alas, the poor natives drink so hard, that the French are compelled by sheer force of circumstances to change their policy and impose a "Maine Law." This evidently goes against the wishes and plans of the government, but still it cannot be helped. The French are not the only people that would gladly allow brandy and other intoxicating drinks to be sold freely, but still they see it won't do.—Public opinion will not allow the free sale. So then they are compelled to admit the "Maine Law" is after all, just about the thing. Hence pride of opinion and love of gain, keeps multitudes from taking their position among the advocates of the Maine Law.

IS IT SO?—What, that in 1853, the consumption of spirituous liquors exceeded that of 1852, by 4,066 gallons! So it would appear from the statistical tables of the Minister of Foreign Relations. See last Report, page 17. The increase appears to have been principally in the article of French Brandy. We have been pondering this fact over in our mind. With the figures we are not disposed to find fault. If the fact is so we would know it. Still the point is not quite clear that so great an amount of liquors was consumed over and above the amount stated for 1852. No allowance is here made for smuggling! Now we have good reason to believe the amount smuggled in 1852, far exceeded that of 1853. In 1852 there was a system of smuggling going on continually; and more than one party smarted for it! The lesson was so effectual that in 1853, the attempts at smuggling were comparatively few. So we think, and we think moreover that from this circumstance alone we can account for the excess in consumption of spirits, as shown by the Minister of Foreign Relations.

Population of Great Britain.

The census of Great Britain was taken on the 31st of March, 1851, when, it appears, the total population numbered 21,129,967. In 1801 it was 10,200,000; or a trifle more than doubled in half a century, besides furnishing some millions, as emigrants to her colonies, and to other parts of the world.

From the Polynesian.

The American Sloop-of-war SARATOGA, Capt. Walker, arrived at this port on the 29th ult., in 25 days from Japan, which is the shortest passage ever made.

The S. brings Capt. H. A. Adams, U. S. N., as bearer of despatches to the Government at Washington.

The point of interest in this intelligence is the fact that Com. Perry concluded a TREATY OF AMITY AND FRIENDSHIP with the EMPIRE OF JAPAN, at Kennegawa, near the city of Yedo, on the 28th of March, 1854. The long doubtful attempt has been entirely successful, and to the United States belongs the honor of making the first international treaty with Japan!

It will be recollected that in July of last year, Com. Perry with two steam frigates and two sloops of war, paid a visit to Japan, as bearer of a letter to the Emperor from the President of the United States, asking them to relax the restrictive policy which has so long closed that empire to foreign intercourse. Having overcome the reluctance of the Japanese to hold intercourse with them, and by a firm but altogether peaceful course of proceedings, induced them to receive some presents and the letter from the President of the United States, Commodore Perry took his departure, with the assurance to the Japanese officials that he should return in the spring for an answer.

Having visited Loo Choo and China in the Autumn and winter of 1853, the squadron, as spring approached, made their rendezvous at the Loo Choo group in February, and thence sailed for Japan. The fleet consisted of the Steam Frigates Susquehanna, Mississippi and Powhattan, the Sloops-of-warSaratoga, Macedonian and Vandalia, and the store-ships Supply, Lexington and Southampton.

On arriving at Yedo Bay, Commodore Perry was informed by the Japanese authorities that they were disposed to give the President's letter a most favorable consideration. They seemed remarkably conversant with the affairs of the United States,—understood the peculiarity of associated sovereignties under one federal head,—knew all about the Mexican war, its object, occasion and results,—and expressed much admiration for the nation altogether. With such feelings it required but little preliminary arrangement to fix upon Yocohama, (beach,) in the district of Kennegawa, as a suitable place for negotiation. This place is situated some 40 or 50 miles from the mouth of Yedo Bay, and a convenient locality for the purpose.

The various articles brought from the United States, and designed as presents to the Japanese authorities, were landed, and at an appointed time were exhibited. These consisted of a rail-road, steam engine, cars, magnetic telegraph, improved implements of husbandry, boxes of books, maps, charts, &c., &c., which were received by the Japanese, and elicited much interest and admiration.

After frequent meetings between Com. Perry on the part of the United States, and the High Commissioners deputed by the Emperor on the part of the Japanese, the terms were agreed upon, and the Treaty finally concluded on the 28th of March.

We have not, of course, seen the document now in *transit* for the United States, but we understand that it opens to American citizens and American trade, the port of SAMODI, (the *Odowari*, perhaps, of the maps,) on the island of Niphon, some 40 or 50 miles west of the entrance of Yedo Bay, and the port of CHICKADADA, on the island of Yesso, in the district of Matsmay, on the Straits of Sanga. The former was selected as the most convenient place for a depot, and arrangements were made with the Japanese for a supply of coal at that point. This is a place of considerable commercial importance,having a good harbor and a population of fifteen or twenty thousand. Its proximity to the manufacturing districts, which are not otherwise approachable by sea, renders it an important position, as a port for foreign trade. The vicinity of the latter place has been frequently visited by American whaleships, where they have had great difficulty in procuring supplies, on account of the restrictive policy of the Japanese.

We understand the treaty arranges for intercourse at both of these places,—for the residence of American citizens there, and also for the residence of Consuls, if, in future, either party should desire it. It also stipulates, that Americans residing in or visiting these ports, shall be free to visit the interior to the distance of ten or twelve miles without molestation.

It is said that the Japanese did not hesitate to enter into the most unqualified stipulations for the protection of seamen or others thrown on their shores; indeed, they affirmed that it was already a part of the law of the Empire, by special edict. They even insisted that the respective governments should pay the expenses of providing for the necessities of the citizens of the other, who might, by their misfortunes, need aid and comfort.

This disposition of the Japanese to treat with care and attention shipwrecked men, is quite contrary to the generally received opinion of the world in this respect, and in justice to the Japanese, it is but fair to state, that the restraints hitherto imposed upon American seamen, about which so much has been said and written, were rendered necessary by their over-bearing lawlessness, and vicious conduct.

So much for the treaty concluded between the United States and Japan. Its details can only be known after it is promulgated by the government at Washington. It is not a commercial treaty, but one of Amity and Friendship, concluded in amity and friendship, and not an imposition of the strong upon the weak, whether they were willing or not.

It is said that no supplies can be had for ships, except wood and water. There is no beef, stock or poultry, and ships, at present. can depend upon nothing in the way of recruits.

It is the first *international* treaty ever made by the empire of Japan, although repeated attempts have formerly been made to enter into relations with them of this character. The privileges enjoyed by the Dutch, were a mere grant to a private Company, having its principal foreign seat at Batavia.

The Russian fleet, consisting of a steamer, frigate, sloop-of-war and store-ship, has been at Nangasaki all winter importuning Japan for a treaty, but left in the month of February, unable to effect their object. It remained for the United States, by her skill in peaceful diplomacy, to overcome obstacles hitherto considered insurmountable, the attempt to accomplish which, has excited the sneers, the ridicule and the contempt of a portion of the public press, as well in the United States as in Europe.

A Treaty has been made with Japan! The wedge has been entered, which will not fail to open that empire to the ultimate free residence, egress and ingress of Americans, and probably of all other commercial nations;—Com. Perry has proved himself a skilful diplomatist, and additional distinction has been earned for the American name and nation.

Had we time or space, we might enlarge upon the probable effects of this important measure;—its influence upon the commerce of the Pacific; upon the Atlantic and Pacific railroad; upon a line of trans-Pacific steamers, touching at these Islands, &c., &c. But we must close, for the present moment, merely with the expression of the belief, that in all these particulars, the opening of Japan by Com. Perry will exert a most important influence, and may possibly prove the only additional spur that was needed to put them all in motion.

Officers of U. S. S. Saratoga.

Commander—W. S. Walker.
Lieutenant—John R. Goldsborough.
Surgeon—T. S. Smith.
Purser—J. Geo. Harris.
Acting Master—John Madigan.

Sailmaker—H. F. Stocker.

PASSENGERS.—Commander H. A. Adams, U. S. N., bearer of Despatches from Commodore Perry to the U. S. Government.

W. L. Wayne, Lieut. U. S. N.; J. B. Randolph, Lieut., U. S. N.; Jacob Zeilin, Bvt. Major, U. S. M. Corps; C. W. Abbott, Clerk to Bearer of Despatches.

☞ We have been reading "Ik. Marvel's Dream Land," and some of his other writings also a volume by "Fanny Fern." Will some one tell us how "Ik" and "Fanny" came to know all about people's dreams and thoughts, in these isles of the Pacific? We are sure they never travelled this way, and still they know all about us. The truth is they must have studied the text, "As in water, face answereth to face; so the heart of man to man."

☞ Just as our paper is going to press, we are required, in the order of time,to notice the late Examination and Exhibition of the Royal School. Our time and limits will only permit us to say, in the language of Mr. Wyllie, H. H. Minister of F. R., "the Examination reflects honor upon both pupils and Teachers."

Treasurer of the Ladies' Strangers' Friend Society, would acknowledge a donation of $10,00 from Rev Mr. Dole, and $15, from John G. Lewis Esq.

American Whalers and American Missionaries.

In the Missionary Herald for Dec. there are some very cheering facts relating to the growth of Christianity in the Sandwich Islands. There are also some statements quite painful to contemplate, and which ought to be considered serious by the capitalists of New Bedford, Nantucket, New London, and other whaling ports. The missionaries seriously charge the officers and crews of their whale ships with the crime of corrupting the simple natives, both by precept and example, from the faith of the Gospel. Of course, owners of ships cannot be held entirely responsible for the immoralities of their crews. But the chief mischief their ships do, grows out of the almost universal practice of *whaling on the Sabbath*—a practice which it is in the power of owners to stop, if they are so disposed. Here is the testimony of the missionaries on this point.

"Among the many obstacles to the progerss of the Gospel at these islands, there is one which is so great, and which threatens to be so mischievous in its consequences, coming from such a source, that we should like, were we able, to lift up our voice like a trumpet against it, cry aloud, and spare not. It is, or ought to be, generally known, that the whaling fleet, with one or two exceptions in a hundred, prosecute the great business of their voyages on all days alike. Or, if there be any difference, there is a better look-out for whales on the Sabbath, and there are more whales taken and cut in on that day than on any other. The great reason for this is, that there are more volunteers on the look-out, the common routine of other unprofitable labors being much of it dipensed with.

"Men who have no Sabbath at sea, generally desire none in port, except as a holiday. More of this class are on shore that day than on other days, rambling everywhere, and engaging in such vices as the police are unable to prevent. Of course, they not only set a bad example, dut they become the tempters of all with whom they come in contact. This is not the worst of it. From a tenth to a twentieth of our able-bodied young men are employed on board these ships, and there taught, both by precept and example, the superiority of the whaleman's morality and religion over those of the missionary and the Bible.

"Were the owners of these ships all infidels, the influence of their capital, thus employed, would be for a lamentation. But this is not the fact. The capital of good men, of leading men in the church, of men who love Zion, and who contribute their scores, their hundreds, and some of them their thousands, to the funds of the American Board, is thus employed. How little do such persons dream that their liberal contributions, if all expended for the salvation of the Islands of the Pacific, would fall far short of counteracting the influence of their capital employed in enticing and requiring our church members to disregard the Sabbath, and in exerting upon the whole community an influence unfavorable to all that is moral and religious! The indications now are, that if the native race is to be blotted from existence, one of the leading agencies in effecting it will be Sabbath whaling. For it is as true in the Pacific as elsewhere, that where there is no Sabbath, there will be little religion, either among the white or the colored races."

Such are the complaints made. Will any man question the truthfulness of these revelations? If not, how fearfully guilty are the *Christian* (!) owners, who allow their ships to do the work of Satan in the Pacific Ocean, while they worship Christ at home! For it cannot be denied that the power to stop this Sabbath whaling is in the Christian capitalists of the places named. They ought to stop it. If not out of respect for the Lord of the Sabbath, they should do it for the sake of the poor islanders, who are perishing, soul and body, through a practice which they either sanction directly or connive at by silence. We beg those of our readers who are in any way involved in this guilt, to give the matter their serious attention. For what will it avail to heap up gold which is stained with blood? The curse of God will follow such wealth; and it were better to live in rags and die a beggar, with a good conscience, than to roll in luxuries procured through practices, which have corrupted the morals, destroyed the bodies, and ruined the souls of thousands.—Zions Herald.

We copy the foregoing remarks from the "Republican Standard," published in New-Bedford. It is, to us, a source of heart-felt rejoicing that the Editor of a secular paper in that city has the moral courage to copy an article of this character into his columns. We fear, however, if he should frequently repeat the deed, he would lose some of his subscribers. This subject of Sabbath whaling and Sabbath breaking, is often discussed in the "far off" Pacific, but, in nine cases out of ten, ship-masters and sailors, tell us that at New Bedford, New London and other whaling ports, the reform must commence. There is no doubt of it. Ship-owners, professing to be christians, are bound to lead off in the good work of reform. Alas! will they do it? We have listened to their fallacious arguments for continuing the business of whaling on the Sabbath. Many of them doubtless partially see the evil, but alas, their prospective gains blind their moral sense, to a degree, that reform is well nigh hopeless. Public sentiment should be brought to bear upon the evil. Editors, Ministers and christians in the United States, should denounce Sabbath whaling, as they would Sabbath labor on a rail-road, or in a cotton factory, on a farm or in a mechanic's shop. We fear alas, that a long time will elapse before New Bedford Ship-owners will send out orders for their ships to abandon this heaven defying sin. Our faith is much stronger to believe that China will first be Christianized, Ethiopia stretch forth her hands unto God, the isles wait for God's Law, and "the abundance of the sea converted." Ah! methinks the angel flying through the midst of heaven having the everlasting gospel to preach, and proclaiming that the kingdoms of this world have become the kingdoms of Christ, will have visited every ocean, continent and island, and finally be arrested in his flight over the emporium of whaleships, and while balancing on poised wing, be compelled to drop a tear to wash out the last remaining sin of earth—*Sabbath Whaling*

The Sailor's Bible in his Chest.

A correspondent of the N. Y. Observer, describing a visit to the sea shore with a friend, furnishes an interesting account of a sailor's chest which had been thrown up by the waves upon the beach. After alluding to the opening of the chest and taking out the clothing, the writer pens the following:—

"But we found a precious treasure in the sailor's chest. No diamond of Brazil—no gem of the western coasts, so precious, yes, the price of it was above rubies. It was the Word of God. We were glad to see it. The sight of it sent a pleasant tide of thoughts through our hearts. If we knew not where the tempest had sent the body, we could not but hope this precious Bible had sent the spirit to a heavenly home. No name yet met our eyes. But these beautiful lines cut out of some book or periodical were pasted on the fly leaf:—

A mother's blessing on her son,
Goes with this holy thing;
The love that would retain the one,
Must to the other cling.
Remember 'tis no common toy,
A mother's gift! remember boy.

In company with the Bible we found a daguerrotype of a lady—beyond a question the mother of that son; the giver of that precious book. As we gazed on the placid features, we could not but think those beautiful lines were placed there by her whose image was now before us. Her own fond and pious heart had made this gift, and sought an expression of maternal love in these lines. A pious mother's blessing with such a gift.

The sailor boy would need the strong hand—the firm purpose—the bold decision—the strength to suffer. But the forecast of the mother went beyond all this, and to higher wants. Her son, hastening to the perilous sea, needed what could only be furnished by the precious Word of God. How much given in that gift—that "holy thing," and with a praying mother's blessing upon it, for how much may we hope concerning that son.

A pleasant thought it is that so many of our seamen have godly mothers. How can the parents of men, exposed to so much peril and suffering be other than persons of prayer. And never should the mariner be suffered to leave the parental fire-side, without the precious Word of God, and such valuable religious books as may be safe guides of the soul in the path of life.

The incident of this article reminds us, that within twelve months not less than two thousand lives have been lost by maratime disasters. How earnestly do such sounds of sorrow from the sea call upon us to do all in our power for the spiritual welfare of our seafaring brethren.

A Frenchman's Opinion of Temperance Societies.

In a former No. we gave M. Ampere's first impressions of America. In subsequent letters, translated for the "Eclectic," we learn his views of American society, and the progress of the country. His observations upon Temperance Societies, are quite as liberal as we should expect. While gently urging a plea for wine, he bears down upon rum and brandy. He remarks as follows:

The movements of Temperance societies began at Boston in 1826, and five years later in England. The progress of temperance in both countries has been astonishing. The U. S. Government has given its aid in suppressing the distribution of ardent spirits in the army and navy; but the voluntary principle has done more than all else combined. In 1836, there were 8,000 temperance societies in the United States, comprising about 1,500,000, members. Even women and children have formed such associations; and what is best of all, public sentiment has been expressed by acts of legislation. Thus, in Maine, the sale of spiritous liquors is entirely forbidden, except in case of sickness, upon the prescription of a Physician, and for artistic purposes. Nothing can be better evidence of the supreme will of the majority. What is worth remarking is, that in a country where the majority rule, they have placed an interdict on the very object which the majority have a passion for. People are everywhere submissive to law, and the Mayor of Portland congratulated his fellow citizens on the good effects of the law, which had diminished pauperism and crime in the city.

Compound Interest.—Some of the natives of Africa, although they may have little pretensions to a knowledge of mathematics in general seem to have a very clear and comprehehsive idea of the principle of compound interest. This appears from the facts stated in a report of a select committee at a British post, on the customs of a tribe in the vicinity.—According to this report if one native stole a fowl from another, the owner, if he had witnesses of the facts, would suffer the matter to rest for two or three years. he would then institute an action for damages, which are measured by this curious standard. It was in the first place calculated how many eggs would these fowls probably have laid in the course of one or two years—how many of these would have been hatched, how many of these chickens would themselves have become parents, for the time between the commission of the robbery and the conviction of the offender. For this imaginry wrong, damages have been given to the fullest extent, and husbands and wives, and whole families, sold to requite the owner of the fowls for his loss.—Boston Journal.

☞ May the above illustration of compound interest suggest to mechanics, sailors, and all others, how much is lost by not taking care of their money. As there is the prospect of a Saving's Bank being established in Honolulu, we could wish, many who now spend all their income might be disposed to lay by a small sum weekly, or monthly, which, at compound interest, would. in a few years, be amply sufficient to purchase a farm, a schooner, a house, or some other valuable property. Think of it. One dollar saved weekly for five years at compound interest, will amouut to a snug little capital. Try it!

A Saving's Bank in Honolulu.

We are glad to observe that the subject of a Saving's Bank is recommended to the consideration of the Hawaiian Parliament by His Majesty, in his opening speech, and also recommended by the Minister of Finance, in his Report. The latter suggests for the present, a Saving's Bank may be connected with the Treasury Department, and if the experiment should succeed then a private company might be formed. The subject seems to be assuming a tangible and practical form. It is our firm belief that the Government would be no loser by the operation. Should the Legislature appropriate a small sum of a thousand dollars or less, we are quite confident a successful experiment might be tried, that would work out great good to the Sandwich Islands. Even supposing the first year, the loss should amount to five or six hundred dollars, we do not see how the Legislature could better expend that amount. It would be a public benefit, as much if not more so, than to devote $500 per annum, to aid the funds of the Agricultural Society. We have strong expectations that the measure will be approved of, so that a Saving's Bank will be immediately established. Should this result take place, we hope our mechanics, seamen, and professional men of small capital will be induced to give character to the institution, so that in a few months, it will become firmly established.

New sperm Whaling Ground.

"Let me mention," writes Dr. Gulick from Ascension, "a fact which has recently come to hand. Capt J. L. Smith of the Cleora entered the Bonatick Harbor on the 20th of July, and left it a few days since. He is just off a whaling cruise along the line between this and the Pelew Islands. It has not before been known that whales were to be found in that track in any number, but he has been very successful. And the strong probability is that that portion of the Pacific will during the next few years be as much frequented by sperm whalers as the region about the Kingsmill Islands; and if it is, that the Islands of the Caroline range will be frequently visited by them and become better known; and that our facilities for sending missionaries upon almost all of them will be unlimited.

To Masters of Whae-Ships visiting the Hawaiian Islands.

YOUR attention is called to the followiing facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Sept. 1, 1853—6m-19

BIBLES! BIBLES!

JUST RECEIVED and for sale at the Chaplain s Study, BIBLES of various sizes and styles of binding. These books are imported by the Hawaiian Bible Society, and sold at the American Bible Socioty prices in New York, with the additional charge of actual expenses.

CHARTS.

JUST received by the undersigned, via Panama, a lot of superior Charts, of the North and South Pacific Oceans, extending from the Equator to 65° N. and 65° S. latitudes, embracing all the latest surveys and observations for the year 1853, drawn and engraved by Chas. Copley, New York.

Nov. 22d, 1853.—29 D. N. FLITNER.

"OFF AND ON."

SHIP-MASTERS AND SEAMEN belonging to vessels lying "off and on,,' can be supplied gratuitously with copies of the FRIEND, by calling at the Chaplain's Study, from 12 M. to 3 o'clock P. M.

Bound volumes on hand and for sale.

S. C. DAMON, Seamen's Chaplain,

Honolulu, March 1, 1854.

Barnes' Notes!

FOR SALE at the Chaplain's Study, complete sets of Barnes' Notes on the New Testament, Isaiah and Job.

Also a few copies of the cheap edition of UNCLE TOM'S CABIN.

Also Webster's Spelling Book.

☞ Any sailor unable to read, and desirous of learning, will be supplied with Webster's Speling Book gratuitously, unless he prefers paying for it.

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for cash, goods, or Bills on the United States.

The Friend sent abroad.

By paying in advance the subscription price, the Friend will be sent by the earliest opportunities, to the United States, England, China, Sydney, or any foreign country.

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4, 5, 6, 7, and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

Passengers.

By the Lightfoot, fm San Francisco, H W Fairbanks, Mrs H W Fairbanks, Miss Nelly L Fairbanks, Miss Carrie L Fairbanks, Mrs H Ball, Mrs S E Broge; Mr H A Spar, Mrs H A Spear, Mr S Erwin, Mr T W Denton, and four n the steerage.

By the Matchless, from San Francisco.—Mr. and Mrs. Elliot, Messrs. Hardy, Biggs, Dickson, Smith, Gardner, Brown. Hennegan, Williams, Brown, Martin, McClemming, O'Harra, Damon, Owen, Conner, Mrs. Connor, Mrs. Adams, Mrs. Purgell, Rice, Lunt.

By the Restless, for San Francisco.—Messrs. H. Helbing, G. C. Melchers, Capt. Coffin, Capt. S. Bailey, Col. Smith, Messrs. Feldheim, Kennedy, Graham, Capt. R. Brown, Heuck, N. P. Halsey, Haskell, Heustis, Haka, H. E. Payne, W. Gosso, H. Aldridge, H. Nichols, Reynolds, Peters, P. Hussey, B. Hall. R. Nelson, John.—24.

By the Sovereign, for San Francisco;—Mrs. Whitney and 2 children, Mrs. Hobron and daughter, Mrs. Slocum, Miss Hastings, Mrs. Hernandez, Mrs. Dutcher, Dr. Chapin, Capt. Coffin, Messrs. Ferguson, Hardy, M'Dowell, Ryan, M'Lane, and several others whose names we have not been able to obtain.

By the N. B. Palmer, for New York.—Mrs. Tucker. Mrs. Low and child, J. F. B. Marshall lady and serv't, A. P. Everett, lady, child and serv't, Mrs. Hempstead and child, Mrs. Hutchinson, E. Whittesey lady and child, P. B. Saunders and serv't, Capt. Snow, of whaleship "Eagle," Mrs. Angell and daughter, Master C. Angell.

By the Matchless, for Sydney,—Mr. and Mrs. Waller and child, H. Tuthill, N. L. Griffin, J. Steward, J. Williams, Mrs. Spencer and child, Mrs. Taylor, Mrs. Chester and child, M Silva, Mary Sullivan, T. Palmer, Mr. and Mrs. Elliot, G. Biggs, W. Dickson, Mrs, Adams, Mrs Connor, Mrs. Purcell, Messrs. Gardner, Brown, Martin, McClaning, O'Hara, Damon, Owen, Connor, Lunt.

DIED

On the 15th inst., of consumption, W. J. Robertson, a native of Montego Bay, Jamaica, aged 36 years.

MARRIED.

In Honolulu, April 19, by Rev. T. E. Taylor, Mr. Geo. C. McLean of this place, and Mrs. Mary Ann Halladay, formerly of New York.

At the residence of S. Reynolds, Esq., on the 12th inst., by Rev. T. E. Taylor, J. H. Brown and Miss Jane, eldest daughter of H. S. Swinton, Esq.

THE FRIEND.

HONOLULU, JUNE 6, 1854.

European News

War Declared—Russians crossed the Danube—English and French forces hurrying to the scene of action.

On the 28th March the Queen of England signed the Declaration of War against Russia. The public was officially made acquainted with the fact, on Friday March 31st. The ceremony took place at London in the Royal Exchange, in the presence of the Civic authorities.

Similar proceedings have taken place in Paris on the part of the French Government.

A Convention between England, France and Turkey has been concluded. 1. England and France engage to support Turkey by force of arms, until the conclusion of a peace that shall secure the independence and integrity of the Sultan's dominions. * * *

4. Turkey guarantees to all the subjects of the Porte without distinction or creed, perfect equality.

The English Admiral, Napier, has issued the following address to the fleet in the Black Sea.

"Lads! War is declared! We are to meet a bold and numerous enemy! Should they offer a battle you know how to dispose of them. Should they remain in port, we must try to get at them.

"Success depends upon the quickness and precision of your fire! Lads, sharpen your cutlasses, and the day is your own."

The British Government have issued orders for the blockade of Russian ports in the Pacific. This will of course interrupt the trade between San Francisco and Sitka.

The Emperor of Russia is making the most extensive preparations to meet the combined naval and land forces of the Allied Powers

Important Documents.

To understand the true position of the great nations of Europe, a person needs to be well posted up in the current news of the day, and well read in the history of modern Europe. More than this he needs to look behind the curtain and listen to the discussions of Kings, Queens and Emperors, with their Ministers and Foreign Ambassadors.

The recent English and American papers, publish a series of State documents, that will be read with intense interest. These documents disclose the record of private interviews between the Emperor Nicolas and the British Ambassador at the Court of St. Petersburg. These interviews took place in January and February of 1853; and in them the Emperor of Russia made known his views of Turkish and European affairs.—Our readers will not expect us to publish these documents, but the following brief extracts will indicate their importance;—

"The affairs of Turkey, remarks the Emperor to Sir G. H. Seymour, 9th Jan., 1853, are in a very disorganized condition; the country itself seems to be falling to pieces; the fall will be a great misfortune, and it is very important that England and Russia should come to a perfectly good understanding upon these affairs and that neither should take any decisive step of which the other is not apprised.

I observed in a few words that I rejoiced to hear that His Imperial Majesty held this language; that this was certainly the view I took of the manner in which Turkish questions are to be treated.

'Stay,' the Emperor said, as if proceeding with his remark; 'we have on our hands a sick man—a very sick man. It will be, I tell you frankly, a great misfortune if, one of these days, he should slip away from us, especially before all necessary arrangements were made. But however, this is not the time to speak to you on that matter."

At a subsequent interview the Emperor uses the following language:—

"Now I desire to speak to you as a friend and as a gentleman; if England and I arrive at an understanding of this matter, as regards the rest it matters little to me; it is indifferent to me what others do or think. "Frankly, then, I tell you plainly, that if England thinks of establishing herself one of these days at Constantinople, I will not allow it." I do not attribute this intention to you, but it is better on these occasions to speak plainly; for my part, I am equally disposed to take the engagement 'not to establish myself there as proprietor—that is to say, for as occupier I do not say—it might happen that circumstances, if no previous provision were made, if everything should be left to chance, might place me in the position of occupying Constantinople.'"

Battle in the Dark.—On the 17th of February, a conflict took place, by mistake, between two columns of the Russian army. The Turkish positions are extended in an easterly direction, as far as the village of Cuipercenti, which is about a mile distant from Kalafat For several days a Turkish corps, about 4000 to 5000 strong, under the command of Col. Mirolai, had been posted in front of the village, and in the direction of the Russian outposts. On this corps the Russians determined to make an onslaught during the night of the 16th. For this purpose two Russian columns were brought up, of from 4000 to 5000 strong, one by the road which leads to Kalafat from about the village of Scribeza, and the other from the left side of it, from about Roisna—Prince Milosch's property—to advance unexpectedly upon the Turks, to surprise them, and cut them to pieces. The Russian columns commenced their march at 3 o'clock in the morn-and by 4 o'clock reached a position from whence they were only half an hour's march from the Turkish pickets. The second column seems either to have missed the direction by mistaking the road, or to have come up long after its proper time. Be this as it may, the latter column, in the obscurity of a a foggy night, concluded the former one to be a body of hostile Turks, and instantly opened upon them a terrific cannonade, which the others, who labored under the same mistake, returned with yet more deadly effect; pressing toward each other, it came ere long to a close fire of small arms. This ill-omened combat lasted for an hour and a half, until, when day dawned, the combatants saw with horror the error they had committed. The loss in killed and wounded in the course of this night's encounter, is reckoned by themselves at several hundreds.

The Turks were naturally alarmed at every point, and at Widdin, which is but a league and a half distant, Omer Pacha, on hearing the cannonade, took all the requisite measures for defence.

The Turkish corps at Cuipercenti stood in arms, in readiness for action at any moment, but did not advance, as it was at a loss to imagine or comprehend what the Russians were about murdering one another in that style. It was not till between seven and 8 o'clock A. M., that the Russian columns withdrew to their respective positions, carrying their wounded along with them.

Sailor's Homes.

During the last few years these establishments have multiplied until every seaport of any size in England and America is now supplied. In London and Liverpool, they are upon a large scale. In New York and Boston there are several, while every port along the Atlantic coast from St. Johns, New Brunswick, to New Orleans has its Sailor's Home. A correspondent of the N. Y. Sailors Magazine thus writes the editor:

Portland.—"What think you of $5,000 given by nine men for our new home? We hope easily to raise the other $5,000 and have a good house, well furnished for 100 sailors, in a respectable street away from the docks, and yet within two hundred yards of the Liverpool steamers, &c."

The editors make the following reply:

"What do we think? We think these gentlemen will find it very difficult to invest the same amount of money in any other enterprise which will yield so large, and rich, social, moral and commercial results."

The friends of Seamen, in St. Johns N. B. appear to have shown a most generous liberality in behalf of seamen. The sum of $20,000 has recently been raised in that city for a "Seamen's Home, Institute, Savings' Bank, and Nautical School."

While the friends of seamen, elsewhere are alive to the importance of establishing Sailor's Homes, Seamen's Savings' Banks and other institutions for the improvement and benefit of seamen, what are the friends of seamen doing in Honolulu? Have we a good Sailor's Home? Have we a Savings' Bank? Certainly not, but we live, hoping, that eventually such institutions will exist in Honolulu. They are needed. A good Seaman's boarding house, is needed most of all. It should be located in the central part of the city. It should be established and conducted upon a scale, that would command the respect of seamen and the community. Its influence would be most salutary. While it would not supercede the necessity of other boarding houses, for seamen, it would tend to elevate their character. During the fall shipping season, oftentimes one thousand seamen are ashore. Many of these would rejoice to patronize a well conducted Home. Persons acquainted with the port, know that there are difficulties in the way of the enterprise. Who will provide the land? Who contribute the means? Who will conduct the establishment? Some, we rejoice to learn, think these and other difficulties could all be overcome.

Seaman's Home, St. Johns.

This enterprise, projected by the Rev. Mr. Harris, has become so successful, that it is found necessary to raise more funds, in order to extend its operations. The present building is entirely too small for the purpose—although when it was leased it was supposed to be large enough for many years to come. The demand for accommodations on the part of our hardy seamen, has not only been steady, but at times too pressing for the room at disposal. For weeks together a dozen or more applicants for "board" have been sent away, because the "Home" was already filled. The committee of Management in order to meet the desideratum, are about purchasing the 'Sandall Property" at the corner of Britain and Charlotte Streets, not far from the present "home," the cost of which will be £3,400 (or thereabout)—will also cost £600 more to put the building in suitable order. The size of the ground is 200 by 80 feet. There are several dwelling houses upon, it all of which are to be connected under the one head. Subscriptions to a large amount have already been collected of our merchants and others, by the indefatigable Secretary, Rev. Mr. Harris. Some names are down for £100—and Mr. H. expects to raise the full amount within a short time, as he meets with the best of encouragement. It seems to us that it would be the better plan instead of patching up the present wooden buildings, to raze them to the ground altogether, and rear a fabric of brick or stone, from the foundation—one that would be a credit to all concerned, as well as an ornament to the city. A Nautical School is to be connected with the Institution. We think that a building of this description, like a hotel, ought to be commenced and carried out in accordance with its peculiar wants and character. Commence right, and although a little more expensive at first, in the end the result will be much more satisfactory. Six hundred pounds is a large sum to expend upon a *temporary* building, or buildings, which in a few years must be taken down—to say nothing of the great danger of fire, which is a thing not to be disregarded—for this cause, like many others, no matter how good, has its enemies "lurking privily to do it mischief." Surely the land ought to be security enough to enable the managers to raise money to make a good brick or stone commencement. But we believe that the legislature would aid the object if applied to. Under the circumstance however—wood or stone—we wish the institution the most unbounded success. It has already done a vast deal of good to our shipping interests, and destined to do a great deal more as soon as it gets fairly under way."—*Morning News.*

American Competition with England. The following is remarkable as coming from the London Spectator in which paper it appeared under date of Oct. 8th.

"A writer to whose compilations the Times gives space and conspicuous position, has taken more than one opportunity of enlarging upon a competition with which our merchants are threatened in India and Asia, on the part of American traders. The ships of the United States appear on the Mekran coast as well as at Kutch, Muscat, and other places, with various articles which they barter for the produce of those countries; the American commodities being principally a certain coarse cotton fabric which they ca sheeting, and dollars. The Americans appear to enjoy a particular advantage over the traders—that of conducting their barter individually, in ships, which are independent floating, pushing shops, instead of working by routine through large establishments at Bombay; and thus they not only save expense, but in each particular transaction secure the largest amount of profit.

Another advantage they have is expressed by the Political Agent at Kutch, who says of the sheeting, that it "finds acceptance amongst the people of the country, because it lasts longer than the cloths imported from Bombay." This indicates the true force of the competition which we have to dread from the United States. If America can cut us out in India, where we occupy the entire country with our government and commerce, the ridicule and disgrace would be greater than any which the most anti-commercial country has incurred.

But there is something in this superiority of tissue over the manufactures of England. The comparison is not made for the first time, nor only in cotton sheeting. It is reported from the Hudson River Railway, that British iron rails become in a worse condition within twelve months, than American rails within a number of years. There may be exaggeration in this; but we have had complaints of our rails from our own official and scientific investigators, who have declared the bad make of our iron to be a frequent source of accident. At the last meeting of the Sheffield cutlers, the Master Cutler declared that American cutlers were cutting them out in knives; knives of American make being preferred to ours, because the material does not give way under use as those of Sheffield are sometimes found to do. In short, notwithstanding the sharp practice and hasty habits of America, they are in some branches of trade earning the repute for sterling stuff and make which used to be our own; and if we suffer them to win that reputation from us altogether, then indeed we shall have lost more than if India were annexed to-morrow."

Shipwrecks of 1853.—During 1853, 21 steamships were lost on the ocean, on the breakers, or destroyed by fire, 16 of which mere American. 3 English, 1 Russian, and 1 Dutch, involving a loss of 615 lives. Of three masted vessels, 39 were lost, with 1,120 lives. In addition, 24 barks, 12 brigs, 21 schooners, and 20 fishing vessels have disappeared with 189 lives and much valuable cargo

Chinese Pirates.—Capt Folger, of the barque Geo. E. Webster, at San Francisco, from Hong Kong, says that the pirates on the coast of China are exceedingly bold in their operations, and as they entertain an idea that vessels from California have a large amount of treasure on board, it requires great watchfulness to prevent being surprised by them.

A Reminiscence of Old Times.—The first bell in Haverhill, Mass., was purchased in 1781: before that time, there was a singular substitute, as appears by a vote passed in 1639—"That Abraham Tyler blow his horn half an hour before meeting time on Lord's day, and on lecture days, and receive one pound of pork annually for his services, from ach family."

The expected War.

Every mail brings intelligence increasing the probability that a general European War is certain to take place. England and France have united their Land and Naval Forces, to sustain the independence of the Turkish Empire. The newspapers report that Prussia, Austria, Denmark and Sweden will remain neutral. The next mail will probably bring intelligence that war has been declared. The following summary we copy from the American Messenger, of April 1.

The British Parliament met January 31st. The Queen in her speech alluded to the Turkish difficulty, and congratulated the nation on the French alliance. She recommended an increase of the army and navy, in view of the imminent danger of a general war.

France has decided to send 80,000 troops, and England 20,000, to the assistance of Turkey. The British Government is to pay half the expenses of the two nations. Thirteen steamers of the Cunard, the Peninsula, and Oriental Steamship Companies have been chartered by the English Government to convey troops to Malta.

The Russian ministers have withdrawn from Paris and London, and orders have been sent to the French and British Ministers at St. Petersburgh to demand their passports.

The Czar proposed to form a defensive league with all the German Powers, promising if the Western Powers attacked any one, that Russia should make common cause with them. They refused through Austria.

The Four Powers have made a new proposition for a peaceful settlement of the question, conceding that the Emperor of Russia treat alone with Turkey, she to have the right of consulting with her allies. It is also proposed that the evacuation of the principalities should take place simultaneously with that of the Black sea.

Louis Napoleon has sent an autograph letter to the Czar, in which after reviewing very clearly the several steps of the difficulties between Turkey and Russia, and explaining the part which France has taken, he states the above proposition of the Four Powers, which, judging from the "many proofs" given by the Czar of his "solicitude for the tranquility of Europe," he is confident he will accept; in which case the Czar would declare "that an armistice shall now be signed, that things shall resume their diplomatic course, that all hostilities shall cease, and that the belligerent forces shall return from the places to which motives of war have led them." "Let Your Majesty," he adds, "adopt this plan; upon which the Queen of England and myself are perfectly agreed, and tranquility will be re-established and the world satisfied. There is nothing in the plan which is unworthy of your Majesty, nothing which can wound your honor. But if from a motive difficult to understand, your Majesty should refuse the proposal, then France as well as England will be compelled to leave to the fate of arms and chances of war that which might now be decided by reason and justice."

This overture of Napoleon has been rejected by Nicholas, and war is deemed inevitable. The fanaticism of the Russians to rescue the Holy Places from the Mohammedans, is aroused to its utmost height, and the English and French nations having sought in vain to preserve the peace of Europe, are making vast preparations for war.

The army of Omer Pasha consists of about 130,000 men. The Russian forces in the principalities and in Bessarabia amount to 156,328 men, with 520 cannon.

MANIFESTO OF THE EMPEROR NICHOLAS.

We, Nicholas the First, &c.

We have already informed our beloved and faithful subjects of the progress of our disagreements with the Ottoman Porte.

Since then, although hostilities have commenced, we have not ceased sincerely to wish, as we still wish, the cessation of bloodshed. We even entertained the hope that reflection and time would convince the Turkish government of its misconceptions, engendered by treacherous instigations, in which our just demands have been represented as attempts at its independence, and veiling intentions of aggrandizement. Vain, however, have been our expectations, so far.

The English and French Governments have sided with Turkey, and the appearance of the combined fleets at Constantinople served as a further incentive to its obstinacy; and now both the Western Powers, without previously declaring war, have sent their fleets into the Black Sea, proclaiming their intention to protect the Turks and to impede the free navigation of our vessels of war for the defence of our coasts. After so unheard of a course among civilized nations we recalled our embassies from England and France, and have broken off all political intercourse with those Powers. Thus England and France have sided with the enemies of Christianity against Russia, who is combatting for the orthodox faith.

But Russia will not betray her holy calling; and if enemies infringe our frontiers we are ready to meet them with the firmness bequeathed to us by our forefathers. Are we not the same Russian nation of whose exploits the memorable events of 1812 bear witness?

May the Almighty assist us to prove this by deeds. With this hope, combatting for our persecuted brethren followers of the faith of Christ, with one accord let all Russia exclaim—"O Lord, our Redeemer! whom shall we fear? May God be glorified, and His enemies scattered."

St. Petersburg, 9th (21st) February, 1851.

Slaves in Russia.—Of the fifty-three and half millions of people which Russia contained in 1842, not less than forty-two millions were slaves: and of these, fifteen millions were slaves of the Crown, or the Emperor! The Russian slaves have no legal rights; in that respect they are no better than the negroes of the States. The Russian people are not only slaves to their nobles, they are also to the soil. The land of Russia is valueless of itself; its value consists in the human property belonging to it, from which the nobles derive their chief revenue. Practically, the private serf of Russia—and there are above forty millions of such—is, life and limb, at the disposal of his owner, as completely as slaves have ever been in any country. He can be sold or hired out as a beast of burden.

The master may at any time send his male slave to Siberia, or for a soldier—and some he must constantly choose for this service. The owner may flog his slave to death, but the law only permits him to be fined. The law forbids any court to receive the evidence of a slave against his master. By a Royal ukase issued by the monster Catherine, and and since confirmed by Nicholas, if a serf makes any complaint to his superiors against his lord, "he shall be amenable to the punishment which the laws award"—that is, to the punishment of death!—But there is no law in Russia, except the despotic will of the head slave owner. Puschkin, the Russian writer, emphatically observes, "There is no law in Russia; the law is nailed to a a stake, and that stake wears a crown."

The last Hope Gone.

The London Times argues from Commander M'Clure's despatches that there is no hope whatever that Sir John Franklin will ever be heard from. That paper says:

"Commander M'Clure can send us no news of Sir John Franklin's Expedition. The opinion among the most distinguished Polar worthies now is, that Sir John Franklin, after leaving the winter quarters, where his traces were found, proceeded to carry out the Admiralty instructions, steering first westerly for Melville Island, and then shaping a course—as far as the scene of action of the configuration permitted—southerly and westerly for Behring's Straits. It is supposed that, in endeavoring to carry this purpose into effect, the Erebus and Terror were hopelessly frozen up or destroyed years ago in some of the multitudinous channels which are known or supposed to exist there.

This we find to be the opinion of the principal Arctic navigators, and it comes before us recommended by its extreme probability. Certainly, Sir John Franklin was not an officer to leave unattempted any duty which he had been ordered to perform, and therefore it is probable that he would not deviate from the letter of his instructions without excellent cause; had he so deviated, it is all but certain that he would have left behind him at Beechy Island, or elsewhere, some record of his changed intention.

If, then, Commander M'Clure has been unable to find any trace of the lost expedition between Behring's Straits and the point from which he wrote his despatches, it would appear that our best chance has been exhausted. The public have a right to expect that we have now seen the last of Arctic Expeditions. Even Sir John Barrow, had he yet been alive, would now have entreated the Admiralty to hold their hand."

What John said to Jack.—"The world owes me a living! Does it? What have I ever done for it to put it so much in my debt? I have grown up in it and been pretty well fed and clothed by it, and have found fault with it pretty steadily for not treating me better; but really I can't see that it is under such mighty obligations to me for that. I'll tell you what it is, Jack, I'll go to work and do something for the world for the next five or six years, and I should'nt wonder if it gave me a living of its own accord, without any dunning."

John and Jack parted, and the last I heard of the former, he was a wealthy, industrious and happy man. JACK.

The following days of the week are set apart for public worship in different nations:

Sunday, or Lord's Day, by Christians
Monday by the Grecians.
Tuesday, by the Persians.
Wednesday, by the Assyrians.
Thursday, by the Egyptians.
Friday, by the Turks.
Saturday, by the Jews.

Report of the Secretary of the H. B. Society, for 1854.

(Published by request of the Society.)

The undersigned Secretary of the Hawaiian Bible Society would offer the following report, on this, the XIIIth Anniversary of the Society. It should be a source of devout gratitude to the members and patrons of this association, that during another year they have been privileged to participate in the exalted enterprise of distributing among the nations of the earth the word of God. Our Society occupies a peculiarly interesting position. It does not legitimately fall to our lot to send forth colporteurs and Bible distributors, and thereby convey the sacred scriptures to the various nations of the earth, but those nations, or their representatives who visit our shores. Our Society having opened a fountain, the nations come hither to obtain a supply of the "water of life, clear as crystal, proceeding out of the throne of God and of the Lamb." Hither have resorted the English, the French, the Danes, the Spanish, the Portuguese, the German, the Swedes, the Americans, the representatives of South America, and the islands of the sea. Many of these persons, to their astonishment have in Honolulu, found, a supply of Bibles and Testaments in their own languages. With our knowledge of the various benevolent Societies of the age and world, it appears in no way surprising that Bibles in ten different languages should be obtained in Honolulu but far different, the impression upon the mind of the sailor who comes hither from the Western Islands, South America, Manila, Guam, or Finland.

During the year I have distributed and sold 569 Bibles, and 330 Testaments, in the various languages, to which reference has now been made. More than half the number of both Bibles and Testaments, have been in the Portuguese language: (viz, 304 Bibles, and 229 Testaments.) The total number of Bibles sold and distributed, since the organization of the society, 3,565 and Testaments 3,670.

The demand for English Bibles and Testaments, among the natives of these islands, is rapidly increasing, and it is expected from present indications, that the demand will be greater than ever, during the coming year. I rejoice, in this place, to notice the fact that measures have recently been taken, in another body (Hawaiian Evangelical association) to meet that demand, in a new and more satisfactory manner. There will immediately be put to press, an edition of the gospel of John, in both English and Hawaiian, while arrangements have been made to publish an edition of the New Testament, in the same style, by the American Bible Society, at New York. I regard this as a most important measure as regards the acquisition of the English language by the natives, and of the Hawaiian language by foreigners. It will be another triumph of our good old English version, made during the reign of James I.

In regard to Bible distribution among seamen, I am learning, by experience, that when they are disposed to visit my study for the purpose of obtaining a copy of the Bible, there is great hope that the sacred volume will not only be preserved but carefully read. It is very common to meet seamen, who are reading the Bible by course, while I not unfrequently, before giving a sailor a copy of the Bible, make him solemnly pledge me his word, that he will commence reading a portion of the Bible, daily, and aim to complete the reading of the entire volume, before the end of the voyage. It is very seldom that I distribute copies of the Bible or Testaments on ship-board, although when I visit ships, I endeavor to let it be known, that I have copies of the Bible for sale and donation. While I endeavor to make seamen and others feel free to call for Bibles, I do not think it advisable to urge upon any class of men, the Bible *as a gift*. On this point, I have thought there might be a violation of the Savior's precepts recorded Matt. 6: 7, "Give not not that which is holy unto the dogs, neither cast your pearls before swine." Unless there is a reasonable prospect that persons will carefully preserve the Bible, when given, then I do not think it should be given. I am no advocate for a careless and indiscriminate distribution of the Bible. Far different, however do I view the distribution of the sacred scriptures by our Society. While we keep the Bible on hand for sale, and gratuitous distribution, we do not throw them away.

I have lately had some most interesting applications for the Bible, by seamen on board both the U. S. S. Saratoga, and the Eng. Sloop-of-war Trincomalee. The applications, I rejoice to learn were made by Bible readers! On board our vessels of war, it is a matter of rejoicing, that some are found sincerely desirous of learning the way of Life and Salvation, while others are not ashamed to be known as followers of Him, who "when reviled, reviled not again."

It is a most gratifiying circumstance that the sale of Bibles, is yearly increasing.—More has been received during the past year than during any previous year. The same is true, in regard to donations, so that our society has a larger amount of funds now on hand, and ready to transmit to the Am. Bible Society than ever before. This is the more gratifying, inasmuch as I have received advices that there has been shipped, from New York, to supply our depository, a larger invoice of Bibles, than ever before. These books may be expected on the arrival of the "John Caskie." During the last few years, the receipts of our Society have nearly if not quite covered the cost of all the Bibles which have been gratuitously distributed upon the Islands and among seamen. It will be understood that, this remark does not apply to the Bible, as distributed in the Hawaiian language and among natives.

The total amount of receipts of our society during its existence has been $2,879,14.

I regret that I have not been furnished with an account of Bible distribution at Lahaina, and Hilo, although I am aware that the same good work has there been carried forward.

In closing our labors for the year, and in entering upon the labors of another year, the officers, members and patrons of the Hawaiian Bible Society, may confidently feel, that they are laboring in a cause, upon which the blessing of God manifestly rests. The object commends itself to the philanthropist and the christian. God has said that his word shall not return unto Him void! But how shall it return at all, unless christians scatter it abroad? Is not God now saying unto us

> "Give my Bible wings, and bid it go,
> Where guilt is found and guilt's companion, woe?
> Nor stay thy labor, till my eternal Son,
> Smiles on a world, to his dominion won."

Yours, S. C. DAMON.

Acknowledgments.—The proprietors of the new Flouring mill, have not laid us under the same obligations, that they have the Editor of the "Polynesian," but some unknown frend on Maui, has forwarded us, (freight paid) "a keg of nice Maui syrup." Will he not send us his name? Our good fortune does not stop here, our old friend at Hanalei, has sent us another bag of excellent coffee. When housekeepers want good coffee, look out for Sandwich Island coffee, in bags marked T.

☞ An Indiana paper says that, of the one hundred and ten newspapers published in that state, all except ten advocate the prohibitory liquor law.

U. S. Consul at Hobart Town.—Mr. Duncan McPherson, of Hobart Town, has been appointed Vice Consul for the United States of America, Mr. Francis having resigned and Mr. Hathaway leaving the colony.

CARD.—The Captain of the Russian Frigate Diana, has forwarded the Seamen's Chaplain, a donation, with the accompanying note, "I herewith send you the sum of $25, which you may apply to the benefit of the poor."

Hawaiian Anniversaries,

The Missionaries' Children—Missionary Society.

The 2nd Anniversary of this Society was held in Honolulu, at the Mission School House on the Evening May 20th.

The Hawaiian Bible Society.

The Rev. E. W. Clark preached the Annual Sermon in behalf of this society, at the Court House, Sabbath evening, May 21st. The discourse was highly appropriate the preacher taking for his text, Psalm, XIX, 7. "The Law of the Lord is perfect, converting the soul." At the close of the exercises, a collection was made.

The Anniversary of the society occurred Wednesday evening, at the Bethel, May 31. In the absence of the President, the Rev. L. Smith, a vice President, was called to the chair. The meeting was opened with prayer. Reports of the Secretary and treasurer, were then read and copies requested for publication.

The following officers were chosen for the ensuing year:

Hon. W. L. Lee, President.
G. M. Robertson, Esq., Warren Goodale, Esq., } V. Pres't.
Rev. S. C. Damon, Secretary.
A. S. Cook, Esq., Treasurer.
Mr. I. Bartlett, Mr. J. T. Waterhouse, Rev. R. Armstrong, } Ex. Com.
Rev. S. E. Bishop, Preacher, for 1855.
Rev. A. Bishop, Alternate " "

Rev. A. Thurston was appointed, to prepare to be read at the next Anniversary, a history of the Hawaiian Translation, of the Bible. At the close of the exercises, a collection, amounting to $208, was taken to promote the distribution of the sacred scriptures among Hawaiian Seamen. The statement was made that many hundreds of them left annually unfurnished with the Bible.

The Hawaiian Missionary Society.

The Rev. T. Coan, preached the Annual sermon in behalf of the Society at the Bethel, Sabbath Evening, May 28th.

The text, Luke, 2: 10, "Behold, I bring you good tidings of great joy which shall be to all people." Our narrow limits is our only apology, for not presenting an outline of the appropriate and eloquent discourse.

The Anniversary took place, Tuesday evening at the Bethel. The Rev. A. Thurston, in the chair. After the reading of the Secretary's and Treasurer's Reports, the following officers were elected for the ensuing year:

Rev. A. Thurston, President.
Hon. John Ii, Rev. W. P. Alexander, " T. Coan, " R. Armstrong, " G. B. Rowell, } V. Pres'ts.
Rev. E. W. Clark, Corresponding Sec.
Rev. D. Dole, Recording Secretary.
C. R. Bishop, Esq., Auditor.
Rev. S. C. Damon, Rev. L. Smith, Mr. J. T. Waterhouse, } Ex. Com.
Rev. W. P. Alexander, Preacher for 1855.
Rev. L. Smith, Alternate " "

☞ Our readers are referred to the Treasurer's report, in another column for an account of the Society's financial operations.

Hawaiian Evangelical Association.

During many years past, the American Missionaries have been accustomed to assemble at Honolulu annually, forming a body, styled the "General Meeting of the Mission." The Mission having been dissolved, when they assemble hereafter, it will be in an ecclesiastical body, styled "The Hawaiian Evangelical Association." This is not a new organization, but one which has existed for about thirty years. It is now in session, discussing various questions relating to the religious and educational welfare of the Hawaiian Islands. At some future time, it is our intention to publish the Constitution of the Association.

Members Present from Hawaii.—*Hilo*, Rev. D. B. Lyman and Rev. T. Coan; *Kailua*, Rev. A. Thurston; *Kau*, Rev. M. Kinney; *Waimea*, Rev. L. Lyons.

Maui.—*Lahaina.*—Rev. D. Baldwin. *Lahainaluna.*—Rev. W. P. Alexander, and Rev. J. F. Pogue. *Wailuku.*—Rev. Mr. Conde, and Mr. Bailey.

Molokai.—Rev. C. B. Andrews, and Rev. S. G. Dwight.

Oahu.—*Honolulu.*—Rev. E. W. Clark, Rev. L. Smith, Rev. D. Dole, and Rev. S. C. Damon. *Ewa.*—Rev. A. Bishop. *Waialua.*—Rev. J. S. Emerson and Rev. P. J. Gulick.

Kauai.—*Koloa.*—Dr. Smith. *Hanalei.*—Rev. Mr. Johnson, and Mr. Wilcox.

The Hawaiian Tract Society.

This Society held its Anniversary Thursday Evening, June 1st, at the Bethel, Judge Andrews in the Chair.

The Report of the Secretary gave an account of the Society's operations during the past year. The Report of Mr. Ryan, the Society's Colporteur, was also read.

From the Report of the Treasurer, it appeared that he had received as follows:

From donors and sale of books and tracts, - - - - -	$301 17
For Colporteur enterprise, -	747 03
Total receipts, - -	$1,048 20

The following officers were chosen for the ensuing year:

Hon. L. Andrews, President.
J. W. Marsh, Esq., Vice President.
G. M. Robertson, Esq., Secretary.
O. H. Gulick, Esq., Treasurer.
Rev. S. C. Damon, Mr. J. T. Waterhouse, Mr. G. B. C. Ingraham, } Ex. Com.

At the close of the exercises, a collection of about $71 was taken up.

The Hawaiian Temperance Society.

A meeting of this Society was held at the Bethel, Friday Evening. The President, Mr. G. B. C. Ingraham in the Chair. The exercises were opened with singing by the Choir—"Beware of the Bowl," &c.

Then followed remarks by the Rev. Messrs. Coan and Baldwin. Our limits will not allow us to notice more fully this and some of the other meetings which have been held.

☞ The Stranger's Friend Society holds its anniversary meeting this week, and next week, follow the Anniversary meetings and exhibitions of the Royal Hawaiian Agricultural Society.

Arrival of Chinamen.—Yesterday the British ship Lord Warriston, Capt. Cubitt, arrived from Hong Kong, after a remarkably short passage of forty-eight days. She brings seven hundred and eighty passengers, two hundred of whom are females. There are several other vessels on the way, all having a full complement of passengers; many vessels are also loading at Hong Kong with passengers for this port.—*California paper.*

☞ The Church of Lahaina, Sandwich Islands, some time since forwarded to the Executive Committee of the American and Foreign Anti-Slavery Society, one hundred dollars, to be awarded as a prize to the author of the best Essay on the subject of "*American Slavery a Formidable Obstacle to the Conversion of the World.*" The Rev. G. W. Perkins, Rev. J. W. C. Pennington, D. D., and Hon. Wm. Jay, were appointed judges to award the prize. Six Essays were submitted to their examination; and the two last named gentlemen concurred in awarding the prize to an essay which, on opening the accompanying envelope, proved to have been written by William Goodell, of New York.—*National Era.*

Free Will Offerings.

For the Seamen's Chapel, (seats free) supported by gratuitous contributions; and the Friend, one thousand copies of which are distributed gratuitously among seamen in the Pacific Ocean.

Names.	Chapel.	Friend.
For the support of the Chapel, several officers of the U. S. S. Saratoga,	$10,50	$10,50

☞ It was our intention to have noticed in this No. a volume entitled "Solomon Northrop." We shall do so, in our next.

Poetry.

For the Friend.

"And the light in the darkness appeareth."—John 1st 5th.
"And there shall be no Night there."—Revelations.

Shall Earth look up to heaven ever
With face convulsed by wrong?
Shall man, then, know his brother never,
Nor Truth inform the Strong?

A long, dark Night had brooded o'er us,
Wild deeds we've darkling done,
Now in fierce Passions bacchic madness,
Now round Pride's demoniac throne.

Late and lingering breaks the dawning,
Thick gathereth still the gloom:
But many a voice is loud proclaiming
Old Night's quick coming doom.

Not long shall Love from Power sever,
Nor seeming outweigh Soul,
Patience conquereth, Prayer's almighty,
Thought will gain its Christian goal.

The day *is* coming. Lo! bright its gleams!
Prayer's wings all mists disperse,
While 'mid the streams of the morning beams,
Faith eyes Sin's fading hearse. E.

For the Friend.

Lay Sermon, No. 3.

Intemperance—Its source.

The practice of using certain stimulant, narcotic, or sedative, drinks or drugs, to a greater or less extent, often to the serious injury of both mind and body, seems to be as old almost as human history, and as widely extended as the human race.

From the time of Noah, and the ancient Egyptian monuments that represent females of high rank enjoying the lordly right of intoxication, down to the present day, with Jew and Philistine, Greek and Roman, Persian and Indian, Chinaman and Hawaiian,—with the subjects of the oldest and most disciplinary institutions on the globe, as with those who have scarcely felt the power of institutions at all, these practices have existed. The Chinese writers, it is true, claim that neither opium, nor any substitute for it, was known in China till within the last two or three centuries. If this be so, though the statement seems to lack confirmation, China may possibly furnish "the exception that confirms the rule," to the otherwise universal fact.

Nor are we aware of this simply as a piece of information respecting others that concerns not ourselves. Most of us acknowledge but too often in our words or our conduct, that we too are liable to some one or other of the forms of intemperate indulgence that the same tendency, which we see in others, exists also in us.

The queries which naturally suggest themselves in view of this so universal tendency, are—what is its ground, and what is its extent, and its meaning? What is implied in yielding to, and what in resisting it?

Am I liable to these practices because my *body* demands for its health and satisfaction what experience soon shows to be its bane and its destroyer? Demands it too with a clamor and craving that *will have it*, in defiance of my reason and my will?

Is it true that this organism, which had seemed so marvellously beautiful and perfect, does yet resemble some machine, rarely complex and delicate in structure, but lacking an essential pivot or pinion within? Does it thus conceal an error in its very structure, a *lie* in its very constitution? Is it incapable of its normal action without rending itself to pieces?

We are not wont to conceive of Nature as a thus bungling artisan, nor of her Author as thus an inventor of lies; but what say in the case of alcohol, the most widely used of the substances referred to, we know, (thanks to physicians and temperance lecturers,) the process by which it produces both its agreeable and injurious effects upon the body. We have seen it mechanically permeating the tissues, without going the regular round of the circulation; in the blood, aiding in keeping up the vital heat, but at the expense of the processes for throwing off waste matter, and finally seizing, with a special affinity and avidity, on the most delicate portion of the body, the nervous system; and from that central seat of vital power, and medium of the conscious soul, exerting an influence in the one direction over all the corporeal functions, and in the other—now stirring the mind to preternatural action, and anon sinking it in folly, idiocy, and insensibility. We have seen, too, that when this action is often repeated, or long kept up, it does induce an organic craving for the substance used; a craving so strong that often the dormant reason and weakened will *cannot* resist. A craving, that, in spite of the advice of friends, the taunt of foes, the eye of pity and the word of warning,—in spite of life and its hopes, of death and its terrors, almost in spite of Heaven and Hell, *will* be satisfied. In this state we can have no doubt that the difficulty *is* in the organism—that the body does demand most imperiously, and will have what is its own destruction. But observing men, physiologists especially, say at once that this is a *diseased* condition, induced, and fixed, by a prior use of the substance for some other cause than the supply of the natural and healthful demands of the body.

But, if not directly abandoned by the *healthy* body,—are there not cases, where the body, thrown off its balance by subjection to the all-binding force of the civil and social institutions, does demand the habitual use of these substances as *substitutes* for the natural means of reparation of its exhausted energies?

Take for instance the extreme case—that of the over-worked employees of a large manufacturing establishment, such as we sometimes read of,—where men are tasked beyond their strength by each day's round of labor. With scanty clothing, insufficient food, want of sleep, and not even enough of the vital air of heaven, they must find the strength to still work on, or lose their wages. The sense of lassitude and exhaustion, the depression of spirits, the sluggish blood and pallid cheek, all of Natures intimations of a need of refreshment, they must disregard.

Does not in such cases the body demand these substances, not as the *best* thing, but the *best under the circumstances*—the *second best*: and do they not come as a kind gift of Providence, to meet a want foreseen, not as natural, but from the character of man, and his habitual treatment of his fellow man, inevitable?

After making all due allowance for the employee's disposition to throw of his responsibility upon his employer, we cannot doubt that there are numberless cases where men seem to be driven to the use of such stimulants by the exhaustion and lassitude of unavoidable over-work in order to keep up the power of working.

But here the fact meets us that the substance taken as a *substitute* for the natural means of nourishment does not *nourish* at all but only calls out the latent nervous energy, which nature keeps in reserve for great emergencies, giving a temporary vigor to be succeeded by a lassitude and exhaustion that require even more rest and refreshment than the man would have needed had he worked on without the stimulant. This fact is sufficient to prove that it is no *substitute* at all; while the physician tells us, that for the "natural modes of refreshment there is, and can be, no substitute. What nature requires in such cases is *food* and not *alcohol* or *tobacco*,—the *pillow* and not the *gin-bottle* and to attempt to cheat her by such pretended substitutes is far worse than idle.

The *body* then stands clear of all imputation of demanding these substances either in the *first* resort from imperfection in the original machinery, or in the *second*, from defect of the natural supplies from without.

If not in the body then, and its wants, where are we to look for the cause of the so prevailing tendency?—for the occasion of this prior use, which, so almost inevitably, results in an organic craving, and a debasing and destroying habit?

If the body cannot answer the question, what says the *soul*? What is its voice in our own experience? Are we, do we *feel* liable to fall into the practices in question because our bodies are not *well* without them, because the soul does not find the body a fitting instrument for itself—cannot act freely with it—till it has put under the influence of one of these substances? And so in the act a *free* and *rational* one on the part of the soul?—as it were rational sacrifice of the health of the body to the higher health of the soul? Is this our consciousness in respect to it? Or is it thus? That there is in us a constant tendency and attempt to make out a positive and complete happiness for the soul from the agreeable *sensations* of the body?—the fruitful source of morbid restlessness and mad craving for excitement.

The state of bodily health, the free play of every organ and of the whole of organs—a buoyant life in every part—is indeed itself a kind of passive bliss, the highest enjoyment of the brute,—but it is for us only the negative condition of enjoyment, by no means a human and satisfactory happiness. The corporeal life is naturally all *pleasurable*, but not designed, and not able to furnish any true *happiness*. And yet is it not often the case that the soul, restless and dissatisfied with its own proper enjoyments and welfare, strives to make for itself a satisfying enjoyment by titillation of the flesh, by absorbing and losing itself in the excitement and indulgence of a fleshy appetite—by awakening and reawakening a pleasant sensation—not rationally for the health of the body, and that it may have a vigorous organ, wherein to realize its own health and happiness but for the pleasure of the sensation itself.

It is the very definition of man that his

whole organism of body and mind is subject to him and the ends which he proposes, while all animals are subjected to the organism and its ends; and it is in virtue of this that man is not an animal, and is lord of all the lower creation. Yet is it not true that he often seems to strive to lose and bury himself in a mere animal delight, even till the body's capacity for pleasurable excitement is exhausted, and he is left to the misery of his own dissatisfaction from the failure of his instrument? Does not the soul often seem to rise and assert its proper dignity and freedom for a moment, only that it may with the greater energy and zest go back and wallow in the mire of sensual gratification, merge and submerge itself in the brute? Watch it as it thus denies its birthright of dominion and authority over all the appetites and passions of the lower part of it, and it makes itself the willing slave of one or the other of them for the pottage mess of a little pleasant tickling of the nerves of the stomach, for a little unnatural warmth of the system, for a little unhealthy and forced action of the brain,—perchance for a maudlin laugh and a drunken sleep; and then say whether we have not here the cause of both the intemperate indulgence and of the liability to it, not in the body or the circumstances at all, but in the diseased and irrational soul.

Apprentice system for the United States Merchant Service.

The scarcity of Seamen is the burden of complaint among sea captains and commercial men. Never in the history of commerce has it been so difficult to man our ships with competent sailors. What shall be done to remedy the evil? is the common and somewhat earnest inquiry.

A prominent remedy, we would suggest, is pay such wages for services rendered, and only when rendered, as will induce a better class of men and boys to go into the employment.

The sailor, formerly, and even now, does not receive as much for his services as the common hod carrier, or street scavenger, although he is obliged to labor seven days in the week, and liable to twenty-four hours in the day of hard toil, in addition to being in a sort of prison and at the risk of his life; and yet no labor more productive than his. Employ such men, and give such wages and encouragements, as will enable them to keep themselves and families above pauperism and want, is one step towards increasing the number and improving the character of our seamen, and promoting the safety and productiveness of our commerce.

Another remedy is suggested from various sources. Although it has been difficult formerly to induce Captains and owners to receive boys on board their ships to teach them seamanship; now the Apprentice system seems to be the chief remedy suggested.

We have before us a pamphlet on the subject by John W. Goin, one of the most respectable shipping masters in this city, advocating an appeal to Congress for laws regulating the Apprentice System, and obliging ships to carry from one to fourteen apprentices according to tonnage; the establishment of a Board of education and guardianship; and receiving ships in all our larger ports, as educational institutions for the boys, to make of them thorough sailors. This Board of Education to be also a judicial board in difficulties that may arise between owners or captains and their wards and sailors. Mr. Goin's pamphlet contains many excellent suggestions though in the details of his draft of a form of laws to be proposed we find some things objectionable, and needing amendment.

Another pamphlet before us on the subject, is from the pen of Captain Sullivan, of the Marine Mission at Large, Boston. That suggests a voluntary Apprentice System, the opening of intelligence offices, to which boys with the consent of parents or guardians may apply for voyages; and captains and owners for apprentices. He gives some facts to show that there is ample material in the country for the increase of seamen. When the clipper ship Great Republic lay in New York, a paragraph appeared in one of the city papers, stating "that the ship would receive forty boys." Captain McKay says, "I think I have received hundreds of applications. I get a batch of letters every day from all parts of the country of applicants, and referring to this notice; proving most conclusively that there is material enough in the country for sailors.

We have noticed before the formation of a company of sea captains in Maine, for an educational institution for young sailors.

An old sea captain, now a merchant in New York suggested to the writer, that the true plan is, that Congress, in connexion with the Navy, should establish an apprentice system for boys, having school ships in all our Navy Yards, for instruction and discipline. Let the boys be exercised in the revenue cutters. Let the revenue service be increased and become a coast guard to aid vessels in distress. Let such apprentices after a certain time be permitted to ship in the Merchant service. The Chamber of Commerce in New York, also has had the subject under discussion, and will probably petition Congress for laws regulating such a system.

Now if some plan can be devised embracing the prominent principles involved in all these schemes, with enough of the voluntary principle to make it work free and easy, comporting with our notions of liberty; with enough of law and government to give it a permanency and strength; with such a union of interest between sailor, captain and owner, Navy and Merchant Marine, so as to give activity and efficiency; it would greatly increase the the profits of the merchant, the comforts of the commander, the moral elevation and well being of the sailor. We hail these various simultaneous movements as an augury of good to the sailor. We hope they will all be guided by a spirit of enlightened liberality and philanthropy towards a long depressed class, yet depressed we must confess in a great measure by their own faults. Let the sailor lend a helping hand to these movements—desert the grog-shop—remember the Saving's Bank, till he shall be able to sail his own craft.—*New York Sailor's Magazine, April*, 1854.

Population of Great Britain.

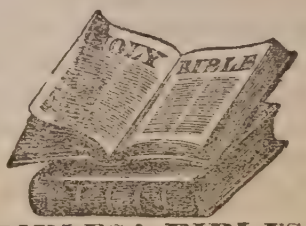
The census of Great Britain was taken on the 31st of March, 1851, when, it appears, the total population numbered 21,120,967. In 1801 it was 10,200,000; or a trifle more than doubled in half a century, besides furnishing some millions, as emigrants to her colonies, and to other parts of the world.

Information Wanted,

Respecting Amos Andrews, of the Bark "Harmony." He is known to have visited Honolulu in Nov. '53.-tf

ALSO,

Respecting John Alexander Cooley supposed to be on board some whale ship. Should he visit the Islands, he is requested to call upon the Seamens' Chaplain, or communicate with him.-tf



To Masters of Whae-Ships visiting the Hawaiian Islands.

YOUR attention is called to the followiing facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Sept. 1, 1853—6m-19

BIBLES! BIBLES!

JUST RECEIVED and for sale at the Chaplain s Study, BIBLES of various sizes and styles of binding. These books are imported by the Hawaiian Bible Society, and sold at the American Bible Socioty prices in New York, with the additional charge of actual expenses.

CHARTS.

JUST received by the undersigned, via Panama, a lot of superior Charts, of the North and South Pacific Oceans, extending from the Equator to 65° N. and 65° S. latitudes, embracing all the latest surveys and observations for the year 1853, drawn and engraved by Chas. Copley, New York.

Nov. 22d, 1853.—29 D. N. FLITNER.

"OFF AND ON."

SHIP-MASTERS AND SEAMEN belonging to vessels lying "off and on,,' can be supplied gratuitously with copies of the FRIEND, by calling at the Chaplain's Study, from 12 M. to 3 o'clock P. M.

Bound volumes on hand and for sale.

S. C. DAMON, Seamen's Chaplain,

Honolulu, March 1, 1854.

Barnes' Notes!

FOR SALE at the Chaplain's Study, complete sets of Barnes' Notes on the New Testament, Isaiah and Job.

Also a few copies of the cheap edition of UNCLE TOM'S CABIN.

Also Webster's Spelling Book.

☞ Any sailor unable to read, and desirous of learning, will be supplied with Webster's Speling Book gratuitously, unless he prefers paying for it.

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for cash, goods, or Bills on the United States.

The Friend sent abroad.

By paying in advance the subscription price, the Friend will be sent by the earliest opportunities, to the United States, England, China, Sydney, or any foreign country.

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4, 5, 6, 7, and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

Considering the ravages of the small pox, and the fact that the last was the first year of a general effort by the Native Churches to sustain their own Pastors, and the comparatively large contributions by the Hawaiian Churches, for the erection of church edifices and for other religious and benevolent objects, the falling off has not been so great as anticipated, and the future is full of hope. Money is needed to carry on the most important of all works committed to man, the evangelization of the world, and if the *hearts* of Christians are engaged in this momentous enterprise, and their prayers ascend in *faith* for its success, the Lord to whom belongs the silver and the gold will not permit it to be wanting in carrying on this great work, till it shall have been accomplished—in the subversion of the Prince of darkness, and the establishment of that of the Prince of Peace.

A. S. COOKE, Tr.

Audited and found correct,
Honolulu, May 31, 1854. J. HARDY.

A Card.

Honolulu, June 2, 1854.

DEAR SIR:—It gives me pleasure to communicate to you the following resolution of the Hawaiian Missionary Society passed unanimously at its annual meeting held at the Seamen's chapel in this place on Tuesday evening the 30th ultimo. Very respectfully

your ob't serv't.
S. N. CASTLE, Treasurer.

"Resolved, That the Treasurer be requested to convey to Mr. Ogden the thanks of this Society for his kind efforts to administer to the comfort of the Rev. B. W. Parker during his passages to and from Tahiti in the schooner Royalist in the summer and autumn of 1853. Also to Messrs. Porter & Ogden for the facilities afforded by them in the transmission of supplies via Tahiti, for Fatuhiva in the schooner Perla which recently sailed from this port."

To F. OGDEN, Esq.

☞ The Treasurer of the Stranger's Friend Society would acknowledge $10,00, "A widow's mite." From Rev. J. F. Pogue, $10 00.

MARRIED

In this city, on Wednesday evening the 17th inst., by Rev. T. E. Taylor, Mr. HUGO STANGENWALD to Miss. MARY C. DIMOND, eldest daughter of Henry Dimond Esq.

In this city May 22nd, by Rev. S. C. Damon, Mr. John L. King, to Kalawahine.

DIED.

At Cannemah, Oregon Territory, by the explosion of the boiler, of the steamboat "Gazelle," JOHN ROBERT DALY, aged 14 years, son of J. L. Daly, Esq., of Buteville, O. T

☞ Sydney papers please copy.

At sea, on board the schooner "Sovereign," May 5th, Mr. WM. SINCLAIR.

On Thursday, 11th Inst., MARY MADELINA, infant daughter of James Stewart, aged 5 months and 11 days. Sydney papers please copy.

THE FRIEND.

HONOLULU, JULY 6, 1854.

Anniversary of the Royal Hawaiian Agricultural Society.

The anniversary meetings of this Society were opened on the 13th June, at 11 o'clock A. M., at the Court House. The President, Hon. Wm. L. Lee, presented a most interesting and valuable report, which has been published in the "Polynesian."

After the reading of the Report of the Treasurer, G. Williams, Esq , other reports were presented.

On the evening of the same day, and at the same place, the Hon. D. L. Gregg, U. S. Commissioner, delivered the annual Address, which was characterized by the graces of literary excellence, liberal views of political economy, and a prophetic glance at the brightening future of the Hawaiian nation. As an Englishman would say, the address was a clever production.

The Hawaiian Musical Society favored the audience with some of their choice performances on the occasion.

On the following day took place the Exhibition of stock, vegetables, manufactures, &c., &c. In some departments there was not so great variety as on former occasions, but in regard to quality there was no falling off. The exhibition of horses is reported to have surpassed that of all former years.

We only regret that our narrow limits do not allow us to publish full details in regard to this interesting Society. We would merely add that no feature of Hawaiian agriculture, for 1854, appears more important or to greater advantage than that of wheat growing. The coming year, extensive arrangements will be undertaken, to produce wheat in various parts of the Islands. The successful experiment of Mr. Emerson, at Waialua, of raising wheat on land only a few feet above tide water, betokens much promise.

Masonic Festival.

The members of "Hawaiian Lodge, No. 21, F. & A. M.," celebrated the 24th of June in commemoration of St. John the Baptist. They marched in procession through the principal streets of Honolulu, to the Bethel, where an oration was delivered by R. C. Wyllie, Esq., prayer being offered by the Rev. L. Andrews. The singing on the occasion was in the highest style of execution After the public exercises had closed, the procession was re-formed and marched to the French Hotel, where the brethren with a few invited guests partook of a sumptuous entertainment.

The following toasts were duly proposed by Worshipful Master, P. T., Charles W. Vincent, and responded to.

1. The Memory of St. John the Baptist.
2. The King, Kamehameha III.
3. Her Majesty, Queen Victoria.
4. The President of the United States.
5. The Emperor of France.
6. The Foreign Representatives and Consuls.
7. Orator of the Day.
8. His Majesty's Cabinet.
9. The Grand Lodge of California.
10. The Ladies.
11. The Press.
12. The R. H. Agricultural Society.
13. The Founder of Masonry on the Hawaiian Islands.

Our narrow limits prevent us from giving more ample details of the celebration.

Corn Meal and Wheat Flour.

We would acknowledge our indebtedness to the Agents of the "Honolulu Steam Flouring Mill," for a bag of each. Their excellence is unquestionable. Most frankly we confess our unworthiness to partake of either, for our faith has been so weak in regard o the final success of this enterprise. Although we have hoped and wished to see the Sandwich Islands become a wheat-producing land, yet it has not been until the present time that we have believed that such a result would ever be attained. The originators and promoters of wheat raising and of the Steam Mill are deserving of all praise. May they obtain immediate profit and the thanks of posterity! It has sometimes been said that the American missionaries were not so forward as they should have been in promoting Hawaiian Agriculture. Most certainly the Rev, J. S. Green, of East Maui, will not come in for any share of this censure, so far as it relates to wheat growing; neither will the Rev. Mr. Emerson, of Waialua, Oahu, so far as relates to corn growing. Both have battled nobly with the worms, the elements, the soil, and public sentiment. No words can fully express our strong desire to witness the success of every description of agriculture on the Islands, but especially that of wheat and corn growing.

Honolulu Book Store and Post Office.

It is extremely gratifying to witness the improvements which have been made by Mr. Whitney in the old "Honolulu House."—Such changes bespeak enterprise and good taste. The miserable Post Office arrangements have hitherto been most discreditable to the city of Honolulu, the metropolis of the Hawaiian Kingdom. The gradual enlargement of Mr. Whitney's stock of books and stationery shows that our community is not altogether destitute of a literary and reading taste. We have a special reason for calling attention to the new Book Store, adjoining the Post Office; it is that all our seafaring readers may know that in Honolulu is to be found a good assortment of books, including Histories, Travels, School Books, blank books, &c., &c.

☞ No doubt all who received premiums at the late Agricultural Fair are highly gratified, but we are equally so with having been presented with a cask of sugar exhibited, manufactured at Dr. Wood's plantation, on East Maui. The sugar is of an excellent quality

☞ Island fruits are quite abundant at this season. Figs were never more plenty. Visitors on Maui and Kaui speak of strawberries and peaches. Pine-Aphles were brought up by the steamer from Kauai. Would that she might bring a supply of Chiromoyas, Strawberries and Peaches, on her present trip to the windward.

Scarcity of Seamen.

The Causes, and the proposed Remedy.

We have received a pamphlet with the above title from some person in Boston. The subject treated upon in this document is becoming one of growing and serious importance. The scarcity of seamen is not only felt in the seaports of the United States, but also in England, and other parts of the world. The "causes," and "remedy," are discussed in this pamphlet. The following extracts we are confident will be read with interest :

CAUSES OF THE SCARCITY OF SEAMEN.

"Several causes have contributed to produce the present scarcity of seamen ; prominent among which is, the custom, widely prevailing, of sailing our merchant ships with able seamen, to the exclusion of *apprentices*, or "green hands." This could be done without difficulty, so long as foreign sailors were abundant, and the offer of higher wages furnished inducement to abandon their own, and sail under the American flag. *Of late foreign sailors have constituted three-fourths of our entire marine.* But the recent discoveries of gold, and the increasing commerce of the nations of Europe in a time of general peace, has created a demand for seamen in all parts of the world, and caused a rise in their wages, the effect of which has been, to cut off our supply of foreign sailors. At the last accounts, seamen's wages in England, were fully up to the ruling price in this country. This new state of things has been taken advantage of, and several popular outbreaks or *strikes* among seamen; for higher wages, have occurred in the ports of Great Britain. So great is the scarcity of seamen in the British Navy, that recently a new screw ship, commanded by Captain Keppel—a popular officer—*was detained fourteen weeks in obtaining one hundred and thirty men.* In a recent report of a Committee of Naval Officers, it was stated that not more than *twenty-one thousand* available seamen are to be found in the United Kingdom at any one time ; and the British government, from the force of circumstances, are now resorting to new and hitherto untried measures, to induce seamen to enter the naval service. The case is no better with us. Speaking on this subject, a New York paper uses the following language : "There is no means of relieving the squadron on the Coast of Africa by another ship, because seamen cannot be got ; the clipper ships strip Uncle Sam of his men." It is well known that the Japan Expedition was detained for want of men, and that great difficulty exists in obtaining a supply for the Home Squadron. A ship-master writing from New York, under date of December 13th, remarks : "The Navy are about to make a desperate effort to get men by raising the pay ;" and adds, "It will be a great burden on the merchant service, to have the nation outbid the merchant, paying out the public money in such sums as to make competition ruinous."

Another cause of the scarcity of seamen will be found in the *desertions* from our own, and the ships of other countries in the gold regions A New York paper, in treating of this subject, says, "*It is calculated that the Pacific Ocean service, absorbs four thousand seamen every year*, that is to say, that number go out from the Atlantic, and do not return ; some going to California or Australia, others lingering in the Islands, or perishing ; there is no adequate supply for such an absorption, and hence the scarcity of seamen." To this statement might be added the fact, that of those who return to the Atlantic Ports, many of them enter our hospitals to die ; while some are so broken in constitution, or debased in moral character, as ever afterwards to prove either useless, or a moral pest on board every vessel in which they sail.

It may be well to remark here, that the Whale Fisheries furnish much fewer seamen to our merchant marine than is generally supposed ; the employment is not attractive, either on the score of compensation for labor, or as a means for gratifying the desire of travel. To many of our young men it has proved a deep sea lottery, with more blanks than prizes. As far as seeing the world is concerned, it is a world of waters, of which adventurous spirits soon tire; large numbers of young men who enter this service are satisfied with a single voyage, and leave the ocean, never to return. Even in the merchant service, this is oft times the case, not a few of the better sort of young men, become disgusted with forecastle life on account of its depraved character, and seize the first favorable momeut to free themselves from its contamination.

Another cause of the scarcity of seamen, is the multitude of clipper ships requiring large crews. From tables connected with the report of the Secretary, for 1852, it appears—that the average annual increase in size or tonnage of vessels built in the states of Maine, New Hampshire, Massachusetts and New York, for the previous sixteen years, was at the rate of 28 1-2 per cent.; while from 1849 to 1852, three years, (the last year inclusive,) it was 66 per cent. per annum.

In connection with the causes named, is the constant diminution by death. An estimate made at Lloyd's, London, fixes the life of seamen at 11 1-2 years from their commencing to go to sea, or an annual decrease by death of 8 3-4 per cent. The tonnage of the United States for the year 1852, foreign and coastwise—gross estimate—was 4,000,000 tons ; that of Great Britain, for the year 1853, was 4,424,000 tons; and employed 243,512 men and boys, or 5 1-2 persons for every 100 tons of shipping. Allowing to our own vessels 3 1-2 persons to the 100 tons, or less than two-thirds the complement of British crews and our marine will number 140,000, exclusive of the naval sevice; subtract from this number $8\frac{3}{4}$ per cent. annual decrease by death, and it amounts to 12,250; add to this of the number supposed to be absorded in the Pacific, say 2000, and there is a loss to us of 14,250 seamen annually.

The secretary of State of the United States, reports the increase of seamen by Registry, for the year 1852, at 9,798, which, compared with the annual decrease as estimated above, *leaves the annual deficiency of about* 4,500 *seamen.* The Registry is without doubt a fair exhibit of the annual increase of our native marine, although the impression prevails to some extent, that in the coasting trade, and the cod and mackerel fisheries, a large number of American seamen are employed who are not registered, and who would therefore be overlooked in a general estimate. So far from this being the case, three-fourths of those engaged in the coasting trade, and one half of all our fishermen are computed to be foreigners; of the balance, it may be safely be affirmed, that a large majority of them are registered seamen, who divide their time between fishing, coasting and foreign voyages.

Having considered the subject of the scarcity of seamen, and noted some of the causes, it remains to be seen whether there is not some effectual remedy for this great evil.—What then is

THE REMEDY?

It may safely be assumed that we have abundant means for meeting this exigency, if we shall employ them; what the means are, and how they shall be used, are important questions to be considered. A New York paper, alluding to this subject, says: "The supply of seamen has been short for a long time past, and it is believed by those familiar with the subject, must remain so, until our ships consent to take a certain number of boys, (as apprentices,) to make up their crews; a great many boys offer themselves, but are generally rejected." One of our city papers uses the following language on the same subject: "The race of American seamen is fast becoming extinct, and unless some remedy is immediately applied, the flag of our country will be upheld by foreigners." In this last quotation, both the evil and the remedy are stated with force and clearness. We want, then, a new race of American seamen, in whom we can repose confidence; the pecuniary interests involved in our vast commercial relations demand such, no less than the comfort and safety of the increasing multitudes of travellers by sea; especially do we need such a race of seamen, as the fitting representatives of a great, commercial, Christian nation. In justice to foreign sailors, it may be said with truth, that there are among them some of the best specimens of seamen that sail under the American flag; as officers too, they hold a deservedly high rank. While this is true, there are others of the most depraved character. To attempt to discriminate between the different nations represented on board our vessels, would be invidious and unnecessary; every ship-master knows where the difference lies. There is some doubt whether, morally considered, every American sailor is just what he should be, although this is not the place to discuss that question; *but whether foreign sailors are good or bad, better or worse than our own seamen, they are fast failing us, and it is no longer a question of choice between the two, but whether we will have American sailors, or lay our vessels up at the wharves!* If we then conclude to raise up a native marine, how is it to be done, and what shall be its character? Two modes for meeting the exigency present themselves, one of which we must choose. The first to be considered is—

A MARINE APPRENTICESHIP SYSTEM.

Much has been said and written on this subject of late, but no practical plan has yet appeared. Indeed, it may be doubted whether a system of marine apprenticeship can be devised that will meet the wants of our commercial and naval service; the attempt made in the navy, commencing about the year 1840

Poetry.

[For the Friend.]

"What though the radiance which was once so bright
Be now forever taken from my sight."

WORDSWORTH.

The glories of the open day,
Its varied voices melody,
Its flowing waters' sparkling play,
They will not from my memory.

Thick and dark the haze arose,
All Heaven's blue enshrouding,
Quite shut out was the bright day's close
As fast dark clouds came crowding.

The air was filled with wrestling winds,
Loudly rang the thunder's glee,
Amid the gloom stalk'd scowling fiends,
Within my heart was *misery*.

But now the stars above are gleaming.
The moonbeams on the waters play;
Saddest joy is in me beaming
'Neath holy night's benignant ray.

I grieve no more for that glorious day,
Pass'd is the storm's deep Misery,
With tears I pray that *Night* may stay,
And long with her to be eternally.

K.

2nd Anniversary of the Ladies' Stranger's Friend Society.

The annual meeting of this useful Society was held at the residence of Capt. Hackfeld, June 8th, when the following Report by the President was read:—[The Society has numbered forty-eight members during the past year. Five of this number have however left the islands, and one beloved member has been removed by death.]

PRESIDENT'S REPORT.

The Ladies of this Association at the close of their second year, have every reason to congratulate themselves upon the prosperous condition of their Society.

The results of past experience have prepared them to continue their benevolent exertions with more certainty and vigor than have characterized their efforts heretofore.

Feeling deeply the necessity which existed for such an organization, the Ladies of Honolulu with many doubts and fears, and without experience in their present field of labor, commenced their combined efforts for the relief of the suffering stranger. The citizens with a promptitude and liberality most commendable, generously contributed to raise a fund which places their institution upon a permanent basis.

The relief which they have afforded to the sick and suffering in our midst, has often been acknowledged by the recipients with overflowing hearts and eyes, and would, of itself, furnish an additional incentive, if needed, for our continued exertions.

Fifteen persons have received aid at our hands, and in the majority of cases their illness has been protracted. The Physicians have kindly continued their gratuitous attendance on the beneficiaries of the Society; and the fears that were entertained by some that our means would not be sufficient to meet the calls upon the Society have fortunately not been realized, although our expenditures have exceeded our income by $120. We have, however, been able by a careful economy to meet the wants of the destitute, and have remaining in our Treasury $182, after liquidating our liabilities.—This sum added to our annual income from the $2,000 invested, together with the annual dues of members, the proceeds of labor and the contributions of the charitable, we may consider as sufficient to meet our wants for the coming year. At the present time we have three persons dependent upon us for support.

Our Society has not benefitted others only, but its members in our social gatherings have been rewarded by a consciousness of doing good, and their re-unions have aided in smoothing down the asperities of social intercourse.

The Ladies of Honolulu will need no promptings to continue their efforts in this noble cause, for surely it is the cause of suffering humanity that makes its appeal to the kindly feelings of our nature, and a blessing is promised upon those who visit the sick, feed the hungry and clothe the naked.

TREASURER'S REPORT.

The Russian Church.

The Russian Church affects toleration. Of the vast population of fully 60,000,000, only about 45,000,000 are numbers of the regular Church; 350,000 are dissenters or hereics to that Church itself, 3,500,000 Roman Catholics are found throughout the wide domains of the Czar; and fully 250,000 Armenians. The protestations of the Augsburg Confession of Faith amount to 2,000,000—those of the Reformed Church to 54-000. There are 10,000 Moravians, while no less than 2,500,000 belong to the Mohometan creed. The the Jews 600,000 in number, and the followers of that mysterious potenate, the Grand Thibet, amount to no less than half that amount. There are creeds still more extraordinary throughout the enormous tract of territory which constitutes the Russian empire; 170,000 are open idolators, and no less than 600,000 are addicted to the disgusting practice of Eetichism, worshipping bats, cows and every uncouth specimen of brute, as representative of the divinity of heaven.

Both Houses of the Pennsylvania Legislature adjourned *sine die* on the 9th inst. Previous to the adjournment of the Legislature, a moderately stringent liquor bill was passed. It is not quite so severe as the original Maine law, but is nevertheless deemed sufficient to answer the required purpose.

A Washington letter states that the project for the purchase of the right and interest of the British Hudson's Bay Company and the Puget Sound Agricultural Company has been renewed.

Information Wanted,

Respecting Amos Andrews, of the Bark "Harmony." He is known to have visited Honolulu in Nov. '53.-tf

ALSO,

Respecting John Alexander Cooley supposed to be on board some whale ship. Should he visit the Islands, he is requested to call upon the Seamens' Chaplain, or communicate with him.-tf

TO SEAMEN AND STRANGERS.—The Seamen's Chapel is open for Public Worship every Sabbath, at 11 A. M., and 7 1-2 P. M. Seats free.

Seamen belonging to vessels (of all nations) visiting this port are invited to call at the Chaplain's study, in Chaplain street, where they will be gratuitously supplied with copies of the Friend and other reading matter. It will be most convenient for the Chaplain to receive calls from Seamen during the afternoon of each day.

A weekly religious conference and prayer meeting is held on Wednesday evening at the Vestry, and also at the same place, every Sabbath afternoon, at 3 1-2 o'clock. Seamen are particularly invited to attend.

Public services at the New Court House at 11 A. M. and and 7½ P. M., and also, Native Churches on Sabbaths, commence at 9 1-2 A. M. and 2 1-2 P. M.

The Seamen's Reading Room is open at all hours of the day. Strangers arriving and having late foreign papers are respectfully invited to aid in keeping said room supplied with useful reading matter.

Donations are respectfully solicited for the support of the Chaplaincy and the publication of the Friend. An anuual report of all donations is made to the Am. Seamen's Friend Society in New York. Any person contributing $50 is entitled to become a Life Director of the Society, and $20 to become an Honorary Life Member. tf.

To Masters of Whale-Ships visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Sept. 1, 1853—6m-19

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for cash, goods, or Bills on the United States.

The Friend sent abroad.

By paying in advance the subscription price, the Friend will be sent by the earliest opportunities, to the United States, England, China, Sydney, or any foreign country.

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4} 5, 6, 7, and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

THE FRIEND:

A Monthly Journal devoted to Temperance Seamen, Marine and General Intelligence.

Celebration of the Fourth of July.

The Anniversary of the birth-day of the independence of the United States of America was celebrated by the American citizens residing in Honolulu, upon a more extended scale, and with greater public demonstration than on any former occasion. The long cherished and deeply felt love for their native land burst forth in a manner highly gratifying to their national pride.

Our readers will obtain an idea of the public exercises from the following programme. We are most happy to record the fact that order, sobriety and propriety characterised the proceedings. The most interesting feature of the procession was the car containing thirty-two young misses, dressed in white and wearing wreaths of flowers upon their heads. Each one wore a scarf, inscribed with the name of the State which she represented. As there are but 31 States, it was a novel but quite appropriate idea that the District of Columbia should be represented.

The eloquent oration of the Hon. D. L. Gregg occupied a full hour in the delivery, but there was no indication of weariness on the part of the audience. The enthusiastic applauses which frequently interrupted the orator showed that his patriotic and American sentiments found a cordial response in the hearts of the large audience. The literary merits of the oration were of a high order. The orator, most opportunely, made a clear and eloquent exposition of the great and leading principles of the Government of the United States, showing most conclusively that the policy of the general government towards the individual States and territories, was admirably adapted to develope the resources of the country, elevate the people, and promote the highest welfare of the individual citizen and the nation at large. The oration was decidedly well timed, well written, and well delivered.

We would furnish our readers a more extended notice of the oration, but a copy was requested for publication in both the English and Hawaiian languages.

The other parts of the exercises were sustained in a highly gratifying manner. The original ode needs no laudatory remarks. The sentiments and the beauty of their versification are evidence that those lines must have emanated from an American patriot and poet. Too much praise cannot be bestowed upon Mrs. Fiddes, (an English lady,) whose musical talent enabled her to compose an original tune, suited to the difficult metre in which the ode was written. In singing, Mrs. F. was assisted by Mrs. Ford, Mrs. Coady, and Messrs. Fuller and Griswold. No part of the gratifying exercises called forth more enthusiastic applause. The very walls of the King's Chapel must have vibrated to the deafening shouts.

The Hon. B. F. Angell, U. S. Consul, presided on the occasion with much dignity. We are exercising much self-denial in limiting our description of this celebration; but our narrow space absolutely compels us to leave much for our readers to supply by the aid of their imaginations. The large Stone Church was filled to overflowing with Americans, Frenchmen, Germans, Hawaiians, and the representatives of not less than a half score of other nations. It was a novel, impressive, suggestive and animating scene, to witness such an immense audience gathered in the heart of the Pacific, to celebrate the birth-day of the National Independence of the United States of America.

ORDER OF THE DAY

FOR THE

CELEBRATION

OF THE FOURTH OF JULY.

The National Salute will be fired at 12 o'clock, M., near the Armory of the First Hawaiian Guard.

Immediately after which the Procession will be formed, agreeable to the following Programme; and the Public generally are respectfully invited to attend, and participate in the Celebration.

The line will be formed on the makai side of Queen street, the right of the line resting on Fort street.

The Ceremonies of the Day will take place at the large STONE CHURCH, commencing at 1 o'clock. Seats will be reserved for Ladies.

ORDER OF EXERCISES.

PRAYER,

BY REV. S. C. DAMON.

DECLARATION OF INDEPENDENCE.

Read by S. REYNOLDS, Esq.

NATIONAL ODE.

(Written by E. Pillet, Esq.,) By the Choir.

There's gloom upon the brows of Fate;—her mantle, half unfurl'd,
Reveals the war-blade flashing o'er the mighty of the world.
But 'mid the deep'ning shadows,—piercing through the cloud of war,—
There gleams the calm and spreading light of an immortal star,
Whose dawn makes glad our hearts to-day, as in the days of yore,
It cheered the hearts of struggling men, upon our own loved shore.

Proud empires arm in trembling, to ward the threatened blow;
The royal flags of Christendom are flutt'ring to and fro;
Yet 'mid the shock of nations,—howsoe'er the die be cast,—
There's one fair flag that floats secure, above the coming blast.
It is our own brave banner, which, hallowed in their gore,
Was planted by our fathers on a blood-redeemed shore.

Wherever men may dwell in peace,—where'er a ship may ride,
That banner is unfurled TO-DAY,—a thing of joy and pride.
The Spirit of the glorious Past comes smiling o'er the sea,
And sings her hymn of gladness at the hearth-stone of the free.
The wand'rer's heart is home again,—he pauses to adore
The Power that guards that distant home on Freedom's chosen shore.

And we, awhile though severed from the land that gave us birth,
May wear at heart its brightest gem 'neath every clime of earth;
And roam we to the east or west, or yet from pole to pole,
No clime can match the wealth enshrined within a freeman's soul.
God grant it be well guarded, and cherished evermore!
Till Time shall give an equal boon to bless each other shore.

ORATION,

BY HON. DAVID L. GREGG.

MUSIC—By the Choir—The "Land of our Fathers."

Immediately after the delivery of the Oration of the Day, there will be presented to MECHANIC ENGINE COMPANY, No. 2, on behalf of the Honolulu Merchants, a splendid Silver Speaking Trumpet.

It has pleased the Chief Marshal to make the following appointments:

Aides de Camp—A. J. McDUFFEE, C. W. VINCENT.

Deputy Marshals—D. N. FLITNER, A. J. CARTWRIGHT, Capt. JAMES MAKEE.

PROGRAMME OF PROCESSION.

AID. CHIEF MARSHAL. AID.

Band.
First Hawaiian Guard.
Officiating Clergyman.
Orator of the Day.
Reverend Clergy.
Military Officers of the Hawaiian Islands.
First Hawaiian Cavalry.
Civil Officers of the Hawaiian Islands.
Consuls and Representatives of Foreign Governments.
Heads of Departments.
Members of the House of Nobles and House of Representatives.
Fire Department.
Mechanic Engine Company, No. 2.
Ty Pong Tong Engine Company.
Chief of Police.
Members of Police.
Judges of the Courts.
Members of the Bar.
Medical Faculty.
Captains and Shipmasters in Port.
Mariners.
Boats' Crews.
Independent Engine Company Young America.
Representatives of States of the United States.
United States Citizens.
Foreign Citizens.
Hawaiian Citizens.

MARSHAL. MARSHAL.

Forms on Queen St., marches down Queen to Nuuanu St., up Nuuanu to King St., up King to Fort St., up Fort to Beretania St., up Beretania to Richard St., down Richard to King St., up King St., to the Stone Church.

After the Ceremonies at the Church, the Procession will be dismissed. Per Order,

R. A. S. WOOD, Chief Marshal,

A. J. McDUFFEE, Aid de Camp.

Presentation of Banner

TO YOUNG AMERICA ENGINE CLUB.

An appropriate introduction to the public celebration of the 4th of July, in Honolulu, was a presentation of a banner to the Young America Engine Club. The ceremony took place in Merchant street, opposite the store of Capt. Snow. The Company, marching to the strains of martial music, proceeded down King street to Nuuanu, thence down Nuuanu and up Merchant. A few moments after 10 o clock, A. M., the Company was drawn up in front of the building lately occupied by Mr. Stangenwald. Miss Fairbanks, to whom was assigned the honor of presenting the banner, appeared upon the piazza, holding the banner, which bears the following inscription:

PRESENTED TO

INDEPENDENT COMPANY

YOUNG AMERICA.

On the reverse was the following:

YOUNG AMERICA

WHERE DUTY CALLS
THERE YOU'LL FIND US.

INSTITUTED JUNE 20, 1854.

The presentation was accompanied by the following neat address by Miss. Fairbanks, and appropriate reply by Master H. A. Carter.

ADDRESS.

MR. FOREMAN AND GENTLEMEN OF YOUNG AMERICA:

Though a stranger, by the partiality of my companions I have been selected to present you, in their name, this banner, as a slight testimonial of their regard for your association.

How novel the scene that surrounds us! Young America united with Young Hawaii in celebrating the 4th of July, in one of the little islands of the Pacific Ocean!—Who feels that he is an exile to-day? Who realizes that wide oceans and barren deserts separate us from the hallowed associations of home? Not one. Though absent from our native soil on this glorious day, we are but fulfilling the destiny of our race. Our Pilgrim Fathers made the deserts of America yield to their toils, and blossom as the rose, and their children came hither,

"The land to redeem from Error's chains."

This concourse of people bear evidence that their labors were not in vain. You are better representatives of your country abroad than her armed navies and fleets of stately clippers. They show her power and prove her wealth; but your mission, like that of your forefathers, is to educate a nation.

Take this banner as an evidence of our kind wishes; emulate the virtues of your forefathers; celebrate the 4th of July,—it will remind you of their trials, their sufferings and their triumphs, and may you always "be found where duty calls you."

REPLY.

To you and your fair companions, Miss Nelly, would I, in behalf of the "Young America Club," return thanks for the very elegant testimonial which we have now the honor to receive. It is needless for me to assure you that the gift is received with the most grateful emotion, for that bright eye of thine running along that line of joyous faces has discovered more than I can find language adequate to express.

Your allusion to the celebration of American Independence by Young Hawaii and Young America is pleasing to us. We feel that the alliance of to-day is an appropriate one, for our hearts are warmly interested in the welfare and progress of this Kingdom, without affecting in the least our true love for our own country, and it is no assumption for me to say that Young Hawaii takes a similar interest in the prosperity and condition of the United States, for from that country the Hawaiiians received the light that brought them from their dark abode, and by that people they have been assisted to climb the ladder, until they reached the position they now hold, ranking on the platform with civilized nations. It is true that this day's celebration is a novel one for Honolulu. In years past the Americans have observed the day in festivals by themselves, but this year *Young Hawaii* holds up the banner with us, for she has been made aware of the stability and rank of American institutions; she has reaped benefits from the assistance rendered by the Americans, and she fully appreciates the blessings that she derives indirectly from the stand taken by our forefathers seventy-eight years ago this day.

Although the Ocean rolls between us and the spot where the Pilgrim Fathers first planted the banner of the free, we are *at home* and can commemorate the day with as much propriety as if we were in Philadelphia on the very spot where the Declaration of Independence was signed.

We feel that we are but fulfilling the destiny of our race in celebrating this day upon these shores, and although it can, this year, be called a novel scene—we intend to have it termed an appropriate one.

The rapid progress of tne United States is the comment of all nations, and we are proud to notice that Americans are respected thoughout the world. It is the manifest destiny of the United States to so conduct her government and institutions that she will before long rank as the strongest and most important nation of the Earth.

Much could be said concerning the respect felt for American institutions by foreign nations, but this is not the time or place. I will mention an anecdote of the celebrated British Admiral, whom we now hear of in the Baltic.

Sir Charles Napier in a conversation with Mr. Bedinger, the American Minister at Copenhagen, after making many compliments to the Americans, says: "I begin to believe in the description which some one of your orators gave of the American Eagle when he said 'he sits on the top of the Alleghany, dips his beak in the Atlantic and his feathers in the Pacific, stretches one wing over Canada, the other over Mexico, and grasps the Continent in his claws.'"

We, as Americans, have much to be proud of, and it will be the aim of this association to teach Young Hawaii, so that she may enjoy the same pride and blessing.

We thank you for the kind wishes of the thirty-two young ladies who in the festivities of the day represent the American States, and can only say in return, may you all be made as happy as we wish, and you will be blest indeed.

We accept with much pleasure the beautiful banner, and shall ever with grateful hearts remember the fair donors, and rest assured, "Where duty calls there you'll find us."

The delivery of the address and reply was accompanied by frequent and loud bursts of applause, which Yankees are skilled in making on the "glorious 4th." No sooner did the cheering cease, than the call was heard for remarks from Mr. Allen, H. H. M.'s Minister of Finance. He stepped from the crowd upon the sidewalk, and offered some peculiarly felicitous and appropriate remarks.

The assembly dispersed amid cheering, the band fanning the patriotic flame by playing Hail Columbia and Yankee Doodle.

☞ It is highly gratifying to the public that the "Akamai" has again commenced running. Now is the most favorable season of the year for travelling upon the islands. The weather, the steamer, and "dull times" in Honolulu, favor excursions upon the other islands. We sincerely hope the proprietors will receive the most abundant encouragement.

Foreign News.

On the morning of July 1st, arrived the RESTLESS, Capt. Paty, 12 days from San Francisco, bringing a large mail. We copy the following paragraphs from the "Polynesian:"

Dates by this arrival are to the 20th of May from New York, and from Europe to the 8th of the same month.

The news from the Seat of War, is full of interest, although no important movement had taken place in the Baltic. The bombardment of Odessa, in the Black Sea, by the allied fleet on the 22d of April, is announced and confirmed. Our latest Liverpool dates assert, that all the batteries and military stores were destroyed; two powder magazines blown up; twelve Russian vessels of war sunk; thirteen Russian merchant vessels laden with ammunition taken; the town and neutral property spared. All this was accomplished in a few hours, and the fleet had sailed for Sebastopol. The loss of life on the part of the Russions was not known, but on the side of the allies, but 8 were killed and 18 wounded.

The Allied Fleets in the Baltic.

A letter from Copenhagen, April 27th, that Sir Charles Napier, with the line of battle ships under Admirals Correy and Chads, were keeping up a rigorous blockade of the Gulf of Findland, which would render the escape of a single Russian ship impossible. Cruisers were stationed off Revel, Riga, Memel, Dantzig, Stockholm, Gothland, Bornholm in the Sound, Cathegath and the Gulf of Keihl, so that the whole Baltic Sea and the coasts are under strict guard. Numerous prizes had been taken. The Danish Government lingers on the side of Russia; the Sweedes are decidedly in favor of the allies. One Swedish line-of-battle ship and four frigates were in commission at Copenhagen, and more were being made ready. A most formidable force of row-boats is being organized by the Russians to harrass the invading fleets from the shallow waters. Eight hundred armed boats are already enrolled. All the boats of the Neva Yacht club are placed at the service of the State. A considerable number of these are assembled at Sweaborg and Cronstadt. Sir Charles Napier is so well aware of the formidable nature of this force, that he has hastily applied to his Government for a fleet of small steamers that may penetrate wherever row boats can.

The latest intelligence from Sir Charles Napier is contained in the following dispatch from Paris, May 6th. A letter appears in the Moniteur of to-day from the Baltic fleet. Sir Charles Napier was still at anchor about 4 miles from Stockholm. The ice was breaking up, and it was expected the Cronstadt would be open by the end of April.

ESCAPE OF A RUSSIAN CAPTURED VESSEL.—A letter from the Baltic, in the London Times, says that the Russian schooner Libertas, which had been captured by a British cruiser, had escaped. The captain of the Russian vessel managed to make his prize crew intoxicated, and carried them into Carlscrona in triumph. At the time of this intoxicating achievement, the Russian vessel was in tow of an English steamer with two other prizes.

SUGGESTIVE.—Fifty tons of medical stores including everything that would be required after a great naval battle, have been sent from England to the fleet in the Black Sea.

[From the Yankee Privateer.]

The Yankee Tar,

OR, SAILING UNDER A WHITE HAT.

BY MAINTOP.

Not long since I was much amused by a pretty good joke, which was played off upon the worthy captain of a Baltimore ship, which I will call the Tornado, by a 'yankee tar' who had not learned to 'pull the ropes' in vain; for his was an eye that saw not to forget;—his tarpaulin that covered a brain that was not unused to thought and ready wit. A long and happy life to him.

One day as I was standing leisurely smoking my cigar, upon a wharf in one of our large cities, I saw approaching the Tornado, one of those old speciments of a yankee greenhorn.—A tall time-worn hat was crowded on to the back part of head; his arms protruded from the sleaves of his swallow tailed coat, and his vest and pants had the appearance of being made long before he had arrived at the years of manhood.

Having got within a short distance of the ship he stopped; and in an attitude most befitting his personal appearance, stood gazing at the ship in seemingly astonishing wonderment.

The captain of the Tornado, observing our yankee, addressed him with, 'Well my hearty, what do you wish?'

'Wall, I'll be darned if I know what I wisb, but I kinder calkilate I should like to go to sea in that ar ship. She is a mighty big un, I kinder think a feller'll feel sorter to hum in 'er arter he's got acquainted,'

'Do you want to ship?' said the captain.

'I want tu hire out,' said our yankee, 'and I'd as livs hire out to work in that ar thing as any whar' else.'

'Was you ever on salt water?' said the Cap-

'No I never seed the salt water afore this mornin in my life.

'I would like to ship a hand, and if you will ship as an able seamen, I will give you first rate wages,' said the captain, with the evident expectation of having some rare sport.

'As tu bein able,' said the yankee, I calkilate I'm able tu du anything that any of ye are. So I do not feel a mite alarmed on that 'ar pint.'

'I am rather of the opinion that you would be seasick, and then you would not be able to do much, I take it, said the captain beginning to enjoy the sport.

'I don't know anything about yer seasickness, but if its anything like the measles, I'll be darned to darnation, if I want it round me. 'Taint ketchen is it?'

'Well it sometimes ketches a green hand,' said the captain laughing.

'Wall;' said the yankee, taking off his old white hat and giving it a beautifying touch with his coat sleeve,' if a good constitution 'll do to reckon on, I an't afraid to try it, by gingerbread.

'Well,' said the captain,' if you think you will ship as an able seamen, what will you go for by the run?'

'Well, that'll depend upon whar' yer goin said the yankee. 'I ollers make it my way, afore engaging, tu know what's to be dun, so as to make some kalkilations,'

'The ship is bound to Liverpool, and I want to know what you will go for, by the month out and back.

'Wall said the yankee, drawing from his pocket a huge jack knife, and for want of a shingle, began to cut and scrape his finger nails,' you said you'd give first rate wages if I'd ship, so 'atween you and I, I'll go for forty dollars a mouth.'

'That is rather round pay for a green hand,' said the captain rather dryly, 'however, we will step into the shipping office, and have you regularly shipped. I guess there'll be no trouble about the pay,'—and in a short time the yankee was shipped in due form as an able seamen at forty dollars a month.

'Now said the captain, you must know that the shipping rules are such, that if you ship as an able seamen, and cannot do an able seamen's duty you cannot draw full pay.—And if you are nothing more than a green hand, you can draw only a green hand's wages.

'And how much is that?' said our yankee opning his both eyes.

'About nine dollars a month,' said the Capt. And now if you have got any dunnage,' you had better be getting it on board.

Presently the Yankee came on board, not with a shirt and a pair of socks tied up in a cotton handkerchief, as might be expected, but with a regular seaman's chest, which he was careful to have well filled. And after it had been consigned to its proper place, our yankee soon made his appearance on deck, but a regular sailor's rig had taken the place of of the old white hat and short waisted coat.

The mate, thinking that in this instance, as in many others, 'that dress did not make the man,' and wishing to have his share of the sport sent the yankee aloft.

But to the surprise of all, before the 'ay ay! sir,' had fairly passed his lips, he was in the rigging, and was soon at the appointed place, and busy at work.

'How is this,' said the captain to the neat looking yankee tar, after he had returned to the deck. 'You told me when you came on board this morning that you had never seen salt water before in your life, and now you seem to know every rope in the ship.'

'Wall, if I don't you must have got some new ones that are not particularly wanted, that's all.'

But I want you to explain yourself. You have come to me with a lie, and now I want you to clear it up, said the Captain, not very well pleased with the idea of shipping a green hand at forty dollars per month.

'Well Captain,' said the yankee, with a gentle pull at the waistbands of neatly fitting duck towers, it means simply this, although I never saw salt water before this morning, yet I have sailed in every kind of craft, from an Indian's birch to a first class ship, and know as much about the ropes of a ship as twelve years experience on the lakes can teach me: but never was I regularly shipped for quite so good pay as at present. And now, said the yankee with a vain attempt to look serious, 'If you please I will take my advance pay.'

'The Captain was caught and made the best of it.

There were built in the United States in 1853, 1,711 vessels, the aggregate tonnage of which was 425,572 49.

There were exported from England, last year, 1,600,000,000 yards of cotton manufactures.

The aggregate value of private property in London is calculated to be *two and a quarter billion dollars.*

THE DEATH OF CAPTAIN PENDLETON.—The New London *Chronicle* contains the following particulars of this sad event, communicated to the owners. The letter is from the mate of the New England:

AT SEA, Jan. 23, 1854, }
Lat. 26 12 S., Lon. 34 15 W. }

MESSRS. MINER, LAWRENCE & Co.:—It is the most painful news I have to write to you, of the death of Captain Pendleton, (ship New England) and how he came to it. December, 1853, while cruising in South latitude 42 16, longitude 159 51, it being about 7 P. M., and fine weather at the time, the three officers in the waist; Mr. James Fish was at the time throwing porpoise blubber overboard to feed the albatrosses, there being a great many around at the time. Dunbar says, "Mr. James, go and get your pistol and shoot some of them." Mr. J. went down, came up and fired, but did not hit them. He went down and loaded again.

While he was loading, Captain Pendleton went down, handed a mug to the steward, with something in it, told him to warm it and pass it down, and he sat down at the larboard end of the table, where I seldom ever knew him to sit, and was reading in Bowditch's Navigator; Mr. J. put on the cap, at the same time was turning round to go on deck, the cock slipped from under his thumb and went off. The ball struck the book, went into the Captain's breast and killed him almost instantly. He only said, "You have killed me." I heard the pistol go off; I thought he was firing over the stern. At the same time I ran down. Mr. J. had the Captain in his arms. He only breathed a few times after I got below. Captain P. was very sick at the time, and had been since we left the islands. After the burial the next day, I consulted the crew, who thought it best to come home. * * * * *

CODDINGTON P. FISH.

For the Friend.

"*A building of God—a house not built with hands, eternal, in the heavens.*"

Have you ever seen this structure, reader? Has it never, in your thoughtful hour risen before your mental vision, in the enchanting proportions of its divine architecture? The organic structure of a healthful soul! The palace of a well-built mind, and a heart at one with the Eternal Love! The spacious mansion of a Christian character! This is the house built not by human inventions, but by the spirit of God; its halls all musical with joy—its walls all radiant with peace; and both halls and spacious apartments flooded with the light of the Sun of Righteousness—aglow with the warmth of redemptive love. Behold a soul having the "image of God" on its portal and in all the apartments of its life;—in word, act and thought;—inscribed "Holiness to the Lord." Is it not a God-built structure, and worthy of its builder? Is it not, indeed, both immortal and eternal? Can change pollute it, or relations of time affect it? Out of and above them all it perennially stands, "in the heavens" of the heart's own conscious joy—in the heaven of heavens of that divine Love which, embracing and embosoming all, ever strives so to reveal itself in all its rational creatures.

—to educate and discipline boys for the navy—signally failed. The principal difficulty in the way of marine apprenticeship in this country is, that it is not in unison with the genius and spirit of our institutions and people.—The system of Great Britain, with which we are most familiar, is objectionable, on the ground of its compulsory features; it encroaches on personal liberty. The condition and wants of Great Britain, however, are different from those of this country; there a coercive system may be best, the *press-gang* included; there, where "the overseers of the poor for any parish are authorised to bind any boy who may have attained the age of twelve years, to the sea sesvice, provdied such boys consent to be bound," (a happy deliverance for the pauper boy,) it may work well. But we have seen enough of this class of pauper sailors to cure us of any desire to witness the adoption of the system among us. Surely, intelligent, free America requires better materials for her merchant and naval marine than are furnished by either the prisons or poor-houses of the land; besides, a system of coerced labor cannot compete with that which is free. The seven years' legal apprenticeship, which prevailed in New England fifty years ago has been abandoned for the voluntary system of labor and compensation, graduated upon a scale of increasing ability.—With such advantages of employment *on the land*, with freedom of will and of action, it is not to be expected that a legal apprenticeship *at sea*, abridging personal liberty, will have commanding attractions for the high-spirited youth of our country. One other difficulty remains to be noticed. The apprenticeship act of Great Britain "makes it lawful for the master of an apprentice, or in case of the master's death, his executor or administrator, with the consent of the apprentice, if above seventeen years of age, to assign or transfer the indenture to any other master or owner." Some trouble would probably be met with in carrying out such a provision here, where property is widely distributed, and joint ownership is almost universal. And yet no system will be complete, or of any practical benefit without it. Who then, it may be asked, on the apprenticeshic plan, is to be master to the apprentice; shall it be one of the many owners, or the ship, or the captain? And when the vessel changes owners and captain, what then is the position of the apprentice;—to whom does he owe service? It will not be easy to reconcile these conflicting interests, and less so to obtain the consent of an intelligent youth voluntarily to put himself in such a position. If, then, the apprenticeship system is not the remedy for the evil, probably it may be met by

THE VOLUNTARY SYSTEM.

This contemplates a native marine, to be created out of volunteers or green hands, who commence a sea life young, in the merchant service, which is the proper place to learn seamen's duties. The plan briefly stated is as follows.—To open an intelligence office in each of our large seaports, where, on application, youth of good character may learn of an employ, and ship-owners and ship-masters may find youth of the right stamp for their vessels, as set forth particularly in a circular published in connection with this report. The plan proposes that every vessel take a proportion of green hands, at the discretion of owners and officers, to be selected by a competent person devoted to the interests of the owners, to be treated as wards of the ship, and protected in their rights, persons and property, and dealt with in a way to make them high-minded, honorable men, and good sailors, and with the understanding, if it prove mutually advantageous, that they are to serve a term of from three to five years, or until they are 21 years of age, with the prospect of promotion and permanent employ thereafter. That during the whole period of service they are to be considered as belonging to the ship, and identified with their owners and employers, and under pay; receiving such rate of wages as may be agreed upon, with an allowance for board on shore, when it shall be for the interest or convenience of the employer, with such privilege of visiting home in the interval between voyages, as may be reasonable and proper. When at length the term of voluntary apprenticeship, (for such it is,) shall expire, that a certificate be furnished them by their employers, of good character, ability and faithfulness, to be registered in the Custom House of the district sailed from, and which, in addition to its value as a means of helping them forward in the merchant service, shall entitle them ever after to the highest wages as able seamen in the navy of the United States, and to the consideration of the Naval Board as candidates for promotion in the naval service. Let these terms of voluntary apprenticeship become general and there is strong ground for believing that the character of seamen will soon be redeemed from the reproaches now heaped upon them; for it is in the use of such means, and through their influence, that men living in the bosom of society become honest, industrious, ambitious, thrifty and moral. It is too much to expect of sailors that they will be as good as other men, when the means for making them os are left unemployed.

The Game of Europe.

It is intimated from intelligent and reliable sources, that the true cause of the aggression of Russia upon Turkey is one which is nowhere officially avowed, the rivalry of the great powers of Europe. Russia in her attack upon Hungary incurred great expense to put down the republicanism of 1849, and she has got no compensation; while France, under pretence of supporting religion, has got Central Italy; Austria has not only secured Hungary, but is extending her power over Northern Italy; and Engand is making conquests in Burmah, and elsewhere.

"The czar," say an able writer, "now reason thus with himself, and privately with foreign ambassadors: 'Shall I do all this for nothing? Shall my gold and silver, and material of war, and the best blood of my gallant army be freely sacrificed, and I and my empire have no return? Is France to gain an entire realm, a prize worth half a dozen campaigns, and I gain nothing? Is Austria, whom I have saved from absolute annihilation, to gain new extensions of influence in Northern Italy, and I to pe put off with no extension whatever? England is extending in Burmah, and indeed all over the world, and am I alone to be cooped up, and to have no compensation for my services to royalty? Is the balance of power to be out of sight, and all to grow stronger but me, the chief reliance, the main stay of imperial and kingly authority everywhere? Moreover Louis Napoleon is stealing the heart of all Catholic and Greek Europe, by styling himself 'The Protector of the Sacred Places!, and is my empire to be overshadowed, and I belittled? He controls Rome, and bysecret treaty with the Porte, he has special privileges at Jerusalem; what is left in the religious world for me, but to wrest to myself the protectorate of all Christians in Turkey? It is reasonable that I should have it; if not, I will have the Danubian provinces, those very provinces that I saved from asserting their independence in 1849.'

"Such ideas and such reasonings are at the bottom of the present direful movements in Europe; but what statesman of the five great powers dares to avow them? Who dares to avow the combinations of depots in 1849 to render more odious and galling than ever their iron rule?

"The overthrow of the recent Roman republic, and the necessary giving up of Central Italy to France, was done under the cloak of religion; and now, as a counterpart, religion is again made the mask for the exercise of Russian sway over Turkey.—[American Messenger.

PAT'S IDIEA OF A DIVORCE.—A few days since a lawyer in Boston was seated in his office, employed in studying out a plea, when the door opened, and a young son of Erin entered, doffed his hat, and said he desired to take advice of his honor.

'The lawyer told him to be seated, and asked his business.

'Shure,' he replied. I want a divorce from my wife Biddy.'

'The lawyer asked what was the trouble, but Pat seemed loth to tell.

'Does she not treat you well, does she not take care of your house, has she dressed you or does she like any any one better than yourself? where inquiries made by the lawyer who endeavored for some time in vain to pump out the desire for a divorce. At last weary of the investigation, the disciple of Coke informed his would be client that he could do nothing for him without knowing all the facts of the case.

'Well, if I must I must,' replied the husband; shure there's a little darlint I love better than Biddy.'

The lawyer could hurdly refrain from laughter sufficiently to inform the Hibernian that the law could not touch such a case as his, and Pat left with a countenance, 'more of sorrow than of anger.'—[Boston Traveller

MR. BORTON, of Hong Kong, writes to the *Friend* of China, insisting that he has discovered a method of deducing the longitude by a common watch. "The method is simply this: the difference of time of the moon's distance by day or night gives the longitude by the longitudinal table under any meridian. Take the angular distance of the sun and moon in sight,—compare that with the Nautical Almanac, lay off the nearest distance to that, and note the time of contact in your instrument, the difference of that time of the ship and time by Nautical Almanac, agreeing to that distance, is the longitude of the place of observation. This may be effected at any time, having true mean time, which may be always obtained by finding the time at sea."

THE PIONEER.

By the last California mail, we have received Nos. 5 and 6 of this new monthly magazine, published in San Francisco, by W. H. Brooks & Co. Enterprises of this description meet our most cordial approval.—Hitherto Californians have shown that the "almighty dollar" has been the Alpha and Omega of their aims; hence we are glad to see that literary pursuits and aims are not now altogether lost sight of. The Pioneer indicates that the minds of men are taking a somewhat more elevated range; and we hope they will soar higher and higher, until authorship of the highest order, in science, morals, literature and theology, shall characterise the dwellers within the "golden gates," where hitherto, alas! the sarcasm was too true,

——"All hearts
Are chilled into the selfish prayer for gold."

Should any of our Island readers desire to subscribe for the "Pioneer," they can do so through Mr. Whitney.

The Makee Block.

We have watched with emotions of delight and gratification the successive courses of stone and brick, which have gradually arisen, forming the handsomest and most noble structure on the Hawaiian Islands. It lifts its spacious roof aloft, so that a person standing upon the top can survey, without any intervening obstruction, the complete circle of the horizon. The view is grand and commanding—seaward from Diamond Head to Barber's Point, and inland from the sea to the summits of the mountains. If any of our American readers wish to know how the Block appears, let them view a handsome, three story, corner brick block, with granite front, in Boston or New York! It is gratifying to know that the apartments and stores have for a long time been let. May other similar buildings, in due time, occupy sites where now stand buildings of far humbler pretensions. May success attend the projectors, owners, builders and occupiers of this noble structure.

"Boat, Sir."—The boat-boys, on the 4th, turned out strong, and drew a neatly painted boat, carrying seven Hawaiian youths, representing the seven principal islands of the group.

☞ We are desired by the Treasurer of the "Ladies' Stranger's Friend Society," to acknowledge a donation of $50,00 from a Friend, 5,00 from Mr. Holcomb, and sale of cheese, at the Agricultural Fair, donated by Mrs. Johnson, Kauai, $6,00.

☞ The reader will observe that pages 51 and 55 are misplaced.

☞ In this number we conclude our brief notices of the anniversaries of our various societies. The list has already become somewhat extended, but the public meetings have generally been well attended. It may be interesting to some of our readers to see a full list of Hawaiian societies holding their Anniversaries in May and June :—

Hawaiian Bible Society, Hawaiian Tract Society, Hawaiian Missionary Society, Hawaiian Evangelical Association, Childrens' Missionary Society, Hawaiian Temperance Society, Ladies' Stranger's Friend Society, Hawaiian Masonic Lodge, and R. H. Agricultural Society.

It is impossible to state the annual income of all these various benevolent institutions, but the sum total would not probably fall below $10,000. Judging from our personal knowledge of the influence and usefulness of these societies, we cannot imagine how that amount of money could be more beneficially expended. We hope their influence and usefulness may be greatly increased, and may they vie with each other in diffusing abroad joy, peace and happiness.

Interesting Relic.—There was exhibited at the celebration, on the 4th, during the delivery of the oration, a small tea-stand, at which Washington and Lafayettc drank tea, subsequent to the battle of Monmouth, 1778. (It was during the same year that Captain Cook discovered the Sandwich Islands.) This article of furniture has been handed down in the family of the ancestors of C. W. Vincent, Esq. The orator of the day made a most touching allusion to this memento of a momentous era.

The Balloon.—As the procession entered King Street from Nuuanu, a balloon was seen to rise and soar far aloft, finally disappearing seaward. Report said the name of *Washington* was inscribed upon it, although it was too far off to be distinctly read.

☞ We would acknowledge files of our regular exchange papers, also favors from James Ludlow, Esq., San Francisco; the Hon. H. W. Seward, Washington, and Adams' Express Agents, San Francisco.

"The Friend" in Wrappers.—Persons desirous of procuring this number of our paper to forward per the next mail, will find them at the Polynesian Office. Single copy 12½ cents, and 12 copies, $1,00.

Religious Notice.

The Congregation Worshipping at the Bethel is hereby notified that there will be no public service there the coming Sabbath, in consequence of painting and whitewashing. The meeting in the afternoon in the Vestry Room as usual.

S. C. DAMON,
Seamens' Chaplain.

Honolulu, July 7, 1854.

MARRIED

By Rev. S. C. Damon, June 23, Mr. Henry Welter, to Kapiika, both of Honolulu.

DIED.

On the eveningof the 14th June, after a long and severe illness, which she bore with Christian fortitude, Harriet S, the beloved wife of Robert G. Davis, Esq., aged 28 years.

In Honolulu, June 29th, Mr. S. Erwin, of Consumption. Mr. E. arrived here sick, on the 23d of April in the clipper ship Lightfoot, from California, where, we understand, he has friends residing. With the bright and sustaining hopes of the Christian, Mr E. passed from a world of sorrow and suffering, to one where sickness and death are unknown.

At Dr, Ford's Hospital May 22nd, Charles Turner, belonging to Astoria, Oregon.

Also, June ——, James Armstrong, belonging to New York City.

Also, May ——, John Stokes Milue, belonging to London He had resided for several years on the Islands.

Passengers.

Per Restless from San Francisco.—Mrs. John Paty and child, Messrs. D. C. Waterman, W. Fell, B. F. Snow, D. C. Stocking, Geo. McLane, W H. Stewart and lady, N. G. Feldham, F. W. Fitch, Master Wm. Fitch, Messrs. Ah Tuk, Ah Chee, Hong, Ah Kow and Ah Hio.

MARINE JOURNAL.

PORT OF HONOLULU.

Arrivas.

June 3d, American Ship Mischief, Lawrence, 10 days from San Francisco.
June 3d, " Schooner Kaluna, Condage, 22 days from Puget Sound.
June 10—Am brig Noble, Robertson, 139 days from Boston.
10—Russian Frigate Diana.
13—Br. ship Eastern Star, Sterling, 55 days from Sydney.
June 19.—Haw. bk Luika, Corwin, 22 ds fm Puget's Sound.
" " —Haw sch Maria, Riddell, 13 ds fm St. Bartholomew.
" 21.—Am. ship Nile, Rose, 25 ds fm Puget's Sound.
July 1—Am schr. Restless, Paty, 12 days from S. Francisco.

Cleared.

June 2d, Ship Lady Pierce, Japan.
" " Chilean Bark Haldera, Hong Kong.
June 3d, American Ship Mischief, Hong Kong.
" " " Schooner Flying Dart, San Francisco.
June 20 —Am. brig Noble, Robertson, for Petropaulovski.

INFORMATION WANTED.

Respecting CHRISTOPHER H. MARBLE, belonging to Newport, R. I. In July, 1852, was attached to the English schooner "Ayrshire Lass," which sailed for Sydney, where she was sold. Since that period no intelligence of him has been received. Should this notice fall under his observation, he is requested to communicate with the Editor of the Friend, or with Mrs. S. A. Marble, Newport.

Respecting WILLIAM CHARLES BUTLER, belonging to Poughkeepsie, N. Y. He left the U. S. eight years since, a sailor on board ship "Newark," Capt. Pendleton, and is supposed to be now in some part of the Pacific. He is desired to communicate with the Chaplain, at Honolulu, or with his mother.

GEO. A. LATHROP,
Physician and Surgeon,
Honolulu, Oahu, S. I,
Office at the Market Drug Store. Residence corner of Fort and Beretania sts., next above the Catholic Church.—Langherne, Druggist, wharf street, next door above Spencer's Store.

THE FRIEND.

HONOLULU, SEPT. 1.

Journal of Events.

July 12—LAUNCH.—Hawaiian Schooner VICTORIA, launched from the ship yard of Emmes and Johnson, in Honolulu. A large concourse gathered to visit the novel sight

July 17—COMBINED FLEET.—This day arrived, seven vessels of war. English Steamer, Virago, Frigate President, Frigate Amphitrite, and French Frigate La Forte, Frigate L'Eurudice, Corvette L'Artemise, Brig L'Obligado.

July 18.—Salutes exchanged between Hawaiian Government, and English Admiral's ship.

July 19.—Salutes exchanged between Hawaiian Government, and French Admiral's ship.

July 19.—British and French Consuls, visited officially the combined fleet.

July 21.—An audience was given by His Majesty, to English and French officers, at the Palace.

To-day arrived, new Steamer Polynesian, Captain Rogers, 9 days from San Francisco.

The beautiful and new Drug Store of Dr. Hoffmann, opened, at the corner of Kaahumanu and Queen sts. See advertisement

22d.—The King, Chiefs and Government officers, embarked on board the English Steamer Virago, for short cruise.

20th—An Act, passed the Hawaiian Legislature, appropriating $5,000 for the encouragement of Hawaiians learning English.

23d.—American schooner, "Lady Jane," arrived from Callao, reporting the yellow fever in Peru. Only 26 days from Callao. She brought several passengers, who had gone to Peru from Australia, for the purpose of gold-digging *somewhere*, about the sources of the Amazon!

25th.—The Combined Fleet sailed to-day, at 10 o'clock, A. M. At half past seven, P. M., Miss Catharine Hays, of world-wide reputation, gave a Concert to a crowded audience, at the Court House.

26th.—The new Steamer, "Polynesian," made an excursion of several miles, allowing the Honoluluans, who were on board, to see the "other side of Diamond-Head."

27th.—American Bk. "Fanny Major," sailed for Australia, having on board Miss Kate Hays, as passenger.

A steamboat meeting was held this evening, at the Court House, for the purpose to exciting an interest in this community, in behalf of a line of steamers, between San Francisco and Honolulu.

The ordination of J. W. Smith, M. D., over the Native Church, at Koloa Kauai. Sermon by the Rev. G. B. Rowell, of Waimea.

29th.—The Steamer "Polynesian" sailed for San Francisco. Stock, to the value of $30,000, was taken up by residents in Honolulu, on condition that the boat should run between Honolulu and San Francisco.

July 31.—ANNIVERSARY OF THE RESTORATION.—This is the eleventh anniversary of that interesting event, in Hawaiian Annals. The Provisional cession of the Islands to Great Britain, under Lord Paulet, took place on the 25th of February, 1843. The British Flag was hoisted on all the islands, and vessels belonging to the natives. This order of affairs was continued until July 31st, of the same year, when the Hawaiian Flag was restored, in a manner highly gratifying to His Majesty and people; by the magnanimous and honorable conduct of Rear Admiral Thomas, at that period, Commander-in-Chief of H. B. M. Naval force in the Pacific. Subsequent to the restoration of the Hawaiian flag, the Admiral took up his residence in Honolulu, for a period of seven months, during which period he secured the esteem of the foreign resident community, by his familiar and friendly intercourse, as he had done that of the Government, by his official acts.

The Anniversary was celebrated by military display, parade of "Mechanic Engine Company No. 2," and Levee at the palace.

Capt. Makee, Dr. Hoffmann, and Aldrich & Bishop, gave a sumptuous lunch, to gentlemen and ladies, at the opening of the new block, corner of K. and Queen sts.

August 3d.—The Holland ship Oud Nederland, J. Riper, arrived, 72 days from China. She had on board 455 Chinese passengers. When the vessel arrived, only one cask of water remained. The vessel touched to obtain a suppy of water.

Aug. 10th —Two house lots, sold in Honolulu, at auction, one for $1,715, and the other for $1,200.

Aug 11th.—F. J. Porter, of the firm of Porter & Ogden, of Honolulu, committed suicide, having first attempted to kill a native woman. The Jury of Inquest testified, "that his death was caused by means of a pistol, fired by his own hand"

Aug. 11th.—The Appropriation Bill, of Hawaiian Government, was approved, making provision for the expenditure of $431,439,49, out of the revenue of the current year. The following are among the items of expense:—

For His Majesty's Privy Purse,	$10,000
" " " Royal State,	4,000
" The Heir Apparent,	3,000
" Six Privy Councillors, each	800
" King's Ministers, each	4,000
" Salary of Chief Justice,	5,000
" Public schools,	23,000
" Department of War.	30,000
" Dredging harbor of Honolulu, &c	40,000
" Government Printing Press,	12,000
" Support of Police of Honolulu,	16,000
" Prisons on Oahu,	20,000

Aug. 12th.—Hawaiian Parliament prorogued, by the King. The following is the translation of the King's laconic message to the House of Nobles:—

NOBLES—"In the exercise of my Prero-"gative, I prorogue your session.

"I thank you for the acts that you have "recommended for the good and safety of my Kingdom."

The King's message to the Lower House, bringing the Hawaiian "Long Parliament" to a close, is rather more lengthy, but not quite so "gracious." It is a noted saying of Cromwell, "Trust in God, and keep your powder dry;" but our good King Tamehameha III, declares thathe will trust in Providence, "In the absence of adequate means to suppress insurrection." We suppose this is an allusion to the fact that the Lower House did not appropriate ample funds to pay soldiers and buy powder! But here follows the King's address:—

[TRANSLATION.]

Representatives of my People:

After a Session of unprecedented length, I relieve you from further attendance in the Legislature. I hereby prorogue you.

In the absence of adequate means to suppress insurrection, I must trust to Providence for the protection of my Kingdom, and to your loyalty, to recommend, both by word and deed, quiet subjection to law and order

Later from China.

Progress of the Revolution.—From Peking, accounts are not receieved with full credit. It was reported that the northern section of the insurgent army had sustained irretrievable reverses, and that two thousand rebels had been slaughtered in one battle, and three or four hundred in another. The Friend of China says that the insurgent army consists of three main divisions, besides the central body in occupation of Nanking and Chinkeang-foo, and concludes that the insurgent army never were on the whole more victorious and powerful. Several principal cities in the Hoo-nan and Hoo-pih provinces have been taken. Important cities in the province of G'nan-hwai have been taken, and in one of them the Governor of the province was slain. The G'nan-hwai section of the insurgent army appears to be advancing through the Green tea districts, towards the sea board, and the local rebels at Shanghae expect succor from this body. Tho whole aspect of the revolution is indicative of its speedy completion.

Rescued Passengers of the Sarah Moore.—The British ship Sea King arrived at Hong Kong on the 2d May, bringing from the Raven Islands, in the North Pacific, eighteen passengers and the carpenter of the wrecked American bark Sarah Moore, of San Francisco. The Sarah Moore sailed from Sydney for San Francisco on the 4th of Septemper last, having on board, besides the crew, eight cabin and twenty-two steerage passengers. In the cabin were Mr. and Mrs. Ross and four children. The vessel sailed for two or three weeks in the direction of the Friendly Islands, where the captain proposed trading. Ross and his wife having had a difficulty, the husband was tied hand and foot, and landed on an Island called Rotamar. The rest of the passengers tried to prevent the captain, who, backed, by his mates, threatened to shoot any one who interfered On the 4th Dec. the ship hove to, off Nottick, one of the Raven Islands, where the boat was sent ashore for hogs, and the master gave charge of the deck to a European, from the Island, who professed to be a pilot. Suspicions were aroused by the conduct of this man, who permitted the vessel to drift on the reef at high water. The value of the cargo was $2,000, There was but five or six natives on the Island who treated the passengers well. On the 17th of March, the American whalers Delta and Thomas hove in sight, and sent boats on shore, taking off the captain, cabin ladies, and crew, the crews of the whalers promising to return next morning for the rest, and take them to Guam. They did not do so, and the next day the whalers were out of sight. Before this, two of the crew, three passengers, and a native started in a whaleboat for the Island of Ascension, but were never after heard of, and are supposed to have perished. Among those left on Nottick were Mr. and Mrs. Power and two children, who endured great privation until the 20th April, when they, with the others remaining, were rescued by the Sea King. One of the passengers and two of the crew preferred remaining on the island.

It is said that the land of Palestine has been mortgaged by the Sultan to the Rothschilds, for a loan to aid in the Turkish war. The probability is hinted at of establishing a Jewish kingdom there

Panama Route to Australia.

Capt, David D. Porter, of the steamship Golden Age, communicates a highly interesting letter to the Panama Star and Herald, which contains much interest in connection with Pacific Steam Navigation:

We left Sydney deeply laden with coal, (and very bad coal it was,) we anchored in Tahiti in thirteen days and a half—distance run, 3,421 miles—and 144 of current against us. We remained in Tahiti six days, and took on board in eighty working hours, 1,140 tons of coal, employing the natives, who with proper arrangements, would do it in one-third less time. We left Tahiti on the 31st of May, and arrived here in eighteen and a half days—distance run 4,532 miles, 515 miles of currents against us; making the whole distance actually run on the trip 8,613 miles. Returning from here to Sydney a ship would only have to run 7,063 miles, owing to the current and winds being in her favor the entire distance, which would make a difference of six days in the voyage, and likely it might be made in seven days less time from this end than from the other. No river was ever smoother than was the Pacific the whole voyage, with the exception of three or four days after leaving Australia, when the weather was a little rough, we had scarcely a sea-sick passenger.

Tahiti offers every facility for provisioning a ship, and in the beauty of the scenery, manner and customs of the natives and native "pic nic" the passengers found constant amusement. The harbor is one of the most beautiful I ever saw, and a ship can lay alongside of the dock tied up with a small rope, when she can be supplied with water of the sweetest kind in a few hours. The island abounds with the most delicious fruits belonging to the tropics, of all kinds—and the health of the place is undisputed. The French authorities are extremely anxious for the establishment of a line of steamers, and offer every facility any one could desire. To us they were exceednely kind and attentive; and to Gov. Page I am very much indebted for his promptness in anticipating our wants. That such a line will eventually succeed there is not the slightest doubt; and the only thing that would likely prevent travel this way at present is the trifling difficulty about crossing the Isthmus. The following is the time which this ship would make on another voyage, and the whole time it would take to reach England:—From Sydney to Tahiti, 11 1-2: Tahita to Panama, 16 days; to cross the Isthmus 9 hours; from Aspinwall to England, 18 days. Forty-five days and nineteen hours, with three days detention in coaling at Tahiti; returning it would take forty days with three days detention in coaling. The overland route can never come up to this time. The consequenee will be that all the mails will come this way; the specie will follow the mails, as a matter of course, for the drafts on England will go in the mail bags.

New York Harbor.—The harbor presented a beautilul spectacle one morning in May last. From the cupola of the Revenue barge office at Whitehall, as far as the eye could take in the waters of Upper and Lower Bays, the North and East Rivers from the Palisades to Williamsburgh, could be seen countless sails of inward and outward bound vessels. The morning being almost calm, those vessels that were not slowly working with the ebb tide, had their sails hanging loose to dry in the sun's rays. These, interspersed with numerous steamers, ranging in size from the noble Europa to the juvenile Edwin Griffin, gave an excitement to the scene pleasing to the beholder. The recent heavy fogs have had the effect to gather together a large number of vessels on our coast, and the fresh breeze of Thursday from S. S. E. drove them in on us, in a crowd. There were in all, Thursday, 73 sail—1 man-of-war, 1 steamship, 29 ships, 17 barks, 14 brigs, and 11 schooners—about 65 of which are from foreign ports. During the day 12,471 emigrants were brought into the quarantine.

Anecdote of the Duke of Wellington.

The Duke was well acquainted with his Bible and valued it. Many years ago (when Sir Arthur Wellesley) a brother officer was speaking sneeringly of the Bible and ridiculing the idea of it being a revelation from God—when he abruptly said "S——, have you read Paley's Evidences? If you have not, I advise you to read them. I once thought as you now think, but I read Paley and am convinced." That officer afterward became one of the holiest men in the British army—and thanked the Duke of Wellington for his timely reproof. You may have heard me speak of my visit to Walmer Castle and observing that a number of the books in his bed-room library were on divinity, and by the most evangelical writers. On a little round table close by his plain iron bedstead were always to be found four apparently well handled books—one was the Book of books, the word of God; another was Leighton's Commentary on St. Peter; a third Howe's Living Temple; and the fourth Baxter's Saint's Rest. Who could desire better books for the soul of such a man? and he kept nothing for mere show—the books were for use not ornament. The following is illustrative of his kindness and humanity: "Early in the morning after the battle of Waterloo," says Dr. Hume, "on entering his room, he sat up in his bed, while I reported to him the casualities that had come to my knowledge. He grasped my hand and seemed deeply affected—I felt the tears falling fast on my hand, and looking up, I saw them coursing in furrows down his dusty cheeks. He suddenly brushed them away with his left hand, and in a voice tremulous with emotion exclaimed, 'Well, thank God, I know not what it is to lose a battle—but it is painful to gain one with the loss of so many of one's friends.'"

Testimonial to Capt. Ingraham—A subscription, amounting to about £60 sterling, collected chiefly in pence from the working classes, has been raised by the British admirers of Captain Ingraham for the purchase of a gold chronometer, as a testimonial for his conduct tn the Koszta affair.

The Racing Clippers.—The Friend of China notices the arrival, on the 16th, of the Romance of the seas, Capt. Dumaresq, in 44 adys from San Francisco, and anchoring about half an hour before the David Brown. Both vessels left San Francisco together, and kept company most of the trip.

☞ We call the attention of some of the shipmasters and supercargoes visiting Washington Territory, from the islands, to the following paragraphs, clipped from a late American paper. Who will bring a specimen to the islands?

A NEW AND BEAUTIFUL TREE IN OREGON.—A strange and beautiful tree has been discovered in Washington Territory, which is not known to exist in any other part of the habitable globe. The tree is destined, I think, to make some noise in the world. It is remarkable, because its like is not found elsewhere, and on account of its great beauty and fragrance. The tree varies in height from one to seven feet. The leaf resembles that of the pear; while the trunk and branches look like those of an orange tree. The upper side of the leaf is coated with a gum, having the appearance of oil, and of the consistence of honey. Handling them, causes the gum to adhere slightly to the fingers. The gum, as well as the bark, is highly odorous. The fragrance, which is quite strong, resembles that of Bergamot, or ripe fruit, and a few leaves are sufficient to perfume a room. A leaf, fully wrapped up in a paper, so as to be entirely concealed, was handed to several persons with a request that they would tell by the smell what it was. All expressed themselves highly delighted with its fragrance, but gave different answers as to its character. Some said it smelled like ripe pears; some that it was Bergamot, whilst others thought it smelled like ripe apples. The flower resembles that of the white Jessamine.

This will certainly make a very beautiful and desirable ornamental tree, to grow in our gardens, around our dwellings, near the parlor windows, or to form a choice bower. Its intrinsic value for those purposes is greatly enhanced by the consideration that it is an Evergreen. This specimen is brought from my farm, and is taken from a grove of about a quarter of an acre. The plant is very rare even here; the oldest settlers of the country say they never saw it growing elsewhere. Still, I have no doubt it will be found in other places. It has been known to the priests of the Catholic Mission of St. Joseph for some years; but has not attracted attention until recently.

Island of Ascension.

Small Pox—Shipping—Rum-Vessel.

Rone Kittie, March 26, 1854.

DEAR SIR:—We hope we are now on the safe side of a fearful crisis. Some six weeks ago the Delta, Capt. Weeks, having the small pox on board, forced her way into the Parion harbor. The pilot, "Bill Powers," took her in to this harbor because he could not take her into the tribe where he belonged, and because it was less protected, being at the extreme of this tribe. The ship having come to anchor, the men sick with small pox were taken ashore upon one of the reef islands near by. They were soon followed by the natives, and plundered of their clothing. Our Nanakin, on being notified of the danger, repaired to the spot, had the stolen clothes burnt, the plunderers, with all concerned, put on a small island upon the reef. To prevent all intercourse with the ship, he planted two loaded guns upon the beach, and stationed armed men along the bay. So far there has been no case of this awful disease upon the island. To God, our Deliverer, we give thanks in the name of these poor people.

During the shipping season, which is now almost done, we have had upwards of some thirty vessels in our ports, all of which have procured supplies, so far as they had suitable trade, and still there are supplies. There has been a good deal of confusion owing to the unsettled state of things among foreigners since Mr. Corgat's death. We have been treated with uniform kindness, and have had the pleasure of giving very much reading matter to sailors. We love this class of people, and rejoice to be here where we may do them good. Why did you not send our bell and flag; our Bethel looks quite naked without them.

Letters have just been received, stating that one of the trading firm of this island, bound here with *rum*, etc., was twice compelled to put back, and the last time wrecked; also, that he is making his third attempt to reach here with his cargo. We cannot wish any man harm, but we do sincerely hope and *pray* that his cargo may never reach here.

There is a "sunny side" to our enterprise, but to see it we must ascend some of the higher summits of faith, and look into the sun of God's glory reflecting light and heat into these vallies of dry bones. Our trust is in our Lord; we will sow the seed and patiently wait the harvest. Pray for us and our work; the "night of toil" will open upon this island a glorious day.

Yours, truly,

A. A. STURGES.

In the foregoing letter, the question is asked, "Why did you not send our bell and Flag? Some months previous we had intimated that such was our intention. We still remain of the same mind, that as soon as our *means* will allow, both "Bell and Flag" shall be forwarded. Will not some of our readers assist us in this undertaking?—Ed. of Friend.

Healthy old Age.

Lewis Cass and Thomas H. Benton are two of the most robust and healthy men to be seen in Washington. Both are and have been remarkably temperate from boyhood. Gen. Cass has ever been a cold water man, and looks as if he would last a score of years yet. Benton appears fresh and energetic as ever, and an exchange paper relates the following incident of him:

He said recently in conversation with a gentleman who spoke of his being the last of the group, "Yes," said he, "Clay, Webster and Calhoun are gone; years ago Dr. —— told me 'when these men are dead, you will be fresh and vigorous as ever.' My habits of living do it; until I was thirty, I drank nothing but water, sir. Since then, I have drank only what circumstances made it fit I should drink. Temperance and moderation keep me in health and strength. Besides I adopt the Roman regime—bathe with cold water and rub dry. That's exercise. None of your common flesh brushes, but such as they rub horses' legs with, sir!—New York Independent.

[For the Friend.

Lay Sermon—No. 4.

Creeds and Credenda.

Ask you what my creed is? Do I believe this or that—authenticity, inspiration of the Bible, &c. I may say that I do, but that reply will hardly determine for you my position. For what mean you by authenticity, inspiration, et cetera? For any thing contained in that acknowledgment, I may be, at heart, pantheist, rationalist, an indifferent, pleasure-loving, "alive in the world" being, or any thing else. Only when I feel that Higher Spirit of truth and soberness glowing within myself, and find myself also one with that book, do I really acknowledge, really believe, its truth and inspiration. All other acknowledgment is but meaningless, nay!—significant of far more than nothing.

Let us not, my friend, rest or trust in any forms, any creeds, at all. Love is all—even as says the apostle. Lovest thou the fair, the good, heartily, in penitence and worship, and thou art above all doctrines—infinitely above all dogmas. Forms, indeed, we must have. In forming, life must ever be. The living head, as co-worker with a living heart, must transmute the food of feeling into its own proper aliment of system and doctrine. But, O! as we prize sight above blindness—the clear water of life, ever freshly welling up from the eternal deeps, above the unhealthy and stagnant pools of earth's surface, let us not lose the free vitality of that Eternal Spirit of Reason in any moulds of the fixing and finite understanding. Use your forms, but fill them full to overflowing, with a life which is more than they. Work even as does Nature around thee—for She "thy nurse and thy mother" was also given thee as an example—with the same calm, free, steady freshness of life: even so out of Eternity into Time, with the same kind, earnest, and joyous spirit of Beauty and Goodness. Is she not all form, and yet is she not every where more than the former, and above it. So work thou, asking not so much—"Do I acknowledge this or that expression of a doctrine?" for all forms in which the finite seeks to enclose the Infinite, in which the receiving vessel would fix and congeal the Spirit which flows through it, instead of allowing it to be within a well of water, springing up in everlasting life, are of the earth, earthy. That Spirit alone is heavenly. Only let that word "purity" ever waken in thee an intensity of reverential and penitent delight, and "holiness" an awfulness and prayerfulness of joy. So shalt thou abide in that free spirit of humanity, which is also the free spirit of Nature. So shalt thou possess a dwelling in the "heavens," eternal, that passeth not away. So, alive in and by that Spirit of the race, which is also far more universal than Nature or Humanity, thou shalt learn that it is indeed the Holy Spirit of Sanctification, the Redeeming Word, and the Comforter. So, even in this flitting phantoms, with its fretful, feverish action, its wounds and bruises, and putrifying sores, thine shall be the "sober certainty of waking bliss," the calm assurance of having realised thy true being, stillness and vigor, love and power,

"Thy feet now
Sandalled with calm,
And the light of thy presence
A rain of balm."

American Slavery, Solomon Northrop, &c.

American papers, of late, have abounded with accounts of troubles and riots connected with the Fugitive Slave law. Instead of that law quieting public sentiment it serves rather to inflame the minds of the people. Congress has done little else, but discuss the Nebraska question during the last session. Slavery makes troubles both North and South, East and West. For ourselves, we hope it may continue to make troubles until the people shall abolish the whole system. If there be any one thing which makes an American citizen, abroad, ashamed of his country, it is the abominable system of slavery. We had supposed that we were acquainted with most of the odious features of the system, but one new feature lately came under our notice. It is that of kidnapping free colored people in the Northern States, and carrying them to the South, and there consigning them to slavery. How frequent a circumstance of this kind may occur, we know not, but that it has once occurred, is very certain, as any one may learn, who will take the trouble to read the volume, entitled "Solomon Northrop." Some twelve or more years ago, Solomon was enticed from the State of N. Y. to Washington, and there thrown into prison, under the very shadow of the Capitol, and within a stone's throw of the White House! He was taken from thence to N. O., and sold to a Planter, up Red River, and for more than ten years compelled to labor as a field slave, beneath the master's lash. We cannot now state the particulars, in full, for the volume was loaned us for a few hours, and we only had time to glance over its pages. After remaining in bondage for more than ten years, Solomon succeeded in sending a letter to his friends, in the State of N. Y.; among whom was a lawyer, who investigated the case, and proceeded forthwith to the spot, proved that the man had been basely kidnapped and sold into slavery. He took the man home with him, and restored him to his family and to freedom. These are a brief outline of the facts in the case; but they are quite sufficient to lead to the supposition that such cases may frequently occur. If any of our readers are inclined to favor the system of American Slavery, we advise them to borrow, or buy and read the narrative of "Solomon Northrop." We could wish a copy might be sent to every member of the Congress of the U. S., and especially to those who voted for the Nebraska Bill. We hope and pray that a better time may come; and that speedily, when the oppressed may go free.

Our sentiments upon this subject find expression in the peroration of Senator Sumners' speech in the Senate of the U. S., on the final passage of the Nebraska Bill:—

From the depths of my soul, as a loyal citizen and a Senator, I plead, remonstrate, protest against the passage of this bill. I struggle against it, as against death; but, as in death itself, corruption puts on incorruption, and this mortal body puts on immortality, so from the sting of this hour, I find assurances of that triumph by which freedom will be restored to her immortal birthright in the Republic.

Sir, the bill which you are now about to pass, is at once the worst, and the best bill on which Congress ever acted.

It is the worst bill, inasmuch as it is a present victory of slavery. In a Christian land, and in an age of civilization, a time-honored statute of Freedom is struck down, opening the way to all the countless woes and wrongs of human bondage. Among the crimes of history, a new one is about to be recorded, which, in better days, will be read with universal shame. The Tea Tax and Stamp Act, which aroused the patriot rage of our fathers, were virtues by the side of this enormity; nor would it be easy to imagine, at this day, any measure which more openly defied every sentiment of justice, humanity, and Christianity. Am I not right, then, in calling it the worst bill on which Congress ever acted?

But there is another side to which I gladly turn. Sir, it is the best bill on which Congress ever acted; for it prepares the way for that "All Hail Hereafter," when slavery must disappear. It annuls all past compromises with slavery, and makes all future compromises impossible. Thus it puts Freedom and Slavery face to face, and bids them grapple. Who can doubt the result? It opens wide the door of the Future, when, at last, there will really be a North, and the slave power will be broken; when this wretched despotism will cease to domitate over our Government, no longer impressing itself upon all that it does, at home and abroad; when the National Government shall be divorced, in every way from slavery, and according to the true intention of our fathers, freedom shall be established by Congress, every where, at least beyond the local limits of the States.

Slavery will then be driven from its usurped foothold here in the Distrlct of Columbia; in the national territories, and elsewhere beneath the national flag; the Fugitive Slave Bill, as odious as it is unconstitutional, will become a dead letter, and the domestic slave trade, so far as it can be reached, but especially on the high seas, will be blessed by Congressional prohibition. Every where within the sphere of Congress, the great *Northern Hamwer* will descend to smite this wrong; and the irresistible cry will break forth—"No more slave States!"

Thus, sir, now standing at the very grave of freedom in Kansas and Nebraska, I find assurances of that happy resurrection by which freedom will be secured hereafter, not only in these Territories, but every where, under the National Government. More clearly than ever before, I now see the "beginning of the end" of slavery. Am I not right, then, in calling this measure the best bill on which Congress ever acted.

Sorrowfully I bend before the wrong you are about to perpetrate. Joyfully I welcome all the promises of the future.

Oahu College.

The subject of establishing a higher Institution of learning, than has hitherto existed, has often been made the topic of remark among the friends of education. Months and even years ago, some have urged its establishment. Several circumstances have recently conspired to impress upon the minds of the Trustees of "Punahou School," that the time had come for prompt and decided action. The Circular found in another column, will show what progress has been made, and what plans have been adopted for the future. In all such enterprises a beginning must be made amid obstacles; perhaps they are not greater or more discouraging here than in older countries. There are certainly many things to encourage the Trustees and Faculty of the "Oahu College" to press forward. The site of the Institution is most admirable; probably none better in the group. The Hawaiian Government has liberally granted valuable lands, surrounding the present buildings. The American Board has already expended from $20,000 to $30,000 in the erection of buildings, and at present is responsible for the salaries of both President and Professor. The present wants and future prospects of the foreign community in the islands, clearly indicate that a well endowed College must be established and maintained, if our children and youth are educated in the higher branches, and fitted for professional life.

The following paragraphs from a recent letter of Dr. Anderson, senior Secretary of the American Board of Missions, addressed to the Trustees of the "Oahu College" present a correct view of the subject, showing enlarged ideas, and worthy of the source from whence they emanate:—

MISSIONARY HOUSE,
Boston, June 13, 1854.

TRUSTEES OF THE OAHU COLLEGE:

Dear Brethren:— * * * *

That (a College) is what is needed at the Islands, and without that nothing among you is permanent, nothing really secure. Not a Harvard, not a Yale, nor even an Amherst, or a Williams, do you now need; but such as each of them was at the outset. How very small were their first classes, and *then* of course they needed but few teachers.—The *thorough drill*, which a few scholars get, in their comparatively limited number of studies, from their comparatively few teachers, may yet be really a more valuable education for them, in their new country, than *what they would actually acquire* in the best of the venerable institutions above named. I cannot believe, if you had a College actually begun on the Islands, that the greater part of your sons would be sent to this country for education, as is asserted in some of the letters lately received. * * * * *

Oahu College. Circular.

More than a year ago, a charter was secured for a College at Punahou. The Trustees have since been seeking for a President to take charge of the Institution. They are happy to announce that they have now secured, for this post, the services of Mr. E. G. Beckwith, for some time past, Principal of the Royal School. His experience and success as a teacher, and his eminent qualifications, for this post, will secure, we have no doubt, the public favor for the institution.

The President will, for the present, instruct in Mathematics, the Natural Sciences, English Literature, and Intellectual Philosophy.

Rev. Mr. Dole, Professor of Languages, will instruct in the Ancient and Modern Languages, Geography, History, and Moral Philosophy.

The Trustees deem it proper to state, that they do not hold out before the community the idea of a liberally endowed institution, with a full corps of Professors. The College is now in its infancy, without endowments, having only the pledge of being sustained till enlightened and Christian people in this and other lands, shall appreciate the necessity of such an institution here, and shall supply its wants, or till time shall demonstrate its inutility

It is probable that for several years the number of students will be small. It is not expected that any class will present themselves for admission to the Collegiate department for several months, though arrangements have been made to commence a class as soon as any are prepared to enter. Meanwhile, the Preparatory department will be organized with special reference to the future wants of the College.

The following Prospectus has been prepared for the information of all who may feel an interest in the Institution.

This Institution is located at Punahou, two miles from Honolulu.

The laws of the Institution are intended to accomplish, as far as possible, the following objects:—

1. To enable a student to pursue any single course which may be thought to be for his advantage.

2. To enable a student to pursue, for a single term, a single year, or any greater length of time, such studies as his parent or guardian, in consultation with the Faculty, may believe to be for his advantage.

3. To allow students who are candidates for degrees, to pursue the studies necessary for a degree, in a longer or shorter time, as their circumstances or ability will permit; the Faculty, however, having the right so to direct the studies as to prevent idleness or superficial haste.

PREPARATORY DEPARTMENT.

For the present the Preparatory Department is open to any pupils of good, moral character, whether intending to become members of the Collegiate Department or not, who can sustain an examination satisfactory to the teachers, in Colburn's Mental Arithmetic, the elementary principles of English Grammar, Topical Geography, Reading, and Spelling.

The studies pursued in this Department are Mathematics, including Arithmetic, Algebra, and Geometry; English Language, including Orthography, Etymology, Analytical Grammar, English Composition and Reading; Belles Lettres, including Oratory and the Analysis and Criticism of English Poetry; Geography; History, Sacred and Profane; Natural Sciences, including the Elementary Principles of Natural Philosophy, Physiology, and Astronomy, Vocal Music, and the Ancient languages.

Instruction will be given in Instrumental Music, Writing, and Drawing, at an extra charge whenever there is a sufficient number of pupils who wish to attend to these branches to make it desirable.

COLLEGIATE DEPARTMENT.

The Degrees conferred by the College, in course, are three, Master of Arts, Bachelor of Arts, and Bachelor of Philosophy.

Those wishing to enter the Institution as candidates for the degree of A. M., will be examined in English, Latin, and Greek Grammar; Arithmetic, Algebra to Ratio; Physiology; Cicero's Select Orations, Sallust or its equivalent, and Virgil, and in the Greek Reader, or its equivalent.

For the degree of A. B., one of the Ancient Languages may be omitted, and, for the degree of B. P. neither will be required.

The degree of A. M., is intended for those who wish to pursue a full course of Academic education, as prescribed in the Laws of the College, and this course will require four or five years of study.

The degree of A. B., is designed for those who wish to prepare themselves for the different professions, and yet are not able to pursue a complete course. This course will require three or four years of study, being nearly the same as for the degree of A. M., except one Ancient Language.

The degree of B. P., is intended for those who wish to prepare for the pursuits of active life. In this course the Ancient Languages may be omitted, but one Modern Language will be required and a complete course in Book-Keeping, accompanied with lectures upon Commerce and mercantile Transactions.

No pupil will be entitled to a degree in course, without having been a member of the College at least two terms, and having passed a thorough examination in the studies prescribed in the College Laws.

TERMS AND VACATIONS.

The year will be divided into three terms of twelve weeks each. The first term will commence on the first Wednesday in August.*

There will be three vacations during the year, the first of one week, the second of three weeks, and the third of twelve weeks.

TUITION AND BOARD.

Twelve dollars per term will be charged for tuition, making no deduction for parts of a term, except in cases of protracted sickness.

Students can be boarded in the boarding establishment connected with the Institution, at $5 a week, including room-rent, lights and washing; payment to be made in advance. Students are expected to furnish their own rooms.

SESSION.

The Preparatory Department will be in session from 9o'clock, A. M., till 2 o'clock, P. M.

TIMES OF ADMISSION.

The commencement of the Academic year is the regular time for the admission of Pupils. None will be received at any other time, unless they are prepared to enter some of the existing classes.

E. W. CLARK,
S. N. CASTLE,
S. C. DAMON,
L. SMITH,
R. ARMSTRONG.
Com. of Trustees.

*The first term of the present year will commence on Wednesday, September 13th, leaving but half a term before the first vacation, for which tuition will be charged accordingly.

— Saturn's Rings will be in a position favorable for visibility the whole of this year, with a telescope of moderate power. A third ring has been discovered recently. It is said that important discoveries with reference to this planet, have lately been made by the new monster telescope of Rev. Mr. Craig, and that the rings are but arches of the most perfect geometrical formation.

SNUFF.—The best snuff in the world is a snuff of morning air.

"THE MORNING STAR."—We are exceedingly gratified to receive a file of this paper, published semi-monthly, at the American Mission Press, in the Island of Ceylon, India. It is printed one-half in the Tamil language, and the remainder in English. The size of the paper corresponds to "The Friend." Its columns contain much interesting information respecting that part of the world. The last Nos. of the paper before us were published in 1853, showing that the periodical was in the XIIIth year of its existence. It is highly interesting to read respecting the progress of the Gospel, and the vast political changes which have taken place in that portion of the globe. At the present time, the British Government in India, looks with favor upon all Missionary efforts among the natives of the country. Missionaries find the most ample protection. How great the contrast between the present order of things, and that of 1812, and 1813, when the American Missionaries were endeavoring to establish a mission in that country. When the Rev. Mr. Judson landed at Calcutta, in 1812, he was not only forbid making an effort to establish a mission, within the limits of British rule, but the order was issued for sending him and his associates to England, on board a Government Transport. (See Memoir of Rev. Dr. Judson, by Dr. Wayland.)

We would also acknowledge the reception of "Report of the American Ceylon Mission, for 1852." This document contains much interesting statistical matter, relating to the history of that mission. From it, we learn that two missionaries, now laboring on the island of Ceylon, went to India, in 1816, or 38 years ago; we refer to the Rev. Mr. Poor, and the Rev. Mr. Meigs. That mission does not appear to have been visited with so much sickness and so many deaths as often reported. Since the year 1816, sixty missionaries (28 males and 32 females) have been connected with the mission. "The average term of service of those who have died, is nearly 8 years; of those compelled to leave, 10½ years; and of those who have been in the field 6 or more years, a little over 20 years." Of 85 American children, born in Ceylon, only 12 have died on the island, and but 3 or 4, since returning to the United tates."

The Murderer of the Missionary Williams.

During a recent voyage of the Eng. Missionary Bark, "John Williams," she touched at Eramanga, where the Rev. John Williams was murdered several years since. Remarks the Missionary, who gives an account of the voyage:—

"One deeply interesting fact came to our knowledge during our visit. Kauiaui, who expressed so strong a desire for a teacher or a missionary, last voyage, is the identical murderer of Mr. Williams. He is chief of Bunkar, the part of Dillon's Bay where the murder took place. We had a conversation with him on the subject. He looked sorry and ashamed, but said, that he did not know that Mr. W. was a missionary. When asked why he killed him? he replied, that it was on account of outrages committed by foreigners some time before. Who can wonder at what he did, when it is remembered that, in the affray referred to between the foreigners and Eramangans, *his own son was murdered*. He is still very desirous to have a missionary.—We arranged for one of the teachers left last voyage to remove to his part of the bay, and with this arrangement he is satisfied for the present. We succeeded in getting the club with which, it is said, Mr. Williams was killed, and a pocket-handkerchief with Mr. Harris's initials on it, which Kauiaui's wife gave to the teachers."

The Rice Harvest in India.

We have taken considerable pains to learn the Tamil customs and superstitions connected with the rice harvest, and give the following, hoping it may interest all our readers, more especially the European portion of them.

Before the rice crop is ready for harvesting, it is the custom for the brahmins or priests, in many of the almost numberless temples, to boil new rice and make an offering of the same to their gods. When the fields are nearly white for harvesting, then the farmer consults an astrologer as to the propitious day for commencing the important work. Having secured an answer, he, with his hired men or servants, repairs to the field and plucks a quantity of the heads of the rice, enough to make one meal for a number of persons. These are taken home, dried, the grain rubbed out and prepared for poothir. Before this, however, a few heads of grain are taken from the lot, and, being tied together with leaves of the mangoe tree and a kind of grass, are suspended from the roof of the house. This is one way of securing the divine favor as they suppose, or rather good luck. The bunch occasionally hangs for years, and a new one being added, year by year, sometimes ten or a dozen hang in a row. In a day or two the farmer calls his relatives, hired men, and boys, to the feast of poothir or new rice. They adorn the vessel in which the new rice is cooked. with mangoe leaves and with the ubiquitous and important sacred ashes, after which the master of the house sits down before the food, while his wife comes, and with a show of very great respect, humility, and obedience, prepares three plaintain leaves, placing one above the other, putting a little salt and a few spears of sacred grass between each, and pours the rice upon the topmost. This she surrounds or covers with curry, curds, plantains, and jaggery. The master then, with his fingers, mixes these all and sundry together, and, first placing a little upon a burning lamp before him, he takes three small mouthfuls himself, and then distributes to each, according to his age, a handful of the precious mixture, which is thankfully received, and each, either audibly or silently, calls upon his god to supply him with food during the whole year. After this they dine together, eating to their hearts content, this first handful being only introductory.

After the feast of poothir is over, on an auspicious day the rice is reapt—a cocoanut superstitiously broken—and the sheaves are gathered together in a heap, waiting to be t odden out, which should be done on another day of good omen, with further ceremonies. There are two auspicious days in the week for this work, namely, Thursday and Friday. The other days are all unfavorable, though in different degrees. If the treading is done on Saturday there will, it is said, be a loss of one-twentieth of the crop, it being taken away by evil spirits ; if on Sunday one-fifteenth; if on Monday one-fourth; if on Tuesday one-eighth; if on Wednesday—the most evil day of the week—the loss amounts to one-third! The grain is always trodden out by cattle, some half dozen of which are tied abreast and are driven round and round upon the grain until it all falls from the straw upon the bare earth of the open field. It is an interesting fact that the Tamulians, like the ancient Israelites, "muzzle not the ox that treadeth out the corn, but allow him to enjoy to his full the straw filled with the precious grain The sacred ashes, which all Hindoos wear upon their foreheads, arms, and bodies as a distinctive religious mark, are generally made during the rice harvest. They are the excrement of the cattle, often obtained while they are treading, which, first dried, is afterward burned. While the grain is being trodden out, the laborers avoid speaking common words, and use a class of words peculiar to the occasion. For instance, eduthu, the usual word for ox, is avoided and polinardiyan is used; so for kutthe (knife) kollun is used, and so on indefinitely. They are also very careful that their baskets are not turned upside down, and particular that no one should kneel, as these things would be, to their minds, a sure indication of a great decrease in the reward of the threshing floor, or a sign that some member of the family would die during the year, or that the land would be sold for debt, or the house be burnt, or some other equally untoward event would happen.

Another custom universally observed by the farmers. is that the person who superintends the work of treading out the grain should neither leave the choordoo (threshing floor) nor eat any thing until the whole business is done; and the person who drives the cattle that tread the grain, frequently cries out very lustily "po-le, po-le, O mother, goddess of the earth, po-le, po-le," which is a kind of prayer that the yield may be multiplied many fold. When the treading is finished the straw is shaken out and piled up around the choordoo in a circle. While thus lying, if the wind breaks the circle on the southern or western side, it is an ill omen, and indicates a decrease of the grain. If, on the contrary, the northern or eastern side be broken, it is a good omen, and shows that the evil spirits will take rice from the fields of others to increase this. Again, if another farmer have his choordoo threshed just opposite, a quarrel will most likely occur between the two, from the superstitious notion that the evil ones will take the grain from his choordoo and carry it to his neighbor's.

After the straw is removed as above, the grain is heaped up in the centre of the threshing ground, and a rough unsightly image of the god Pulliar, and a knife, are placed upon the heap as guards against the thefts of the much dreaded evil spirits. Now the process of winnowing is commenced. which is all done by a fan made of the braided palmyra leaf—a slow process indeed, but one by which the rice is quite well cleaned. After all is winnowed, superstitous signs are written upon the heap—a present of some quarts is given to the family brahmin—and the rice is carried home in old baskets. Carts are seldom or never used in conveying the grain or the straw from the field, but all is carried upon the heads of men and women. The latter generally carry the grain, while the men take the straw upon their heads in immensely great bundles, under the pressure of which, with much toil and "sweat of the brow," they briskly walk and sometimes run, ten or a dozen in single file, to their not unfrequently distant homes.

It should be said that many of the above mentioned superstitious and heathenish observances are now but little observed in comparison to what they once were, owing to the spread of civilization, European influence, and the knowledge of true religion diffused through the agency of English and American missionary societies.

It is an interesting fact, as showing the great poverty of many of the people, that for weeks after the fields are harvested, poor women may be seen with a little broom or brush, sweeping and searching among the stubble, for the single kernels of rice which have fallen while the grain was reapt. These, each one picks up, generally kernel by kernel, and in the course of a day may glean enough to come to the value of two pence when sold. Thus wretchedly poor are many among the Tamil people, who have no little difficulty in procuring food, even of the coarsest kind sufficient for their maintenance.—Ceylon Morning Star.

Conversion of a Prince.

In the Friend of India of the 17th ult., there is an interesting account, headed "The First Christian Prince in India," by which it appears that on the 8th of March the young Maharajah Dhuleep Sing was formally admitted into the Christian church by Rev. W. J. Jay, Chaplain of Guttehgurh, a place in the north of India. The ceremony was attended by all the civil and military authorities, by the American missionaries, and a number of the Maharajah's own attendants. The Maharajah is sixteen years of age, and has an income of £40,000 a year. The Friend of India thus speaks of him and the course he has taken:

"A lad of this age in India is a man, with as great a capacity for estimating the merits of different creeds, as he is ever likely to possess. Sixteen is the age at which even the law courts acknowledge the right of a native youth to choose for himself, and this last act of the Maharajah has been taken entirely of his own free will. He has been neither coaxed nor frightened into Christianity. Indeed, the government had every motive for retaining him in his old creed. He was simply left to his own discretion and that he has chosen rightly, will, we think, be allowed even by those who are not given to 'missionary fanaticism.' His conversion will, at least, save the palace of Futtehgurh from becoming like that of Delhi, a place, whither all evil naturally seeks shelter, and a native Christian noble, with his vast wealth, may accomplish far more good than a hundred ordinary converts."—Ceylon Morning Star.

Erricsson, the Inventor.

John Erricsson was born in Sweden, in 1803. He early showed a taste for mechanics, and at the age of eleven attracted the notice of Count Platen, who obtained for him a cadet-ship in an engineer corps. He afterwards entered the Swedish army and was employed in the survey of Northern Sweden. While occupied with his favorite study of mechanics, he projected his Flame Engine. In 1826, he visited England. While there, in 1829, he competed for the prize offered by the Liverpool and Manchester railway for the best locomotive, and produced an engine that attained the wonderful speed, at that time, of fifty miles an hour. His propeller, his semi-cylindrical engine, his centrifugal blower, his distance instrument for measuring distances at sea, his hydrostatic guage, his

pyrometer, and other ingenious inventions, have already made the name of Erricsson famous in the scientific world. The caloric engine, which has now arrived at the consummation of success, was first brought before the scientific world of London twenty years ago, and was rejected by men of science as an impracticability, and as involving the absurdity of perpetual motion. Faraday, Brunel, and Ure, after a short resistance, finally conceded the practicability of the invention, and Faraday endorsed the caloric engine in those famous lectures of his, before the London Institution. Fox, whose name is identified with the success of the great London Exhibition, was a pupil of Erricsson.—Literary World.

Christians in England, Aiding American Missions in Turkey.

The war now in progress, and the effort of England to assist the Turks, has called the attention of the British Christian public to the subject of Missionary operations throughout the Turkish Empire. Instead of establishing new missions, an effort is now being made to assist Missionaries of the American Board who are laboring in various parts of the Empire. Sir Edward and Lady Buxton, have started the enterprize. An English newspaper before us bears most honorable mention of the labor and success of the American Mission in Turkey:

It affords us unfeigned satisfaction to be able to announce that the laborious and successful American Missions in Turkey are about to receive a substantial proof of the esteem in which they are held by British Christians. Our readers will remember a favorable mention of the Missions in the Missionary notices for April, in connection with remarks on the departure of the naval and military armaments to the East. Other bodies of Christians have been equally alive to the subject, and at length means have been adopted for giving practical expression to the interest which is felt in the labors of the Missionaries, and the deep sympathy which has been awakened in behalf of various populations of the Turkish empire.

Sir Edward North Buxton and Lady Buxton opened their mansion on Wednesday evening to a numerous assembly of ladies and gentlemen, and Christian Ministers of every denomination, interested in the object.—Among those present we observed Sir Culling E. Eardley, Mr. Kinnaird, M.P., Mr. Cheetham, M.P., Mr. Bevan, Mr. MacGregor, Mr. Hitchcock, Dr. Yates, from Syria, Rev. Drs. Bunting, Beecham, Steane, &c, Rev. Messrs. Burnet, Binney, Gurney, Hoole, Herschell, Latrobe, Rule, Sherman, Venn, Veitch, Chaplain to the Bishop of Jerusalem, and many others. The spacious drawing-rooms were filled with one of the most remarkable and unanimous meetings for a religious object we have ever had the pleasure to witness. The proceedings were opened with prayer by Mr. Sherman; and Sir Edward Buxton then stated that the Provisional Committee had come to the conclusion that the best method of accomplishing the desired object of promoting Christianity among the population of Turkey, was not to establish a new and distinct Mission, but to assist the Missions already established, and which God has so remarkably blessed by affording to the American Missions the needed pecuniary supplies to enable them to carry out their educational plans, and to increase the native agency among the Armenian, Nestorian, and Greek Churches; and by giving aid to Bishop Gobat at Jerusalem. The Rev. Cuthbert G. Young, who had visited the Missions, submitted a statistical report of the operations of the Missionaries, and of their remarkable success, together with the lamentable inadequacy of the means at their disposal for the vast and promising field now opened. He confirmed the painful fact that by the law of Turkey capital punishment awaits any Turk who embraces Christianity. He called attention to a pamphlet recently published by himself, "Openings for the Gospel in Turkey," and to the Rev. Mr. Dwight's "Christianity in Turkey," and made special and emphatic mention of the first article in the first number of the "London Quarterly Review," on the "Christian Population of the Turkish Empire," which he characterised as remarkable for the large amount of correct information on the subject which it embodied by some writer whose name he did not know. Sir Culling Eardley addressed the meeting, as also did Dr. Yates, Mr. Venn, Mr. Veitch, Mr. McGregor, Mr. Hitchcok, Mr. Herschell, and others. Donations to a handsome amount were announced; prayer was offered and the blessing pronounced by the Rev. Mr. Gurney, and the assembly broke up soon after ten o'clock.

Leap-Year.—Leap-years are those that are exactly divisible by 4, and also by 400, and not by 100. The year 1900 therefore will not be a leap-year.

E. HOFFMANN,

AT THE

NEW DRUG STORE

Corner of Kahumanu and Queen Streets,

Makee & Anthon's Block,

Would call the attention of the traders and residents of Honolulu to his new stock of MEDICINES, DRUGS & FANCY ARTICLES of American, English, French and German manufacture. He has also a most excellent assortment of Perfumery, Scented Oils and Soaps, all of which will be sold at fair prices.

Orders from other islands will be promptly attended to, and residents may feel well assured that great care will be taken in putting up prescriptions.

MEDICINE CHESTS

TO SEAMEN AND STRANGERS.—The Seamen's Chapel is open for Public Worship every Sabbath, at 11 A. M., and 7 1-2 P. M. Seats free.

Seamen belonging to vessels (of all nations) visiting this port are invited to call at the Chaplain's study, in Chaplain street, where they will be gratuitously supplied with copies of the Friend and other reading matter. It will be most convenient for the Chaplain to receive calls from Seamen during the afternoon of each day.

A weekly religious conference and prayer meeting is held on Wednesday evening at the Vestry, and also at the same place, every Sabbath afternoon, at 3 1-2 o'clock. Seamen are particularly invited to attend.

Public services at the New Court *House* at 11 A. M. and and 7½ P. M., and also, Native Churches on Sabbaths, commence at 9 1-2 A. M. and 2 1-2 P. M.

The Seamen's Reading Room is open at all hours of the day. Strangers arriving and having late foreign papers are respectfully invited to aid in keeping said room supplied with useful reading matter.

Donations are respectfully solicited for the support of the Chaplaincy and the publication of the Friend. An anuual report of all donations is made to the Am. Seamen's Friend Society in New York. Any person contributing $50 is entitled to become a Life Director of the Society, and $20 to become an Honorary Life Member. tf.

To Masters of Whale-Ships visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Sept. 1, 1853—6m-19

The Friend sent abroad.

By paying in advance the subscription price, the Friend will be sent by the earliest opportunities, to the United States, England, China, Sydney, or any foreign country.

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4, 5, 6, 7, and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

THE FRIEND:

A Monthly Journal devoted to Temperance Seamen, Marine and General Intelligence.

PUBLISHED AND EDITED BY

SAMUEL C. DAMON, Seaman's Chaplain

TERMS.

One copy per annum	$2,00
Two copies "	3,00
Five copies "	5,00

☞ Persons desirous of procuring the services of a day laborer. or out-door servant, will perhaps meet with such person, by applying to the Chaplain, to whom applications are frequently made for situations.

☞ At the new Drug Store of Dr. Hoffman, gentlemen and ladies will find an assortment of goods, useful, beautiful, ornamental and *childish;* besides medicines at wholesale and retail. See Advertisement.

☞ We are requested by the Minister of Public Instruction to give notice, that for the present, or until the services of some suitable person can be obtained, the Royal School will be taught by female Teachers, under the general supervision of the late Principal, Mr. Beckwith.

Picnic.—Mr. Whitney, the Superintendent of the Bethel Sabbath School, met the scholars and teachers, at the residence of the Chaplain, Saturday, 26th ult. The attendance was numerous. Many of the parents and members of the congregation were present, besides other invited guests. The singing was conducted by Mr. Griswold. Addresses were made by Mr. Armstrong, Mr. Robertson, and Mr. Angell, the U. S. Consul. The day was highly propitious, and all present, both old and young, apparently enjoyed the occasion very much.

☞ We would acknowledge our indebtedness to Capt. Paty, of the "Restless," for files of late papers, and list of passengers. If all ship-masters would be as attentive to such matters, it would confer a favor on the public, and save editors much trouble. Mr. Ludlow and others, in San Francisco, lay us under renewed obligations for files of late papers.

☞ A cargo of ice may be expected in Honolulu, about the middle of the month.

☞ Something new!—Where?—in Honolulu,—What?—New stores,—new dwellings,—new goods—new faces,—new ideas,—and a new College We have never known Honolulu more active during the period of what has usually been styled "our dull times." Merchant vessels are discharging their cargoes. All the Mechanics in Honolulu are full of work. We hear of nobody failing, but are able to perceive, that many are adding to their wealth. Rents are high—never higher. It is quite difficult to obtain family tenements. These are favorable indications. They bespeak prosperity and thrift.

The Rev. T. E. Taylor.

By a late arrival from Tahiti, we are happy to learn that the Rev. Mr. Taylor's health is much improved. We have receeived a letter from him under date of June 25th, from which we extract the following:—

"I have time to say but a word, as I am now on board the "Perla" with my effects, bound to "Fatuhiva," (Marquesas,) with supplies sent from Honolulu, sometime before I left. I hope my health has considerably improved. My cough and stricture in breathing have disappeared. We had a delightful run down in 18 days. From the Captain and officers, I received only courtesy and kindness. "The opportunity to visit the brethren, at Fatuheva, came very unexpectedly. It is one of the incidental good things that come from that dreadful evil, war between Russia, and France and England. The French and English fleets have made Nukehewa their place of rendezvous, and this vessel takes supplies for them."—The measles are now prevailing sadly among the natives (at Tahiti, just now. Hardly a family escapes, and in a great many cases they prove fatal. Many causes seem to combine to diminish the native race. The luxuriance and fruitfulness of Tahiti surpasses that I had before seen or Imagined. I do not remember to have seen apples in my own native land more abundant upon, and under the trees, than oranges are here. I hope to be back here about the middle of August, if we are not picked up by some Russian vessel, or do not fall into any other mishap."

The Moon.—Every object on the surface of the moon of the height of one hundred feet, is distinctly seen through Lord Rosse's telescope. On its surface are craters of extinct volcanoes, rocks, and masses of stone almost innumerable. But there are no signs of habitations such as ours, no vestige of architectural remains, to show that the moon is or ever was inhabited by a race of mortals similar to ourselves. No water is visible, no sea, no river; all seems desolate.

Notice.—The next meeting of the "Oahu Clerical Association," will be held at the residence of the Subscriber in Honolulu, on Wednesday, September 20th. The first session will open at 3 P. M. Punctuality and a full attendance of the members are desired. S. C. Damon,
Secretary of O. C. A
Honolulu, August 30.

Notice.—E. G. Beckwith, Esq., recently elected President of the "Oahu College," will deliver his Inaugural Address at the Court House, in Honolulu, Thursday evening, September 21st, 7½ o'clock, per order of Board of Trustees.
August 31, 1854,

LIST OF OFFICERS OF U. S. S. 'St. MARYS.'

Commander Theodorus Bailey, Esq.
Lieutenants, John L. Ring, James M. Frailey, Charles W. Hayes, Act'g Lieutenant, R. M. McArann.
Act'g Master, Thomas Roney, Purser, G. H. White.
Ass't Surgeon, Edward F. Drayton.
Lieut't. of Marines, James Wiley.
Passed Midshipmen, James E. Jouett, John J. Cornwell, A. E. Benham.
Midshipman, Robert Boyd, Jr.
Captain's Clerk, Lewis H Wheeler.
Boatswain, Edward Kenney.
Gunner. J. D. Booram.
Carpenter, S. B. Cocke.
Sail-maker, John King.

☞ Our subscribers may have been disappointed, in not receiving "The Friend," for August. We would apologise, if that is necessary, inasmuch as we did not publish a "Number" for August, but shall issue our paper, semi-monthly, after the shipping season commences.

DIED.

Lahaina, August 1st, 1854.

July 17, at Lahaina, in the U. S. Hospital, George Arthur H. Guardinier, of Albany.

July 23, at the same place, James H Roff, of Maryland.

July 28, at the same place, John M. Johnson, of New Jersey

These three young sailors entered the hospital at about the same time, with the seeds of consumption in their frames, which made rapid and fatal progress. Mr. Guardinier had some time ago made profession of his faith by uniting with the 2d Baptist Church of Albany, and maintained a marked Christian character. The other two, since coming to the hospital, were mercifully guided to exercise repentence and faith in the Savior All three departed in peace and joyful hope, trusting in Him who is the "resurrection and the life."

"Lovely in their lives, in death they were not divided.
S. E. B."

On board Wavelet, on her passage from San Francisco Peter Masterton, passenger.

At Koloa, Kauai, on the 3d of July, James E. Wilcox, of consumption. Mr. W. has been a resident at the islands for several years, formerly as a school teacher, and latterly as a shipping agent for seamen. We believe he was from Vermont, where he has friends and relatives.

At Molate, near San Francisco, on the 28th of June, John Gorham Bond, aged 21 years, youngest son of the late George Bond, Esq, of Boston, and brother of Rev. E. P. Bond, of Kauai

In Honolulu, August 11th, Mr. James F. Lewis, aged 40 years. An American. He had resided many years in Honolulu.

In Honolulu, August 31, at Mr. Pinkham's Boarding House, John S. Evans, Esq., late Post Master of Stockton, California. The deceased came to the islands passenger on board the "Polynesian." He was a native of Perrysville, Cecil Co., Maryland, where his friends now reside. Funeral to day at 5 o'clock, P. M.

Passengers.

By the Restless from San Francisco.—G. B. Post, Esq., and Lady, Mr William Motten and Lady, Mrs. E. C Boles, Mrs. E. Long, Child and servant, Mrs. S. J. Rogers and Child, Elias Perkins, Esq., Mr H. M'Tyre. Joseph R. Pratt, J. P. Griswold, R. Spencer, Geo. Howe. Jacob Cohen, S. Jacobs, Capt. J A. Avery, Michael Murray, Wm. H. Wilder, H. Graham, J. L. Lewis, Frederick Rowe, T. B. Baker, J. M. Ederton, E. Fisher, Chas S. Watkins, Ah Chun.—29 in all.

Outward—Per Flying Dart.—C. A. Poor, J. R. Pratt, Mrs. Ball, Patterson, Carter, Cheever.

By J. B. Brown, at Lahaina, from San Francisco.—Mrs. Chase child and servant.

By Wavelet, from San Francisco.—G Lange and lady, Messrs. J. R. Dalrison, M. Monet, H. A. Nash. A. Harris, R. C. Macy, G. Adley, E. Burke, J. Lazarus, A. J. McPhelan, D. Quintan, S. C. Siders, J Whittit, E. Corey.

By Thomasine, from Vancouver's Island.—H. Coleman.

By Restless, for San Francisco.—Rev. H. Kinney, lady and two children, Messrs. Corwin, Carelan, Dickinson, Graves, McIntyre, J. L. Reed, E. Burgess, J. F. McLane, H. Logan, E. Benison, D. Dempsey, Achu, Ahk. Achong Achug,—19.

By the "Polynesian" for San Francisco.—Dr. G. A. Lathrop and lady, Dr. B. F. Hardy, J. L. Blair, W. Fell, L. H. Monutelbaum, H. W. Fairbanks, H. F. Rogers, lady and child, G. Q. Cannon, — W. Bigler, W. Farrer, J. Haskins.

FOR HONOLULU.—Bark Fanny Major,—J. C. Bullions, F. L. Hanks, Geo Brayton, L. Post, A. Shearer, V. Dnicker, L. Gunnet, J Shoblocks.

FOR AUSTRALIA.—Same vessel,—Mr. and Mrs. Charles R. Thorne, Wm. Thorne, Thos. Thorne, Edward F. Thorne, Miss Emily Thorne, Miss Kate Denin, Mrs. Hays, Miss Catharine Hays, Mr. Bushnel, Mr. Coulon, Mr. Rolfe, Mr. Russell, Mrs. Dr. Montague.

By the Lady Jane, from New York,—J. Kathou, wife, two children and 2 servants. J. O Oliver, wife, 2 children and servant, J. B. Budlong, Williams, and 34 passengers for San Francisco.

By the Thomasine, for Callao.—H. Coleman.

By Star of the East, for Sydney,—G. Barham.

MARINE JOURNAL.

PORT OF HONOLULU.

Arrived.

July 7.—Am. ship Tinqua, Whitmore, 14 days from San Francisco. Sailed same day for China.
July 9.—Am bark Wavelet, Smith, 13 days from San Francisco
July 10.—Am. brg. J. B. Brown, Maghae, 30 days from Puget's Sound, via San Francisco and Lahaina.
July 11.—Br. bark Thomasine, Owen, 18 days from Vancouver's Island.
July 14—Am. wh. ship Alabama, Coggshall, Nantucket, 37 mos. out, 2000 bbls. sp'm. oil.
July 16—Br. sh. Amazon, Vincent, 42 days from Callao.
17—Br. steamer Virago, Marshall
17—Br. frigate President, Rear Admiral David Price.
17—Br. frigate Amphitrite, Frederick.

THE FRIEND.

HONOLULU, OCT. 3.

Journal of Events.

September 7th,—The Steamship "Peytona," and Schooner "Restless," sailed for San Francisco; both reported as full of freight. For passengers see list. Arrangements have been made for a new regular communication by sailing vessels, while there is a reasonable prospect that steamships will commence running between this port and San Francisco. The opposition between steam and sails will help trade and add life to the business of the islands. No fears whatever, in the final issue, that steam will injure sailing vessels, or the reverse.

September 12th,—The U. S. S. Portsmouth arrived, 30 days from Callao. The following is her list of officers:

Thomas A. Dornin, Commander; William A. Parker, James I. Spotts, Lieutenants; Thomas Patterson, Thomas Roney, Acting Lieutenants; Isaac Brinkerhoff, Surgeon; Levi D. Slamm, Purser; Wm. M. Gamble, Acting Master; Samuel F. Cowes, Assistant Surgeon; Charles Carpenter, R. J. Bowen, J. W. Walker, A. J. McCartney, Midshipmen; M. Hall, Boatswain; David Bruce, Sailmaker; John Rainbow, Carpenter, and J. H. Baker, Gunner.

September 15th,—From this date the new law goes into operation, allowing all vessels, both foreign and Hawaiian, to enter the ports of the Hawaiian kingdom, without paying tonnage-dues. Ports free. According to the predictions of some commercial theorists a wonderful accession to the business of the islands must be expected.

September 17th,—The "Young Eliza," an American schooner of only 30 tons, arrived in 21 days from San Francisco. This is the first foreign arrival under the new law.

September 22d,—The Dutch Frigate, "Prince Frederick," 36 guns, arrived. She is the first vessel of war, belonging to Holland, that has ever displayed her flag in the port of Honolulu. The following is her list of officers:

Commander.—Col. A. C. Van Braam Houckgeest.

Lieutenants.—P. Blommendall, W. O. A. Van Bennekom, J. J. Boelen, C. A. W. Halverhout, J. P. A. de Tong, J. C. H. Beeloo, J. J. C. Reeder.

1st Surgeon.—J. Feucht.

2d " .—J. A. G. A. Smeets.

Purser.—D. P. Mariouw.

Lieut. of Marines.—L. F. Geill.

1st Clerk.—L. M. Van Onselen.

2d " .—J. C. Van Haeften.

September 25th,—This evening the exercises occurred at the Court House, of the inauguration of E. G. Beckwith, Esq., (late Principal of Royal School,) as President of the Oahu College. The meeting was opened with prayer by the Rev. E. W. Clark, singing by the choir of the 2nd Foreign Church, statements respecting the history and present condition of the Institution, were made by Rev. R. Armstrong, Secretary of the Board of Trustees; Mr. Beckwith having declared that he accepted the office of President, to which he had been invited by a unanimous vote of the Trustees, was duly inaugurated, by the keys of the Institution being delivered to him by Rev. S. C. Damon, Vice President. An able and interesting inaugural address was then delivered by the President. It occupied one hour in the delivery, and was listened to with marked attention; singing followed, and the meeting was concluded with the benediction by the Rev. L. Smith

Before the closing of the meeting, by motion of Mr. Angel, U. S. Consul, a copy of the address was requested for publication.

A more full report of the proceedings will be found in the Polynesian of the 7th inst., and the address together with the Charter, and other accompanying documents will be published by the Board of Trustees.

September 27th—The "Asa Thor" arrived from China.

We have dates from Hongkong, by the Asa Thor, to the 29th of July, and many items of interest are contained in the papers which have come to hand by her.

Among these is one of a melancholy nature, in relation to the murder of Mr. George Perkins, who resided in Honolulu for a few weeks, and is favorably known here.

From evidence adduced upon the trial of a Chinaman and his wife, who were indicted for his murder, it appeared that in May last he left the Danish bark Concordia, in which he was voyaging, with the intention of proceeding to Macao. The Chinaman and his wife had charge of the boat in which he embarked, and from the testimony of two others, who were a part of the boat's crew, it seems that he was stabbed with a pike till he was apparently dead, his body was rifled and then thrown overboard. The jury in the case returned a verdict of guilty, and the sentence of death was pronounced upon them by the Chief Justice.—*Polynesian.*

September 27th—The Americon schooner "Vaquero," arrived from San Francisco, bringing 14 days later news, from Europe to July 19th, and U. S., to Aug. 5th.

Mr. Ogden, of Penn Yan, N. York, has been appointed Consul at Honolulu.

The difficulty between the United States and France, respecting the Consul at San Francisco, is settled, and when the French flag is again hoisted, it is to be saluted. So it appears that Mons. Dillon has been more successful in combatting Uncle Sam's officials, than he was those of His Majesty Kamehameha III. The reason, we doubt not is, that in the former he was right, and the latter, wrong.

The late news from Europe does not show that there has been much advance in the Russian war. It would seem as if crowned heads and their ministers were in quandary They do not know what to do.

The report that Austria had joined the Allied Powers of the West, was premature. If she did, there is evidently a disposition to fall back.

Sir Charles Napier, commanding the Allied Forces in the Baltic, has signified his desire to attack Cronstadt, when so advised by England. So say the newspapers. At the last accounts the cholera was raging at Cronstadt, and on board some of the English vessels of war.

A New Name for Brandy, or

A New Argument for Total Abstinence.

Dialogue between two neighbors, Mr. Common-Sense, and Mr. Love-the-Bottle.

Mr. Common-Sense.—'Good morning, Mr. Love-the-Bottle.'

'Good morning,' is the reply.

'I thank you for loaning me the No. of the 'New Era' for Sept. 7th, altho,' after reading it, I had a most frightful dream.'

'Do, pray, tell me what your dream was.'

'I am almost afraid to tell it.'

'Come, come, neighbor, out with it.'

'Well, I dreamed that all the liquor selling hotel keepers, in the United States, had got their signs newly painted with the following: 'Licensed to sell hell-fire, manufactured by the French.'

'Why, neighbor, what could possibly have made you dream such a dream, after reading the 'New Era?.'

'No mystery about the matter—have you not read, in that No. of the paper you loaned me, what a certain writer says about people in the U. S. drinking hell-fire?'

'Do explain yourself—where is the paper?'

'Here is the paper, neighbor, read for yourself.'

"In England they drink ale, most of which is very thin; in France and the nations of the continent they confine themselves to the bright and scarcely intoxicating wines which are indigenous to their climes; but in the United States the common cup is hell fire, popularly known under the name of brandy. Next to this is the most feverish and intoxicating of French wines—champagne—generally diluted with water when used by the French, but quaffed by us in goblets of profusion and always in its native strength."

'But who is it, neighbor Common-Sense, that writes such severe language?'

'Read for yourself, neighbor, Love-the-Bottle.'

He reads the following editorial remarks:

"We copy the following just and excellent remarks from 'Europe in a hurry,' by George Wilkes, Esq., formerly Editor of the 'Police Gazette,' New York. We have merely had time to glance over the volume, but we are fully convinced that Mr. Wilkes possesses in a high degree that impartiality and fairness so rarely met with in Continental travelers.—The style is fluent and racy, and as Mr. W. apparently neither wrote for Buncombe nor Cockaigne he was indedendent enough to be just."

'Mr. Wilkes must be a shrewd observer,' says Mr. Common-Sense, 'but the query with me is, how the Editor of the 'New Era' should have published such paragraphs.'—To call brandy, hell fire, is worse than for the celebrated Robert Hall to call ardent spirits, 'liquid fire, and distilled damnation.'

'Ah, neighbor Common-Sense, do you not see, that the Editor of the New Era, quotes that extract, to show that high duties, make base liquors—turning brandy into hell-fire?'

'O, yes, I understand that, and I suppose he would try and make his readers believe, that the higher the duty, the poorer the liquor. Then, of course, if this reasoning is correct, where there is no duty, the brandy is "simon pure."'

'Certainly,' replies Mr. Love-the-Bottle. 'This is most obviously true.'

'You believe this doctrine, do you?'

'To be sure, I do.'

'Let me ask you one more question, Mr. Love-the-Bottle. Do you suppose French merchants send a purer and better article, to sell at Tahiti, where there are no duties, than they do at Honolulu; or do you suppose French Whalers barter off a finer article among the Indians in the N. W. Coast and the Marquesians, than they send to the United States?'

'Ah, ah, ah,' replies Mr. Love-the-Bottle. 'I never looked at the subject in that light!'

'But is not that a common sense view of the subject?'

'I confess, it is; but you know we, who will have our brandy, desire to purchase our beverage as cheap as possible; besides, you know that we dislike to have our liquors denounced and taxed, and liquor selling made a disreputable business.'

'I am as well aware of that matter, as you are; but if the Rum organ extols writers, who call brandy hell-fire, you must not be surprised if we Common Sense folks call brandy by the same name. The truth is, neighbor, I was surprised to see that paragraph in the columns of the "New Era." If the same had been found in the "Friend" or "Polynesian," I imagine there would have been loud complaints. Perhaps a French man-of-war would have threatened to blow the town down, and the Government up, for offering such an insult to the French nation, and French commodities.'

'But enough, neighbor Common Sense,' 'I am engaged.'

'But, stop, a moment. Do you wonder that Common Sense people tax and denounce brandy and all intoxicating liquors, when they witness the sad evils inflicted by them upon the community? Are you aware of the evil, and extent of the evil in Honolulu?—Did you ever enumerate the young men that have gone down to the drunkard's grave even in Honolulu? There was Mr. So and So, clerk, and Mr. Thus and So, the hotel keeper, and Mr. Would-be-a-Gentleman, and Mr. Fast Man, and Mr. Love-the-Bottle, a relation of yours.'

'Stop, stop,' says Mr. Love-the-Bottle; 'this is an unpleasant subject; I must attend to a little business down town.'

'Allow me,' says Mr. Common Sense, 'to request that when you call for the next glass of brandy, you will recall the new name for brandy; and when you are drinking it, remember, that you are drinking a beverage which so inflames the brain, that the poor inebriate has worse dreams and visions than I experienced last night. I tell you, delirium tremens is no joke; and I fear unless you knock off immediately, you will soon have an attack. Come, come, neighbor, sign the Pledge, and bid farewell to the bottle.'

'I will; hand me the Pledge.'

A Pledge was now brought forward, and Mr. Love-the-Bottle signed his name, with a bold, though rather trembling hand. Who will follow his example?

Irish Emigrants and their Liberality.—It is a fact that would defy belief were it not for the result of official inquiry, that the emigrants to the United States, from Ireland alone, besides having subsisted themselves, have sent back to their kindred for the last three years, nearly five millions of dollars annually, thus doubling in three years the purchase money of Louisiana.

Edward Everett.

"According to Gunter!"

Some months since we received a letter from J. Hunnewell, Esq., of Boston, intimating that he had in his possession a Gunter's Scale, the history of which was identified with the history of the Sandwich Islands, so far as related to the measurement of cloth, by the yard. It was also intimated, that if requested he would forward the same for safe keeping in some Museum at the Islands.—We would remark that the scale has been received, and deposited in the Museum of the "Oahu College." It was accompanied by the following interesting letter:—

Boston, April 15th, 1854.

To Rev. Samuel C. Damon:

My Dear Sir:—Agreeable to your request, I have sent you my old two foot Gunter's Scale, by the ship Washington Allston.

In giving you a history of the Scale, I must introduce myself, by telling you that my first residence at the islands was during the life time of Tamehameha, first. During that time, I never saw or heard of any kind of a standard for long measure; the arms of man was the only way to measure that I had ever seen, and this was a very uncertain, as well as unsatisfactory and vexatious way in trade, particularly in selling cloth, as it would sometimes take hours to decide on the measure of a fathom and a half of cloth: particularly the valuable kinds of cloth; then men with extremely long arms were in requisition, and they would sometimes require over seven feet to the fathom—yield this point once and we should be likely to see the long fathom, or long arms brought in as long as that kind of cloth lasted.

In the year 1820, I made and commenced the use of the yard-stick, which was the first that I ever saw there; it was a great novelty, and I have many times been told by the natives that I cheated, that my yard stick was too short; in such cases my only appeal was to the old Gunter scale (which I now send you) as my standard and the white man's standard, and to establish this as a standard required long arguments and much patience and perseverance.

Other yard sticks were made subsequently, and brought to compare with my standard before they were acknowledged as satisfactory. This old scale is not introduced as the first that was ever carried to the islands, but as the first that was used as a standard measure, in trade, in Honolulu.

If you and your friends should deem this old scale to be of value enough at Honolulu, to be preserved there as a relic, please place it where it will be preserved and appreciated as such. Very respectfully, yours,

James Hunnewell.

The Milky Way.—The number of telescopic stars in the milky-way, is estimated at eighteen millions. In order, I will not say to realise the greatness of this number, but at any rate, to compare it with something analogous, I will call attention to the fact, that there are not in the whole heavens more than about eight thousand stars visible to the naked eye. Humboldt.

Poetry.

[For the Friend.]

BY MISS F. M. CAULKINS.

God hath Blessings for the Sea.

Under Ocean's tossing wave,
Mill ons find a nameless grave;
Yet s me angel whispereth me,
God hath blessings for the sea.

Careless men who fear not God,
Boldly sweep the ocean broad:
Thus it will not always be,
God hath blessings for the sea.

Tell me not of to tured slaves,
Dunge n-wafted o'er the waves:
Waves shall bear them homeward free,
God hath b.e sings for the sea.

Warring foes may plow the main;—
Fle ts a thundering strife maintain;—
Can they balk the hi h decree?—
God hath blessings for the sea.

Ships with Chr stian flags unfurled,
Wafting Bibles round the world,—
See, they start at mercy's plea!
God hath blessings for the sea.

Seamen then, redeemed and tried,
While from coast to coast they glide,—
Every where shall p eachers be:—
God hath b essing- for the sea.

New London, Ct., July 3, 1854.

[N. Y. Correspondence of the Friend.]

Great Bear Hunt.

The great European bear hunt continues, and every day the excitement increases in intensity. Sir Charles Napier is heading him on the Baltic, and no less vigilant hunters are cutting him off on the Black Sea. On the Danube he can no longer find a safe shelter, and the last news by steamers shows him to be in a growling, uncomfortable mood. He gets no sympathy; and worse still, he deserves none. Ever since he put his ugly paw on Hungary, and indeed long before, so haughty and selfish has been his bearship, so oppressive and cruel his conduct, that the humane every where have longed to see him humbled. The prospect is, that he will soon be treed near Moscow, or holed in Siberia. There is no outlet for him on the East, the Turks are so expert with the musket and sabre; none on the South, for to say nothing of more potent powers, the Poles and Hungarians would eat him without roasting. And as to the West, Sir Napier's dogs in concert with some French hounds will bark his hide off. His only hope then is in retreating among the less grizzly, and less savage bruins of the cold North. In the mean time the mighty hunters will be helping themselves to his cubs!

This hunt is no holiday affair. Its social and moral results are now prophesied and pondered with the deepest interest, both by statesmen and philanthropists. That two such nations as England and France—antipodes long before Nelson flung out to the breeze "England's Expectation at Trafalgar," and if possible more intensely so since—that these two nations should shake hands across the Channel, and unite in a great bear hunt, is a marvel with a moral!

OTHER EUROPEAN GAME.

While this Royal Hunt is going on, numerous parties of the people are trusting Providence and keeping their powder dry for other important game. As for example in Sweden, parties are scouring the hills and vallies, for what is called in the United States, Religious Liberty; in Spain, for relief from the domination of an unprincipled, bull-fighting Queen; in Italy, for a dead shot at Popery; and in all Mahomedan countries, for the beast Alborak and his rider, that they may make a nocturnal journey in another direction. In China, too! Quadrupedante putrem sonitu quatit angala campum:—i. e., literally translated, the Celestials are wide awake for an immense good; and in Japan, they are hunting it with Commodore Perry's iron horse. This sleepy world is waking up, and revolving in the direction of right side up, to receive and appreciate, and improve richer blessings than have gladdened it since the gates of Eden were shut.

AMERICAN HUNTING-GROUNDS.

Here, too, we are on the alert; not, however, hunting bears, as they have been scarce ever since George Washington & Co. cut down the hollow trees, and threw shot with such precision. Not hunting fugitive slaves, neither. The disaster to Mr. Douglass has well nigh put an end to this business, and him too. Should he survive long, it is believed he can never fully recover. The whole story, as another Hon. Senator briefly tells it, is this:—One dark night he went on a dark mission to Nebraska, and blazed away at a very black object; when to his utter astonishment, his musket not only kicked him over, but kicked out of him all his self respect and moral sense. He had not enough left for a priming. The ladies, however, showed their sympathy, if they did not make up his loss, by sending him thirty pieces of silver! Since that time few can screw up courage enough to hunt in the dark. They insist on daylight; so that if they are blown to atoms, they may see what becomes of the pieces! But we are hunting in a manner worthy of a free people; hunting for the great principles of right; for the immunities conferred on men by the best charter ever penned by uninspired man, and the higher behests of law and liberty bestowed by infinite Wisdom. The enlightened moral sense of the community has been severely shocked by the late acts of Congress designed to extending the area of slavery; and never did a crew of wrecked mariners cast out the best bower, or sweep every point of the horizon for relief, with a more earnest will, than is now manifested by the wisest and best men of the land. They insist that the Constitution shall be respected, that odious and unjust laws shall be repealed, and that the teachings of God in his word and Providence shall be heard and heeded. The moral sentiment of the land has never before been so aroused and concentrated. Hence, both cabinet and party guilty of the flagrant wrong, are dissolving like April snows. The last great thaw was in New Hampshire. It brought down the Merrimack from the dark, deep ravines of the White Hills, a freshet which carried off an immense quantity of Democratic flood-wood, including the State Printer, with his entire political stock, and the jolly-boat of the candidate for the U. S. Senate. The last seen of them, they were miles below Concord, just going over Hook-set Falls! "The Friend" would be joyfully surprised to see the old conservative and strong-minded men and women, too, of the free States;—the former, like soldiers of Revolutionary memory, shouldering their canes to show how they are ready to fight again for freedom; and the latter, like Madam Bailey, late of Groton, Ct., doffing their flannel skirts to make cartridges to utter death to slavery, and freedom to every human soul. Rare hunting, under these circumstances! Next fall the trophies will begin to come in; when it is expected the bear's skin will be dressed to make mittens for the freed blacks in Canada.

Yours, truly, J. S.

New York, July 20, 1854.

SUNDAY CORN.—The Investigator, an infidel paper, publishes an extract from a letter in which the writer says he has raised two acres of "Sunday corn," the proceeds of which he proposes to devote to the purchase of infidel books. All the work upon it was done on Sunday, and he thinks it will yield about seventy bushels to the acre. "I don't see," says this painstaking Sabbath-breaker, "but what Nature or Providence has smiled upon my Sunday work, though the priests tell us that no labor performed on that day ever prospers. My two acres of corn tell another story." Upon this, the Rural New Yorker comments briefly thus: "If the author of this shallow nonsense had read the Bible as much as he evidently has the works of its opponents, he would have known that the Ruler of all does not always square up his accounts with mankind in the month of October.—*Southern Christian Advocate.*

☞ Neither does God square up his accounts with the ship owner or ship master at the end of the voyage, who hurries his ship off Sabbath morning; neither with the whaleman who is so anxious to fill up his ship with oil, that he altogether overlooks the command, "Remember the Sabbath Day, and keep it holy." What sheer folly to imagine that God will allow the open violators of his laws to escape unpunished. "Whatsoever a man soweth, that shall he also reap."

The Samoan, or Navigator Islands.

We have just received the January No. of the Samoan Reporter," for January, 1854. It contains much interesting intelligence, relating to that group of islands. The population of the group now numbers 33,901—scattered over six islands—the largest island containing a population of 15,587, and the smallest, 191. Some singular facts are presented in connection with this census; while the number of males is 11,736, that of females is only 9,841; boys, 6,456, and girls, 5,865 The following statement may not be devoid of interest to some of our readers:—

From an article in the Edinburgh Review, some years ago, it appeared that the proportion of children and adult females to every hundred men stood as follows in the United States, Ireland, and New Zealand:—

	United States.	Ireland.	N. Zealand.
Men	100	100	100
Adult females,	98	108	77
Children,	161	141	48

According to the census just taken, we have in Samoan for every hundred men—84 women, and 105 children.

We regret to see it announced that the war has been renewed among the natives of the group.

Honolulu Circulating Library Association.

We rejoice to learn that this Association is not likely to pass into oblivion and forgetfulness, as some similar institutions have done in Honolulu. At a recent meeting the following officers were chosen:

G. M. Robertson, Esq , President.

W. L. Green, William Webster, and C. H. Lewers, Directors.

J. L. Blaisdell, Treasurer.

Mr. Fosbrooke, Secretary.

The general object of the association to sustain a General Reading Room, and Library Annual subscription, $6 00. It is not designed to confine the privileges of the Association, merely, to its members, but to allow the public to share in its benefits. It speaks well for the vigor of the institution that the "Literary Club" has become "annexed."

We understand that application has been made to the Hawaiian Government, for the grant of a suitable and eligible site, for the erection of a permanent building. The lot referred to, is the now vacant lot, adjoining the Polynesian Office, corner of Merchant and Bethel streets. The location is most admirable, as it must strike every one. Considering the great importance of the institution, and the credit which it will reflect upon our city, we cannot think the Government will hesitate a moment respecting the grant. Should it be made, and a subscription opened, we are fully confident the necessary funds would be immediately forthcoming. As an encouraging fact, we have heard that the mechanics (carpenters and others) in Honolulu, intimate that they will do the work *gratis*. If this should prove to be true, we hope the enterprise may be started immediately. Let a building, every way suitable be erected, which shall be an ornament to the city, and embody the intellectual sentiment of the foreign community in Honolulu. This is one of those schemes, which as it appears to us, not one word can be said in opposition. We hope it will not require opposition to urge it forward. The Board of officers, is a pledge that something will be done. Let them be sustained by liberal subscriptions. Now is the time to make a fair trial and praiseworthy effort. It has our most cordial approval.

TWO LECTURES,

On the Origin of the English Language, the necessity of a combination of Norman-French and Anglo-Saxon, and a sure but simple Key to ascertain, by the meaning of a word, the source of its derivation. By D. FRICK, LL. D., Member of the Philological Societies of Paris and of London.

To be delivered on the 13th and 20th of October next, at 8 o'clock, P. M., in the spacious hall of the Bethel, most kindly granted by the Rev. S. C. Damon.

Admittance Card, for both Lectures, One Dollar.

The Czar Among Yankee Tars.

The following reminiscence in the life of the Emperor Nicholas, is sketched by George M. Dallas, late Vice President of the United States, and Minister to Russia. History reports many similar incidents in the lives of European monarchs of other days, but we had supposed this age was a stranger to such dashing eccentricities. It appears the more remarkable that the Czar should have indulged in this freak of his fancy among the citizens of another County:—

A few years ago an American frigate, alike celebrated for the beauty of her proportions, the solidity of her form, and quickness of sailing, entered the harbor of Cronstadt. Her arrival was at once communicated to Nicholas, and before her anchor was fairly down, one of his richly ornamented steamers was observed approaching across the wide bay. The steamer stopped at about one hundred yards distance from the frigate, and a dazzling group of officers was seen to enter a barge, the course of which was immediately directed towards the ship. Acting as coxswain to this barge, and seating himself at the stern, appeared a conspicuous figure with a small white cap, encircled by a red band, and attired in a single-breasted dark green frock coat, the attire corresponding with the individual's subordinate capacity, and presenting a singular contrast to the epauletts and other finery of those under whose orders he seemed stationed.

Always prepared to receive such visitors, our naval commander met them at the gangway, and gave them a cordial welcome.—Among them was the vice-chancellor of the empire, the minister of marine, and a number of admirals and general officers, who went 'aft' in the cabin of the commodore, whilst their coxswain, as if conscious that he must look out for himself, walked 'forward,' and mingled carelessly with the common sailors. As he examined the battery and scrutinized the bulwarks, asking now and then some questions, the hardy tars trained to discern the air and tone of real authority, instinctively touched their tarpaulin hats, and winking knowingly to each other, whispered their conviction, that it 'was the old boy himself!' This suspicion circulated with rapidity throughout the frigate, but no one deemed it decorous, by the slightest word or look, to intimate its existence to him who thought himself, as he wished to be, absolutely unrecognized. After inspecting this proud specimen of our naval architecture and armament, the splendid cavalcade re-entered their barge. And now arrived the moment when the Commodore was to decide whether he should give the ordinary salute of twenty-one guns, or thrice that number, constituting an imperial salute. The suspected coxswain was then observed, alone, and leaning on the wheel of the steamer, as the man of-war's heavy cannon thundered from her ports. He remained silent and stationary until, at the sound of the twenty-second gun, he started with surprise, gathered his officers around him, and after he had explained to them that the 'cute Yankees had seen through his disguise, he issued his orders for the resumption of his true character, signals were immediately noticed to be exchanged with the surrounding forts, and ten or twelve Russian ships in the harbor. The star-spangled banner was then hoisted at the mast-head of the steamer, gracefully playing across the bows of the American ship, while every other armed vessel commenced firing answering salutes.—When these ceased, the flag of the Union slowly descended, and Nicholas proclaimed his real presence by hoisting in its stead the standard of his house—the dark double-headed eagle, on a yellow ground, whose appearance, as if by magic, awoke the cannon both on the shore and the bay, producing the deafening roar of two thousand guns. The self-confidence which leads to those eccentric movements characterizes the deportment of the sovereign every where and at all times.

"No Letters, No Papers."

We have often referred to the fact that sailors were negligent about writing their friends. This may be true, but we fear, that our sympathies have not been sufficiently strong for those, who do write, yet get no replies. How many times have we seen a dark and down cast expression upon Jack's countenance because he received "no letters—no papers" from his wife, his mother, his father, or his sister. Hundreds will doubtless visit the Honolulu post office, within a few weeks, but will go away disappointed. On landing they will hurry away to the post office, and with hearts beating with anxious hope, they will call for their letters and papers, but the reply will fall heavily upon their ears, "No letters, no papers." We never see any one, and certainly never see a sailor, going away disappointed from the post office, but we feel a deep sympathy for him. His heart feels sad. He thinks, for a moment, that all his friends are dead, or they have forgotten him. He declares, that he has so often written and got no replies, that he'll write no more—*never*. We have known more than one sailor make this resolution and stick to it. This is bad, and tends to evil. The influence is injurious upon the sailor's mind. He becomes more reckless than ever.

In view of these facts, we would ask, do the friends of sailors take sufficient pains to write? We fear not. Could they witness Jack's anxiety to receive letters from home, when he is in a foreign port, they would write letters, by the score. We write for sailors, and the friends of sailors, and would inform both parties, that the mail-arrangements between the Sandwich Islands and America, or Europe, are now complete. No difficulty whatever, about forwarding letters either way. Letters are rarely lost,—and communications are frequent. Replies to letters may reasonably be expected in three or four months.

The following deaths have taken place on board of the Portsmouth during her absence from this port:

27th March, Nicholas Turner, (colored,) aged 18; 30th May, Joseph Nutter, aged 21; 1st July, Allen Yerks, shipped at Honolulu last December, aged 24. He shipped at Lahaina last year. 21st July, Wm. H. McKay, Corporal Marines, aged 23.

[For the Friend.]

Naval Intelligence.

U. S. S. Portsmouth,

Honolulu, Sept. 12, 1854.

Mr. Damon.

Sir:—With your permission I send these few lines to you for a place in the "Friend," believing that a history of our doings since we left this port in December last, will come acceptable to your numerous readers. I suppose that it is a well known fact that we made the passage from this port to San Francisco in twelve days, the shortest passage ever made between the two ports, and fully showing that this ship is well entitled to the name which she now has of being the fastest ship in the American Navy. While in San Francisco, we went up to More's Island, and went on to the dry dock and had our copper repaired. While on the dock, she was visited by all the members of the State Senate and House of Representatives, and a large party of citizens, including many ladies. While there, Captain Dornin received orders to charter a Steamer, and with this ship to proceed to Emenada and break up Walker and his fillibustering party. On the third of February, the steamer Columbus took this ship in tow, and we left San Francisco for Emenada, the steamer towing us most of the way. We both arrived and anchored opposite Fort McKibbon, (Walker's Head Quarters,) on the afternoon of the ninth; Walker and his party occupied two double houses and some tents; the flag of the New Republic, (as it was styled by Walker,) was flying. We did not hold any communication with the shore the first ten days; but we could distinctly see that our sudden appearance at Emenada created quite a stir amongst the new republic makers. During the night of the third day after our arrival, Walker, with most of his command, deserted the camp, and left his sick and wounded in charge of a guard of about a dozen men, who also deserted the camp, and left the poor and unfortunate sick and wounded to the mercies of the Indians and Mexicans, who were constantly running around on the neighboring hills. Capt. Dornin humanely ordered all the sick and wounded to be conveyed on board of the Columbus, which was done with great care by the boats' crews attached to the Portsmouth. Some of these men were in a horrid condition. Immediately on their being safely landed on board of the steamer, their wounds was dressed and every thing done to make them comfortable. They sailed the next day for San Diego. On their arrival there, they were transferred to the Southerner, and in her they proceeded up to San Fransisco, at which place Lt. Wm. H. Gilman had his leg amputated. Having drove Walker and his gang of outlaws from Emenada, we both went to San Diego, where we had the good fortune to arrest Major Frederick Emery, Walker's Secretary of State, and Emanuel Ladoro, his agent and spy. They were both sent up to General Wool, at San Francisco, and have been tried, condemned and sentenced. On the ninth of April, the Columbus was discharged, and left for San Francisco in charge of Lt. Wm. H. Bell, and the Portsmouth sailed for Mazatlan. On our arrival at Mazatlin, we found that the Mexicans had forty Americans incarcerated in prison, and the sole charge against them was, that they were found on board of a bark from San Francisco, bound to Guaymas; that they had no passports, and therefore they was fillibusters, and as such they would have been condemned and shot, had it not been for our appearance in the harbor. As soon as our arrival was made known to these poor fellows, they felt sure that they was hope, and certain that the air of Freedom would once more inflate their lungs. After being detained in that port forty-one days, and after a great deal of difficulty, Captain Dornin succeeded in obtaining the release of them all. On the morning of the 20th of May, our boats were all sent to the shore to convey them to the ship; the next day the Revenue Cutter, Wm. L. Marcy, arrived. Her Commander very kindly offered to take them up to San Francisco, and they were all transferred to her. On the 26th, we left Mazatlan for Acapulco. On our arrival at the latter place, we found the place in a state of revolt and under martial law, the Alvarez's party having full possession of the town and fort. We found that Santa Anna had a blockading squadron off the harbor. This was the cause of much trouble, as it stopped the mail steamers from entering the harbor. With a good deal of difficulty, we succeeded in driving off the obnoxious vessels, and obtained a free pass for steamers in and out of the port. On the 26th of June, we left Acapulco with light hearts, full of hope, and as we all had every reason to suppose, on our homeward bound passage. We arrived in Callao on the 29th of July, and here we were doomed to disappointment; for instead of receiving orders to go home, we were ordered to proceed as soon as possible to this port, and on the twelfth of August, at five P. M., we left Callao and arrived here this morning, making the passage from port to port in thirty days. Officers and the ship's company in good health. W. F. G.

A Chinese a Ptactical Christian!.—The ceremony of baptizing a native of Canton, China, took place Sunday afternoon, at the Bethel Church, Main-street, Brooklyn. This convert recently arrived in this country on board of a vessel as steward to Captain Ellis, the master, and intends studying so as to be ablo to return to his native land, and act as a missionary in Canton and its vicinity. He was baptized by Rev. Wm. Jones, who, in doing so, added the name of William (his own name) to that of the Chinaman's, (Ten Wassa,) at his (Ten's) request. He was converted in his own country by reading the Bible translated into his own language; and Captain Ellis, with whome he came to this country, gives him a very high Christian charcter. In illustration of his following out practicaily the teachings of the Bible, it was stated that the mate of the ship in which he came to this country, struck him a severe blow on one cheek, as it subsequeutly proved wrongfully, when he, without offering any resistance, obeyed the Scriptural injunction by turning the other cheek to receive a blow from the enraged mate, who was so moved with the sincerity of the man that he immediately left him, and went to the Captain, and told him that the Chinaman was the first practical Christian he had ever seen, and that he never would use violence with him again.—N. Y. Times.

A Card.

The Trustees of Hilo Boarding School, render public acknowledgments to the people of Hilo generally, foreigners and natives, and to B. Pitman, Esq., in particular, for their prompt and valuable contribution of materials for a temporary building, Cloth, &c., &c., which enabled the teachers to keep the school in operation, after the burning of the buildings, and to render the pupils as comfortable as the nature of the case would allow.

For a permanent two story building, to contain school and lodging rooms, the Trustees have received as follows: From

	$ cts.
B. Pitman, Esq.,	50 00
Capt. O. Smalley,	8 00
" Geo. C. Harris,	5 00
Mr. James Wilson,	2 00
A Friend,	5 00
W. A. Clark,	5 00
Capt. David Cochran,	5 00
" James G. Bragg,	5 00
L. P. Leek,	5 00
J. H. Coney, Esq.,	10 00
Chas. H. Wetmore, M. D.,	50 00
Capt. C. M. Newell,	5 00
" Wm. Shockley,	5 00
" William Devol,	5 00
" James R. Allen,	5 00
" J. K. Tallman,	5 00
" James M. Willis,	5 00
Thos. Miller, Esq.,	5 00
Mr. William W. Reed,	10 00
Capt. William Cash,	5 00
Rev. T. Coan,	30 00
Mr. William Barnes,	2 00
Nine Constables,	2 25
Three individuals, 25 cents each,	75
S. L. Austin, Esq.,	100 00
A Friend, on ship Cortes,	50
Collection in Hilo and Puna,	200 00
Mr. S. Kipi,	10 00
Mrs. H. Pierce,	25 00
Mr. L. Kuapa,	5 00

Mr. J. Kaona, Honolulu, Oahu,	4 00
Collection at Lahaina, Maui,	200 00
	1,309 87½

The Hawaiian Legislature has recently appropriated four thousand dollars to aid the school. The Trustees have made an appeal to the A. B. C. F. M. for a special grant of two thousand dollars, to which they expect a favorable response. They have ordered building materials from Boston and Puget Sound, and are about to collect such as are found in the vicinity, so that they hope to be prepared in three or four months to contract for putting up the building.

It is expected that the whole expense of the building will be about eight thousand dollars. The Trustees have in view not only the wants of the present, but of future generations, and they hope the benevolent friends of education, at these islands, will enable them to carry out their plans.

D. B. Lyman,
Treasurer of H. B. S.

Hilo, August 29, 1854.

[For the Friend.]

The U. S. S. Portsmouth Struck by Lightning.

On the first instant, in latitude 16° 37 N., longitude 122° 52 W. At six P. M., commenced blowing fresh from North East, which was followed by a heavy shower, accompanied with very sharp lightning and heavy thunder. At seven P. M., the lightning struck the Portsmouth's main conductor, and followed it down without doing any injury to the ship. The Captain of the fore-top, with three men, was in the top, and was prostrated by the shock, but not injured.

Sept. 12th, 1854.

Persecutions in France.

It is no uncommon occurrence to notice in English and American papers, accounts of the persecutions of Protestants in France. In the "Watchman and Wesleyan Advertiser," published in London, May 31, 1854, we find a summary of these persecutions, for 1853-4. Instances of the police and civil authorities interfering with Protestant worship, are given, and 61 distinct specifications are enumerated. We select the following, as exhibiting a correct view of the subject:

February 14th, 1853.—The Protestant worship at Tarsac, commune of St. Saturin, (Charente,) is prohibited, and the temple (place of worship) closed by order of the Prefect. The motives alleged are:—"That the worship had never been authorized, and is of a nature to cause disunion in families and to disturb public order."

March 4th.—Several Christians, of the Plymouth brethren, are condemned by the tribunal of Montelimar, (Drome,) severally to twenty-one and eight days' imprisonment, and to various fines, for holding an unauthorised meeting at St. Gervais. The priest of the parish is avowedly the instigator of these proceedings.

The meetings at Labeaume, (Drome,) are closed by direction of the Mayor, in virtue of orders received, to forbid meetings out of the temples. They have since recommenced.

March 20th.—For nearly twenty years it has been the custom of the Protestants of Chaillevette (Charente Inferieure) to meet, during the winter months, in private houses, for mutual instruction and prayer. The Mayor knew of this custom and sanctioned it. On the 20th March, however, the Commissary of police of the Tremblade, accompanied by three gend'armes and a rural police officer, all fully armed, arrive at the house where the people are met, and disperse the meeting, principally composed of women and children.

The Protestant meetings at Branges (Saone-et-Loire) are interdicted, the people meet privately in companies of nineteen each.

April.—The meetings of the Baptists, at Bordeaux, are closed.

May.—The Prefect of the Charente prohibits the meetings at Fouqueure, because they are not authorised, and are besides, he says, "of a nature to throw disquiet in the public and in families.

June 8th.—M. Porchat, Pastor of St. Mans, is condemned by the tribunal to fine and costs, and the meetings are ordered to be closed.

June, or July.—The Baptists at Rittenshoffen and Grumbrechshoffer (Haut Rhin) are prohibited from meeting, and the proprietor of the house in which the services are held is sentenced to a fine by the Court of Wissembourg. He appeals to Strasbourg.

August 2d.—The Prefect of the Aisne declares all the meetings of the Baptists closed, throughout the department.

August 28th.—The Commissary of Police of Chauny (Aisne) closes the chapel of the Bpatists in that town, notwithstanding its having existed for many years.

Sept. 4th.—While the Protestant congregation at Franvilliers (Sarthe) was worshipping God, the pastor of the established church of Contay officiating as minister of the flock, the Commissary of Police enters, and, interrupting the service, begins to question the congregation, and declares the meeting illegal.

Oct. 9th.—Refusal of the Prefect of La Charente to allow, or authorize, M. Moroy to distribute tracts in his parish, (Mansle.)

January 8th, 1854.—For upwards of ten years the parish of Chateau-Ponsac, Charente, has embraced the Protestant faith, almost to a man, and had, since then, peaceably enjoyed the ordinances of religion, when, without the least warning, two gend'armes enter the chapel, and prohibit the service in the name of the law.

Jan. 12th.—M. Fournier, Pastor of the Protestant Established Church of Negrepelisse (Tarne et Garonne) is required by the Prefect of Montauban, to obtain a license as bookseller, in order to be able to distribute the Almanach des bons Conseils and the Bible among his flock!

Jan. 27th:—Mr. Gilly, of the French Methodist Connexion, is condemned to a fine by the tribunal of Alais, (Gard,) for holding religious meetings at Branous, although it was proved that the Mayor authorized the meetings, and that the Sous Prefect had given a verbal promise of authorization.

February.—Several members of the congregation of Plymouth Brethren at St. Jean de Gard, are sentenced by the tribunal of Alais, (Gard,) to fines for holding unauthorized meetings.

March 3d.—All the chapels belonging to the Evangelical Society in the Haute Vienne, Villefavard, and others, are closed, under the pretext of their not belonging to the Protestant Established Church. The details of this painful affair are still wanting. Mr. Barbezat, Pastor of Randon, one of the churches closed, on hearing this, is seized with an apoplectic fit, of which he dies a few days afterwards.

March.—The gend'armes enter a Dissenters' meeting, at Plantiers, Gard, and disperse the congregation. The preacher is called upon to answer before the courts of law.

Predictions of the Weather.—*Influence of the Moon.*—Dr. Olbers, the distinguished astronomer of Germany, was led to the following conclusion by an examination founded on careful meteorological observations for fifty years in different countries: "I believe," he says, "that I have demonstrated that the influence of the moon upon the weather is so small that it is totally lost amid the great variety of other forces and causes which change the state of our atmosphere;" and that "its pretended influence on men, animals, or plants, is all of it due to illusion and prejudice." No astronomer can by any means foretell what will be the state of the weather on any future day; and it is time that the community should be no longer imposed upon by pretences to predict the weather, or by the ridiculous superstition that there is any influence of the signs of the Zodiac upon the parts of the body of man or animals.

[For the Friend.]

Raiatea, July 10, 1854.

Dear Sir:—As you are an advocate for the Temperance Cause, you will be pleased to hear of what has at last been effected here. You are aware, that during the civil war which raged here, disorganizing society, drunkenness, and heathen immoral dances were permitted, and grew to a fearful height. These have also been continued, since the present government was established; threatening entire ruin to the country. At length the Chiefs, though of the same class, began to see the evil, that anarchy and confusion threatened to overturn their authority. They have arisen to grapple with the Hydra. A general meeting of the Chiefs was called, to take the subject into consideration.

There was only one Chief who pleaded in behalf of liquor. He, however, was supposed to speak the mind of the Chief, second in authority on the Island, the Chief himself, being on that occasion, the King's speaker. After the arguments for, and against the evil had been heard, the King's speaker rose and said, he gave the business into the hands of the Governors of districts, and of the principal Judges, to settle it as they desired, or agreed upon. They each successively rose and declared they were for abolition; cut off the evil, no mitigation. It was a great nuisance. They told the speaker, as he had given it into their hands, they would keep it; they would not give it up again to him; he had gone too far to recede. He rose and said, those who are for suppressing the sale and drinking of spirits, hold up your right hand, when the assembly, as one man, rose and held up their hands; he who had pleaded for it, excepted.

It now remains to be seen, whether they will be able to carry out in practice, what they have established in theory. A day or two was allowed to clear away the rubbish. The King's speaker the same night, or the day after, purchased a cask of spirits, whether to have a good swill before the days were out, or in bravado for an example to set others on, is not known. The grog sellers have so many sly ways of evading the laws; the dollars they will have, whether the people die or live. Nothing else is so profitable as grog. I fear the people will find it difficult to stop the evil. The government is not yet on a firm basis. Every right-minded man will rejoice at the attempt. It shows they are well aware of the evil, and as far as their means extend, they will prevent it. Now, another serious evil, a very heavy trial has befallen them. A vessel from the colony of New South Wales touched at Huahine, full of Mormons bound to the Salt Lake. She had the measles on board—communicated them to the people of Huahine, whence they spread over the group. Not a family on Raiatea, so far as known, has escaped. The measles had not proved so fatal—the whole families were ill at once; but many, a few days after recovery, have been seized with flux, which has proved fatal. It is still raging. It has not carried off so many on Raiatea, as on some of the other islands. It is a heavy judgment. It will be a blessing, should it prove a means of repentance, for their wicked departure from the doctrines of peace and good will, so long proclaimed amongst them, and for slighting the messages of mercy, so kindly sent amongst them, as observed by a Looker-on.

☞ Many of our readers among whalemen, will be interested in reading the following :

TRISTAN D'ACUANHA.—A correspondent of the Journal of Commerce mentions the death in December last, of old Governor Glass, who at the head of a little colony of less than one hundred and fifty people, has dwelt upon the island of Tristan d'Acuanha for a period of many years. He was about eighty years of age at the time of his death, which was caused by a painful cancer. The little island on which he had passed a considerable portion of his life is about forty miles in circumference, and very rocky and mountainous, and the soil is so poor and the winds are so violent that the inhabitants can grow little else than potatoes. Of the one hundred and fifty inhabitants of the isle, eight only are men—the remainder being women and children. Rev. Mr. Taylor, sent out there by the Foreign Missionary Society, dwells among them, preaching and instructing their children. He is now endeavoring to procure a ship to take them away from the barren home which they have so long occupied. Their departure, if they go, will prove a serious loss to the whalers in those seas, who have been accustomed to resort to the island for water and fresh provisions.

A GOOSE NINETY-THREE YEARS OLD.—Mr. Everett, farmer, of Kirby Lodge, near Rockingham, has a goose which he vouches to be at least ninety-three years old. It has been on his farm full fifty years, and passed the former part of its life on the farm adjoining. It is a large fine fowl, with a head and neck as white as snow, and has lately hatched a brood of goslings from its own eggs. Mr. E. has a book stating its age and history, which he can authenticate. If we were to pluck a quill from this antiquated goose, and write its biography, it might not be an uninteresting record. The echoes of the Scotch rebellion had scarcely ceased when it had first peeped from beneath its shell into the wide world, and possibly its immediate ancestor smoked at the festive board at the coronation of the third George. It cackled at the Gordon riots, and hissed when Wilkes was made a state prisoner. It was hatching with the first French revolution, and screamed when Napoleon le Grand threatened to invade our shores, and also when Castlereagh was made Prime Minister. Like many other bipeds, it has brooded over scores of addled eggs, and grown no wiser from experience, but though year after year has flown by, they leave the "giddy goose" still.—Leicester (Eng.) Mercury.

VISIBILITY OF MERCURY.—The most favorable time for seeing Mercury this year, will be early in the evening near the 14th March, 15th July, and 11th November; and early in the morning near April 8th, August 8th, and November 27th.

☞ We would acknowledge our usual exchange papers; also, a package of newspapers, from J. W. Sullivan, Newspaper office, San Francisco; also from J. Ludlow, Esq.

☞ Visitors at the Seamen's Reading Room, will find a fresh supply of papers.

Information Wanted.

By almost every mail we receive letters requesting information. In several instances, of late, it has been our privilege to communicate facts, such as will relieve the minds of anxious friends. It always affords unspeakable pleasure to perform offices of this nature, especially when we have good news to communicate. The following are among the letters which we have lately received. We publish them in full, for two reasons; firstly, we hope, that should the persons referred to, read them, they will embrace the very earliest opportunity of communicating with their anxious friends; and secondly, we desire to call the attention of all seamen to the importance of writing to their friends, by every opportunity. Especially would we call the attention of all whalemen to this subject. Thousands of whalemen, will in a few weeks visit the various ports of the Sandwich Islands, and we hope, not one will fail of writing to his friends. Seamen owe to themselves and to their friends not to allow an opportunity of forwarding letters to fail.

☞ All letters will now be forwarded safely through the Sandwich island Post-office.

☞ Hawaiian postage five cents.

SIDNEY, Shelby Co., Ohio, July 12th, 1854.

REV. MR. DAMON.

Dear Sir:—Be so good as to permit me to ask the favor of getting some information from you respecting my son, Wm. B. McElroy. He went aboard of the whaleship Arnolda, which left Bedford, Massachusetts, about two years ago, commanded by Captain Harding.

I received a letter from William, written from the harbor of Hilo, Sandwich islands, under date of April 10th, 1853; since that time, I have had no letters, nor do I know whether he is in the land of the living or numbered with the dead. I wrote to Messrs. J. B. Wood & Co., Bedford, Mass. They could not give me any information, but advised me to address a letter to you, and that you would immediately make the inquiry of the commander of the Arnolda.

If you will be so good as to write to the Captain on this matter, and on receipt of his reply write to me directed as above, you will confer a special favor on a much distressed father, and if it is ever in my power to reward you for your attention to this matter, I will take a great pleasure in doing it.

In so doing you will oblige,

Your obedient servant.

HUGH McELROY.

NEW YORK, July 1st, 1854.

MR. DAMON,—Having been informed that by writing to you I might possibly gain some information of my brother, whom I have not heard from in near two years, I have taken the liberty of addressing you. His name is William C. Morris. He sailed from New Bedford in July, 1851, in the whaleship Montezuma, Capt. Towers. I think he left that ship, as I have been informed, in 1852, and went on board the ship Averrick Kenniken. If you could learn anything of him, and would be kind enough to let me know, or would be kind enough to send the letter which I enclose to him, you would eternally oblige an almost broken-hearted sister.

MARY E. MERRITT.

☞ If you should write, direct your letter to Mr. Nathaniel T. Merritt, 54th street, between 5th and 6th avenues, New York.

SAN FRANCISCO, Aug. 21st, 1854.

MR. DAMON—

SIR:—I write to see if I can hear any tidings from my brother, JOHN HAMBLIN, cooper of bark or ship "Charles Frederick." He got his discharge from her a little more than two years ago on account of his health, and I have never heard from him since. My parents live in Wood's Hole, Massachusetts. I have been here over 12 months, and expect to remain to receive an answer to this, should you write one. If you can give any tidings, you will greatly oblige Yours, very respectfully,

CHARLES C. HAMBLIN.

SAG HARBOR, May 30th, 1854.

REV. SIR:—Having heard recently that my son, JEREMIAH P. BUNCE, was in Honolulu, I would wish to solicit your kindness to advertise in your paper, that information is wanted of Jeremiah P. Bunce, who has been gone seven years. Not knowing what has become of him, I had given up all hope of ever seeing or hearing from him again; but an acquaintance of mine saw him in Honolulu six or eight months ago, and had conversation with him. I desire therefore, that if he is living he would come home or write home. He will hear of something greatly to his advantage; besides it will relieve the anxiety of his afflicted mother. Kind sir, if you will be so kind as to print the above notice you will oblige a disconsolate widow, and may God's blessing rest on you.

Yours, respectfully,

NANCY M. BUNCE.

SAG HARBOR, Long Island, State of New York.

LONG BAR, Yuba Co., California, July 11, 1854.

MR. DAMON.

SIR:—I take this liberty to address you a few lines thinking you might give me some information of my brother, Wells Stow, who sailed from New Bedford a year ago last spring, or about that time, in the ship "Majestic," Capt. Percival. My folks have not heard from him since I think he shipped as blacksmith. Any information of him, or the ship, will be thankfully received. When I visited your lovely islands in the bark "J. E'Donnell, Capt. Bennett, at that time the seaman's friend and Chaplain, was, as the seaman called him Father Damon.

Yours, ALONZO W. STOW.

P. S.—Please to direct your letter to Parks' Bar, Yuba Co., California.

WANTED.—Exchange on the U. States and Europe.

Oct. 2, 1854.—3m

Appeal to the Friends of Humanity.

It is well known to some in this community, that Mr. James L. Hassard, of Molokai, has received serious injury, and compelled thereby to relinquish for the present all manual labor. The following letter from the Rev. C. B. Andrews, a Missionary on the island, will furnish a correct statement of the facts in the case:—

Kaluacha, Sept. 21st, 1854.

MR. S. C. DAMON.

REV. AND DEAR SIR:—Mr. Hassard wishes me to write to you a statement of his accident, which disables him for life from self support.

I was appointed road supervisor on Molokai during this year.

Wishing to break a cart road through a ledge of rocks, where the road for years has been only a horse-track, I hired Mr. Hassard to bore and blast the rocks that narrowed the paassge.

It is about six miles to the windward of our station along the sea side. After nearly completing the work, as he was filling and preparing a blast, it went off, shattering one hand and arm so that the hand is amputated; his nose was cut open, and his sight put out. It is one of the wonders of Providential care, that he was not blown to pieces as the rock was.

Mr. Hassard has a wife (native) and two little boys dependent on him for support, which they received bountifully, while he had hands and eyes. Since then, doctor's bills for himself, and outgoes for their support, have drained his resources lower than should be, with a family to support and himself disabled. He has a house and a few acres of land left, which he has been trying to sell to raise means with which to go to the States. If, in your parish, any of our and his countrymen will feel that he is a "neighbor," according to the Samaritan method of feeling neighborly, it will rejoice my heart. He received his injuries working for the public good. Any of us at any moment may be thrown upon society, as helpless as he is. Please write to me what may be hoped for his welfare.

Yours, truly, C. B. ANDREWS.

☞ It is confidently hoped that the foregoing appeal will not be, in vain. A paper, for subscriptions is now in the hands of Mr. Rawson, the watch-maker, opposite Capt. Snow's store. As our readers peruse these lines, let them remember the precept, "Whatsoever ye would that men should do to you, do ye even so to them." Matt. 7: 12.

☞We have been requested by Mr. Frick, to state, that the time for the delivering of his lectures is necessarily altered from the 12th and 19th, to the 13th and 20th of the month.

New Publication.

THE GOSPEL ACCORDING TO JOHN, IN PARELLEL COLUMNS: ENGLISH AND HAWAIIAN. Mission Press, Honolulu.

This publication will be of valuable service to Hawaiians learning English, and also, to foreigners desirous of learning the native language. Copies of the body to be obtained at the Mission Printing Office, and also at Chaplain's Study. Price, 25 cents.

CHAPTER 1.

1. In the beginning was the Word, and the Word was with God, and the Word was God.	1. I kinohi ka Logou, me ke Akua ka Logou, a o ke Akua no ka Logou.

Card

The Subscriber having been frequently called upon to collect and acknowledge funds for others, would gratefully ackdowledge sundry donations, for "his personal wolfare," from Foreign Residents in Honolulu. S. C. DAMON, Sea. Chap.

October 2, 1854.

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P, CUMINGS.

Kealakeakua, Hawaii.

INFORMATION WANTED.—Respecting Edward Henry, belonging to Yolo Co., California. He is supposed to have died on some part of the islands. Any information will be gladly received by Mr. Gregg, U. S. Commissioner.

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for cash, goods, or Bills on the United States.

The Friend sent abroad.

By paying in advance the subscription price, the Friend will be sent by the earliest opportunities, to the United States, England, China, Sydney, or any foreign country.

The Friend, Bound.

Bound volumes of the Friend for 1, 2, 3, 4, 5, 6, 7, and 8 years at the Chaplain's Study. A reduction from the subscription price will be made to Seamen and purchasers who desire more than a single volume.

Donations.

Levi D. Slamm, Purser	For Chapel	For Friend.
U. S. S. Portsmouth,	$10 00	$10 00

Died.

In Honolulu, August 31st, J. L. Evans, of consumption. Mr. E. was Post Master at Stockton, California, and arrived here on the 21st of July in the Steamer Polynesian, too far gone with disease to be restored.

At sea, on the voyage from Honolulu to Australia, Mr. William Dickson, merchant of Honolulu. We learn that Mr D. accidentally fell overboard from the schooner Mischief, which was then going at the rate of ten knots, and was drowned before she could be hove-to, and a boat sent to his relief.

In Honolulu, Sept. 4th, of whooping-cough, ELLA FRANCES, infant daughter of Capt. BROWNSON, of the bark Harmony, of New London.

Passengers.

Inward per PEYTONA.—Geo. A. Lathrop and Lady, Mrs. C. C. Porter, Mrs. E. M. O'Brien, J. R. Dow, Geo. Wilkes, H. H. Beals, W. C. Reeds, Alfred Moses, H. Dickenson, Capt. Wm. Stott, J. D. Blair, Fairbanks, S. W. Shelton, Dr. B. F. Hardy, L. H. Mandlebaum, Amos Brown, W. P. Williams, Edward Burgess, G. Lanpus, S. F. Mitchell, G. W. Rogers, Capt. Baker, Chas. Chapman, Wm. Pinchbeck, R. H. Robinson, I. Stein, S. Wilkinson, I. Odell, George Tomtellot, Wm. H. Perry, G. Boman, M. Kennett, H. Smith and two Chinamen.

By the Matchless, from Sydney.—Mrs. Brady, W. Davies, J. Smith, Mr Dawe, W. Sparrow, Mr. Homan.

By the Lady Jane from San Francisco.—D. B. Mickles, Dr. W. J. Mills, E. A. Ham, E. B. Purdy, W. Muntrey, A. Brock, W. W. Mickles, A. B. Ensworth, S. C. Hillman, Ahkung, Miss Agnew.

By the General Morgan from S. F.—N. A. Ladd, Ch. Mills, Wm. Benedict, H. Wilmington, H. Dreyford.

By the Peytona for San Francisco.—W. P. Williams, C. A. Poor, John Ladd, Mrs. Brady, S. W. Shelton, Geo. Wilkes, S. Jacobs, C. Wolf, W. Sparrow, E. C. Bowers, Jr., A. K. Clark, Rev. W. S Turner, S. F. Mitchell, G. W. Rodgers, Cpt. Baker, Capt. Baylies, Capt. Coggeshall, W Pinchbeck, Mr Jones, H. Tindall, Jacob Hardy, J. Cutter, John Smith, Apio, and 6 in the steerage.

By the Restless for S. F.—Mrs. Fiddes and two daughters, Messrs Nash, S. C. Grove, S. S. Foster, R. A. Fry, Sheil, Emmett, Freshell.

By the Madonna, from San Francisco.—Capt. John Manwarring, T. H. Megroth.

Per Lady Jane for San Francisco.—Hon. E. F. Purdy, Mr Benjamin F. Foster, Mrs. Kathow and 2 children, Mr. Ensworth, Mr. Munfrey, Mr. Beach, Col. Spencer.

INWARD—Per Vaquero—J. C. Correll, wife and child, J. Mixter, J Price, wife and son, G. Allen, Capt. Brown, Mc Lellar, J. Halsey and wife, J. S. Allen, G. Bunnan and wife, R. Sept. 20.—Am. wh. bark Lafayette, Allen, N. B., 21 mo's, 400 bbls. sperm oil, from Japan coast.

Memoranda.

The Alfred Tyler reports spoken and heard from in the Ochotsk sea in

May.—Ship South America, Walker, 1 whale; Cherokee, Smith, 2 whales; Chas. W. Morgan, Ripley, nothing; Pacific Allen 3 whales; Ocean, Norton, clean; Roscoe, Gifford, clean; Lexington Brock, 1 whale.

June.—Condor, Kempton, 4 whales; Cleone, Sherman, 12 whales. Saratoga, Harding, nothing, Mary, Sayer, 8 whales; Mary, Bayliss, nothing; Washington, Holley, 5 whales; Levi Starbuck, Jernegan, 4 whales; Abagail, Drew, 9 whales; Alice Frazer, Taber, 1 whale; Alexander, Ryan, 3 whales; Adelino, Brotherson, 3 whales.

July.—Wm. Wirt, Ashley, 1 whale; Vigilant, Debbois, 6 Polar Star, Holley, 2 whales, Arnolda, Harding, 3 whales; City, Gifford, 1 whale; Congress, Hathaway, 6 whales; Reindeer, Cromwell, 2 whales; Massachusetts, Bennett, 5 whales Navy, Norton, 1 whale; Minerva, Pease, 2 whales; Daniel Wood, Tallman, 6 whales; Montreal, Grey, 6 whales; Draper, Coffin, 2 whales.

August —Jireh Swift, Earle, 8 whales, Cortes, Stetson, 1200 bbls.; Morea, Peabody, 1 whale, King Fisher, Palmer, 1000 bbls; Mercury, Dimon, wanting 500 to fill; Sarah Sheaf, Wall, 1000 bbls.; Speedwell, Gibbs, 6 whales; Henry, Bunker, doing well, Jas Maurey, Wholden, boiling; Sea, Soule, 13 whales.

The "A. T." left Ochotsk Sea August 26th, in consequence of the illness of Capt. Ripley. Had good weather first part of the season—latter part, foggy. Whales scarce and shy. Heard of but few ships getting live whales—mostly dead ones picked up in the ice.

Capt. Peabody, of ship "Morea," shot himself in the Anadir sea; mate took charge and came down to Ochotsk sea; reported a great deal of ice and whales scarce.

Capt. Palmer, of ship "King Fisher," reports in a gale in July the following ships were driven ashore at Shanta Islands: "Silas Richards, N. B. "Callao" do. and "Benj. Rush," Warren. The 'B. R.' had got off; ships Copia and Cowper, of N. B., had been in the ice, and gone into the bays to repair; also, the ship "Herald," leaking.

The Lafayette reports having spoken ship Roscoe, N. B. 34 months out, 1250 bbls. sperm. The James Arnold, N. B. 14 1-2 months, 500 sperm. Bark Seashell, of Warren, 750 sperm. Ship Miantonomi, 15 mos, 150 sperm. Martha, of Fairhaven, 21 mos, 350 sperm. Heard from ship Jireh Perry, 25 mos, 1150 bbls. sperm.

Sch'r E. L. Frost saw brig Zoe and bark N. S. Perkins: had done well sealing, and were bound for Honolulu,—daily expected.

SAN FRANCISCO, Aug. 23.—Arrived, whaling brig Boston, Hodges, from a cruise, and last from Bhering's Sea and Kamchatka, clean. Had been absent 4 months, and experienced a succession of thick fogs. Died on board, Aug. 12, Capt. J. H. Taylor, late of whaleship Maria Theresa, of New Bedford.

HONOLULU, NOV. 1.

Journal of Events.

Oct. 8. H. B. M.'s Ship "Trincomalee," Houston, Commander, arrived from Port Clarence, Arctic Ocean, via San Francisco. She left Port Clarence on the morning of Aug. 21st; and on the afternoon of the same day arrived at that port H. B. M.'s Ship "Enterprise," a vessel which had not been heard from for three years. The Enterprise commanded Capt. Collinson, passed Honolulu, in company with the Investigator, Capt. McClure, in the spring of 1850. The officers and crew of the latter ship reached England via Hudson's Bay. All the vessels in search of Sir John Franklin, are this season to be withdrawn from the Arctic Ocean. The Enterprise may be daily expected at Honolulu, en route for Hong Kong; the "Rattlesnake" and "Plover" will proceed to Valparaiso. During the long cruise of the Enterprise in the Arctic regions, only three deaths occurred among the crew.

Oct. 10 Minute guns were fired by the American vessels of war in port, in honor of Commodore Downes, U. S. Navy, intelligence of whose death was brought by the last mail.

Oct. 14. The steamer "Sea Bird" arrived from San Francisco. She belongs to the Hawaiian Steam Navigation Co. and will run among the islands. If not too large, she appears just what is needed. Most gladly will all foreigners bid farewell to all sailing vessels when they make their trips for pleasure or business among the islands. We shall be much mistaken if steamboats do not become exceedingly popular among the natives.

Oct. 17. This day arrived the U. S. S. "Susquehannah," commanded by Capt. Buchanan. She is one of the very largest side wheeled war steamers in the world. Her capacity for carrying must be enormous, for she steamed incessantly for 21 days during her entire passage from Simoda, Japan, to this port. The engine was stopped only on one occasion, to allow a burial to take place. The following is a list of her officers:

COMMANDER—FRANKLIN BUCHANAN.
LIEUTENANTS—Thos. T. Hunter, Napoleon Collins, J. Hogan Brown, J. K. Duer, Geo. H. Cooper.
SURGEON—John S. Messersmith; Ass. do., Chas. F. Fahs.
PURSER—G. R. Barry.
CHAPLAIN—E. C. Bittinger.
MASTER—Reubeu Harris.
MARINE OFFICER—Capt. W. B. Slack.
MIDSHIPMEN—R. L. May, E. C. Hawley.
ENGINEERS—Chief, S. Archbold; 1st Assistants, G. F. Hebard, H. H. Stewart; 2d do., E. Filtrian, J. C. E. Lawrence; 3d do., T. A Shock, A. Henderson, S. D. Hibbert.
ACTING BOATSWAIN—Jno. Collins.
GUNNER—C. B Oliver.
CARPENTER—John Green.

The following gentlemen also came as passengers:

COMMANDER—C. RINGGOLD, late Com. U. S. Ex. Ex. E. A. LeKoy, Bearer of Despatches, T. C. Stuart, Sec. U. S. Ex. Ex.

Oct. 23. The "West Point," another steamer belonging to the H. S. N. Company, arrived from San Francisco. Of all the vessels owned by that company, this boat in size and appearance, is best suited to our inter-island trade. We understand that she is a remarkably strong and well-built vessel. Her commander Capt. Jones, is acquainted with the navigation about the islands, having formerly commanded a whale ship in the Pacific.

On the same day arrived the U. S. Steamer "Missis-ippi," 23 days from Simoda.—This makes the fourth steamer which we have to report as having arrived during the past month. The month of October, 1854, may be referred to as the era when steam navigation became fully established in our waters.

The following is a list of officers on board the "Mississippi":

COMMANDER—S. S. Lee.
LIEUTENANTS—Edmund Lanier, Wm. L. Maury, [Hydrographic duty] J. M. B. Clitz, C. M. Morris.
ACTING LIEUTENANTS.—Wm. A. Webb, S. Nicholson.
MASTER—John Knell.
PURSER—Wm. Speiden.
SURGEON.—D. S. Green, Ass't. do. L. S. Williams.
CHAPLAIN.—Geo. Jones.
CHIEF ENGINEER.—Jesse Gay.
MARINE OFFICER—Capt. R. Tansill.
O. H. Perry, Commodore's Secretary.
PASSED MIDSHIPMEN.—J. H. March, W. T. Jones, K. R. Breese; S. C. Mish, Midshipman.
J. W. Spalding, Captain's Clerk.
A. L. C. Portman, Com'd. "
Wm. Speiden, Jr., Purser's "
ENGINEERS—1st Assistants, Robert Danby, Wm. Holland, 2d do., G. T. W. Logan, G. W. Alexander, Wm. H. Rutherford, 3d do., E. D. Robie, J. D. Mercer.
GUNNER.—J. R. Clark.
BOATSWAIN—Amos Clark.
SAIL MAKER.—Jacob Stephens.
CARPENTER.—H. M. Lowry.

Oct. 25. His Majesty and numerous officers of the Hawaiian Government, visited the steamer "Susquehannah." Royal salutes were fired by all the vessels of war in port, and their yards were "manned."

Panoramic View of Honolulu.

We congratulate Mr. Emmert upon his successful enterprize of lithographing a panoramic view of Honolulu. The entire picture is twelve feet long, by two feet wide, and embraces ninety-six smaller views of public buildings and private residences, in Honolulu. The labor and expense attending the enterprise are much greater than persons would, at first, imagine. For three months, with two assistants, he was engaged, in actual labor, upon the engravings, and at an expense exceeding $4,000; but we are glad that he has been compensated. Only about twenty or thirty sets of the views remain unsold, and they may be obtained at Capt. Snow's store. Mr. Emmert, we learn, intends opening a wood engraving and lithographic establishment in Honolulu, and in a few days will be ready to receive orders. His office is over Vincent Granier's store.

☞ Bound volumes of the "Friend" can be obtained at the Chaplain's study, including all the "Nos," for this year, up to the present date.

SAILING DIRECTIONS FOR THE HARBOR OF SIMODA.

By Lieut. Wm. L. Maury, U. S. N.

U. S. Steam Frigate Mississippi,
Honolulu, October 26th, 1854.

Vessels bound to the harbor of Simoda, from the southward and westward, should make Cape Idzu, from which Rock Island bears ESE ¼ E, distant about 5 miles; and if the weather is at all clear, the chain of islands at the entrance of the Gulf of Yedo will at the same time be plainly visible.

Between Rock Island and the main land, there are a number of rocks awash and above water, among which the Japanese junks freely pass, but a ship should not attempt a passage inside of Rock Island, unless in case of urgent necessity, particularly as the north-easterly current, which sweeps along this coast, seems to be, at this point, capricious, both in direction and velocity.

Giving Rock Island a berth of a mile, the harbor of Simoda will be in full view, bearing N½W, distant 5 miles.

Vandalia Bluff, on the east side of the entrance, may be recognised by a grove of pine trees on the summit of the bluff, and the village of Susaki, which lies about one-third of the way between it and Cape Diamond.—Cape Diamond is a sharp point making out to the eastward of the entrance of the harbor.

Standing in from Rock Island, you will probably pass through a number of tide rips, but not get soundings with the hand lead, until near the entrance of the harbor, when you will be in from 14 to 27 fathoms.

Should the wind be from the northward and fresh, a vessel should anchor at the mouth of the harbor until it lulls or shifts, or until she can conveniently warp in, as it is usually flawey and always baffling.

Approaching from the northward and eastward, a vessel can pass on either side of Oho Sima, from the centre of which Cape Diamond bears WSW ¾ W, distant about twenty miles.

Between Oho Sima and Simoda no dangers are known to exist; but the north-easterly current must be borne constantly in mind,—particularly at night and in thick weather—Its general strength is from two to three miles per hour; but as this, as well as its direction, is much influenced by the local winds, headlands, islands, &c., neither can be relied upon.

Should Oho Sima be obscured by thick weather, before reaching Cape Diamond, endeavor to sight Rock Island, for there are no very conspicuous objects on the main land by which a stranger can recognise the harbor at a distance, and the shore appears as one unbroken line.

To the westward of the harbor there are several sand beaches, and three or four sand banks. These can be plainly discerned when within six or eight miles, and are good landmarks.

A vessel from the southward and eastward should pass to the westward of the island of Kozu Sima,* which may be known by a remarkable snow-white cliff on its western side. There is also a white patch on its summit, to the northward of the cliff. From this island the harbor bears N by W ½ W, distant about 28 miles.

*This is the most south-western island of the chain of islands lying off the Gulf of Yedo.

There are but two hidden dangers in the harbor; the first is the

Southampton Rock,

Which lies in mid-channel, bearing N ½ W from Vandalia Bluff, about three-fourths of the way between it and Centre Island. This rock is about 25 feet in diameter, and has 2 fathoms water upon it. It is marked by a white spar-buoy.

The second is the

Supply Rock,

Bearing S by W, a short distance from Buisako islet, and is a sharp rock, with 11 feet water upon it. Its position is designated by a red spar-buoy.

Both of these buoys are securely moored, and the authorities of Simoda have promised to replace them, should they by any cause be removed.

Centre Island, which receives its name from being the point from which the Treaty limits are measured, is high, conical, and covered with trees. A cave passes entirely through it.

In the outer roads, or mouth of the harbor, a disagreeable swell is sometimes experienced; but inside of the Southampton rock and Centre Island, vessels are well sheltered, and the water comparatively smooth. Moor with an open hawse to the southward and westward.

There are good landings for boats in Simoda creek, and at the village of Kakisaki.

A Harbor Master and three Pilots have been appointed; wood, water, fish, fowls and eggs, also sweet potatoes and other vegetables may be procured from the authorities.—It is necessary to supply them with casks to bring the water off.

Latitude Centre Island,	34° 39 49 N.
Longitude " "	138° 57 50 E.
Variation,	52 min. westerly.
H. Water, F. and C.	V hr.
Extreme rise of Tide,	5 ft. 7 in.
Mean " "	3 ft.

To make the foregoing directions more easily comprehended, they have been rendered as concise as possible, but to furnish further information to navigators bound to, or passing the port, the following additional remarks are appended:

The harbor of Simoda is near the south-eastern extremity of the peninsula of Idzu, which terminates at the cape of that name.—To the northward of the harbor, a high ridge intersects the peninsula, and south of this, all the way to the cape, it is broken by innumerable peaks of less elevation.

The harbor bears SW by W from Cape Sagami, at the entrance of Yedo Bay, distant about 45 miles.

Rock Island is about 120 feet high, and a third of a mile in length, with precipitous shores and uneven outlines. It has a thick matting of grass, weeds, moss, &c. on the top.

From the summit of this island overfalls were seen, bearing N ½ W, distant a mile or mile and a half. These may have been caused by a rock or reef. An attempt was made to find it; but the strong current and fresh wind prevented a satisfactory examination.—The Japanese fishermen, however, deny the existence of any such danger.

N by W from Rock Island, distant 2 miles, are the Ukona rocks. These are two rocks, though they generally appear as one. The largest is about 70 feet high. Between these and Rock Island, the current was found setting ENEasterly, fully four miles an hour.

Centre Island bears from Rock Island N ½ E, distant 5 1-2 miles, and from Ukona rocks N by E ½ E, distant 3 1-2 miles.

Buisako islet lies NNE from Centre island. It is about 40 feet high, and covered with trees and shrubs.

Should the buoy on Southampton rock be removed, the east end of Centre Island on with the west end of Buisako, will clear the rock to the westward.

Off the village of Susaki, and distant one-third of a mile from the shore, is a ledge of rocks, upon which the surf is always breaking; give them a berth of two cables in passing.

Approaching from the eastward, the harbor will not open until you get well inside of Cape Diamond.

To the northward of Cape Diamond is the bay of Strahama, which is quite deep, and as it has also several sand beaches, it may be mistaken for Simoda; but as you approach this bay, Cape Diamond will shut in the Ukona rocks and Rock Island to the southward; whilst in the Simoda roads, they are visible from all points.

Cape Idzu, latitude,	34° 36 03 N.
" longitude,	138° 52 32 E.
Rock Island, lat.	34° 24 20 N.
" long.	138° 57 10 E.

SW ½ W from Kozu Sima, distant about 20 miles, and south a little westerly from Cape Idzu, distant about 40 miles, there are two patches of dangerous rocks, 15 or 20 feet high, which have been named Redfield rocks. They are in

Lat. 33° 56 13 N, Long. 138° 48 31 E, and Lat. 33° 57 31 N, Long. 138 49 13 E.

These positions may not be strictly correct, but it is believed they are not much out of the way.

By order of Commodore M. C. Perry, U. S. N.

Silas Bent, Flag Lieutenant.

Several errors in the first edition of these directions, published in July last, have been corrected in the above.—W. L. M.

SAILING DIRECTIONS FOR THE PORT OF HAKODADI.

By Lieut. Wm. L. Maury, U. S. N.

U. S. Steam Frigate Mississippi,
At Sea, July 20th, 1854.

This splendid and beautiful bay, which for accessibility and safety is one of the finest in the world, lies on the north side of the straits of Sangar, which separate the Japanese islands of Nippon and Yesso, and about midway between Cape Sirija Saki* (the NE point of Nippon) and the city of Matsmai. It bears from the cape NW ½ W, distant apout 45 miles, and is about 4 miles wide at the entrance, and 5 miles deep.

The harbor is the south-eastern arm of the bay, and is completely sheltered, with regular soundings and excellent holding ground. It is formed by a bold peaked promontory, standing well out from the high land of the main, with which it is connected by a low sandy isthmus, and which appearing at a distance as an island, may be easily recognized.

The town is situated on the north-east slope of the promontory, facing the harbor, and contains about 6,000 inhabitants.

*Saki, in the Japanese language, means Cape, consequently it should more properly be called Cape Sirija; but to prevent mistakes it has been thought advisable to adopt the Japanese names.

Approaching from the eastward, after passing Cape Suwo Kubo, named on our chart Cape Blunt, which is a conspicuous headland 12 miles E by S from the town, the junks at anchor in the harbor will be visible over the low isthmus.

For Entering the Harbor.

Rounding the promontory of Hakodadi, and giving it a berth of a mile, to avoid the calms under the high land, steer for the sharp peak of Komaga daki, bearing about N, until the east peak of the Saddle, bearing about NE by N, opens to the westward of the round knob on the side of the mountain, then haul up to the northward and eastward, keeping them open until the centre of the sand hills on the isthmus bears SE by E ¾ E, (these may be recognized by the dark knolls upon them.) This will clear a spit which makes out from the north-western point of the town in a NNWesterly direction two-thirds of a mile; then bring the sand hills a point on the port bow, and stand in until the north-western point of the town bears SW ½ W, when you will have the best berth, with 5½ or 6 fathoms water. If it is desirable to get nearer in, haul up a little to the eastward of S, for the low rocky peak which will be just visible over the sloping ridge to the southward and eastward of the town. A vessel of moderate draught may approach within a quarter of a mile of Tsuki point, where there is a building yard for junks. This portion of the harbor however, is generally crowded with vessels of this description; and unless the want of repairs or some other cause renders a close berth necessary, it is better to remain outside.

If the Peak or Saddle is obscured by clouds or fog, after doubling the promontory, steer N by E ½ E, until the sand hills are brought upon the bearing above given, when proceed as there directed.

A short distance from the tail of the spit is a detached sand bank, with 3½ fathoms on it. The outer edge of this is marked by a white spar-buoy. Between this and the spit there is a narrow channel with 5 or 6 fathoms water. Vessels may pass on either side of the buoy, but it is most prudent to go to the N'd of it.

Should the wind fail before reaching the harbor, there is good anchorage in the outer roads, in from 25 to 10 fathoms.

Excellent wood and water may be procured from the authorities of the town; or, if preferred, water can be easily obtained from Kamida creek, which enters the harbor to the N'd and E'd of the town.

The season, at the time of our visit, was unfavorable for procuring supplies;—a few sweet and Irish potatoes, eggs and fowls, however were obtained, and these articles, at a more favorable period of the year, will no doubt be furnished in sufficient quantities to supply any vessels that may in future visit the port.

Our seine supplied us with fine salmon and a quantity of other fish, and the shores of the bay abound with excellent shell-fish.

During our stay in this harbor, from the 17th of May to 3d of June, the weather was generally pleasant until the 1st June, when the fog set in. It was usually calm in the morning, but towards the middle of the day a brisk breeze from SW sprung up.

Latitude mouth of Kamida cr'k,	41° 49 22 N
Longitude " "	140° 47 45 E
Variation,	4° 30 W.
High Water, F. & C.	V hours.
Extreme rise and fall of tide,	3 feet.

Our chronometers were rated at Napa Kiang, Lew Chew, from the position of that place as given by Captain Beechy, R. N.

By order of Commodore M. C. Perry, U. S. N.

Silas Bent, Flag Lieut.

Death of Rev. H. Kinney.

It is with the most unfeigned sorrow that we announce the death of the much lamented missionary of Kau, Hawaii. Most unexpectedly does this intelligence reach the islands. It was confidently hoped that the visit to California, would reinvigorate a constitution, debilitated by the monotonous routine of pastoral missionary labor, on the most extreme part of Hawaii, sixty or seventy miles from any missionary station or any American family. The following truthful obituary we copy from the "Pacific" of September 29th. Most heartily can we join in these expressions of sympathy for the bereaved wife and children, and the native church left without a most devoted, kind-hearted, and guileless Pastor. It was with reluctance that he left his people to go on a visit to friends, and in search of health. The writer of the following obituary could readily sympathize with the deceased, in reference to his missionary labors, at Kau, for he was formerly located in that region himself:—

Died at Sonora, Tuolumne Co, Sept 24th, Rev. Henry Kinney, of Fishkill, Duchess Co., N. Y., and a late missionary of the A. B. C. F. M.—at the Sandwich Islands.

The deceased had but recently arrived from the Islands, having come to this coast for his health. His wife who has two brothers and two sisters in the State, at the house of one of whom he died, accompanied him, with two children. During the voyage and the first three weeks of his residence here his health improved. But since that time his disease, (a chronic affection of the brain,) returned with more violence and on Sabbath morning last, terminated in death.

At the time, however, when he suddenly fell away, he was supposed and pronounced by his physician to be recovering. But though unexpectedly to his family and relatives, and to himself even, he was told that he must die, he was found ready. The sammons did not take him by surprise. When informed that he had not one hour to live, his countenance lighted up with smiles, and words of peace and victory broke from his lips. "Rejoice," said he to those weeping around, "I shall soon be there!"—Already his eyes, closing upon earth, were opening on his heavenly home. With those who were bending over him with clasped hands and flowing eyes, he saw also angel-forms bending to take his spirit to God; while with the sighs and sobs of the weeping circle, came mingled to his ear, the songs of the redeemed, on the shores of that better land were waiting to bid him welcome—soon too soon for those who mourned a husband, father, brother, he was there! And "blessed are the dead who die in the Lord."

Truly, he "rests from his labors," and his works do follow him. He had been 6 years a Missionary at the Islands, occupying a large field in Kau, the Southern District of Hawaii. The station is one of the most laborious on the Islands, and the most remote and lonely in the group. Without a helper, without a neighbor, he had toiled alone, as the pastor of a widely scattered flock, only his heroic wife sharing the burden under which he finally fell.

But he has his reward. Those who knew him best loved him most. His purity of mind was equalled only by modesty and gentility of disposition and manners seldom equalled. His memory be precious.—God comfort his widow, who but lately mourned with her husband over a lovely daughter, taken at their lonely station. God bless the fatherless, who are left orphans in a strange land. The Great Head of the Church care for the flock, now left without a shepherd, and sanctify the loss of so beloved and faithful a laborer to the Mission, whose strength is greatly weakened and whose heart and hands are already overburdened—Be all surviving pastors there and here as ready as our brother to go and render their account.—T. D. H.

The Sabbath.

The following remarks, upon the Sabbath were written by Dr. Cumming," of London.

"Our sabbaths upon earth ought to be, as they were meant to be, shadows cast upon the world as from above, foretastes of the great sabbath of eternity. I look upon the sabbath as a kind of bivouac preparatory to the battle of the week; an occasional and recurring respite from labor, preliminary to the everlasting sabbath that will be enjoyed by the people of God. I look on it as a beautiful island cast into the roaring and restless torrent of immortality; and standing upon that island, we can look at the rush and listen to the din of the eddying world, and see leaping down from above in undimmed splendors the sunshine of heaven, and hear from afar unspent chimes of an eternal harmony. The sabbath is too precious to be given up; humanity will not surrender it, Christianity will not let go. It will be revered by the Christian, as long as the world shall last. The poor man would be the greatest sufferer, were there no Sabbath. What! would you give up that blessed day of jubilee, on which the highest and lowest can assemble in the house of God, and say—"We are peers;" when the rich and the poor can meet together, and feel the ennobling and kindling sentiment of a common brotherhood—"The Lord is the maker of us all?" Part with your beautiful cathedrals, but part not with your precious sabbaths. Man built the cathedral, God hallowed the sabbath; the one might be the injury of the beautiful—the other would be the loss of the essential. An irreparable catastrophe, an awful judgement, a bitter bereavement; humanity and Christianity together would weep over the extinction of the sabbath, as the setting in night of its brightest day."

Interesting Correspondence.

Accidents often occur in firing salutes, which render the remembrance of the event exceedingly unpleasant; but when the accident is so overruled as to call forth a generous and cordial expression of kindly feeling, sorrow is turned to joy, and sadness to thanksgiving. The following correspondence relates to acts of national courtesy and sympathy between the British and American vessels of war in China, which reflect the highest credit upon all parties. It betokened a genuine and chivalrous courtesy for a British vessel of war to fire a national salute in honor of the 4th of July. It was sad, however, that a noble British sailor should be disabled for life, by the loss of an arm; but it was a good deed for the officers and sailors of the American squadron to express their heartfelt sympathy by a generous contribution. We learn that the American residents at Shanghae increased the amount to near $3,000.—This sum, well invested, together with a pension which the sailor will receive from the British Government, will render the man and his family independent for life! Such expressions of kindly feeling in the intercourse of nations will work out incalculable good.—Where officers and seamen of national vessels vie with each other in giving expression to sentiments of mutual respect and generous sympathy, they will dignify the service of their respective nations, and add true lustre to naval glory. We would merely add that the publication of this correspondence was solicited on our part.

U. S. S. Susquehanna,
Shanghae, July 10, 1854.

My Dear Sir:

The officers and crews of this ship and the Vandalia have heard with sincere regret of the sad accident to one of the crew of the Encounter, on the 4th inst., while firing a salute in honor of our national day.

These accidents to seamen are always distressing; but on this occasion it is particularly and deeply lamented by the officers and crews of the Susquehanna and Vandalia.

As the loss of his right arm deprives the unfortunate man of the principal means of supporting his family and himself; the officers and crews of the Susquehanna and Vandalia are anxious to assist in relieving his distress, and it is with sincere pleasure that we send him the enclosed bill of exchange for two hundred and eighty-three pounds sterling, which we beg him to accept from his brother seamen, as a proof of our heartfelt sympathy.

Respectfully your ob't servant,
FRANK'N BUCHANAN,
Commander.

Capt. G. W. D. O'Callaghan,
Commanding H. B. M. Ship Encounter,
Shanghae.

H. B. M. Ship Encounter,
Shanghae, July 11, 1854.

My Dear Sir:

Charles Lyne, the seamen who lost his arm while firing a salute in honor of your national day, (the 4th inst.,) begs me to assure the Captains, officers and crews of the Susquehanna and Vandalia of his deep gratitude and thankfulness for their kind and generous consideration of his misfortune.

Allow me, Sir, also to express my own feelings on this occasion, which are, that I see in this token of sympathy, not merely an act of charity, but one which is evidence of a sentiment of good will and kindly feeling between our respective nations. Such it has been my good fortune ever to find, where the service has brought me in contact with the navy and people of the United States of America; and I cannot refrain from declaring my own hope and belief, that with those capable of such liberality and consideration, as it is in this instance my duty to acknowledge, a more extended intercourse will but tend to improve those feelings which exist, no less to the honor than the advantage of the two countries.

I have the honor to be,
Sir, Your ob't servant,
G. W. D. O'CALLAGHAN.

Captain F. Buchanan,
Commanding the U. S. S'r Susquehanna.

Origin of the Insurrection in China.

In our columns will be found an account of the visit of the U. S. Ship Susquehanna to the city of Nanking, for the purpose of ascertaining the present position, the plans and future designs of the Revolutionists in China The summary account now published was drawn up with much care by the Rev. Dr. Bridgman, an American Missionary who accompanied Mr. McLane, the U. S. Minister, as an interpreter. We regret that our limited space will not allow us to publish the entire document, which we find in the North China Herald of July 22.

In this connection, it may be interesting to some of our readers to have their memories refreshed with an allusion to the origin of this most singular movement, which seems destined to change not only the political, but the religious aspect of that great empire; for let it be borne in mind that the revolutionists are the open, energetic and decided opponents of idolatry. Their creed may embrace much of error, still the originators and promoters of this vast scheme to revolutionise China and establish a new order of things will enlist the sympathies of no small portion of the civilized world, and especially of the Christian community, when the fact is considered that they are opposed to *idolatry*, *opium*, *tobacco*, *rum*, besides being actively engaged in publishing both the Old and New Testaments in the language of China.

"Whatever," write the editors of the Am. Messenger, "may be the result of this wonderful movement, which even now threatens to seize the Imperial throne at Peking, it is a most striking illustration of the power of the Christian press. All accounts agree that the mind of Hung-siu-tshuen or Tae-ping-wang, (Great Peace King,) was first aroused, nearly twenty years ago, by reading a tract, received at the literary examinations in Canton, entitled, "Good Words to Admonish the Age," which was written and printed by the early and faithful Chinese convert and native preacher, Leang Afa."

This remarkable person, Leang Afa, was employed in 1815, by the English Missionaries Morrison and Milne, in the printing establishment at Malacca. In 1824, he was ordained as an evangelist. He is now 66 years of age, and for thirty years has labored faithfully in writing, preaching and circulating books.

Tae-ping-wang, in 1833, became acquainted with the doctrines of Christianity, as unfolded in the tract of Leang Afa. In 1846, he was under the instruction of the Rev. I. J Roberts, an American Baptist Missionary at Canton; but he is now at the head of the Revolutionary party in China, having its head quarters in Nanking.

We have learned from the Rev. Mr. Bittinger, Chaplain on board the Susquehanna, and who recently, (in May last,) visited Nanking, many interesting particulars respecting the movements of the Revolutionists. These particulars confirm the statement of Dr. Bridgman; Mr. B. remarks that he saw handbills, containing the ten commandments, posted upon the walls of Nanking; that all the idols of the city have been destroyed; that the Scriptures are in the hands of the people; that the Sabbath is observed among them, and that order and decorum are strictly enforced throughout the army.

We are by no means blind to the fact that fanaticism, ambition and other wrong principles may be deeply blended in this revolutionary movement. Strange, marvellously strange, if the pure doctrines of Christianity should be promulgated by these men! Our only wonder is that so much of Bible truth should have become incorporated into their system. Before British and American Christians have washed their hands of the sins of an *opium war* and *negro slavery*, let them deal tenderly with, and judge mildly of the Revolutionists in China, who are printing the Bible, trying to arrest the flood tide of opium and rum, and sweeping the ten thousand temples of idolatry with the "besom of destruction."

Some men are very entertaining for a first interview, but after that they are exausted, and run out; on a second meeting we shall find them very flat and monotonous: like hand-organs, we have heard all their tunes.—[Colton.

I'll Write Once *More*.

This is right. It is a good resolution.—We are glad our remarks in the last Number of the Friend, under the heading "No Letters, No Papers," induced one sailor to write once more to his friends, although he had previously decided never to write again. He said that he cut out the paragraphs and sent them home! We feel highly complimented to have our paper cut in pieces and sent to Ireland; much more so than if we had seen that any of our editorial scribbling had found its way into the most celebrated papers of Europe or America. To inspire one good thought in a sailor's soul, or keep alive in his bosom the sacred flame of affectionate regard for kindred and friends, is to us a source of pure delight. Sailors are compelled to encounter many rough blasts, besides those which blow ever the ocean. The tender chords of their souls are roughly handled, and it is sad that they should themselves sometimes become the guilty agents of their own sorrow; but if guilty, self-reproach and remorse make the iron strike deeper into their souls. Experience with the world leads us to judge more leniently our fellow sinners. Jack may sometimes be in the fault, though not always. We fear the friends of seamen do not think sufficiently of the importance of writing to every foreign port where letters will be likely to reach the absent ones. This very day, (Oct. 5th,) we heard a sailor, after heaving a long sigh, remark, "It is rather a hard case; I get no letters;" still he had written several times to his friends, residing in Binghampton, N. Y. But did that sailor rashly resolve never to write again? No; for he placed in our hands five letters, to be forwarded to his father and sisters. Now if those letters do not draw forth some long replies about next March, we shall be disappointed, and shall be half inclined to write to our old room-mate and class-mate, the Rev. Mr. Humphrey, minister in Binghampton, to preach a sermon upon the text, "As cold waters to a thirsty soul, so is good news from a far country. (Prov. 25: 25.)

☞ In years past, there has been much difficulty, in transmitting small sums of money to the United States and Europe. Through the banking-house of Page, Bacon & Co., recently established in Honolulu, business of this kind can now be transacted. We would call the attention of seamen to this subject. It is not unfrequently that seamen deposite their money in our hands; but we have hitherto very much disliked to assume the responsibility. We are now, however, prepared to put seamen in the way of safely investing their money, or placing it in safe deposit.

☞ On the 13th and 20th of the last month, Mr. Frick delivered two lectures upon the English language. They abounded with much curious and useful information upon the structure and history of our "mother tongue;" showing that the old Saxons were not much given to pompous words and high sounding epithets, but that their Norman conquerors introduced a "court" language, and scientific termanology. The lecturer might complain of the want of interest among the people of Honolulu, upon the subject of his lectures, but it should be remembered that most of our people have chosen for their motto, "go-a-head", a phrase rather Anglo-American than Norman French!

☞ If the following persons will call at the Chaplain's Study, they may learn something to their advantage.—Eli J. Crawford, Lewis L. Bright, Crawford C. Butts, Wm. T. McKneel, Capt. B. B. Lamphier, W. P Weeks, H. F. Richardson, Thomas A. Brown, H. W. Hammond, Morris E. Lee, Capt. Moses J. Buddington, David L Rigby, Gustavus Frederick Bracy, Charles W. Crehore, Charles Butts, Cook Smith, Samuel Price, Jno. F. Stein, Thomas Banks, Daniel Kane, John Owen Davis, Amos Andrews, John A. Cooley, Charles R. Taylor, Robert Shepherd.

FREE-WILL OFFERINGS,

For the Seamen's Chapel, (seats free) supported by gratuitous contributions, and The Friend, one thousand copies of which are distributed gratuitously among seamen in the Pacific Ocean:—

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

CARD.—Mr. WILLIAM BROWN, an Englishman, residing at Waimea, Kauai, desires to return thanks to all those persons in Honolulu who have kindly assisted him.

CARD.—The Seamen's Chaplain would acknowledge $20.00 from H. B. M. Consul General, for the quarter ending 30th Sept. 1854.

COMPOSITORS WANTED—At the Polynesian office. tf

BANK OF

Auctioneer,

Over the Store of R. Coady & Co. 25-tf.

Visit to Nanking.

The following summary of the views held by the Revolutionary party in China, will be read with interest by all interested in observing the movements in that part of the world The city of Nanking is now their head-quarters. The U. S. Steamer Susquehanna visited that port last May, having on board Mr. McLane, the American Plenipotentiary, who was accompanied by Dr. Bridgman, as interpreter. The object of this visit was to ascertain the views of the Revolutionists towards foreigners. The following summary was drawn up with much care by Dr. Bridgman, and originally appeared in the North China Herald. For want of room, we are obliged to omit many paragraphs. We would particularly call the attention of our readers to the fact that "all intoxicating liquors" are tabued by them; (see paragraph 6th.)

1. Their government is a theocracy, the development, apparently, of what is believed by them to be a new dispensation. As in the case of the Israelites under Moses, they regard themselves as directed by one who has baen raised up by the Almighty to be the executor of his will on earth. They believe their body politic to be under the immediate direction of the Deity. Sometimes their leaders, they say, are taken up to heaven, and sometimes the Heavenly Father comes down to them.

2. Their government is a mixed form, half political and half religious. It would seem, also, to have both an earthly and a heavenly magistracy, or rather, perhaps, a visible and an invisible machinery. They most distinctly avow a personal intercourse between their principal actors, (men and women,) on the one side, and the Heavenly Father and the Heavenly Elder Brother on the other. All their affairs of state—things temporal—are strangely blended with things divine, I say not spiritual, because I do not know what ideas they have of Spirit and things spiritual.

3. Their government is, moreover, a royal despotism. In their new organization there is no emperor, but a Fraternity of kings, viz: a Heavenly king, an Eastern king, a Western king, a Southern king, a Northern king and an Assistant king. These six royal personages, we were told, were all residing in their new capital, which they call Tienking, "Heavenly Capital." Under their sway there is no more to be, as of old, a Nanking, "Southern Capital," or Peking, "Northern Capital," or aught of this kind.

4. This royal fraternity claims, also, universal sovereignty. Of what the kingdoms and nations of the earth really are, in numbers and in power, these kings and their brethren are doubtless almost wholly ignorant; but their claim to universal dominion on earth is put forth in languuae most unequivocal. As the Heavenly Father, the Supreme Lord, the August High Ruler, is the Only One True God, the Father of the souls of all natiens under Heaven; so their Heavenly king is the peaceful and true sovereign of all nations under Heaven. These, and words like these, are common, both in their conversation and in their writings; and from these—partly true and partly false—premises, they draw the conclusion, that as all nations ought to obey and worship the only one true God, so ought they to bow submissively, and respeetively bring tribute—rare and precious gifts—to their Heavenly king, even to Hung-siu-tshuen. Some of the great men of the realm were specially concerned lest their "brethren from a foreign land" should not at once fully comprehend the oneness of the true doctrine, but should imagine that there really were such distinctions that we might speak of this kingdom and of that kingdom, and of my sovereign and your sovereign.—The address on a despatch from the ministers of the court was, in courtesy, almost equal to that, in other revolutionary times, once conveyed to "Mr. George Washington."

5. Their government is administered with remarkable energy. It is now only four or five years since it struggled into existence in some obscure place, called "Golden Fields," in the province of Kwangsi.

* * * *

6. Their order and discipline are no less remarkable than their energy. Under their new regime, both tobacco and opium are prohibited. Every kind of strong drink, too, would seem to come into the same category, and if any is used, it is only by special permission. * * * Every where else, as well as in the Holy City, extreme watchfulness was observed in the maintenance of order; and all irregularities and infractions of the laws were rebuked or punished with a promptitude seldom seen among Chinese. All persons without exception, had their appointed places and their appropriate duties assigned, and all moved like clock-work. In short, martial law throughout all their lines, in their streets, in their boats, and wherever else they were seen, was the order of the day.

7. Their religious creed, though it may recognise, in some sort, all or most of the doctrines of the Bible, is, through ignorance or perverseness, or both, grievously marred with error. While their government, as already remarked, is of a mixed form, being partly religious, having in it a very strong religious element, still they have no church. There is no community separate from their one body politic, at least none appears, and no traces of any could we find.

Christians they may be, in name; and they are, in very deed, iconoclasts of the strictest order. They have in their possession, probably, the entire Bible—both the Old and New Testaments—and are publishing what is usually known as Gutzlaff's version of the same; I have said, therefore, that "in some sort," they may recognise its doctrines. How far their errors are to be attributed to errors or defects in their version, is a question which I must not here discuss.—Their ideas of the Deity are exceedingly imperfect. Though they declare plainly that there is Only One True God, yet the inspiration of the Holy Scriptures, the equality of the Son with the Father, and many other doctrines, generally received by Protestant Christians as being clearly revealed in the Bible, are by them wholly ignored. True, they have formulas in which some of these doctrines are taught; but then these are borrowed formulas, and they have used them without comprehending their true import.—So I believe; and I think this is made manifestly plain in the new version of their Doxology or hymn of praise, where Yang-siu-tshin, the Eastern king, is proclaimed the Paraclete, the Holy Spirit.

Our Saturday we found observed by them as a Sabbath day, but they appeared not to have any houses for public worship, nor any Christian teachers, ministers of the Gospel, properly so called. Forms of domestic worship, forms of prayer, of thanksgiving, &c., they have; and all their people, even such as cannot read, are required to learn and use these. We saw them repeatedly at their devotions; some of them were exceedingly devout, while others were quite the reverse.—Most who were asked to do it promptly recited that form of the Decalogue which is given in their tracts. Tien Fu, Heavenly Father, was the appellation used almost invariably by them, when speaking of the Deity.

A form of baptism was spoken of by them; but no allusion was made by them to the ordinance of the Lord's Supper. We found them, according to their reformed calendar, discarding the old notion of lucky times, places, &c. May 17th, A. D. 1854—the day the Susquehannah and the Confucius arrived off the Heavenly Capital—was marked in their chronology the 21st day of the 4th month of the 4th year of the Great Peaceful Heavenly Kingdom.

They have a list of books which are published by royal authority. It and their books usually bound together, bear the impress of a seal of state. On this list they have the names of more than twenty different works, two of which are the Old and New Testaments, noticed above. Whether other books not on that list, will be accepted or not by their government, or even tolerated, remains to be seen. In the shops and stalls at Wuhu, I saw a few popular books and ballads of the old sort, but none elsewhere except those published by the insurgents themselves.

* * * * *

10. Their numerical strength, and the extent of territory under their control, are by no means inconsiderable. They said they had undisputed control from Chiang-fu, four hundred miles up the Great River; and that, besides the large number of troobs garrisoned and entrenched about Chinkiang, Kwachau and the Heavenly Capital, they had four armies in the field, carrying on active aggressive operations; two of these had gone northward, one along the Grand Canal and one farther westward; they were designed to co-operate, and after storming and destroying Peking, to turn westward and march through Shanshi, Shenshi and Kansuh, into Sz'chuen, where they are expected to meet their other two armies, which from Kiangsi and the Lake provinces are to move up the Great River and along through the regions on its southern bank.

* * * * *

13. In the present attitude of affairs, their bearing towards foreigners is becoming, every month and every day, more and more a matter of grave and exciting interest. Their officers at Chiankiang and Nanking, told us, again and again, that their troops would not approach Shanghae, and that for the present they would have nothing to do with Canton. They remarked also, what is here well known, that the Insurgents in Shanghae are

anxious to join them, and that many thousands of the people in the city and province of Canton are their true friends and brethren. Still, in every thing that was said by their high officials in the Celestial Capital, a tone and a spirit of high assumption were too extraordinary—too far from the simple dictates of all reason—to be passed by unheeded, as idle vaunting.

Will that Royal Fraternity and their Ministers of State, if they become masters of the Middle Kingdom, recognise the existing treaties between the Chinese Empire on the one side, and the governments of England, France, and the United States on the other? Most assuredly they will not, except on compulsion, or unless they willingly descend from their high position. They—the "Second Son" of the Most High God, and his royal associates—they, and they alone, are to be the dispensers of all authority and all instruction in that, their Heavenly Kingdom, truly ordained of Heaven, and of which they are to be the Head and Chief Supports!

Poetry.

Waukesha, Wisconsin, July 19, '54.

Rev. Mr. DAMON: Dear Sir,—Will you confer the favor to insert these verses in the Friend. They were composed on the death of the two little daughters of Capt. George Lawrence, who have died during his absence.

Respectfully yours.

To Capt. Geo. Lawrence, Jr.—Ship Jireh Perry.

ON THE DEATH OF EMMA AND MARY.

The Lord of Life marks dawning hour
Of every opening bud and flower,
And oft, with kind, indulgent hand,
Their bloom transfers to better land.

Father, He saw thy flowers bloom,
In land of sorrow, shade and gloom;
Then breathed His voice in angel ear,
"Go, gently bring those love flowers here.

"If left below, too soon they'd fade,
And perish in earth's darksome shade;
Here shall they bloom to Holy Land.
To grow in care of angel hand."

The angel then in rapture flew
To pluck the flowrets as they grew;
And bore their bloom to Holy Land,
To grow in care of angel hand.

Where hopes, though bright, may fear no blight,
And loving dreams end not in night,
And fragrant flowers immortal bloom,
Unshaded by death's chilling gloom.

Seek'st thou to meet thy flowrets there,
In spotless robes all bright and fair?
And songs of joy unceasing sing,
Where sin can never discord bring?

Then see thou that thy footsteps stray
Not from the Christian's narrow way;
That thou in gathering hour may'st stand,
With thy loved flowers, at His right hand.

My crown is my heart; not decked with diamonds and Indian stones, nor to be seen: my crown is called content; a crown it is seldom kings enjoy.—[Shakespeare.

Men and statues that are admired in an elevated situation, have a very different effect upon us when we approach them: the first appear less than we imagine them, the last bigger.—[Grevile.

Whalemen's Letters,

Remaining in the Hawaiian Post-Office Oct 10. 1854. ☞ *The number of letters for each vessel in each port will be found in their respective columns. Barks are marked 'b,' all others are ships.*

HENRY M. WHITNEY, P. M.

Honolulu, Oct. 10, 1854.

☞ We copy the following from a letter written by the Rev. S. E. BISHOP, dated

Lahaina, Oct. 9, 1254.

"Inquiry is made in October Friend after Wells Stow, of the Majestic, Percival. He arrived here in that ship last week, sick with liver complaint or something similar, and is now snugly and *well stowed* away in the Hospital. He appears like a fine man, and such is the character Capt. P. gives him. His health has much improved since he came on shore. Stow was not in the boats of the Majestic on their perilous cruise, of which an account was given in the last Polynesian:—Capt. P. was relating it last night. It was a remarkable instance of help and deliverance coming when hope had failed. Both the captain in the boats, and his mate on board, had just given up hope of their safety, and that hour the fog cleared up, and showed them within two miles of each other, after a separation of ten days, and when another night's exposure would probably have finished some of them."

Passengers.

By the Prince de Joinville, from San Francisco.—Mr and Mrs. Burbaker, H. Holden, R. Ramsdell, T. Warner, D. Wallis, J. W. Dunn, P. H. Swimbly, S. Wyckoff and 45 Hawaiians.

By the Northern Light, from San Francisco.—Chas. Dana, Wm Fell, Jas. Wilson.

By the Vaquero, for San Francisco.—Wm. Nichols, W E. Smith, Capt. Wm. Garvie, J. Grant, P D. Mickle, G. B. Post and wife. G. G. Brown, C. S. Watkins, Dr. Homan, B. F. Hilliard, wife and child, Mrs. Wardwell and son, Ahong.

By the Sea Bird from San Francisco.—Mr. Doty and lady. Mrs. Matthews and 2 children, Gov. S. Purdy, G. W. Ryckman James O'Meara, Geo. S. Wright Capt. Prender ast. E. Hopkins, A. M. Brown, C. S. Kavanagh, W. F. Poor, H. Kenman, Mr. Gwynn.

By the Lanka, from Puget's Sound.—S. C. Allen, M. Curtis.

By the Restless, from San Francisco.—D. A. Ogden Esq, U. S. Consul for Honolulu, Mr. Thompson and lady, Samuel C. Grove, J. S. Sprague, Wm. Hammond, H Wunderman, Ginske, A Purgeniaster, Paul Emmert, S. G. Barnard, D. Little, John Mock, A. Murry, David Wieda, Matthew Norris, A Jordan, B. Van Horn, Capt. Wm. E. Cutrel. J. Ritchie, Benj. Carman, H. Waltham, J Conner, (23 passengers)

B. Prince de Joinville, for S. F.—J. H Strauss, E. Dean, R. McCartney.

By the Flying Dart, from S. F.—J. Martin.

By the Living Age, from New York,—Mrs. Stuart, Henry L. Bullions.

By the Alice from Sydney.—Joseph Moore, Henry Nathan.

By the Chusan, from Boston,—Rev. E. F Doane and lady, Rev. W. C. Shipman and lady, Mrs. Merrill.

By the Princess Royal, from London,—110 emigrants for Vancouver's Island, including men, women and children.

" 19 Majestic, Percival, cruize.

Memoranda.

[COMMUNICATED FOR THE FRIEND.]

The following account of a typhoon (Cyclone) experienced by the U. S. Ship Mississippi, on her late passage from Japan to this port, has been furnished us for publication.

The Mississippi sailed from Simoda on the 1st ult., with a fresh SW wind.

Oct. 2d,—Wind gradually hauled around to the N'd and E'd, with dirty weather.

Oct. 5th.—Latter part, wind hauled around to E by S; weather pleasant, with passing clouds. Lat. noon, 34° N, Long. 149° 01 E; bar. 30 11 and 30·02.

Oct. 6th—Commences with moderate breezes from SE by E, with passing clouds. Middle part cloudy with rain; Barometer gradually falling. Latter part squally with rain; wind SE by S blowing quite strong. At 11 P. M. close reefed the topsails. Sea very low and flying rapidly; sea moderate. Lat. noon, 35° 21 N, long. 151° 53 E; bar. 30·02 and 29·71.

Oct. 7th—Commences with the wind SSE, blowing fresh and squally, with light rain at intervals. Scud remarkably low and passing with great rapidity. At 4 A. M got up steam Ship heading E, going about six knots; wind S by W. At 4 A. M bar. 29·62; at 6, 29 64; at 7, 29 60; at 8, 29 58. At 9, wind S, blowing strong; bar. 29·58, having remained stationary for about an hour; but some time after 9 it commenced falling again; wind increasing rapidly. Took in the square sails and hauled up to the S'd and E'd to avoid the centre of the cyclone, which was evidently approaching us from the S'd and W'd;—hazy about the horizon. At 10 A. M. bar. 29·52; sun out; hazy about the horizon. Wind from the S'd, blowing strong and increasing. At 11, bar. 29 47; wind S by W; scud not so low and not flying so rapidly as during the night Sky obscured by thin scud; sun dimly seen; sea getting up; bar. 29·59. Noon, wind heavy from S by W; sea increasing; scud moving faster; sun out occasionally. At 1 P. M, bar. 29·29.—Blowing heavy, with furious puffs; spoon drift flying over the ship; sea heavy and lashed into a foam. Several albatross and other birds flying about us; weather thick. At 1.30 P. M. bar. 29·19. At 2 P. M. bar. 29.17; wind SSW, between 2 and 3 P. M blowing most furiously, with frequent squalls of almost hurricane violence. Sea heavy and lashed into a foam; spoon drift flying over the main top. One of the bow guns capsized head rail stove in; some of the planking of port wheelhouse washed away; two boats in the lee waist washed away from the davits. At 2 30, bar. 29.17, stationary; wind SW. At 3 P. M. bar. 29·21; wind SW, blowing with almost hurricane violence in the squalls; weather thick. At 3.30, bar. 29 25; still blowing furiously; squalls not so heavy as they have been. At 4 P. M. bar. 29·27; still blowing furiously; sea very heavy; weather thick; moderated a little. At 4 30, wind WSW; a sensible abatement in the fury of the wind, though still blowing heavy in puffs. Scud low and rapid; wind WSW At 5, bar 29·39; still blowing strong, though sensibly abating; scud still low and rapid; cirrous clouds seen through the scud; thick about the horizon.

THE FRIEND.

HONOLULU, NOV. 22.

Sailor's Home in Honolulu.

The corner stone is not laid, but there is a spot where in due time it will be laid. All praise and honor to King Kamehameha III, and his Privy Councillors, for consecrating one spot in Honolulu, to temperance, to virtue, and the sailor's welfare. It is a noble deed. Our expectations are more than realized. The site which has now been given for a Sailor's Home, is *the* spot of all others in Honolulu. It is in the very heart of the city—near the sea—facing on Merchant street—near the Post Office—easy of access from those quarters and adjoining the Bethel premises. There is not a more eligible site for a Sailor's Home, in the city of Honolulu. To secure a location so favorable, will contribute in a most essential manner to hasten forward the erection of the necessary buildings, and now if Seamen and the friends of Seamen do not come forward, and nobly contribute to establish the institution, they will merit the lasting reproach of good men, and the derision of the wicked. Present prospects, however, indicate a favorable issue. Generous donations have already begun to flow into the Treasury, from landsmen and seamen. The Board of Trustees chosen to manage the affairs of the institution are a pledge to the public that integrity and fidelity will characterize the financial operations of the concern. It is confidently hoped, that before the 1st day of January, '55, the sum of $5,000 will be raised, as that amount is necessary to secure the land. Should this amount be secured, it will operate as a powerful lever to raise an additional sum of $10,000 to complete the enterprise. Where there is a will, there is a way, and where there are large souls, generous pockets, and business talents, much more can be accomplished than can be imagined by men of narrow views and selfish instincts. Having a fair breeze, staunch ship, good crew and skilful Pilot, it will be safe to make all sail, and hoist the studding sails.

In other parts of our columns will be found, the Resolution of the Privy Council, and other documents relating to this enterprise.—This important resolution, we learn, was drawn up by Mr. Wyllie, and the friends of the enterprise feel under special obligation to him, for having thus plainly defined the leading principles upon which the land was given. We also learn that the Honorable John Ii was unwearied in his exertions to advance the scheme before the Privy Council. The names of other gentlemen merit honorable mention for the interest which they have manifested in the cause. We hope, that hereafter they will be abundantly rewarded in witnessing the usefulness and success of the enterprise. Let the motto of all be, ONWARD.

☞ We regret that the crowded state of our columns will not allow us to present an outline, even, of the interesting discussions at the Bethel, on the evenings of Monday, Wednesday and Friday of last week. We are also prevented, by the same cause, from furnishing our readers with a sketch of Capt. Elliott's address, at the Bethel, Sabbath evening last. It was admirable, and based upon the pertinent text, "Who is my brother?" Another most important meeting was held at the Bethel on Monday evening, when the Committee previously appointed reported the following Constitution, which was unanimously adopted. After which the Board of Trustees was chosen.

CONSTITUTION

OF THE HONOLULU SAILOR'S HOME SOCIETY.

ARTICLE 1. The name of this Society shall be "The Honolulu Sailor's Home Society."

ART. 2. The object of this Society shall be to improve the social, moral and religious condition of Seamen resorting to this Port, by promoting the establishment and maintenance of a Home, of good character, from which all intoxicating liquors shall be excluded; and in such other ways as shall be deemed proper.

ART. 3. Any person contributing One Dollar, annually, shall be a Member, and by paying Fifty Dollars, shall be a Life Member.

ART. 4. The control and disposal of the funds, property and estate of the Society, and the direction of its concerns, shall, in accordance with the Act of Incorporation, when obtained, be vested in the Board of Trustees, consisting of eighteen persons, residing in Honolulu, who shall be chosen by the members of the Society, at its Annual Meeting, and the Trustees last chosen shall hold their office until others are chosen, ten of whom shall be a quorum at any meeting regularly convened. To guard against hasty and unwise legislation, the Board shall be divided alphabetically into three classes of six each,—one class shall go out at the end of each year; but be re-eligible. Said Board shall have power to elect from their own number, a President, Vice President, Treasurer, Secretary, and an Executive Committee of three, and to appoint such other Committees as shall, from time to time, be deemed necessary. The Board shall have power to fill vacancies, in its own body, occasioned by resignation, death, or any other circumstance. At the Annual Election, the twelve Trustees remaining in office, shall have power to nominate twelve Candidates from whom six may be selected by the Society to fill up the Board.

ART. 5. The Board shall have power to appoint their own meetings, form their own rules of business, regulate the time for holding Annual Meetings, and employ such other means for accomplishing the object of the Society, as in their judgment, its exigencies may require, keeping regular minutes of their proceedings.

ART. 6. Sea-faring men, disposed to promote the objects of this Society, may be connected with the same, as *Floating Committees*, under such regulations as the Board may adopt.

ART. 7. All moneys already contributed, or that may hereafter be contributed, for the purpose of purchasing or erecting buildings, for the use of the Society, shall be faithfully applied to that purpose, and no other; and no conveyance of real estate shall be made without the concurrence of at least two-thirds of the Trustees.

ART. 8. No alteration shall be made in this Constitution, unless requested at an Annual Meeting, and sanctioned by two-thirds of the members present.

Passed by the Meeting, Monday evening, 20th Nov., 1854.

WM. ST. M. BINGHAM, Secretary.

OFFICERS

OF HONOLULU SAILOR'S HOME SOCIETY.

G. M. ROBERTSON,	H. M. WHITNEY.

RESOLUTION OF THE PRIVY COUNCIL.

Resolved, That the Petition for a lot of land for a Sailor's Home be granted, provided it shall be a rule established in such home, and strictly enforced That no intoxicating liquors shall be drank on the premises; no women of lewd character admitted; no gambling allowed, nor any other disorder tolerated. This resolution shall not be binding on the King's Government, unless the sum of Five Thousand Dollars be raised by subscription for the purpose aforesaid, within twelve months, and on the further condition that such Sailor's Home shall be equally available to the Sailors of all Nations, including those of this Kingdom,—and when said lot ceases to be used for the purpose of a Sailor's Home, the same shall revert to the Government.

By order of Privy Council, this 20th day of Nov., 1854.

LORREN ANDREWS, Secretary.

After the reading of above resolution, the Rev. S. C. Damon offered the following resolution, which was seconded by Mr. W. H. Johnson, and unanimously adopted.

Resolved, That the Chairman be instructed to convey to His Majesty, the King, and the Privy Council, our heartfelt thanks for the generous gift made by them of the Lot of land situated makai of the Seamen's Chapel, for the purposes of a "Sailor's Home," on the conditions expressed in the Resolution passed by that Body, this day.

SHIP "HARRIET" AND BRIG "WAVERLY."

Strong's Island, Feb. 4, 1854.

Rev. S. C. Damon :—In a note from you, bearing date, "Honolulu, March 10th, '53," (which note I received April 7th, '53,) I found the following : In the next No. of 'Friend,' I shall publish certain statements respecting the 'Harriet,' burnt in the lee harbor of your island. In due time let me know all about that. That No. of 'Friend' I received last Wednesday, Feb. 1st, through the kindness of Capt. Long, of the John & Elizabeth, New London. Looking over those 'statements,' I thought our friends must have their fears not a little excited for our safety, if such atrocities had been committed here so recently, and for no assignable cause. This morning I called on the King to learn 'all about it,' and hasten to send you the following from the King's own lips :—

The burning of the 'Waverly' took place during the reign of the 2d King before King George. He was quite an aged man at the time, and blind. His name was Ahua Na Likeak.

'White man want to get gal go aboard ship. King no like. In night white man take plenty gal go board ship. In morning kanaka go board ship; every kanaka; big island, small island, all go and kill every man board ship. White man kill some kanakas. Then kanakas take chests, small things ashore, then set fire to ship; burn sails, rigging, spars, casks, every thing belong to ship. Every white man was killed.'

All was done by order of the old blind king; after which, all was immediately quiet again. King George was then some 17 or 18 years old, and stood on the beach and saw the whole transaction. About a month after that a Brig sighted the Island and sailed around it, but no one came on shore.

Before I speak of the Harriet, let me refer to some political changes on the Island. That king died about ten months after the burning of the Waverly. His successor, Ahua Na Sru, was king but a short time,—less than a year. But it was 'all time fight, fight, plenty row, kill plenty kanaka.' He sent his son and killed a brother of King George with a spear. He survived the wound three days. The night he died, he told Keru, (the King's native name,) to go and kill that son or the King. He went, but the son had run away. He then went into the King's house and broke his left arm with a stick, not wishing to kill him; though every body outside was calling to him to kill him. But Keru spared his life and completely quelled the disturbances. When he returned he found his brother dead, and he buried him the same day. At this time there were very many old Chiefs. Some proposed one, and some another, for King. But all the young men on both islands told Keru to get tattooed the next day and they would make him King. The rule is not to tattoo much till somewhat advanced in life, and no one can be king till he is tattooed like an old man. Some of the old men entered into this movemeat of making Keru king. So that soon as the tattooing was done, he was proclaimed King.—This was about four months after he disabled the old king; all waiting quietly for him.

The first ship that came in after this was the 'Seringapatam,' Capt. Gordon, (English.) A fine man. He come here five times. He go way; stop no long time—maybe one moon—sometimes three moon—then come again. He first man bring pig Strong's Island. We send plenty gal go board ship: that reason Capt. like come plenty time.—Plenty good looking gal stop Strong's Island then. No all same now—most all gone!' I asked him the reason why he called him a fine man if that was the way he conducted? 'O, Captain give me plenty every thing,' After this ship left the place the Harriet came. About two months after the Harriet was taken, the 'Pacific' came; Capt. Round, St. John, New B unswick; Mr. Baker, 1st officer, Mr. Cudlip, 2d do. She was here some three or four months. 'The Pacific bring sick to Strong's Island.' Before she sailed, Capt. Gordon came again in the Margaret. When Capt. Round sailed, he went to the lee harbor and fished up an anchor belonging to the Harriet. The 'Pearl,' the 'Lydia,' the 'Lexington' and the 'Sussex,' (English,) were in the lee harbor with the Pacific. The day after they anchored at the lee harbor, the Captain came to see the King at the small island, and spent the night with him. The next day the Captain, the King, and all his Chiefs, with some kanakas, went to the lee harbor. The Captain went on board, and soon returned to invite the King to dine with him. Both went on board, and after dinner the King returned for the night, and the Captain remained on board ship. 'Planty gal stop board ship.' The King sent his men to cut wood two days for the Harriet. The fourth day, the King, with all his Chiefs, returned to the small island and had a great feast. He told the Capt. that soon as he got ready for sea he wanted him to come to small island and receive some gifts from him, as taro, yams, hogs, &c. But during the night after the feast, unbeknown to the King or any body else but themselves, every kanaka belonging to lee harbor went home. Next day one man came from there and reported that the ship had been taken. King immediately sent his steward to see what had been done. He returned, and confirmed the story as follows, (King putting the questions, and steward answering them.) 'Ship gone?' 'All gone ship.' 'Where sailor man?' 'All dead.' 'Where's de every thing belong ship?' 'Every man take 'em, go ashore.' 'Where ship?' 'Ship stop,' i. e., it had not been destroyed. He then gave me the names of all the places to which the kanakas belonged who had some hand in it. When he had learned these facts he immediately called three of his highest Chiefs, and sent them with all the men from the small island and the other side of the large island, 'to go and see what's de matter." Told them not to bring any thing belonging to the ship to the small island, as he did not wish to see any thing of it. Gave orders also to kill twenty men and five women. This was done by stratagem, the day after they went; that is, the first day they conducted themselves as though nothing had happened, or as though all was right: ate, drank, talked and laughed as ever. In that way the guilty ones were detected.

After this the King sent to see if every hing had been done as he had directed.—Finding it so, he gave orders to burn the ship. They saved chests, five boats, harpoons, lances and small things; the rest went down with the ship. His brother, the kanaka, then brought every thing that was saved to the small island: five boats, ten muskets, &c., &c. But the King ordered every thing to be thrown into the bay and sunk; to break up all the chests and stave every boat.—However, kanaka saved two of the boats. This destruction was made so that there might be no discovery of the lost ship when other ships should visit the Island.

Reasons assigned for this bloody affair, were as follows: The Captain, officers and sailors took the women on board without the consent of the men, and detained them there, all the time, night and day. 'No kanaka give gal. Sailor man take 'em, no let 'em go shore. Kanaka no like; they afraid white man carry 'em to sea.' One officer took the wife of the son of a chief and detained her on board. The son held on to her as long as he could; the officer after fighting some, succeeded in getting her. Her superior beauty seemed to have been the reason for the officer struggling so hard for her.

The natives who left the King during the night to go and look after their wives and daughters, went on board the ship as usual after breakfast, with their presents, while two boats were on shore for wood. They took them by surprise and killed every body belonging to the ship, both on board and on shore. No natives were killed. The reason he gave for ordering those five women to be killed with the twenty men was, 'because they no tell white men kanaka going to kill 'em.'

Thus you have King George's account of those horrid affairs. And I think for the most part, if not in every particular, it can be relied upon as a true statement of things as they occurred. For he has a most excellent memory, and was very careful to state every thing in the order in which it occurred, as you will see by his going into those particulars about the political changes between the times of taking the two ships. There may have been other accounts given under other circumstances, differing somewhat from the above. But as I sat down by him, I told him I wanted he should give me all the particulars about the burning of those two ships;—that there had been all sorts of stories told and put in the papers, now I wanted him to tell me all the truth, and nothing but the truth. There was none of that cautious reserve which he manifests at times when wishing to make a guarded statement, or to keep back a part of what he knows. I referred to some of the stories I had heard, as that the sailors threw some of the women overboard and greatly abused them or tried to kill them —Said he knew nothing of the kind, but that the natives threw some of the women overboard that they might not get hurt in the affray, and they swam ashore.

After this he says he adopted the practice of furnishing every ship that came here with all the women they wanted, and whoever they wanted, never daring to refuse a white man. But his kanakas he could manage, as his word was law and the end of all strife. And this had been the practice till Missionary came to Strong's Island. 'No all same now.' It is true King George has publicly declared against the practice, and it is no more done

openly. But I am very sorry to say that I have too good reason to believe that a practice of so long standing, which secures special favors from captains, officers and sailors, especially in the article of tobacco, is not so readily given up by some of the chiefs and some of the common people. The names of captains and officers who still debase this small remnant of a noble and once numerous people in this way, might be given, if it were best. For it is hardly possible to keep such things a secret on a small island like this with so few inhabitants; especially when young girls from my school are taken, as has been the case.

But, my dear Brother, there will be a sure end to these things, and that not far off, and in the silent grave, if there be not a change of practice on the part of some of those who come to us from the sea. Are there no motives that will touch a sailor's heart and lead him to abandon a practice fraught with such awful consequences to others and to himself. He has his remedies, or temporary ones, perhaps on board of his ship, or in the hospital. So have the poor natives he leaves uncared for behind him.—But their remedy is a most loathsome lingering of life, and such a horrid death as will make one sick of his race!

These things the missionary must know and be familiar with, whether he would or not, if he is faithful to his high commission. And wives, and mothers, and sisters at home, yea the whole universe of God will know them when every secret act shall be published at the Bar of God. O, when shall there be a moral reform among those who go down to the sea in ships? I know there are some of the best men that ever lived, whose home is on the sea. And you, Bro. Damon, know better than I how often they are to be found. Give them all my warmest love, and a hearty God speed in the work of doing good to their fellow seamen, till every ship shall be a Bethel, and every sailor a herald of glad tidings to the last. Then the Angel having the Everlasting Gospel, will soon fly through the earth, proclaiming the glorious truth: 'The kingdoms of this world are become the kingdoms of our Lord and of his Christ.'

Ever, and truly, your brother in the Gospel, B. G. Snow.

TRAGICAL SCENES AT MARQUESAS.

Omoa, Fatuhiva Aug. 21, 1854.

Mr. Damon, Dear Sir—I send you an account of a tragedy, that was acted some months ago, at Resolution Bay, on the neighbouring island of Tahuata. The information is intended for your floating readers, if you deem it worth a place in your journal. Resolution Bay has been much frequented by whale ships, and is likely to be visited again now that the French have abandoned it.

Last September, the English whaling bark Caroline of London, Captain Willis, touched at Resolution Bay, and left two sick men—a white man, and a colored one. They were placed under the protection of Panau the chief of the bay, Capt. Willis giving him eighty dollars to defray expenses. After the departure of the vessel, Panau ordered some of his natives, to take the colored man out to sea, and throw him overboard. He was taken out, cut to pieces and then thrown overboard. The white man was shut up in a house, and starved to death. Panau stood sentry over him, and threatened to shoot a friendly Spaniard, for attempting to supply the sick man with food. After his death the Spaniard commenced to dig a grave. Panau saw him at work, and asked what he was doing. The Spaniard told him he was digging a grave for the white man. "What, you going to bury a white man—a dog—anything is good enough for a dog—there take him and throw him among those bushes, and don't let me see you attempt to bury him." The tale is too sickening to prolong it any farther, but I may add that Panau has been to England and speaks English. On our way here, we passed Resolution Bay, he then displayed French colors. A native informed me of this affair sometime after it took place. I asked him how it was possible to conceal it so long He stared at me, as if I were a blooming production of nature, and said, "with us such things are *sunk*." However, it has risen again to verify the old saying that "Murder will out."

It will astonish the advocates of the doctrine of "Spiritual Rappings" to hear that it is an old worn out Marquesian idea. Extremes meet. The lowest round in the ladder and the highest one, are nearer each other, than we are inclined to believe. Certainly, they are the two most likely to meet when the ends of the ladder are brought together. Man may step aside from the walks of civilization, and lose himself in regions scarcely more sensible than the ravings of superstition. Times have been flowing down hill, they are about stationary now.

The American brig Swiss Boy Capt. Dexter, was the only vessel that has anchored in the bay, since our arrival. She was here in March, and again in June last, on a trading expedition.

I thank you for the papers you sent me. I shall always be pleased to receive your "Friend." Yours truly,

S. Bicknell.

(Communicated for the Friend.)

ORDINATION AT HAUULA, OAHU.

Rev. Moses Kuaea was ordained pastor of the Church and Society at Hauula, Nov. 1st 1854. The pastor and people being all natives, the exercises were all in the Hawaiian language, and were as follows: Invocation and reading the Scriptures by Rev. B. W. Parker; prayer by Rev. Stephen Waimalu; (native,) sermon by Rev. B. W. Parker; Ezekiel 31, 17. "Son of man I have made thee a watchman unto the house of Israel, therefore hear the word of my mouth, and give them warning from me." An interesting and profitable discourse, and well suited to this period when many are following cunningly devised fables. The consecrating prayer, and address to the people, were by Rev. E. W. Clarke, charge to the pastor by Bev. J. S. Emerson, and Right hand of fellowship by Rev. L. Smith. Benediction by the Pastor. At the request of both the church and Pastor, Rev. J. S. Emerson retains his connections with the Church at Hauula as Senior Pastor.

HISTORY OF THE CHURCH AT HAUULA.

In connection with the Church at Kahuku it was separated from the Church at Waialua in 1842, with 300 members and more. In 1848 the Church of Kahuku was separated from that of Hauula, and 61 members were received from it. The Church at Hauula now numbers 288 members, and the Church at Kahuku 116 members. Of the whole number transferred 12 years since from Waialua to Hauula Church, only 64 now survive, of whom 23 are in the Kahuku Church. The Church at Hauula have a good and commodious house of worship, built of stone and well laid up in lime mortar, having glass windows. It is well floored and seated, and all is in good style; and what is best of all is that it was done almost entirely at their own expense; and there is no debt upon the Church. It is to be hoped that the enterprise which has thus far characterized this people will not soon forsake them.

NA MOTU: or Reef Rovings in the South Seas: A Narrative of Adventures at the Hawaiian, Georgian and Society Islands, with Maps, and an Appendix relating to the resources, social and political condition of Polynesia, and subjects of interest in the Pacific Ocean. By Edward T. Perkins, 8vo. pp. 456. New York:—Putney & Russell.

Recent political events in the Sandwich Islands, and the constantly increasing trade between the Eastern shores of Asia and our Pacific coast, have excited in the American people much interest in the Islands of the Pacific, of so great importance to our nation in a commercial point of view. *Na Motu or "The Islands,"* is a narrative of the personal adventures of a New Yorker during five years passed among the South Sea Islands. To those who wish to obtain information in regard to these Islands, their people, customs, history, &c., it will be a valuable book, while at the same time it will prove of much interest to the general reader as a lively description of scenery, character and adventures in one of the most interesting portions of the world. Much attention is paid in the work to character, customs and traditions of the natives, and a chapter is devoted to the Mission, and their results. The Appendix, which fills nearly one-fourth of the book, contains a description of the present condition of the Hawaiian Kingdom, with statistics of its commerce and agriculture, and a discussion on the question of annexation; a history of French aggression in the South Seas, and a statement of the present condition of the American whaling interest in the Pacific.—[*N. Y. Courier*.

Jenny Lind's Brother, a Sailor.—At a sailor's pic-nic at Framingham Mass., on Thursday one of the sailors, Jenny Lind's brother, belonging to the U. S. ship *Cyane*, made a speech in which he spoke of the bombardment of Greytown, giving a humorous account of it. He spoke of the people as a *parcel of pirates*—told who the Mayor was, a graduate of Sing Sing—how they insulted the United States Official—and how their houses were destroyed. He spoke warmly in praise of his commander.

A good Idea.—The city authorities of Boston have decreed that all the names of non-residents, who come to Boston and get drunk and are arrested, shall be published.

"To beg I am ashamed."

There are some enterprises for the promotion of which, we are not ashamed to beg. We are not ashamed to beg for money to distribute bibles, good books, or build a Sailor's Home, but we are ashamed to beg for the support of "The Friend." This paper has now been published eleven years. Its character is known, and its usefulness among ten thousand seamen is admitted. Not a day passes but we have repeated assurances from masters, officers and sailors, that "The Friend" is a most welcome visitor on ship board. A Captain's wife recently informed us, that her husband read no other book at sea, but "The Friend." We have had shipmasters tell us that from information derived from "The Friend," they have filled up their ships. Others have told us, that "The Friend" has warned them of reefs and islands, that would have proved the cause of losing their vessels. Seamen, without number have told us again and again, that they thought more of "The Friend," than of all other newspapers. Under these circumstances, as a publisher of "The Friend," "I am ashamed to beg," neither is it our intention to beg any more. No skipper or any one else has heard us beg for "The Friend," for the last twelve months, and unless we forget ourselves hereafter, they never will hear us beg again. If the Friend is supported, it will be done by regular subscribers, and "free-will offerings." Our sea-faring friends are knowing to all our efforts for sustaining this paper. It rests entirely with our readers whether the paper is published hereafter. If we can square accounts with the printer, then we shall commence Vol. XIIth, otherwise we shall "rest upon our oars." The simple truth is, gentlemen, such phrases as, "your paper is useful," "it is doing good," "we cannot do without it," &c., do not settle a monthly bill for printing and paper, amounting to $70, or $80. Enough.

Estimated cost of "The Friend," for 1851, -		$950 00
Estimated receipts from subscribers, &c, - - -	$450 00	
Free-will offerings, since Jan. 15, -	312 50	
To be raised,	187 50	
	950 00	950 00

Foreign Subscribers.—The repeated assurances of those Ship-masters, and others, who send 'The Friend' to their families in the States, that it is a most welcome Monthly Visitor, leads us to invite others to do the same. Said Capt. Soule, who has sent 'The Friend' to his wife for five years, "I do think it strange that more ship-masters do not subscribe for the paper, and send it home. They all think much of the paper, although they do not subscribe for it." We should not refer to this subject, did we not honestly believe, that we were conferring a favor upon the friends of Seamen. "The Friend" is sent to U. S. at $2 00 per annum, including the Hawaiian postage, which is the same as to Honolulu subscribers.

☞ Masters of vessels, bound to the Marquesas Islands, or Micronesian Islands, are respectfully desired to make it known to the Seamen's Chaplain, or Messrs. Castle and Cooke.

VISIT OF THE "LADY PIERCE" TO JAPAN.

Many of our readers we are confident will peruse with interest the following narrative of a merchant ship, visiting Japan. She touched at Honolulu, about June 1st. We copy the following from the China Mail of August 24th.

The American clipper-ship Lady Pierce, Capt. Burrows, fitted up at S. Francisco in a most costly manner for a "peace expedition" to Japan, arrived with her owner, the 14th August. Mr. Burrows describes his visit as having been attended with the most pleasurable and satisfactory results. We have been furnished by him with the following notes from his private journal:—

The Lady Pierce arrived in Jeddo Bay fifteen days after Commodore Perry had left "as a token of amity and peace, and without any preparations for war," and the high Japanese officers said the visit was much more pleasing to them than that of Commodore Perry, who had with him "too many big guns and fighting men." The Japanese, however, expressed the utmost regard for the Commodore and his officers.

The ship had been supplied at San Francisco with every comfort and luxury likely to gratify and interest the Japanese, who were surprised to find such an elegantly furnished vessel used as a private gentleman's yacht. Her dimensions were taken by artists, together with delineations of her guns, tackle, &c; the authorities saying the Emperor intended to have two vessels built on the same model.

On board was a Japanese seaman, the sole survivor of a crew of fifteen men belonging to a junk, which had been blown out to sea, and was picked up near the Sandwich Islands after having drifted about for seven months. This man, named Dee-yee-no-skee, was received with the most lively demonstrations of pleasure by his countrymen, who listened with much delight to his graphic description of his rescue from the junk, & kind treatment by the Americans, especially on board the Lady Pierce, in which he had been, by the kindness of her owner, permitted a free passage to his native country. The Japanese, especially the lower orders, were profuse in expression, by words and gestures, of their gratitude to Mr. Burrows, who seems to be of opinion that Dee-yee-no-skee, a man of fair talents, is likely, by his account of American manners and customs, to accomplish more than hosts of ambassadors towards forming and cementing an intimacy betwixt the Japanese and foreigners.

Shortly after the arrival of the Lady Pierce at Uraga, orders were received from the capital that Mr Burrows should be supplied with everything he might require, and received with "similar hospitality to that displayed towards Commodore Perry."

With a party of Uraga officials on board, the Lady Pierce proceeded to within ten miles of Jeddo, and her owner expressed a desire to anchor off that city; but this was objected to by the officers, who said "It is not good—Commodore Perry did not go there, and we hope you will not."

During the stay of the vessel, every part of her was crowded with visitors, who were profusely regaled with the refreshments with which the vessel had been provided, fresh Oysters and Peaches being their favorite delicacies, with Champagne as a beverage; and although at one time there must have been several thousands in and around the ship, and though every thing, silverware included was thrown open to their inspection, not a single article was stolen.

Large presents of silk, porcelain, lacquered-ware, &c., were made in the name of the Emperor to Mr Burrows, who, however, was requested to give publicity to his determination, that henceforward, in accordance with stipulations in the treaty no foreign intercourse whatever would be permitted with Jeddo, but that all vessels must proceed either to Simoda, or to the other ports thrown open to American trade.

From Jeddo, therefore, the Lady Pierce proceeded to Simoda, under the pilotage of three men sent on board by the authorities, and escorted by a government cutter manned by two officers and twenty men, who had received orders to render every assistance that might be required

During the stay of the vessel, no guard was placed over her, nor was any restriction put upon landing, of which Mr. Burrows twice took advantage while in Jeddo Bay, and on both occasions was received with every mark of courtesy. He is however, of opinion with the officers of the U. S. Squadron, that no extensive foreign commerce can possibly, at least for many years to come, be carried on with Japan. He says he applied for coal, and was told at first that "government had determined not to dispose of their sea-coal;" but, after reference to Jeddo, he was informed he might have as much as he required at $1 65 per picul, or $28 a ton, such coal as he saw at the depot being of a very inferior description to that sold in Oregon at $8 a ton.

Mr. Burrows says the Japanese are fully aware of the present disturbed state of China, which they impute entirely to the effects of foreign intercourse; and considers the enormous prices fixed upon such commodities as he desired to purchase a certain index that fear alone dictated their Emperor's acquiescence in the demands made by Commodore Perry.

He likewise asserts the Japanese to be a nation of Atheists, denying the existence of a God, and selecting as an object of worship either the Spiritual Emperor at Meaco or any other Japanese. He was told by the interpreter that formerly their religion was similar to that of China, but that the belief in a Supreme Being had latterly been entirely discarded, and they professed to be much shocked on Dee-yee-no-skee declaring his belief in the Deity, to whom, and not to the Spiritual or Temporal Emperor, he said his successful supplications for, and thankful acknowledgment of, deliverance from the drifting junk had been directed.

☞ If masters of whale ships visiting this port, would adopt the suggestion of the following testimonial, they would place "The Friend" upon a permanent basis. It would be done too, without their "feeling it," and we are confident there is not a ship owner in New Bedford or any other port, who would complain of this item in the ship's account.

Valuable Testimonial.

Whereas, we have often received interesting and useful information respecting our whaling vessels and their cruising grounds from "The Friend," published by Rev. S. C Damon, we hereby authorize, (in case Mr. D. resumes the publication of the paper,) the captains of any of our ships which may visit Honolulu, to make a contribution to Mr. D. of five dollars, for account of the ship, for each voyage.

Chas. P. Williams. J. F. Trumbull.

P. S. The above testimonial was voluntarily started by the owners of whale ships, in New London, and was immediately signed by parties, representing, 40 out of the 52 vessels sailing from that port.

Thirty clean ships.—We have been informed that just fifty ships visited the Arctic Ocean this season, but thirty returned without taking a drop of oil; while several of the remaining twenty took barely enough to keep their binnacle lamp burning. This is a hard season indeed. If any men have our sympathies, it is those who have been thus unsuccessful. Their anxiety, disappointment and trials are exceedingly great. The whaleman's lot is sufficiently hard, where a full ship is his reward, but where nothing is accomplished towards "a voyage," for twelve months, the case is extremely hard and trying. Try again, is our only note of encouragement.

A Good Example.—Some years ago, when making an effort to collect funds for the publication of the Friend, there were sold to one ship's company the "Waverly,' bound volumes amounting to $13 00. The master charged each man with the amount subscribed; when the vessel arrived home, the owners paid the bill. This was highly creditable, and we are confident, if ship owners and ship masters would oftener indulge in such acts of generosity, it would secure the good will of seamen, and retain them in their employ.

[Published by request.]

Wages Increased in the U. S. Navy.

GENERAL ORDER.

The General orders of January 4, and May 28, 1853, are hereby revoked; and from and after this date the monthly pay of the petty officers, seamen, ordinary seamen, landsmen, boys, &c., in the Navy, will be increased as follows:

Yeomen, in ships-of-the-line, to	$45
do in frigates, to	40
do in sloops, to	30
do in vessels smaller than sloops, to	24
Armorers, in ships-of-the-line, to	30
do in frigates, to	25
do in sloops, to	20
Ship's Steward, to	30
Boatswains, Gunners and Carpenters' Mates and Master-at-arms, to	25
Ship's Cook, Coxswains, Quarter-Masters, Captains of Forecastle, and Surgeon's Steward, to	21
Sail Makers' Mates, Quarter-Gunners, Captains of Tops, Captains of After-guard, Captains of Hold, Cooper, painter, Armorer's Mates, Ship's Corporal, Masters of Band, Cabin Stewasd, Ward-room Steward, Cabin Cook and Ward-room Cook, to	20
Seamen, to	18
Musicians of the 1st class, to	15
Ordinary Seamen, to	14
Landsmen and Musicians of the 2d class, to	12
Boys, to	8, 9 and 10

This increase will not apply to those enlisted for receiving ships and shore stations. Those now in the service who have received a bounty under the General Order of May 28, 1853, will be charged with such part of the bounty as is proportioned to the unexpired term of their enlistment.

An advance of two months pay only will be made when the recruit shall be received and duly entered on the books of some receiving ship. The other existing general regulations with regard to enlistments will continue in force [Signed] J. C. DOBBIN,

Secretary of the Navy.

Navy Department, August 11th, 1854.

Information Wanted.

New Haven, Sept. 5th, 1854.

Dear Sir:—I take the liberty to write to you respecting my son, James R. Balford, which left New Haven in August, 1851, and sailed in the ship Neva, Captain Case, on a whaling voyage; and all I can learn of him since is, that he left the vessel in Honolulu in 1852, and in 1853 I heard he was there as a military officer; but what grade I could not learn, and if you will please to inform me if there has any one by that name ever been at the office for letters, you will confer a very great favor on his almost distracted mother. I am willing to compensate you in whatever you say is right, for I would not begrudge any thing if I can only get some tidings of that dear son. I do not know the reason, if he is living, that he cannot write and relieve his dear friends. I hope you will pardon me for thus intruding on you. My anxiety is such, that I do want to hear if he is living. I enclosed him a letter; so if you hear of any one by that name, you will know him. If you will be so kind as to forward me a line if you ever heard of such a person, you will confer a great blessing on his anxious mother. P. BALFORD.

SANDS' SARSAPARILLA

IN QUART BOTTLES,

For Purifying the blood, and the Cure of Scrofula, Rheumatism, Stubborn Ulcers, Dyspepsia, Salt Rheum, Fever Sores, Erysipelas, Pimples, Biles, Mercurial Diseases, Cutaneous Eruptions, Liver Complaint, Consumption, Female Complaints, Bronchitis, Loss of Appetite, General Debility, &c,

Chase, C Fohrer, Walker, Capt Childs, S Hoyt, Peck, C F Merrill, Rev'd Pere Leonore, Dr Eustache, Dr. Hennaim, Mr. Thomas Tiefie, and 2 Germans.

By the Mercury, for New Bedford—John Lippitt, Esq., of Lahaina.

TOTAL ABSTINENCE ILLUSTRATED.

The following remarkable incident in the life of one of the noblest of men, of patriots, of statesmen, of orators, and of christians, are worthy of attentive perusal. They illustrate most forcibly the correctness of the principles which we advocate. Had Mr. Wirt adopted the *principle of moderation*, he would, without doubt, have died the death of the drunkard; and over his grave a tomb-stone might have been erected, with the inscription, "Rum's Victim;" most fortunately for his own good, and his country's welfare, he adopted the principle of *Total Abstinence*. Would that more young ladies were as decided and uncompromising as Miss Gamble! If they were, they would save themselves long years of bitter anguish, and floods of unavailing tears. We would recommend the advocates for rum-selling to discuss their principles with the drunkard's wife.

Reformation of William Wirt.—The distinguished William Wirt, within six or seven months after his first marriage, became addicted to intemperance, the effect of which operated strongly on the mind and health of his wife, and in a few months more she was numbered with the dead. Her death led him to leave the country where he resided, and he moved to Richmond, where he soon rose to distinction. But his habits hung about him and occasionally he was found with jolly, frolicsome spirits of bacchanalian revelry. His true friends expostulated with him to convince him of the injury he was doing himself. But he still persisted. His practice began to fall off, and many looked on him, as on the road to ruin. He was advised to get married, with a view of correcting his habits. This he consented to do, if the right person offered. He accordingly paid his addresses to Miss Gamble. After some months' attention, he asked her hand in marriage. She replied:

"Mr. Wirt, I have been well aware of your intentions some time back, and should have given you to understand that your visits and attentions were not acceptable, had I not reciprocated the affection which you evinced towards me. But I cannot yield my assent until you make me a pledge never to taste, touch or handle any intoxicating drinks."

This reply to Wirt was as unexpected as it was novel. His reply was, that he regarded that proposition as a bar to all farther consideration of the subject, and he left her. Her course towards him was the same as ever—his, resentment and neglect.

In the course of a few weeks, he went again and solicited her hand. But her reply was that her mind was made up. He became indignant, and regarded the terms she proposed as insulting to his honor, and vowed it should be the last meeting they should ever have. He took to drinking worse and worse, and seemed to run headlong to ruin.

One day, while lying in the outskirts of the city, near a little grocery or grog shop drunk, a young lady, whom it is not necessary to name, was passing that way to her home not far off, and beheld him with his face upturned to the rays of the scorching sun. She took her handkerchief, with her own name marked upon it, and placed it over his face.

After he had remained in that way for some hours, he was awakened, and his thirst being so great, he went into the little grocery and grog shop to get a drink, when he discovered the handkerchief, at which he looked, and the name was on it. After pausing he exclaimed:

"Great God! who left this with me? Who placed this on my face?"

No one knew. He dropped the glass, exclaiming:

"Enough! enough!"

He retired instantly from the store, forgetting his thirst, but not his debauch, the handkerchief, or the lady, vowing, that if God gave him strength, "never to touch, taste or handle intoxicating drinks."

To meet Miss Gamble was the hardest effort of his life. If he met her in her carriage or on foot he popped around the nearest corner.

She at last addressed him in a note under her own hand inviting him to her house, which he finally gathered courage enough to accept. He told her if she still bore affection to him he would agree to her own terms. Her reply was:

"My conditions are now what they ever have been."

"Then," said Wirt "I accept them."

They soon married, and from that day he kept his word, and his affairs brightened, while honors and glory gathered thick upon his brow.

His name has been enrolled high in the temples of fame; while patriotism and renown live after him with imperishable lustre.

(Communicated for the Friend.)

WRECK OF WHALE SHIP CITY.

Ship Syren Queen, Hilo, Nov. 9th 1854.

Dear Sir—I send you for publication the following account of the loss of the Ship City of New Bedford, under my command, with a cargo of three hundred and fifty bbls sperm oil, and nine hundred and seventy whale, which happened in Saghalien Bay ten miles south of Gobovatch.

On the 6th of Sept last, had a fresh breeze from the N., steering south-west across the head of the bay under double reefed topsails, jib and spanker. At four o'clock and twenty minutes P. M. sounded with seven and a half fathoms of line and no bottom. Then hauled up west, for a well known landmark called "the pass," and a ship that laid in that direction. At thirty minutes past four the ship struck on a bank before unknown, the 2d mate and a foremast hand being at the mast head at the time and no danger visible. I immediately braced the topsails aback, and hauled down the jib and spanker, to back her off. Then lowered a boat to sound around the ship, and made preparations to carry out a kedge anchor, but on finding that all to leeward of the ship was shallow water, and that it would be impossible to kedge against the wind and sea, took the kedge on board, clewed up the topsails and let go both anchors, to hold her where she then was, until flood tide when there would be sufficient water to float the ship and get her under way; then threw the deck load overboard, after which she did not strike so heavily; fired two guns and set a signal of distress, to inform two ships then in sight to windward, of our situation. Not however with hopes of receiving help from them, for they could render none. About nine o'clock it commenced breezing on and swell fast increasing; at eleven ship struck very heavily, tried the pumps and found her making water fast, in twenty minutes lower hold nearly full, abandoned pumps and clear-away boats, as the ship was fast heeling over and endangering them. At half past eleven the water was over the lower deck; put two sick men and seven others in waist boat in charge of second mate, and veered her out clear of the ship. The mate and nine men in larboard boat, which being the best boat took also log-book, and my trunk containing ship's papers &c. At midnight the wind had increased to a gale, the sea making a breach over the ship fore and aft, hauled the starboard boat alongside and with much difficulty succeeded in getting the remainder of the crew on board with the third mate and myself. The lee davit heads then about three feet from the water, veered out line enough to clear the boats from the masts should the ship fall upon her beam ends, and lay there about four hours, when the sea had become so exceedingly rough that we could keep our boats free no longer, as the current sweeping round the ship caused a much rougher sea there than in deeper water, and the danger of being stove by pieces of the wreck was momentarily increasing as the ship was breaking up fast. We then took our oars, cut the lines, and pulled out astern of the ship. When about one hundred fathoms distant the ship fell on her beam ends, mast head in the water. Pulled to windward until daylight, (about an hour and a half) when I could see neither boats nor ship, but knew by the pieces of the wreck that we had fallen to leeward notwithstanding our exertions to keep to windward. I then set my boat sail, reefed, with the sprit dropped, thinking that the other boats would see it and do the same, but seeing nothing of them, I then steered for the west side of the bay, about fifteen miles distant. On arriving within about a mile of the land, found heavy breakers on a bank which ran parallel with the coast. On attempting to pass through, a tremendous breaker caught the boat, dashed her off to leeward, where she broached too and filled half full; by almost a miracle we succeeded in bailing her out before another caught us, and keeping away to leward for a ship which we supposed to be at an anchor. But on nearing her, it proved to be the Chilian bark "Revello," on a bank, and abandoned. Seeing that it would be impossible to board her without staving our boat, kept away to leeward, and effected a landing on the west side of the Saghalien, after being in the boats fifteen hours, hauled our boat up, made a fire to dry our clothes and passed the night in the bushes. The next morning, walking along the beach, met the second mate and boat's crew, who reported that after we cut our lines, he pulled until daylight, when saw my sail to the windward of him, but could make no signal that I could see his sail having been left on board the ship. He then kept away for the "Revello" and on finding her abandoned, steered for the land, and after several narrow escapes from swamping, had landed about a mile to windward of my boat, opposite a native hut where

they had passed the night. We returned with him to the place where he had landed, the gale still continuing, attended with rain.—About five o'clock P. M., we were surprised by the appearance of one of the mate's boat's crew, drenched with water, and so chilled as to be scarcely able to stand. He reported as follows, that in the morning after leaving the wreck, his boat was to windward and saw my sail, also saw the ship, her stern gone and casks drifting out through the cabin. They followed after my boat with their oars, to the west shore, passed to leeward of the bank that had so nearly swamped my boat, and reached the smoother water in shore where they anchored. They then saw the "Revello" to leeward, took their anchor and steered for her. In attempting to board her their boat was dashed in pieces, and everything in her lost, the crew saving their lives by clinging to the side of the bark. Remained on board through the night, and in the morning, fearing the bark would go to pieces cut away her fore and main masts, made a raft of some of the spars, upon which they lashed themselves with the hope of reaching the land, then about eight miles distant, but before they reached it, the mate and six others perished. Three only, remaining alive, and two of them unable to stand.

We immediately went to the raft, found the two men crawling up the beach, and took them to the native hut. Up to this time the natives had seemed to dislike our company, and had stolen nearly all of the little that had been saved by my crew, and when we brought the men from the raft they came out in their true colors, driving every one from their hut, and expressing a particular dislike to shelter the almost dying men. The rain at the time pouring down in torrents. Fortunately some of my crew had saved three blankets, with which we made a rude tent and with a fire succeeded in saving their lives, although two of them were wholly unconscious until the next morning, when we were driven away from that place by the natives.

The gale had by this time abated. We launched our waist boat and took her to the place where I had landed, where we made a fire and cooked some fish which some of the crew had bought with what little clothing remained. The Tartars again appeared and demanded our coats, which of course we refused them. They then threatened to call others to their assistance, and take them by force, but before they could effect their object, we had embarked and were about one hundred yards from the beach, when they appeared, armed with bows, arrows and spears. We then pulled for the Russian village of Petrowsky, about thirty-five miles distant. Landed on the Siberian side at ten o'clock at night, about ten miles from the village made a fire and passed the night. In the morning embarked again and landed at Petrowsky about ten o'clock, Sept. 10th.

We were received by the Russians with every mark of kindness, my men supplied with food, shelter and clothing; my officers and myself taken into their families, where we received every attention in their power to bestow, for which they would make us believe we were under no obligations to them whatever, as on their part it was only an act of Christian duty.

We remained at Petrowsky until the first of Oct., when we embarked on board the Russian American Co's Brig "Ochotsk," bound to Than to pass the winter. On board of her we narrowly escaped shipwreck a second time, having to slip our cable, and work off a lee shore in a gale; at one time wearing ship when fairly in the breakers. The gale abated, and we returned to Petrowsky on the third for passengers who had been left behind. There we found the ship "Syren Queen," of Fairhaven, Capt. J. Lakey, who had heard a rumor of the loss of our ship and came in search of us, and I would here make public acknowledgement of the debt of gratitude due him, from my officers, crew, and myself, for the kind and gentlemanly treatment, while on board that noble specimen of naval architecture, the "Syren Queen;" also for his kind sympathy for our misfortune, and the feelings of gratification which he felt at being the means of saving us from passing a winter in Siberia, dependant upon the bounty of strangers for a subsistence.

I would also tender my thanks to Captain Watson of the bark "Sheperdess," and Captain Smith of the ship "Splendid," for their kindness in taking a part of my crew on board their ships. If you will please correct the above account of the loss of the "City," and give it a place in the "Friend," you will oblige your ob't serv't,

S. HENRY GIFFORD.
late Master of ship City.

To Rev. S. C. Damon.

NAMES OF CREW SAVED.

Cyrus E. Clark, 2d mate, Henry Stuart, 3d mate; Wm. H. Murphy, cooper; Morton Lover, boatsteerer; Wm. Watson, steward; Charles Henry, Cook; Jas. H. Hathaway, Henry Saywood, Ephraim Baily, Oliver Randall, Edward Gifford, Peter Keheo, John Franklin, Manuel Fritas, Antoine, Frank, Joe, George, Enrique, seamen.

NAMES OF CREW LOST.

George N. Lewis, mate; John Lagrange, boatsteerer; Hugh McElleny, Carpenter; Wm. H. Clark, Ambrose Sayer, Harry, Dan, seamen. S. HENRY GIFFORD.

Royal Mistake.—Mr. William Chambers in his entertaining sketches of Things in America says:—"It has sometimes been remarked of George III, that instead of fighting American subjects, he would have shown somewhat more prudence by removing, family, court and all, to the States, and so leaving Great Britian as the lesser country, to shift for itself, as a colony."

Men, by associating in large masses, as in camps, and in cities, improve their talents, but impair their virtues, and strengthen their minds, but weaken their morals; thus a retrocession in the one, is too often the price they pay for a refinement in the other.—[Colton.

The point of aim for our vigilance to hold in view, is to dwell upon the brightest parts in every prospect, to call off the thoughts when running upon disagreeable objects, and strive to be pleased with the present circumstances surrounding us.—[Tucker.

One may live, as a conqueror, a king, or a magistrate; but he must die as a man.—[Webster.

Deference is the most indirect, and the most elegant of all compli-ments.—[Shenstone.

Influence of Women.

Senator Houston was once asked, at a large party given by Mr. Speaker Winthrop, why he did not attend the usual places of public amusement as he had been accustomed to do. His reply was this—let it be read and remembered by the mothers and daughters of America:

"I make it a point," said the honorable senator, "never to visit a place were my lady, if she were with me, would be unwilling to go. I know it would give her pain, as a christian, to attend such places, and I will not go myself where I could not take my wife."

A member of Congress present alluded to his own wife, and added that there was a mutual understanding between him and her, that they should follow the bent of their own inclination in such matters.

"That may do for you," responded Mr. Houston, "but with me it is different from what it is with many men. My wife has been the making of me. She took me when I was a victim of slavish appetites; she has redeemed and regenerated me, and I will not do that in her absence which I know would give her pain if she were present."

Mrs. Houston is a member of a Baptist church, and is a native of Alabama.—[Western Christian Journal.]

☞ No one of our readers will, of course, feel hit by the above remarks, unless he has already felt conscience-smitten.

A Silent Sea Captain.—Capt. Stone of the Steamer Canada, now in this port, is probably the most silent man afloat. Sailors who have been with him many months, say they never heard him speak. He writes his orders to his officers, and if they fail in carrying them out, he repremands them in writing. Yet he has the reputation of of being one of the most skillful and prudent Captains of the Cunard line, and remarkable for his powers of personal endurance. When at sea he rarely leaves the deck, night or day, more than an hour at a time, and nothing appears to escape his notice. Still he does not speak either to his officers or passengers. On a recent passage two wags, who were passengers in his ship, noticed this peculiarity, and at dinner one day were quite eloquent upon the blessing of speech, and then by way of contrast, expressed their deepest commiseration for dumbies. One of the wags was so overcome by his feelings that he deliberately took an onion from his pocket and applied it to his right eye, while he gazed at Capt. Stone with the left. "Poor dear gentleman," he sobbed, as the tears followed the onion, "I wonder if he is deaf as well as dumb." This was too much for the passengers, who burst into a roar of laughter, in which Capt. Stone joined heartily as the rest. When order was restored he said, "Gentlemen and Ladies, or Ladies and Gentlemen, I acknowledge that I appear to a disadvantage by not speaking more than I do; but what would you have me say? It is my constant care to see that you are properly attended to in every particular. What more can you desire?" After this effort he resumed silence, and has not been known to speak since.—[*Boston Atlas.*

DIED

On board "Hobomok" 23d May, Robert Wilson aged 29 years, of N. Y. City. He came out in the vessel.

At Raiatea, Society Islands, Oct. 1nth, 1854, Mrs. Platt, wife of the Rev. George Platt, an English Missionary.

In Honolulu, 27th Oct. Harriet, aged 6 months infant daughter of Robert Davis, Esq.

On 5th may, Japan Sea, on board "Active," Ezekiel Trask. He came out in the vessel, and belonged to Keen N. H.. Last voyage he was with Capt. Henry, Mary of N. Bedford.

On board "Zenas Coffin," Capt. Rose, in Sept. Israel Fallen, a native of Orange Co. N. Y.

In July, on board "Washington," George a native of Madagascar.

On board "Alexander BarcIay," during her last cruise, Henry Dickman.

On board "Geo. Howland," in the Yellow Sea, Mr. Joseph Haller of Dartmouth, Mass. aged 28 years; William, a native of Honolulu, May 2d; Joseph Manuel Silva, Sept. 6th, a native of St. Marys, Western Islands.

Lost overboard and drowned, off Cape Horn, July 14, from ship "Mer imac," Mr. JOSEPH LATHAM, of New London. He was first officer of the ship. At the time he fell, it was blowing a gale of wind. He leaves a wife and children to mourn his loss.

From the same vessel, PETER a Spaniard, was lost overboard and drowned, about Sept. 1th

Drowned, June 10th. by the capsizing of a boat, belonging to the Cowper, Mr. NATHANIEL E COLE, boat-steerer aged 24 years, of Fall River Massachusetts, EDWARD LEFLER. of Canada, and a Sandwich Island Native

Drowned, Sept. 23d, by boat being stove, belonging to Benj. Tucker, JOHN WEATHERBY, Vermont; BENEDICT MUNSON, Norwegian, and HARRY MANGIAIN.—[Vermont papers please copy.

On the 9th November, 1854, MARIA LOUISA DE FROUVILLE, aged 8 months, infant daughter of Dr. de Frouville, of this city.

At Hilo, Hawaii, Nov. I, 1854, WILLIAM JOHN HILDYARD, of Beverly, Yorkshire, England, aged 36. During the past season the deceased had been attacked, as surgeon and physician to the whale ship John Coggshall, Capt. Norton, of New Bedford. His death was the result of an injury received while riding on horseback, and terminating fatally after four days and a half of agonizing suffering. His funeral was numerously attended by masters, officers and seamen, and by the foreign residents of Hilo.

On board ship J. Peavy, May 4th, a native of the King Mills' Group, aged 18 years. Sickness unknown.

Also, HENRY RUEKER, aged 37 years, belonging to Ulster County, N. Y., U. S. A.

At Lahainaluna, 11th Nov., Mr. JAMES KENDALL, of consumption, aged 36 years. Mr. K. had come to the Islands from California some 8 months ago, for the benefit of his health, but disease was too deeply seated to be arrested by the climate or medical skill He leaves a wife here —whose devotion to him during his sickness endeared her to all her acquaintances,— and a daughter of 8 years, in California, to mourn his loss. Mr. K. was a native of Windham, N H. His life was one of unusual integrity, and his death that of the true Christian.— His memory is precious.—*Communicated.*

THE FRIEND.

HONOLULU, DEC. 8.

END OF VOLUME XI.

With this "No.," concludes the XIth volume of the Friend. Whenever we close our editorial labors for the year, we feel somewhat like the mariner who has sailed round the world, or the whaleman, who has made a cruise to the Arctic. Editorial life has its dangers and perils, its calms and storms, its smooth seas and rugged sailing, its fair breezes and fierce gales, as well as life upon the Ocean wave. Sometimes a subscriber will blow our sails "sky high," because the carrier has omitted to drop the paper at his door; sometimes a contributor will frown most hideously, because his prose or poetry are not in type; sometimes a reader will come down upon an Editor like a white squall, and right glad will he be to escape under bare poles; sometimes we have felt when encountering some of our readers, like those poor innocent bow-heads, when they saw the harpoon or lance brandished by the whaleman's brawny arm; sometimes a skipper will give us a blast because he finds something in our columns that favors the inmates of the forecastle, and then again we would get a fierce counter-blast from Jack because we did not more boldly advocate Sailors' rights; but we have not always to buffet a Northeaster, dread a Typhoon, or keep a sharp lookout for an iceberg or a reef.

Editorial life at the Sandwich Islands has many pleasant scenes, and much fine weather. It is our delight to advocate good principles and good undertakings. If men will be so foolish and reckless as to push their way down towards the grave of the drunkard we esteem it a privilege to point them to a better pathway, and happier end. As multitudes of our readers have their home upon the deep, and are cut off for the most part of the year, from the busy world, it is an employment, by no means unpleasant, to fit out a monthly visitor, who finds his way on board almost every vessel navigating the Pacific, and who is most cordially welcomed, both 'fore and aft,' thus seeming to keep seamen slightly, at least, informed respecting the great world. We are not insensible to those expressions of approbation, which are not unfrequently conveyed to us by letter and otherwise, that our humble efforts in the Editorial line are appreciated by landsmen and seamen. Such intimations and notices are the pleasant gales and prosperous breezes, wafting our craft safely along the voyage of life. Truly, we esteem it a delightful privilege to instruct, inform, or direct any of our fellow voyagers on the sea of life. All we ask of them is merely, that they will furnish us with the means to keep our vessel in good sailing condition. If we could close our accounts, for the year, and find a balance of a thousand in our favor, it would of course, be highly gratifying, but such a result we neither expect or labor for; and even if it should ever be realized, we do not believe our feelings would be more cheered and refreshed than they were while reading the following paragraph, from a letter penned by a Sailor,—a man-of-war's man, who visited Honolulu a few months since, but who wrote from the interior of New York State: "Your paper exerts a great influence among sailors. You presented me with a bound volume. I wish you would send me another. Reading it induced me to knock off swearing, drinking, and many other vices, and I have, I hope recently been converted to God. The want of missionaries for the heathen, does not speak very well for Christian people, so I thought I should like to become one. I am now trying to prepare myself for that work."

Hoping that our efforts will be appreciated by other seamen, we shall endeavor for the twelfth volume of the Friend to keep on the even tenor of our ways, making if possible a straighter wake, than during the period of the eleven volumes already published.

☞ Readers perusing a portion of the Thanksgiving Sermon published in other columns, will find an efficient police, and City Government officers, enumerated among the blessings for which we should be thankful.—We are of the same opinion. Good laws and good officers are blessings. There are unmistakable indications, however, that it requires unceasing vigilance to maintain the peace and order of the city. The grog selling is doing all that it can to create drunkenness and disorder; still there is a wholesome public sentiment demanding order and quiet. When order is disturbed it must be restored. The riotous and bloody scenes occurring last Saturday night, are to be traced directly to a certain grog shop. Rum was the cause of the trouble. We asked a sailor what occasioned the trouble, and he replied "liquor." The man belonged to the "Chasca," and knew all about the disgraceful affair. The master of the "Chasca," said the same. The unfortunate man most deeply implicated, is naturally a quiet and orderly sailor. He was so, on Saturday night, until drugged with poison at ———.

It is a hard thing to regulate rum selling. It is a business opposed to peace and law, social happiness and public virtue. Rum tramples upon all laws, human and divine, hence the only safe method is to enforce the Maine Law. If LIQUOR does the mischief, then destroy the LIQUOR! Make the rum seller responsible for the deeds of his drunken victims.

☞ We are happy to welcome amongst us the Rev. A. Williams, and family. Since 1849, he has been Pastor of the 1st Presbyterian Church in San Francico. We met him in that city at that time, when the rush from all parts of the world thither, had just commenced. He commenced preaching in a small Court House. His people erected a fine church, which was burned in the great fire of May 1851, but another church edifice was soon erected. He visits the islands for his health.

☞ Honolulu subscribers will please pay their subscriptions for the year to the carrier. He will furnish bills receipted.

IMPORTANT INFORMATION ABOUT ARCTIC WHALING.

New Whaling Ground—Whale Ships round Pt. Barrow for the first time—Whales seen—Reports of H. B. M.'s Ship "Enterprise." Future Prospects.

The following communication was placed in our hands, by Capt. Lakey, of the "Syren Queen." We solicited it for publication in our columns, from the writer, Capt. Pierce, of the "Kutusoff." The interesting and important information, which it contains respecting Arctic whaling, we are confident will be read with much interest by those engaged in the whale fishery, either as owners, or whalemen:

Mr. Editor:—I notice that you are well posted up in regard to the seasons of '51 and '52, by that valuable series of letters republished in the Friend from the New Bedford Shipping List, written, as I believe, by Capt. Tobey, of the "Lagoda," at least that is my impression, from the date of sailing and other internal evidence afforded by those interesting letters. The season of '53 was considered as a failure, inasmuch as the average *catch* was less than half that of the preceding season. There were about 160 ships in the Arctic in '53—the amount of oil taken about 90,000 barrels, or about 560 barrels to each ship. To furnish this amount of oil, probably full 900 bowheads were taken and cut in, or killed and lost in the ice. The first whales were taken near Cape Olutovsky during the latter part of May. The ice began to give way about Cape Navarin early in June, and a few whales were taken in that vicinity on the 10th; we had worked up within four or five miles of the Cape close to the ice.—There were then 55 sail in sight, and but three boiling. The ice remained along the western shore of the Anadir Sea until the latter part of July, and quite a number of whales were taken nearly abreast of the river of Anadir while the ice remained. There was also a small show of whales about thirty miles farther east, clear of the ice from the 10th to the 20th of July. They were next seen on the west shore of the straits early in August, where a few were taken. Again the latter part of August, they were quite plenty in the Arctic for a few days, in that locality known among Arctic whalemen as "on the Compass," but the great number of ships soon destroyed or drove them off into some retreat inaccessible to their deadly and determined pursuers, and I believe very few were seen after the end of August. On the 29th of August I counted 88 sails from the mast-head, about 35 of which were boiling. I suppose that nearly all the fleet were assembled within a square of 60 or 80 miles. At that time a whale bound north through such an array of ships and boats, if he escaped with life, would be apt to get up a sufficient head of steam to take himself far into the ice-fields of the north, or east around Point Barrow as far as open water might extend.

During the present, or rather the past season of '54, there were but 45 ships in this direction, some of which left the ground early to try for right whales at the south. The result has been a decided failure, more so than in '51, and I think, in some measure, from the same cause of which more hereafter. This season I fell in with the ice near Cape Olutovsky, on the 20th of May, in lat. 60° North, spoke several ships, none of which reported whales to the south, or westward. The ice gave way but slowly, as we had no southers until late in the season. On the 8th of June I had worked up as far as Cape Navarin, having passed through considerable broken ice, but neither saw nor heard of any bowheads in that vicinity until the 24th, when they made their appearance in rather limited numbers among the ice, which still remained near the land. A few remained hereabout for several days, and some five or six were taken. I think the greater part moved north almost immediately after the southern ice broke up. I was told by the Captain of a French ship, that he saw full 200 bowheads in one day going quick to the north-east.

The ice continued in the west part of the Anadir Sea much the same as last year, and many an anxious eye watched for its disruption, hoping it would leave the bowheads supposed to be so snugly ensconsed therein, without a shelter; but when it did break up, it was found that but few had taken refuge there. In the Straits and Arctic there were but a few scattering whales seen, and moving quick, so fast indeed, that most of them would be seen but one or two risings. I heard of but five or six being taken in the Straits and equally few in the Arctic. The question arises, what became of the whales seen early moving to the north-east? From information derived from H. B. M.'s ship "Enterprise," spoken on her passage down to Fort Clarence, it was found that the ice to the eastward of Point Barrow broke up earlier and more extensively than usual, and that great numbers of Polar whales were seen along the coast to the eastward of that point. The same was remarked in '51, in which year the "Enterprise" passed to the eastward of Point Barrow on the 25th of July.

The ice master of the "Enterprise" had been mate of a Greenland whaler, and was therefore a competent judge of the species of whales seen. Acting upon this information, obtained about the 12th of August, five ships started for Point Barrow, viz: the "Wm. Thompson," "G. Howland," "Rosseau," "Franklin" and "Hobomok." They succeeded in rounding the point about the 22d or 23d of August, and passed it again on their return on the first of September. They found whales as represented, but of a small size. I believe they saw those of a larger kind, on their way out. The 'W. Thompson' took seven, the "G. Howland" three, the "Franklin three, the "Rosseau" two, and the "Hobomok" two. Owing to the lateness of the season, they did not think it prudent to venture far east or stay later, lest the ice should close them in. The "Kutusoff" and "James Andrews" also started for the same place on the 17th of August, beating up against a head wind for six days, when they bore up for the south, the wind remaining steadily ahead, and mostly foggy weather. I mention this to show the clear state of the sea as they made one board off into lat. 71° 40', long. 161° 30' before reaching ice, and that in a loose state, as far as could be seen from the mast-head with a glass. On another board they stood into the same lat., long. 162° 30' without seeing a particle of ice.

The "Kutusoff" came near being lost on the Northern Sea Horse Island. Ships passing up or down should give it a good berth in foggy weather. Thus it appears, that in open seasons bowheads pass to the eastward of Point Barrow, and find good feeding grounds for a long extent of coast.

In Sir G. Richardson's Arctic Expedition down the Makenzie River, and eastward along the coast of the Arctic Sea, page 162-4, I find mention of many black whales, seen as far east as Cape Bathurst, long. 128° west, which is nearly 30° east of Point Barrow. The question is, whether it will answer for ships as ordinarily equipped, to venture far to the east, and risk passing an Arctic winter of ten months in that frigid climate This season the sea has been uncommonly clear to the north and east. The same was remarked in '51. Should next season prove the reverse of this in regard to ice in that disection, probably there would be good whaling at the south for a small number of ships. I would also mention that I was told by Capt. Hunting, of the "Jefferson," that about the 15th of August, that he, in company with another ship, in lat. 69° to 70° saw quite a large body of bowheads moving quick to W. S. W. He followed them in that direction until he reached the ice, which made farther east, in the western part of the sea, than in either of the two preceding seasons. From their disappearing in that direction, I should judge there was a clear space still farther west, particularly in the neighborhood of the first of those large rivers of Siberia which empty into the Arctic Sea. During the melting of the snow, the great body of fresh water running into the sea must necessarily tend to break up the ice, along the coast in their immediate vicinity.—

On a chart of the North Polar Sea, printed by order of the English House of Commons, in 1848, I find Cape Chalagskoy the farthest land to the north, for twenty degrees west of Cape North. Cape Chalagskoy is in 70° 12' north, about 15 miles farther south than Point Barrow, on the opposite coast. Capes North on the west and Lisburne on the east are in about the same latitude, 69° 00'. The distance from Cape North to Chalagskoy is less than from Cape Lisburne to Point Barrow, and I see no good reason why a ship may not in favorable seasons, in regard to the ice, pass Cape Chalagskoy as easily as Point Barrow. Immediately west of this Cape is a deep bay making to the south as far as lat. 68° 40', or the same in which good whaling has been found in the Arctic. To the N. W. of this bay is an island, the north part of which is in near 70° N. The coast from this island stretches nearly west, in from 69° 30' to 35' N. to the first of the great Siberian rivers, the mouth of which is thickly studded with islands, where it empties into the sea, in 69° 12 lat., long. 161:00 east.

Doubtless along this coast, that is from 160 to 70 or farther east, was open water the past season, and there, in my opinion, the whales seen going west would have been found, could a ship have penetrated the icy barrier, with the same facility as a bowhead would make the passage. The more than usual accumulation of ice in the west, with the unusually open state of the sea to the east, leads me to believe the ice must have been driven in that direction by easterly gales

early in the season. Land is known to exist to the N. N. W. of Cape North, mountains having been seen from the main land, leaving a passage to the west of probably not more than sixty miles. If this passage was blocked up with ice, the drift ice from the eastward would naturally accumulate to the north and south of Cape North, as was the case the present season. Should ships go to the north with the intention of whaling to the eastward of Point Barrow, and risk the chances of an Arctic winter in that region, (as I think they will,) and find the ice too heavy to round the point, I think they might well try the western side with an equally good prospect of finding whales, should the ice permit their passing Cape Chalagskoy.

To conclude my sketch of the Arctic season of '54, I would mention, that on my passage down in Septemper, I saw fifteen or twenty right whales near St. Matthew's Island, mostly cows and large calves, and four or five were taken in that vicinity. On the whole, the season has been a complete failure, many ships have left without taking a whale.

New Whaling Ground.—The Lady Franklin, Capt. Penny, one of the ships engaged in the Arctic whale fishery, has just returned to Scotland, after a perilous voyage to the Polar Seas for commercial purposes. Captain Penny it will be remembered, commanded one of the vessels sent out by the British government in search of Sir John Franklin, and having been previously engaged in the whale fishery, availed himself of the opportunity presented while connected with the searching expedition, to find new seas in extreme Polar regions, to which the fisheries might be extended. From what has transpired since the return of Capt. Penny, notwithstanding the efforts of the company, in whose employ he was. to prevent the disclosure of facts which might injure their speculation, it appears that the voyage has been a most successful one, a new field having been discovered, abounding in whales.

From the brief statement we have seen in the English papers, we cannot identify the locality of the place referred to, the geographical names being new, but it appears that within a few weeks twelve whales were killed when winter set in. They remained enclosed in the ice for nine months, when on its breaking up they set to work with equal success taking sixteen whales. They appear to have been absent little more than a year, and yet were on the fishing ground during two of the brief Arctic summers of six weeks each.

"The total quantity of oil (which is boiled) brought home, will be about 190 tons, with 15 tons of bone. The bone will fetch £350 a ton, and the oil, it is expected, will realize over £40 a ton."

But the most remarkable circumstance connected with this voyage is, that in the newly discovered ground Captain Penny found *two American vessels there before him, engaged in the same fishery* Thus we see that commerce where there is a prospect of gain, may accomplish what governments cannot; and we should not be surprised to hear that some of our whalemen, in probing the intricate recesses of the Polar regions, may yet find traces of the missing expedition of Sir John Franklin, and perhaps stumble upon the bold mariner himself.

The account we have seen, and from which we gathered the above facts, farther states that the health of the men had been good, and that the most friendly intercourse with the Esquimaux was established.—[Am. Paper.

THE SAILOR, AND SAILOR'S HOME

We would fain make a few remarks upon the efforts now making to establish a "*Sailor's Home*" at Honolulu. We have followed the sea for our living for over 16 years; we have served in every capacity on board ship; we have obeyed and we have commanded, and we can speak knowingly and feelingly on the subject.

We have noticed the erection of "Sailors' Homes" in many parts of the world, and we never knew one that did not, while properly conducted, have a lasting and beneficial influence upon those who resorted thither. And we are sangnine and confident that the erection of one in Honolulu will be blessed with the same results. The sailor is not that heedless, thoughtless nondescript which history and romance have been pleased to paint him. Under a rugged, thoughtless, oftentimes eccentric exterior, there is a well of kindness, a fund of reflection, and a sensitiveness of benefits received that would shame to the dust many a proud heart that is loath to acknowledge that he is "a man and a brother." And with such feelings as the characteristics of—not the exceptions but—the rule, there is no doubt in our mind that the seaman who frequents Honolulu can and will appreciate the labors of those who are endeavoring to provide a "*Home* for this "Ocean Child." wherever he goes.

In connexion with this subject, we have perceived with the greatest satisfaction and pleasure, the promptitude with which the Hawaiian Government responded to the call made upon them for a donation of land for a site of the new Institution, and thus assisted in raising up a home "for the stranger within its gates." We do not so much look at the value of the gift, though the lot is one of the most valuable in town, as the prompt, frank and cordial spirit in which it was given. We wish the enterprise a hearty God speed, and do not believe that there is a genuine tar in port that would begrudge a penny for its advancement.—[New Era and Argus.

The New Whale Fishery.—The last European advices brought a more detailed account of the resident whale fishery which was established in 1853 by Capt. Penny, an officer who has distinguished himself among the searchers for Sir John Franklin—upon the shore of Baffin's Bay. The following brief summary of the history of the expedition is copied from the Providence Journal:

"Two ships, well equipped, and manned with thirty-three men, and three boys, sailed from Aberdeen on the 13th of August, 1853, and reached the fishing ground in Baffin's Bay, on the 17th of September, where they found an abundance of whales, ten of which they killed and secured before the 1st of November. They then went into winter quarters in Hogarth's Sound erected their boiling house, and set to work to boil their oil. In this work they were assisted by fifty Esquimaux engaged for the purpose.

Their efforts were entirely successful, notwithstanding the cold was 40 degrees below zero. The active duties of the men tended to preserve their health, and none felt time to hang heavily. But, singular as it may seem, that dreadful scourge, the cholera, broke out among the Esquimaux, and swept off many, while the crew escaped with slight premonitory symptoms.

Early in the following spring (the present year,) the fishing was resumed with great success, although the edge of the ice was twenty miles from the ships, seventeen more whales were killed, and after being cut up were transported by the Esquimaux, on sledges drawn by dogs over the ice, to the ships, where the oil was boiled as before.—One ship was soon filled with boiled oil and whalebone, when Captain Penny sailed for Aberdeen, leaving the other ship to continue the fishing and boiling."—[Vineyard Gaz.

THE LADIES FAIR

On Thursday evening last, was conducted with a spirit, zest, and good will that reflects the highest credit on the noble minded conductresses, and is a lasting memorial of the munificence and generosity of the ladies and gentlemen who attended the Fair. We understand that the net income of the concern amounted to about $1200 dollars. The room was neatly and tastily ornamented, and among the decorations we noticed a coat of arms of the I. O. of O. F., painted by Mr. S. M. Bingham, which as a piece of workmanship, attracted much attention for its felicitous and superior style of execution. Of all the little things of comfort, luxury and *vertu*, that were offered for sale, it is impossible to speak;—they were as manifold and charming as the graces of their fair manufacturers. The refreshment table was another, not the least attraction of the evening; the ices, cakes, fruits and other good things which only a tropical climate can produce, or Honolulu ingenuity compound, must have convinced the most fastidious cœlebs that housewifery is not at a discount here. Of the gentlemen present we have but little to say; they were polite and attentive as ever. But of the ladies, ah!—

"Cease my heart so fondly beating."

We remember "once upon a time" when the sight of a *Lady* in Honolulu was "good for sore eyes." But that was a long time ago, before gentlemen thought of taking their better halves with them, and while the present generation of Hebes and Houris still wore pinafores. That is past, however, and now we do not believe that there is a community of our size that can vie with us, whether in church or ball room, in the number, attractiveness and lady-like manners of its fair sex. So God bless them! for their brightest jewel is their *Chartly!*—[New Era and Argus.

☞ Just at the present time, when seamen and their friends are agitating the subject of establishing a "Sailor's Home" in Honolulu, it is interesting to observe what is doing upon this subject elsewhere:—

Care for the Sailor.—The Duke of Northumberland has given land worth £1,000 at North Shields, and is about to erect and present to the Port a handsome Sailor's Home, which will cost £4,000, and will have accommodations for above 100 seamen, with a library, savings bank, &c. The ship-owners will raise £2,000 more for its endowment. So God, in His providence, takes care for the sailor.

A Donation not always valued by its Amount.

Some people have a way of making presents, and contributing donations, which renders them of little value. They give grudgingly. They give of necessity. They are not cheerful givers. The poor man who receives their charity is made to feel uneasy. His feelings are wounded. The public agent collecting funds for some charitable institution, is oftentimes severely tried. Not unfrequently he would rather contribute from his own pocket, more, twice told, than he receives from a growling and patronizing donor.

But there is a way of giving, that makes a gift doubly precious, and enhances its value a thousand fold. So too, there is a way of declining to give, which is not altogether unpleasant. Perhaps a man is unable to give, and calls have been frequent, and he does not think it best, very well. We commenced our remarks, not for the sake of complaining of those who give niggardly, and grudg ingly, but to illustrate the principle that, "a donation is not always valued by its amount." A poor widow once "threw in two mites which made a farthing," so modestly, and cheerfully did she perform the deed, that our Saviour remarked, "this poor widow hath cast more in, than all they which have cast into the treasury. For all they, did cast in of their abundance, but she of her want did cast in all that she had, even all her living."

It has recently fallen to our lot, to receive certain donations for charitable purposes, the value of which is much increased by the way in which they were given.

The master of a whale ship called upon us recently. His vessel was lying off and on. He had heard of the effort to erect a Sailor's Home in Honolulu, and without waiting to be called upon, by a "floating committee," or any one else, he says: "I have been three seasons to the Arctic—and made a losing voyage, but I'll give $20 00 to the Sailor's Home, *I'll make so much sure.*" Such a donation, under the circumstances, we regard as a noble gift. It was most honorable to the man. We know not the widow's name who gave the "two mites," neither will our readers learn from us the name of the Skipper, who gave $20 00.

Take another example, some days since when visiting the Hospital, we passed by the bed of a man who seemed to be a great sufferer. He could hardly speak, but after fumbling under his blanket, he drew out a $2 50 gold-piece, shining as bright as when it dropped from the mint in Philadelphia, "there," says he "take that for your Home. *The Sailor's Home is a great thing.* I'll give some more by and by." This too, was a well-done deed. No matter for the name of the donor; but try reader, and do the like, as modestly and cheerfully.

Take another example, Jack is a queer fellow. He does things sometimes which will make a misanthrope laugh, and Sir Humphrey Melancholy smile. A certain sailor called at our sanctum a few days since. He had a "sheet in the wind!" He was none of your ignorant fellows. His language was well chosen. There was no mistake, he had the elements of a noble character. There was the scholarly air in his demeanor. He was just such a son as a fond doting mother would love; and the more he grieved her, the more would she love him. He said he had broke his mother's heart; we believed it! He raised the veil of the past enough to show a sad looking picture. His mother once wore the Quaker garb, and New York "Friends" knew her well, but now she doubtless wears robes purer than those that once adorned her person here on earth. Our conversation with the young man chanced to turn upon the "Sailor's Home." He spoke of its importance, and especially of fitting up a good reading room for sailors. "*Do for mercy's sake*" he says "*build a Sailor's Home in Honolulu*, and here is my donation." He then gave us half a dollar. It was, let it be remembered, the first donation paid us for the Honolulu Sailor's Home. May this donation prompt a multitude of others to aid forward the enterprise.

Take another example, and it occurred, reader, not five minutes ago. While sitting at our desk scribbling these lines, we received a visit from the wife of a shipmaster. "There," says she, "is my donation for the Friend. My husband may do what he has a mind to do, but this ($5 00) is for me and *my son*; you gave him a volume some time ago. You will not mention my name." We did not promise that we would not record the deed!

Take one example more and we are done. Last week, Consul General Miller forwarded us the following note with its accompaniment:—

"The enclosed ten dollars is a subscription from Captain Collinson to the seamen's Chaplain at Honolulu—5 dollars being for the Chaplain's fund, and 5 dollars for the Friend, will you be kind enough to execute this commission for him."—Signed, "R. M." The donation came through Capt. McGuire of the "Plover." We do value and appreciate the donation. That Capt. Collinson, of the "Enterprise," during his long cruise, of three years in the Arctic, should have remembered us and the Friend, is both surprising and gratifying. If the abovementioned examples are not sufficient to illustrate the heading of these paragraphs, viz: "A donation not always valued by its amount," then, at some future time we may pile up a few more.

Honolulu Sailor's Home.

At a meeting of the Honolulu Sailor's Home Society, held at the Bethel vestry, Friday evening, December 1, business of importance was transacted.

First. It was resolved that the sum of $15,000 will be required to erect a suitable building or buildings for a Sailor's Home upon the lot given by the Hawaiian Government for that purpose.

Second. Contributors towards the funds of the Society, residing in Honolulu, will not be called upon for their subscriptions until May 1, 1855.

Third. When the sum of $5,000 is raised, the work will be commenced. It is necessary to raise that amount within one year from the time the grant was made, in order to secure a title to the land.

Fourth. "Sailor's Fair."—It was resolved to hold a *fair* for the benefit of the Sailor's Home, in the month of November, 1855

The ladies of Honolulu are most cordially invited to cooperate in promoting the enterprise.

☞ It is expected seamen will forward specimens of their handicraft, such as whalebone canes, &c.; also curiosities from the various islands of Polynesia, and other foreign shores.

☞ Strangers and foreign visitors are also invited to cooperate in this scheme for collecting funds to build the "Home."

☞ It is intended that this fair shall be of a miscellaneous character, hence any person residing on the Islnds, or living in other countries, landsmen or seamen, are invited to forward their contributions to the *fair.*—*Articles curious and ornamental, useful and fanciful, works of art and of nature, literary and mechanical*, are respectfully solicited.

☞ As nearly one year will elapse before the Fair will be held, it is to be hoped that many contributions will be forwarded from various ports in the Pacific, San Francisco, Valparaiso, Tahiti, and China.

☞ The object of the Fair being so intimately connected with the comfort and welfare of seamen, it is confidently hoped that all ship-masters, officers and sailors, on board merchant ships, whaleships, and vessels of war, will interest themselves in collecting and forwarding contributions.

THE FALL OF SEVASTOPOL.

Ten Ships of the line sunk;—Twenty-two thousand Russians taken Prisoners;—Eighteen thousand Russians killed and wounded;—Many thousand of the Allied army killed and wounded;—English and French Flags wave over Sevastopol.

The Official Reports of the great victory, achieved by the allied army over the Russians, have not been received, but the newspaper reports are abundant, so that no reasonable doubt can exist. Three battles were fought and the fortifications of Sevastopol were finally taken by storm, and at the point of the bayonet. The contest was most sanguinary. The final surrender of the Russians took place on the 25th of September. The loss in killed and wounded on both sides is frightful, but that of the Russians much the greatest.

The expedition fitted out by the English and French, for the capture of this stronghold of the Russians on the Black Sea, is the largest, in numerical force, of any since the invention of powder. The following paragraphs from the N. Y. "Courier and Enquirer," will present a striking picture of the expedition, in an historical point of view:—

Comparison is often the most striking mode of conveying an impression; and it is interesting to examine how the present expedition to Sevastopol compares with other great enterprises of the kind which have figured in history. Its superior magnitude to them all, will thus be made most palpable.

The expedition to Sevastopol, according to the last accounts, numbers six hundred vessels, and ninety thousand men. The "invincible Armada," despatched under Philip II., of Spain, for the conquest of England, and so famous in warlike annals, numbered only one hundred and thirty-seven ships of war, twenty thousand soldiers and eleven thousand sailors. The expedition of Charles V. to Tunis consisted of five hundred Genoese and Spanish vessels and thirty thousand men; that of Gustavus Adolphus to Germany of only fifteen or eighteen thousand; that of Jussuf against Candia thirty thousand men; that of Kionperti against the same stronghold fifty thousand; that of Charles XII. upon Denmark twenty thousand; that of Peter the Great upon the Caspian Sea twenty thousand men with two hundred and seventy ships; the attempted descent of Hoche against Ireland, twenty-five thousand men; that of Bonaparte upon Egypt, twenty-three thousand men, with thirteen ships, seventeen frigates, and four hundred transports; the Anglo Russian expedition against Holland, forty thousand men: that of Abercrombie upon Egypt twenty thousand men; that of Lord Cathcart upon Copenhagen twenty-five thousand men; that of Wellington upon Portugal fifteen thousand, and upon Spain thirty thousand; that of the English upon Antwerp seventy thousand men, forty thousand of which were land troops, and thirty thousand sailors; that of the English upon Washington about eight thousand, and upon New Orleans fifteen thousand; that of the French upon Algiers, thirty thousand.

Loss of the Steamship "Arctic."

This vessel belonging to the Collins' Line of Ocean Steamers, left Liverpool Sept. 20th, with 226 passengers and 175 belonging to the vessel. On the 27th, at 12 M., while running at 13 knots, she came in contact with a French steamer, or a bark-rigged iron propeller. The fearful results of the collision are most heart-rending. Out of over 400 souls on board, only about 32 are known to have been saved. Among the lost, were the wife and two children, a son and daughter, of Mr. Collins. All the American papers abound with detailed accounts of the most frightful catastrophe. At the time of the collision the weather was densely foggy, and no blame whatever is attached to the commander of either vessel. The sad intelligence seemed to spread a gloom over the whole community.

Loss of the "Silas Richards."

The following particulars respecting the loss of this ship were communicated to us by John McLeod, one of the crew:

On the 12th of July the vessel was cruising near the Shantar Islands, five boats off whaling, the weather foggy and the wind blowing fresh. At 2 P. M. the ice came down very rapid, and it was expected that the ship's bows would be stove. All hands were called, the cable was slipped, with a buoy and 30 fathoms of chain, then made sail, but could not make any head way. About 5 o'clock came into 6 fathoms of water, and let go our best anchor. The wind calmed down considerable, and the fog clearing up could see that we were in a bay, where lay the "John Coggershall" and "Lark." At 6 A. M. cable parted near the hawser-hole;—sail was made, but it was of no avail; the bark "Silas Richards" went ashore. The masters of the two others came to render assistance. When the tide ebbed the vessel parted midships, and when the tide rose a fruitless attempt was made to pump ship.—Capt. Wilcox then called "all hands" and asked if any one thought the ship could be saved? The reply was "No." Orders were given to cut away the masts, and the vessel fell over upon the starboard side. The ship's company fitted up some huts on shore, and landed provisions. Subsequently landed all the oil—about 900 barrels of oil. The "Hibernia," Jeffrey, took the oil and the men left in different ships.

The ladies of the Strangers' Friend Society are happy to acknowledge the following donations:

Capt. Bailey,	$5,00
Lieut. Maury,	5,00
Capt. Husing,	6,00

Information Wanted,

Respecting Lyman Bradley, belonging to Dundee, Yates Co., N. Y. He is supposed to be on board some whaleship in the Pacific. Information will relieve an anxious mother's mind, if forwarded to the Seamen's Chaplain, Honolulu, or to James Dougherty, Chappell's Block, Rochester, Monroe Co., N. Y.

☞It is a matter of heartfelt rejoicing to the inter-island travelling community that the Hawaiian S. N. Company have placed upon the routes, Steamers so well adapted to the trade and travel. Those who have experienced the trials of Schooner voyaging and have now made trips upon the "Kamehameha," (formerly Sea-Bird,) and the "Kalama" (West Point,) speak in rapturous terms of the change. We are glad to learn that the company is encouraged by their increasing freights and other sources of income. May their most sanguine wishes be realized.

☞If any apology is necessary for our not visiting all the vessels which have arrived in port, during the past month, we would simply remark, that we have been unable to do so and meet the numerous and unavoidable engagements on shore. Seamen and others are frequently calling at the Chaplain's study, funerals must be attended, &c.

Erratum.—Page 86 of Nov. 22, for 'south of Goboratch,' read 'north of Cape Gobovatch.'

The Great Polar Ocean.

At a late meeting of the London Geographical Society, Lieut. Osborne, a member of one of the British Arctic Expeditions, argued at some length in favor of the great Polar Ocean. He said that in Wellington Channel he had observed immense numbers of whales running out from under the ice—a proof that they had been to water and come to water, for every one knew that they must have room to blow. He further said that there were almost constant flights of ducks and geese from the northward, another proof of open water in that direction, since these birds found their food only in such water.—He added that it was his deliberate opinion, from observations made on the spot, that whales passed up Wellington Channel into a northern sea. In reference to the abundance of animal life, in the latitude of this supposed Polar sea, he remarked, that while on the southern side of Lancaster Sound, he never saw enough game to keep his dog; yet Melville Island, 150 miles to the northward, abounded in deer and musk oxen. It was clear, he continued, that animal life did not depend on latitude, but increased, if anything, after passing the 70th degree. Moreover, while in Baffin's Bay the tide made for the southward; coming from the Atlantic in Barrow's Straits, it made for the northward, which could only be explained on the hypothesis of a sea in that direction. All this seems to us proof on proof of a great Polar ocean.—[U. S. Mag.

Recent Massacre near Fort Laramie.—The War Department have received official information from the commander at Fort Laramie, of the death of Brevet Second Lieutenant Grattan, of the sixth infantry, and 20 of the men of that post who went out to Sioux under his command.—This unfortunate affair occurred on the 18th ultimo.

Hawaiian Thanksgiving.

In compliance with the following proclamation of His Majesty, Kamehameha III, the 30th of Nov. was observed as a day of Public Thanksgiving.

WE, KAMEHAMEHA, King of the Hawaiian Islands, hereby issue our Proclamation, agreeably to former custom, that

Whereas, Numerous and great blessings have been continually bestowed upon us as a people, by a kind Providence, during past years; a good measure of success has attended every department of our government since its formal organization; our people have passed from the condition of serfs to that of freemen, enjoying the right of trial by jury, and of representation in our Legislative Council, while a large portion of them have become owners of the soil; our revenue has increased more than six hundred per cent. within ten years; and commerce and agriculture have steadily advanced; order, system and efficiency have been introduced into our Judiciary, especially in its higher branches; our foreign relations, although in past times seriously disturbed, have become settled, regular and peaceful; our public schools embrace over 13,000 children, while a larger proportion of the people can read and write their own language than is found in many much older States, though one and another fearful pestilence has swept over our Islands, carrying to the grave multitudes of our beloved subjects, yet, through the blessing of an ever merciful God on the means used, the plague has been stayed, and our borders are free from the destroyer.

During the present year, moreover, while dangers have threatened us both from within and from without, we are to the present hour permitted to dwell in peace, while other nations, some of the greatest and most powerful of the earth, are involved in war: God has not failed to raise up for us friends for our protection in the hour of need; our people have been blessed with health in a remarkable degree; crops have been good; commerce has prospered; education and religion have every where been free and have shed their benign influence on the public mind. All these, and the numberless other blessings we have received, in the present and in past years, demand from us as a people, a formal, general, and heartfelt tribute of thanksgiving to Him from whom all blessings flow.

Therefore, we do, with the advice and consent of our Privy Council of State, appoint Thursday, the 30th day of November next, as a day of general thanksgiving to God throughout our Islands, and we earnestly invite all our people to a sincere and prayerful observance of the same.

Done and passed in Privy Council, this 15th day of Oct., 1854.

KAMEHAMEHA.

Religious services were held at the Court House, and the Bethel congregation united with the congregation of the 2d Foreign Church of Honolulu. The Rev. Lorin Andrews conducted the exercises. He selected for his text the highly appropriate passage: Psalms. 92, 1, "It is a good thing to give thanks unto the Lord, and to sing praises unto thy name, O, most High."

For want of room we are unable to publish the sermon entire, although all who listened to it would doubtless rejoice to see it in print. After the introduction, the Reverend speaker proceeded to remark —

"Let us then, brethren, turn our attention to the obligations we owe to God,
As individuals,
As a church and congregation,
As a community, and
As a nation."

Omitting, necessarily, his remarks upon the 1st and 2d heads, we copy those under the 3d and 4th, believing that our readers will be interested in their perusal :—

"Let us render thanksgiving to God for our blessings as a community. By community I mean the city of Honolulu and vicinity. These blessings, the past year, have been many and great. Our minds will at once refer to our general state of health as one blessing. The small pox, which for many months of the past year existed as the scourge of God, left us about a year ago, and since then we have been blessed with general health. The pestilence has not walked in darkness among us, nor destruction wasted at noonday. The mortality has not been greater than would ordinarily be expected in a community like this.

Next to health, we may mention peace among neighbors. We may mention this as a mark of God's favor, because the history of Honolulu will show that it has not always been thus. The most of us can remember that in years past there were contentions, disagreements and hostile feelings between families. Perhaps it was not wonderful that it was so when we consider the heterogeneous state of the foreign population. But for some cause, God has lately hushed to silence the angry and selfish passions of men, and peace and quietness seem to prevail in the community. We ought to thank God for such a state of things, because, as the author of peace, we owe it to him. He can calm the angry passions of men as well as the raging of the sea, and when he does it he is entitled to our gratitude.

We should, moreover, be thankful for a vigilant and energetic police. Honolulu suffered somewhat in former years for want of this. When the watchful guards have by night patrolled our streets, God has kept incendiaries and pickpockets and other disturbers in a great measure quiet, so that no great annoyance has lately arisen from that quarter. The local regulations of the community are generally obeyed, and we lie down at night and sleep quietly, because God blesses these institutions for the good of the citizens

Next to these, we may mention the religious and literary institutions of Honolulu.—Some men consider churches as nests of hypocrisy. But God says his people are the salt of the earth and the light of the world. Let God be true and every man a liar.—Therefore we believe that in the planting of churches in this community, and their accompanying institutions, we ought to be grateful to God, not only that they have been planted, but that they have been nursed by pastors and blessed of God himself. I have already spoken separately of the second church, but besides that, the doors of several sanctuaries are thrown open every sabbath and sinners from the sea and the land are invited to enter and listen to the voice of mercy and salvation. The colporteur is among us visiting houses and ships and individuals, offering the bible and the tract and exhorting to repentance of sin and faith in Christ.

As for schools in Honolulu I hardly need speak. No children need grow up in ignorance, for schools abound among us, and soon, if true to ourselves, we may become a literary as well as a religious and civilized people. The college at Punahou is in active operation, but needs to be endowed and enlarged in order to secure the hopes we have of its future efficiency. To God first, then to the efforts of men are we indebted for all these blessings.

In Honolulu too, the christian has a sabbath. Men may recognize the great historic fact from the creation down, that God rested on the seventh day and hallowed it, and afterwards made it a law, which law has never been abrogated. Some trample upon it, but there are those who keep it and love its rest and its worship as a foretaste of heaven and of an eternal home.

The community of Honolulu ought to be thankful that seamen are cared for. Undoubtedly much of the quietness of the place is owing to this. Let us be grateful for what God has done in this respect, and especially that his finger points so directly to further and more full efforts in their behalf.

I might speak of the sabbath schools—of the public library—of the fire companies—of the several charitable societies—the hospital—the newspapers—the musical and other social societies that exist amongst us, but time flies. The truth is, we have more blessings of this kind than we ordinarily think of, and for them all we are called upon this day to thank God. The most of these blessings, if not all, have been secured by long persevereing labor and at much expense.

It is true we have many institutions of another class, for some of which, as a community, we ought to be ashamed. We have shops for the manufacture of drunkards and of the drunkards' drink—we have houses of licentionsness—we have saloons and dens for gambling—we have a great nightly school for immorality full of pupils and amateurs—we have bacchanalian revels vile enough to make midnight blush and hell ashamed—we have habitual violators of the sabbath, and blasphemers of the God of the sabbath. For these we need not be thankful. God requires it not at our hands. They are not the gift of his Providence, though some of them are according to law. But we should sigh and mourn over their existence, not only because they are a present source of annoyance to the virtuous portion of the community, but chiefly because their abetters are preparing themselves and our fellow men for an awful eternity. Still, then, we should thank God for what *He* does and helps his people do for the cammunity, though there be powerful and active opposition to it.

IV. We ought to be thankful to day for what God has done for us as a nation. Since the subjugation of the Islands by Kamehameha, and especially since permission was given to the pioneers of the gospel to dwell on these shores, with slight exceptions, the government has been sustained; changes have been wrought mostly for good. Since that time other nations far wiser and far more powerful have been overthrown. When the great chieftian was no more, when a contest had in a measure been settled respecting the tabu and the gods —when the ancient religion was overthrown—when, from the character of the elder son of Kamehameha, disturbances and anarchy might have heen expected, the gospel offering a new religion arrived. Its claims of course were not immediately understood, but God inclined the hearts of the king and council to consent to the publishing of the gospel. Peace followed in the councils of the nation. For though naturally warlike and bloodthirsty, yet through the influence of the gospel of peace and its concomitants, intelligence and order, the nation has stood to this day. The Hawaiian is a small nation compared with most of the nations of the earth, but God has preserved it in all its vicissitudes, sometimes against the threats of armed foes, and sometimes against internal disaffection, and disappointed the hopes and expectations of those who would long ago have overthrown her supremacy. She stands now, not in her own physical strength, but in her moral integrity, and by the pleasure and protection of the God of nations. As a people, we have treaties of amity, friendship and commerce with several of the most powerful and intelligent nations of the earth, who acknowledge our independence and the king's sovereignty.

Again, christian institutions also, not perfect, indeed, but efficient, exist in all parts of the kingdom. The gospel has been so preached that all the people have heard its invitations. A good number of churches support their own pastors; the nation supports not only the common schools, but several of higher order, and the churches are supporting a mission to another and destitute people. The christian sabbath is generally observed by the Hawaiians, and is the only national tabu day. The people read the bible and sing the praises of God in the language in which they were born, and worship in temples built by their own hands and dedicated to Jehovah.

While there are wars and rumors of wars among other nations of the earth, the Hawaiian nation has peace and tranquility at home and peace with nations abroad. Tho' there is room for great improvement, yet the nation as a mass are improving in industrious habits, in general intelligence and civilized manners. There is an increase of the commercial spirit among Hawaiians. The nation is free from debt.

With the bible, God has blessed the people with liberty of conscience. Natives and foreigners may each and all worship God in any form they choose, and believe any creed they prefer, so they do not violate the laws of the land. Foreigners of any nation may dwell here and follow their own occupations, not incompatible with the good of society. These blessings, moreover, are secured by a written constitution, which constitution is protected by a legislature, a part of which is chosen by the people themselves, so that the oppression of chiefs, as in ancient times, can never return. The taxes are light compared with those of other monarchies, and though the annual revenue be small, it has sufficed hitherto for the expenses of government.—The nation has also said by its legislature, that every man who wished for a homestead for his own use and the maintenance of his family, should have one at a nominal value, thus carrying out in reality the theory some half century ago published in France, and to some extent acted upon in the United States. Thus the poor are cared for not by poor laws, but by giving them the means of subsistence and encouraging industry.

It is true the nation suffers from intemperance, licentiousness and indolence, but, as before, we are not required to thank God for these. He abominates them himself. It belongs to us as good subjects to abate such nuisances as are in the way of our national prosperity. And He is ready to bless us when we are ready to have them removed.

If such be the present condition of the nation, have we not abundant reason for thanksgiving to God? For no arm but his could have delivered us when men rose up against us, and no wisdom but his could have guided us in our perplexities, and no power but his could have changed a nation from darkness and degradation to comparative light and liberty, and that too without blood or strife, or convulsion. And He is still the God of this nation. In the early days of our present sovereign, the kingdom was formally and publicly, and repeatedly devoted to Jehovah. He has taken care of it to the present day. We have no evidence that he has forsaken the nation.

It is true again, in physical force the nation is weak. But has it not been strong in moral power when it trusted in God?—Strengthened by the God of nations, has it not in years past prevailed over difficulties and braved appalling dangers? When the nation as one man has bowed down before Jehovah in supplication, has he ever refused to hear? If He has, why does the nation exist now? Certainly the disposition to overthrow us has not been wanting, and the power to do it has existed all around us, and yet the nation stands. What more do we need either as natives or foreigners to make us a happy nation, for "happy is that people whose God is the Lord."

There is a political question I might introduce here which relates to the future, but I waive the discussion of it as I have been speaking of the past. We may resolve the case of the nation, as the apostle does that of the christian, "If God be for us, who can be against us." We find reason, then, to thank and praise God to-day for his blessings to us as individuals, as a church, as a community, and as a nation. And now let us all remember that to Him and to Him alone, we are indebted for all these blessings. Truly we can say with the Psalmist, "God has not dealt so with any nation." And if the fore-mentioned blessings are not enough, He stands ready to give us more, on our giving our hearts more fully to Him.

I close with two or three remarks.

1. Where God has done so much he has a right to expect gratitude in return. It is a principle of the New Testament, "Where much has been given much will be required." As God has freely given, thanksgiving should spontaneously and freely flow from our hearts and appear in our conduct. And in no way can we show our gratitude better than in yielding a full and implicit confidence in his protection and obedience to his commands. That God has a right to expect some kind of thanks for our many blessings as individuals, as a church, as a community, and as a nation, we may reason, not only from our own feelings in cases somewhat analagous, but the whole tenor of scripture demands it.

2. To withhold gratitude on such an occasion as this, and on the reception of so many blessings, is to dry up the fountain whence they flow. It is true God "sends rain upon the just and upon the unjust," but it is spoken in reference to the heathen who know him not. When his people acknowledge him not, he reproves them and sends blasting and mildew upon their gains.

3. Let not our thanksgiving be a mere form, but let it come up from the deep recesses of the heart. In vain our assembly to day, in vain our formal prayers, in vain is thanksgiving on our lips when our hearts remain unaffected, our love cold, our feelings indifferent. God requires the affections of his people. We shall all need his kindness still. We shall need his sympathy, his care and his blessing in our future lives. Let us, then, show ourselves deeply grateful for past blessings.

"FASHIONABLE LIFE IN CALIFORNIA."—The vilest men that the Creator allows to live among us, are those who break up families. No punishment allowed by our laws is severe enough for them. How shocking to reflect that such fiends in human shape are in every part of the State.—No wonder men tremble to bring their families to this land.—[C. C. Advocate.

☞ A sailor on the New Bedford whaleship Logan, lost a sheath knife overboard on the morning of the 23d of August, and on the afternoon of the same day two dolphins were caught from the ship, and upon opening one of them, the same knife, known by the name upon it, was taken out.

SANDS' SARSAPARILLA

IN QUART BOTTLES,

For Purifying the blood, and the Cure of Scrofula, Rheumatism, Stubborn Ulcers, Dyspepsia, Salt Rheum, Fever Sores, Erysipelas, Pimples, Biles, Mercurial Diseases, Cutaneous Eruptions, Liver Complaint, Consumption, Female Complaints, Bronchitis, Loss of Appetite, General Debility, &c,

FOR SALE

In lots to suit purchasers, by the undersigned, at his Drug Store, in Kaahumanu street, Honolulu.

G. P JUDD,
Sole Agent for the Manufacturers.

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

THE SEAMEN'S HOME AT NEW ORLEANS BURNT.—The extensive building known as the Seamen's Home situated on Suzette street between Tchoupitoulas and Levee, took fire about 2½ o'clock on the 17th instant, and was completely destroyed. The fire originated in a two-story frame tenement adjoining the Home, which was occupied by some eight or nine families, and communicating to the Home by way of the third story windows, despite the efforts of the fire brigade to stop the further progress of the devouring flames, the splendid edifice in less than half an hour was in ruins. The loss is estimated at about $40,000, and we understand is fully covered by insurance. Jack is houseless now in the wide world, but of course his house will be speedily rebuilt; in the meantime the enterprising and kind hearted gentlemen who have hitherto taken so deep an interest in his fortunes while ashore, will doubtless provide for him a temporary shelter.—[N. O. Crescent.

MARRIED

Dec. 1, by Rev. S. C. Damon, Mr APONIJAH PARSONS and Miss MARY ANN BEAHEN, of San Francisco.

Married in Honolulu, Dec. 1, by Rev. S. C. Damon, Mr. J. M. WEST, to KAMOUOHU.

DIED

On Tuesday last, Dec. 5, at 12, noon, precisely, Capt. SYLVESTER BROWN, of ship "Washington," of Sag Harbor, a resident of Bridge Hampton, Long Island, New York State.

Died, middle of August, 1854, on barque Washington of Sag Harbor, GEORGE JOSE, a Batavian, and buried on Great Shantar Island.

On board bark Antelope, Oct. 28th, PELEG NOUNEE, a native of Hawaii, after a long and lingering illness, during which he received care and attention from two other Hawaiians on board.

Dec. 1, MICHAEL R., infant son of M. R. Harvey, of this city, aged 20 months.

On the 24th Nov., in Manoa Valley, GEO. AUGUSTUS, the Barber, aged about 40 years. He was born on the Island of St. Thomas, but was a naturalized Hawaiian. He was a member of 2d Foreign Church.

Passengers

By Sch. VAQUERO, from S. F.—CABIN.—Rev. Albert Williams, lady and three children, Dr. Chas. F. Guillou, Wm. Baker, Jr., Capt John Sharkey and lady, Mrs. Reed and two children, Mrs. Ball and daughter, Miss Behan, A. G. Jones, J. Tuttle Smith, Capt. Jacob Taber, H. Y. Darwell, Wm. A Grove, L. Memoranda.

American Clipper Schooner "Vaquero," F. A. Newell, master, sailed from San Francisco Friday, Nov. 10, 1854. Discharged Pilot at 5 P. M, and commenced the voyage with light airs from Westward. For fifteen days experienced a succession of light winds, calms, head winds, with heavy head seas from S. S. E. to S. W., un il we struck the trades in Lat. 26° 09' N., Long. 241° 33' West, which continued very light from E. S. E. for the remainder of the passage.

Schooner Frolic, from St. Bartholomew's Bay, left ba k Magdalene. Chester, to load Guano. Ceres Island, bearing N. E., spoke sloop Flying Cloud, Tifts, on a cruise, 5 seal skins.

[Received from Captain Maguire by General Miller, Dec. 1.]

On the 28th of August, and again on the 31st, four whale ships were seen from H. B. M's Discovery Ship, Plover, to the eastward of Point Barrow, at 71° 21' North, and Long. 156° West. One of them was boarded and proved to be the Franklin, Capt. Richmond, who said these ships had been induced to venture so far by the accounts of numerous whales seen in that part of the Artic Sea and farther east by Capt. Collinson, of the British Discovery Ship Enterprise. They had some success, but the whales were small. Capt. Richmond said a whale ship named the Monongahela was supposed to have been lost last season on the Fox Islands near the 172 passage, (Long. 172 W.,) some casks having been picked up this year near those Islands and believed to have belonged to that ship. The whole crew are supposed to have perished. The sea north of the American Continent was more open this year than it was ever known to be before.

The Friend.

HONOLULU, JAN. 1.

NEW YEAR AND NEW VOLUME.

With the new year we commence Volume XII, of the Friend. As during past years it will be our endeavor to furnish an entertaining, instructive and useful monthly sheet, for our readers, upon the land and sea. Not only do we wish our readears a *happy New Year*, but our best endeavors will be put forth to make our readers happy, both here and hereafter. Would you be truly happy, take the Bible for your guide, obey its commandments, and follow its precepts. Keep constantly before your minds, that your abode on earth is short, that the voyage of life will soon end, and that happiness everlasting is found in Heaven. With the new year abandon bad habits and vicious practices, make good resolutions for the future, relying upon Divine aid to enable you to carry them into execution. Not only make yourself happy, but others also; remember the poor, assist the unfortunate, "weep with those who weep," as well as "rejoice with those who rejoice," live temperately, walk humbly, and you will not fail to be happy. Methinks we hear you reply, "to preach is easy, to practice difficult;" granted, we are aware that rowing with the current is a very differient matter from rowing against it, still, he who would win the prize must run the race, he who would enjoy the victory must fight the battle, and he who would wear the crown must bear the cross. Remember the saying of William Penn, "no cross, no crown."

Sailors' Homes.

The above engraving presents a view of the Sailor's Home in New York, under the direction and patronage of the American Seamen's Friend Society. This institution has been in successful operation since 1842, or during a period of twelve years. During this period, it has afforded accommodation to more than *forty thousand* boarders, or to from three to four thousand annually. The results have been such as to encourage the friends of seamen, in sustaining the institution, although it has been far from a self-supporting concern. It has afforded board *gratis*, to many shipwrecked and distressed seamen.—Many have been the difficulties it has had to contend with, but still the general influence has been most excellent. It has elevated the character of Sailor-boarding houses in other parts of the city. It has afforded good lodging and board to multitudes of seamen desirous of enjoying a quiet and respectable home, while they were on shore. Many intemperate seamen have there become reformed and steady men, while others it is to be hoped, have become savingly benefitted, and will forever rejoice that they were brought under the social, moral and religious influences of the establishment.

It is well known that similar institutions have been established in nearly every seaport of the United States and Great Britain. At first these houses were mere experiments; but they have now been thoroughly and successfully tried. In London and Liverpool, they are exceedingly popular among seamen.

Those in Boston have succeeded admirably. So far are they from diminishing in number, that they are upon the increase, becoming more conveniently fitted up, and being more generally patronized by seamen. One of the most happy effects, is to elevate the character of other sailor-boarding houses; because if they had been what they should be, "Homes," would never have been needed or established.

As our readers are fully aware, the experiment of a Sailor's Home is about to be tried in Honolulu. We are not aware, as the like, has ever been fairly undertaken, before, in any part of the Pacific Ocean. Contributions for this object, at these Islands, have never before been solicited. The friends of the cause, in Honolulu, and among seamen, resorting hither, have become pledged to one another and the public that they will now put forth one honest and persevering effort to erect a Sailor's Home, in the heart of this city. This enterprize has not been blindly undertaken. The many difficulties in the way of its successful accomplishment, have not been overlooked. There are obstacles to be encountered, here, which the friends of such enterprises in England and the United States know nothing about; but we have our encouragements, which are by no means to be lost sight of. The young men in Honolulu who have put their hands to this business, are a sure pledge that it will not be abandoned until dire necessity utter her decree. Some have said, "you'll never succeed," others predicted that if the building was erected sailors would not patronize it, while many have turned away from the enterprize with cold indifference. Such things were to be expected, but on the other hand, words of encouragement and generous contributions have been called forth from most unexpected quarters. The project does meet with favor. The appeal which has been sent forth, has touched the chord of benevolent feeling in many hearts. It is our confident belief that no benevolent enterprize has, upon the whole, ever met with more general favor among landsmen and seamen. Now there is a common centre around which their sympathies may gather. The Home, when established, will open a spacious assembly room, where the sailor and landsman may meet, exchange their kindly greetings and become better acquainted with each other. The Home will serve as a monument to perpetuate, to future generations of sailors, the substantial sympathy, which is now felt in behalf of the "sons of the ocean." Who does not desire to aid in erecting this monument? Who can afford to forego the opportunity of doing something to advance this enterprize? Now is the time that a person may drive "a nail in a sure place," upon which will hang a hope for good to those who come after us. Ah, we hear a cold selfishness, or niggard covetousness whisper, "Can't afford it," "I give now more than I can afford," "Sailors have got a good home on ship board," "There is no use doing any thing for sailors, they are so ungrateful," "It is more than I can do to take care of myself and make myself a home." Very well, it is not our purpose to stop and argue down such old and stale excuses for inaction—a more, much more delightful prospect opens before the friends of the enterprize, which is to go directly forward, raise funds, hire the mechanics, buy the lumber, and put up the building. Even now, methinks, from its beautiful cupalo, or projecting balcony, we can discern, "Honolulu Sailor's Home" inscribed upon the ample folds of its waving flag. Let the enterprize be now pressed forward; let the year 1855 not close, ere the work is well nigh accomplished;—let the future historian of the Sandwich Islands record the fact, that the Sailor's Home was undertaken near the close of the last year of the reign of Kamehameha III, and completed in the first year of the reign of Kamehameha IV.

NEW PUBLICATION.

English and Hawaiian Words and Phrases, for the use of learners in both languages. By A. Bishop. Published by Henry M. Whitney, Honolulu, 1854.

"Better late than never," is the old saying. The truth is, such a publication should have been put forth twenty years ago. Had it been done, it would have saved much useless scolding, and fretting, by both foreigners and natives. O how much "*murdering of the King's Hawaiian*" there has been among foreigners, because they had no colloquial phrase book of the native language. This publication must prove of immense benefit to the natives as well as foreigners. The Rev. Mr. Bishop appears to have executed the work in a most satisfactory manner. He has the thanks of all, who desire to learn either language, upon the islands. Another book is now needed more than ever, and we hope it will soon make its appearance from the press. We refer to a Dictionary of the Hawaiian language, with English definitions.—The demand is urgent, and should be supplied. We hope Judge Andrews will find time to prepare his work for the press. May great things be undertaken and accomplished during the year of the reign of Kamehameha IVth.

A Gratifying Spectacle.—On Monday afternoon, December 25th, the Steamer "Kalama" starting for Kauai, took a whale ship in tow when leaving the harbor; while the Steamer "Kamehameha," starting for Maui, took the "Restless" out, bound on her trip to San Francisco. This is a new order of things for the Sandwich Islands. It is highly gratifying that the H. S. N. Company find sufficient encouragement to run their Steamers. Even to those who do not sail in them, it is a blessing to have these vessels running among the islands. We are not anxious to see business men, clippers and steamers, go-ahead to their destruction, as they do elsewhere, but, really, a little more life and energy imparted to business and people at the Sandwich Islands, will not produce any alarming effects. Our two Steamers are doing something really beneficial in this line, and we hope they will infuse a little more "steam" into the people.

The Rains.—Usually our fall rains commence in November, but this year they have kept off until nearly New Year's. It has afforded a remarkably fine season for whale ships to do their work, dry their bone, cooper their oil, and tranship their cargoes. Every thing has moved on like clock work, without the least interruption. The rains have commenced; for a few nights the showers have come so plentifully and refreshingly, that, even old Somnus could not sleep. The trees are all washed, the dust is laid, nature has put on robes so fresh and green, gay and lively, that we pity the poor growler who does enjoy life at the Sandwich Islands. With our doors and windows open, and surrounded by an atmosphere, so balmy and mild, that it seems tempered for an invalid's lungs, we cannot refrain from expressing a sigh over our fellow men, who suffer from Arctic cold, or are scorched by tropic sun; really, what a delightful spot is the Sandwich Islands, notwithstanding strangers suffer from 'the fever,' and some of the other ills of life which afflict the inhabitants.

Whaling off Maui.

A Lahaina correspondent writes as follows:

"Two men, mates of whaleships, have bought boats and whaling tackle, and are going to engage in humpback whaling at Kalepolapo Bay. I have often seen humpbacks in the channels around us, and am sure they would have many chances for a fish. I am glad to see any new business undertaken." S. E. B.

Naval Glory.—The officers of the United States Navy do better when left to themselves, than when told to obey instructions. The captain that follows his own inspirations becomes a world-renowned Ingraham; the captain that follows the orders of his superior becomes an inglorious and unfortunate Hollins.

[For the Friend.]

LAY SERMON.

"The heart knoweth its own bitterness, and the stranger intermeddleth not with its joy."

There is rarely a heart which, when vexed with private grief, does not long and yearn for some kindred soul to which it may pour out its woe—does not feel after some one in whom a similar experience has induced a similar feeling;—and when the attempt to find such fails, and the heart recoils upon itself, the bitterest of the grief finds utterance in the bitter resolve—"I will devour my grief *alone*."

So too, in our hours of hope and happiness, it is with the readiness of instinct that we seek in those we love for a kindred hope and a kindred joy;—and here, too, the feeling that they can but imperfectly share with us the brimming cup, is ever the fennel leaf—the bitter drop—that, as we quaff embitters all.

It would seem to be by an impulse of nature that heart seems to commune with heart alike in its joy and its sorrow—while yet the limitations, imposed by the same nature, render such communion impossible.

In this very isolation of consciousness, which all men are compelled to feel, and which by most, especially by those of large hearts and expansive sympathies —by the loving souls—is felt to be one of the most painful restraints imposed upon us by our nature as finite beings—is there not yet, an impressive instance of the preventive goodness of God, and a forcible argument of the probationary character of our present estate?

It is in our highest moods—when feeling most flows deep, and pure, and tranquil; and, under its vitalizing influence, thoughts grand and holy, joyous and beautiful, spring forth without number—even as stately trees and delicate flowers along the banks of the deep-flowing river—it is in such states that free communion with other souls is ever most demanded as a necessity of our nature, and that the impossibility of attaining it is felt most keenly as a cramping and crushing of our best energies.

This want, then, making itself felt in our highest and holiest, our most rational moods, must be a rational one; and, like all other rational wants of our nature, must have had, in the Providence of God, provision made for its final satisfaction.

Yet who of us is not, at times, made to feel it to be a mercy and a blessing that the time of such mutual consciousness has not yet arrived;—that to his fellow men, even to those loved ones with whom he most craves communion, the recesses of his heart are still impenetrable? What earthly love, what human kindness of construction—could withstand the full revelation—the "darkness made visible"—of what we often are within?

Is it not matter for heart-felt thanksgiving that none can read the record on our hearts —that none can behold the foul brood of sinful desires and evil thoughts with which we struggle, and from which we groan to be delivered,—save He who alone can aid us in that struggle, and so purify us by his love that we shall be able to bear the light of a common consciousness, and be thoroughly known by those we love, without being overwhelmed with shame and confusion of face?

Thanks, O Father! that Thou alone art the Searcher of Hearts,—that Thou, who alone canst love the vile, alone art conscious of all our vileness. Thanks! that Thou strivest to teach us to seek in Thee for rest and healing in our hours of pain, and grief and guilt, by compelling us in our hours of highest joy and gladness, to find in Thee alone One with whom we can fully commune in Spirit and in Truth.

NAVAL.

After the official inspection of the U. S. ships Saratoga and Cyane, on Monday, the latter was put out of commission, in consequence of requiring extensive repairs. The Saratoga will also be repaired to considerable extent. Shortly after the inspection by Commodore Gregory, the crews of both vessels received their discharge; and as a large number of "land sharks" were hovering around the vessels, with a view of securing the sailor's hard earnings, Rev. Phineas Stowe, accompanied by Mr. Morrill of Amesbury, and other benevolent gentlemen, engaged the National Brass Band, and proceeded to the Navy Yard for the purpose of inducing the sailors to take up quarters at temperance boarding houses. They were well received on board ship by all classes. A flag and various Japanese curiosities were presented to Mr. Stowe, and nearly 150 out of 200 on board the Saratoga, accompanied the apostle of temperance and humanity, the band leading the way. The procession marched through some of the principal streets of this city, to the Bethel on the corner of Lewis and Commercial streets, which had been beautifully decorated for the occasion. After listening to addresses and music they were almost all safely housed in temperance quarters. Later in the evening, a temperance meeting was held in the Bethel, where addresses were made by the Mayor, Mr. Williams of New York, Messrs. Norrill and Stowe, and one of the crew of the Saratoga. Many took the pledge, and the occasion was a deeply interesting one. To-morrow there is to be a picnic at Framingham, the company marching from the Bethel. Seldom has any benevolent enterprise been crowned with greater success than has thus far attended this.—Boston Atlas, Sept. 6.

☞ In a recent trial before the U. S. District Court, Philadelphia, Judge Kane said: "Rum has sunk more seamen than all the tempests that blew."

KAMEHAMEHA III IS DEAD!

It is with unfeigned sorrow that we announce the death of the King of the Hawaiian Islands. He expired at his palace in Honolulu, December 15th, at fifteen minutes before 12 M. The melancholy event was immediately made known to the public, by the royal and national standards being lowered to half-mast, and firing of minute guns, corresponding to his age.

The most respectful allusions to the event, were made in the several Churches of Honolulu on the following Sabbath. Great preparations are making for the most imposing celebration of the funeral obsequies. The remains of His Majesty are now lying in state at the Palace.

Proclamation of Kamehameha IV.

At half-past 12 o'clock, His Excellency the Governor of Oahu, escorted by a company of Guards, caused the official Proclamation given below to be read, in Hawaiian and English, at the corners of the principal streets of Honolulu. The Proclamation of His Majesty, KAMEHAMEHA IV, was received with shouts from the people and evident satisfaction, wherever it was made known.

PROCLAMATION.

Whereas, it has pleased Almighty God to remove from this world our beloved Sovereign, His late Majesty, Kamehameha III; and whereas, by the Will of His late Majesty, and by the appointment and Proclamation of His Majesty and of the House of Nobles, His Royal Highness, Prince LIHOLIHO, was declared to be His Majesty's Successor. Therefore, Public Proclamation is hereby made, that Prince Alexander Liholiho is KING of the Hawaiian Islands, under the style of KAMEHAMEHA IV. God preserve the king.

KEONI ANA,
KUHINA NUI.

The Court has gone into mourning for three months, for the death of His late Majesty, King Kamehameha III.

The funeral of His late Majesty will take place on Saturday, the 6th of January.

At the Privy Council of the 16th ult. the Ministers of the late King offered their condolence, and placed their respective *Port-folios* at the disposal of His present Majesty, King Kamehameha IV. The members of His Privy Council followed this example. All assured His Majesty of their loyal attachment and faithful allegiance. It pleased the King to address His Council in the following words:—

"Chiefs—I have become by the Will of God, your Father, as I have been your child. You must help me, for I stand in need of help.

"To you Ministers, and other high officers of State of Our late King, I return my sincere thanks for the expressions of condolence with which you have this morning comforted me. I request of you to continue your labors, in the several positions you have hitherto held, until when my grief shall have allowed, me time for reflection, I make such new arrangements as shall seem proper.

"I thank the Members of this Council, in general for their condolence, who will, also, I hope, assist me with their advice, as though they had been appointed by myself."

ORDER OF PROCESSION

FOR THE

FUNERAL OF HIS LATE MAJESTY, KAMEHAMEHA III.

GRAND MARSHAL.

MARSHAL.

HAWAIIAN CAVALRY.

PHYSICIANS.

CLERGYMEN OF ALL DENOMINATIONS.

FREE MASONS.

Odd Fellows.

ROYAL SCHOOL.

FACULTY AND STUDENTS OF OAHU COLLEGE.

Other Schools and their Masters, 6 deep.

ARTILLERY.

THE KING'S BAND.

HOUSEHOLD TROOPS.

THE KING'S PURVEYOR AND SERVANTS.

THE PHYSICIAN AND ASSISTANT PHYSICIAN OF THE LATE KING.

TWO KAHILIS.

THE LATE KING'S STANDARD.

Soldiers. HIGH CHIEFS. SMALL KAHILIS.

HEARSE.

Soldiers. HIGH CHIEFS. SMALL KAHILIS.

TWO KAHILIS.

Her Majesty, the Queen.

HER ROYAL HIGHNESS, THE PRINCESS VICTORIA; HIS MAJESTY, THE KING; HIS ROYAL HIGHNESS, PRINCE KAMEHAMEHA.

The King's Chancellor, the Chamberlain, the Kuhina Nui.

THE MINISTERS.

THE REPRESENTATIVES OF FOREIGN NATIONS.

THE GOVERNORS OF ISLANDS.

THE MEMBERS OF THE PRIVY COUNCIL AND LADIES OF THE COURT.

THE FOREIGN CONSULS, AND THE POST CAPTAINS, COMMANDERS AND OFFICERS OF SHIPS OF WAR.

The Judges, Officers of Customs and other Government Officers,—four deep.

DRUMMERS.

HAWAIIAN INFANTRY.

First Hawaiian Guard.

FOREIGN MARINES, TAKING PLACE ACCORDING TO THE RANK AND SENIORITY OF THEIR RESPECTIVE COMMANDERS.

FIRE COMPANIES—Four deep.

HOOK AND LADDER COMPANY—Four deep.

THE KING'S YEOMANRY.

The Foreign Residents and Foreigners belonging to foreign merchant vessels.

The Native Population generally.

☞ Those who attend the Funeral, to assemble at the Palace at 10 A. M., on Saturday, the 6th January, and the Procession to start at 11.

The Line of Procession will be formed on north side of King street, fronting the Palace, the right resting on Richards st. Those who proceed with the remains of his late Majesty, will take their position North of the Palace, towards Richards street. The public generally are invited to attend.

M. KEKUANAOA, Grand Marshal.

PALACE, December 20, 1854.

HISTORICAL SKETCHES.

THE KAMEHAMEHA DYNASTY.

The idea has arisen in the mind of the editor, that, at the present time, when a new king is ascending the Hawaiian Throne, a few brief shetches of former kings would be read with much interest. We mentioned the idea to a "new resident," and he most heartily approved of the plan. "Old residents" may know all about the former age, but those persons recently taking up their abode upon our shores, are not possessed of this knowledge. They are desirous however of acquiring information, and are continually making enquiries respecting events and personages of a by-gone period. These sketches must be exceedingly brief, as our limits are narrow. There is much difficulty, however, in following the rule of brevity, inasmuch as the mass of materials is so abundant from whence our information is drawn.

It requires much self-denial to be brief upon this subject with Hawaiian histories before us by Jarves, Bingham, and Dibble, together with a score of other historical works upon Hawaiian Annals. It would be far easier to compile a volume of Royal Biography, than condense a brief sketch.

KAMEHAMEHA I.

This distinguished personage in Hawaiian history, and founder of the Hawaiian Kingdom, was born in the year 1753, or twenty-five years before the islands were discovered by Capt. Cook, (1778.) At this period these islands were subdivided into several petty kingdoms. The best authorities assert that Kamehameha descended from the line of the Kings of Maui, although he was the *reputed* son of Keoua, a half brother of Kalaniopuu, king of Hawaii. This king died at Kau, Hawaii, in April, 1782, after a reign of thirty years, and left his kingdom jointly to a son Kiwaloa, and his *reputed* nephew, Kamehameha. The portion of the island which fell to Kamehameha's lot, embraced the districts of Kona, Kohala, and Hamakua. Then commenced the reign or the dynasty of the Kamehamehas, dating back a period of seventy-two years. During the subsequent twenty or twenty-five years, Kamehameha I was engaged in wars, which finally resulted in the subjugation of the entire archipelago under his sway. Many of these wars were conducted with admirable skill and military prowess. To a certain extent fire-arms were brought into use, and some foreigners contributed their more extended knowledge to aid forward the conquest. Subsequent to the general conquest, he resided at different times on Hawaii, Maui, and Oahu. Dibble remarks re-

specting him, that he "possessed not only great powers of body, but also a strong and well-balanced mind, and a disposition naturally mild and generous. And it was soon seen, at the commencement of his reign, that he was much more disposed than former chiefs, to consult the welfare of his people. He showed to foreigners great kindness and respect, and opened the way to a safe and increasing intercourse with the American and European nations."

"Kamehameha had his chosen counsellors and wise men, with whom he habitually conferred on matters touching the prosperity of his realm. He enacted laws prohibiting murder, theft, extortion, confiscation and robbery, which operated to promote peace and quietness to such a degree that, in the expressive language of the islanders "old men and women were safe when lying asleep in the path." It is said that Kamehameha gave force to his laws by uniformly observing them himself."

Kamehameha 1st had several wives, but Kahumanu and Keopuolani were regarded as special favorites. Jarves remarks that "Kamehameha consorted with Kaahumanu from affection, and with Keopuolani from policy." According to the policy of the times, the children of the latter, however, and not of the former, became heirs to the throne. The name of Keopuolani is especially worthy of mention, as she was the mother of Kamehameha II and III. She was the mother of eleven children, but only three grew up to mature years, viz, the two mentioned above and a sister, Nahienaena.

Much might be written regarding the internal and foreign policy of the kingdom, as managed by Kamehameha I. Both written documents and oral tradition represent him as a most remarkable man, eminently gifted by nature.—He has been styled the "Napoleon of the Pacific." It most certainly indicated powers of a high order that he should succeed in both conquering the islands, and ruling them happily for near twenty years after they were conquered. He must have been a great general and good ruler. In a modified sense, he doubtless merits the appellation sometimes given, "the good" Kamehameha. He died on the 8th of May, 1819, at Kailua, Hawaii, and was succeeded by his son Liholiho, under the title of

KAMEHAMEHA II.

This royal personage was born on the island of Hawaii, in the year 1797. At the age of twelve years he was invested with royal honors by his illustrious father, for the purpose of securing the succession, and rendering the Kamehameha dynasty established, although the reigning king very prudently continued to manage the affairs of the kingdom

The crowning of the young prince was a wise stroke of policy on the father's part, for although he was king, and a conqueror, still there were aspirants for the crown in some of the conquered families. Hawaiians were not altogether unsusceptible to feelings of rivalry, ambition, and jealousy; neither have these feelings as yet disappeared among the old chief-families of this kingdom.

Liholiho ascended the throne of his father at a most critical period. Through a peculiar combination of circumstances, very soon after his reign commenced, the old idolatrous system of the islanders was abolished, but not however without war and bloodshed. The reform party, with the young king at its head, was triumphant. While these stiring scenes were transpiring on Hawaiian shores, events of immense moment were taking place in America, but having direct reference to the Hawaiian people. On the 23d of October, 1819, the brig "Thaddeus" sailed from Boston with the first band of missionaries for these islands. After a safe passage, they arrived within sight of the snow-capped summits of Mauna Loa and Mauna Kea, on the 30th of the following March. On arriving off Kawaihae, they sent on shore making enquiry, "What is the state of the islands." The answer is, *"Liholiho is king—the islands are at peace—the tabu system is no more—the gods are destroyed, and the temples are demolished."*

A new era is indeed dawning upon Hawaiian shores. No wonder a report of such thrilling intelligence awoke an interest in the churches of America, which has not yet died away. The report of the safe arrival of the missionaries and the state of the islands, called forth the following beautiful lines from an American poet, which were sung originally at the embarkation of the second company of missionaries at New Haven, in 1822:—

Hail! Isles of the South! your redemption proclaim;
No more you repose in the borders of gloom;
The "Ancient of Days" has announc'd his glad name.
And glory has dawned on the verge of the tomb.

The billows that girt ye, the wild waves that roar,
The zephyrs that play where the ocean-storms cease,
Have borne the rich freight to your desolate shore,
Convey'd the glad tidings of pardon and peace.

On the islands that sat in the regions of night,
The lands of despair, to oblivion a prey,
The morning has open'd with healing and light,
The young Star of Bethlehem has brought in the day.

As might have been expected, the new king found elements not easy of control within his own dominions, after his father's death, but now a new element was introduced.

It should perhaps have been previously stated that, prior to the death of Kamehameha I, he established a most striking and peculiar feature in his kingdom. Liholiho was, to be sure, king, and yet he was not "exactly king" without Kaahumanu's consent, or rather she sat upon the throne beside him.—There was something very peculiar in this arrangement, and what few but Hawaiians have fully understood. Jarves remarks, in regard to this novel mode of government, "this singular feature of a double executive has been retained, though modified, to this day, and the powers and limitations of both defined by law. Neither could act officially without the other; each in turn being a check or support, as the policy of the government required, and no act was valid without the sanction of both. This is is an anomaly in government, but the principle is so well understood and recognized by Hawaiians, that the harmony of the kingdom has never been endangered."

It will readily be seen that the new king inherited a kingdom requiring that he should hold the helm of state with a steady hand, or he would surely be involved in difficulties. It is unquestionably true that the christian element very soon began to exert a conservative influence, and give stability to the throne, upon which there sat a king by no means possessing the judgment, decision and sagacity of his illustrious father. He very soon squandered the revenues which his father had accumulated, and involved the kingdom in debt, which it required many long years to pay off. When once remonstrated with by a missionary for pursuing so reckless and disreputable a course, he replied, "Five years more, and then I will become a good man." He was naturally daring and indifferent to consequences. He once embarked at Honolulu for Kauai in an open boat. His boatmen were terrified and bewildered, for they knew not where to steer, but he, spreading out his hand in the form of a compass, pointed to his second finger, said "Here is your point of compass, steer by this." The men remonstrated, but it was of no avail, for Kauai the king was bound, and strange as it may seem, reached it in safety! To some extent he listened to missionary instruction, so that he could read and write imperfectly.

Ere long, he imbibed the strange freak of visiting England, but why or wherefore, no particular reason could be assigned, except that he desired to see foreign lands, and sailor-like roam abroad.—[See P. S.

"In October, a council was held at Lahaina, in which, after a full discussion, it was decided that he should embark in the English ship, L'Aigle, Capt. Starbuck.—Kamamalu, his favorite wife, Boki and Liliha, Kapihe and Kekuanaoa, with a steward and a few male servants, were to accompany him. It was the wish of the king and the chiefs, that Mr. Ellis should go with him to act as interpreter and counsellor. A large sum was offered for his passage. Captain Starbuck alledging his inabil-

ity to provide accommodations for his family, he was compelled to remain. Kauikeouli was appointed successor to the throne in case the king never returned, and was also made heir to his private lands. The government was to be administered by the chiefs in council, the regency being invested in Kaahumanu, with Kalaimoku as prime minister. November 18th, the royal train went on board the L'Aigle, and under a salute from all the shipping and the batteries, sailed in company with ten other vessels for Oahu. On the 27th, the L'Aigle left Honolulu, amid the sad forebodings of the people. Kamamalu remained on shore to the last, mingling her tears with those of her attendants, to whom her amiability and attention to domestic concerns had greatly endeared her. Before stepping into the boat, after the manner of her forefathers, she thus chanted her farewell:—O! heaven; O! earth; O! mountains; O! sea; O! my counselors and my subjects, farewell. O! thou land for which my father suffered, the object of toil which my father sought. We now leave thy soil; I follow thy command; I will never disregard thy voice; I will walk by the command which thou hast given me." Salutes were fired, and the ship soon disappeared before a favorable breeze."—[Jarves.

In the following May they reached England, where they were kindly welcomed by George IV. During a period of two months Liholiho and suite were the guests of the British government. They were flattered and feasted; but the change of scenes and excitement were too great, for being attacked with the measles, both the king and queen died. The king died on the 14th of July, and the queen six days previously. The British government then made the necessary preparations for conveying back to Hawaiian shores the remains of the deceased king and queen. This office was assigned to Lord Byron, cousin of the poet, commanding H. B. M. frigate "Blonde." On the 6th of May, 1825, this vessel arrived at Honolulu. In a few days after her arrival, funeral obsequies were celebrated in a manner characteristic of a semi-barbarous people, just beginning to imbibe the opinions and views of civilized and christian nations. If our readers would become acquainted with the details of those ceremonies, we would refer them to the standard histories of the islands, or to "old residents."

The visit of the "Blonde" is an important event in Hawaiian annals. It reflects the highest honor upon the British government, that it should have paid such distinguished honors and profound respect to the remains of Hawaii's king and queen. The selection of a nobleman of Lord Byron's standing, to discharge this delicate office, reflects additional honor upon all parties concerned. The kind, considerate, and courteous manner in which his lordship discharged the duty entrusted to him, entitles his name to a lasting record in Hawaiian annals. The honorable dignified and high-minded course pursued by his lordship, while his vessel remained at the islands, entitles his name to be cherished in grateful remembrance by the friends of missions and humanity.

In concluding our remarks upon the reign and character of Kamehameha II, we would merely add, the mortal remains of both king and queen are still preserved in the Royal Tomb, at Palace Yard, in Honolulu.

KAMEHAMEHA III.

The distinguished and royal personage for whom, at the present time, our city is decked with badges of mourning, was the brother to Liholiho, Kamehameha II. He was born March 17th, 1814, and, of course, died at the age of 42 years. His name was Kauikeaouli, signifying, "hanging in the blue sky."

We consider it a somewhat remarkable circumstance in the childhood of Kauikeaouli that he should have been among the very first to have "broken tabu," by eating with his mother, Keopuolani. She died on the 17th of September, 1823, but in belief of the christian religion. Her dying charge to the king, is worthy of one who had been much longer under christian influences. She exhorted him to follow missionary instructions, walk the straight path, observe the Sabbath, and should the people go astray, not to follow their example.

During the childhood and minority of the Kauikeaouli, he was instructed by the missionaries in the elementary branches of an education, being taught to read and write.—After his brother's death, and before he became of age, the kingdom was governed by a regency. He was, however, duly recognized as king in the early part of 1833, (Kinau holding the same relation to him that Kaahumanu had done to his brother Liholiho,) hence, at the time of his death, he had reigned during a period of twenty-one years.

It is not our design to enter upon a sketch, ever so brief, of the character and reign of his late majesty.

We shall merely copy the following extract from a sermon preached by the Seamen's Chaplain, at the Bethel, on Sabbath morning following the king's death. The text is recorded in 2d Epistle to the Corinthians, IV Chap., and 18th verse:—"*For the things which are seen are temporal, but the things which are not seen are eternal.*"

"How striking and impressive an illustration of this sentiment has recently transpired in yonder palace. While engaged in preparing this discourse, and while seated at my desk writing these very paragraphs, the booming minute guns, the wail of the people, and the flags at half-mast, announce that *the king is dead*, and that the sovereign of this nation has bid adieu to the fleeting and transitory scenes of this world, for the untried scenes of the eternal world. When I selected my subject and commenced writing, I had not the most distant thought that the chief magistrate of the kingdom, was about to resign his honors and station, at the approach of death. A mightier than any earthly potentate has exercised his sovereign pleasure in removing the hereditary ruler of the Hawaiian people. His death, more than would that of any one of his subjects, presents a striking illustration of the sentiment, *things seen are temporal.*—Kings must acknowledge its truth. They as well as their subjects must pass away. Their heads must bow when the king of terrors wields his sceptre. Their reign is transitory; their thrones are unstable; their robes must be put off; their insignia of office dispensed with; their palaces vacated, and their kingdoms pass into other hands, when the king of kings enforces obedience to that old statute, published near six thousand years ago, (but not repealed,) "for dust thou art, and unto dust shalt thou return." Death is "a king against whom there is no rising up." His decrees are summary and final.

"Were this the place and the occasion, I might indulge in remarks relating to the life and character of the distinguished dead. He was born in a dark and idolatrous period, and inherited the throne under peculiar circumstances. In his youth he witnessed his people receiving a new and the christian religion.—During his reign, the nation over which he has ruled, has come to be recognized as a christian and independent nation. Much of the good which has been accomplished, much of the evil which has been prevented, and many of the happy changes which have taken place, were doubtless brought about through the soundness of his judgment and the mildness of his character.

The late sovereign of the Hawaiian people, was gifted by the God of nature with many of those traits which qualify a person to be a good ruler, in trying scenes and peaceful times. He enjoyed the love of his people, and the respect of foreigners. *He came into power when his people were serfs, and he left them freeholders.* But I must not dwell upon this theme."

KAMEHAMEHA IV.

The new king of the Hawaiian kingdom, was born February 9th, 1834. He is the son of his Excellency, Kekuanaoa, the present governor of Oahu, and Kinau, whose official title was Kaahumanu II. His majesty was adopted when a child by the late king, and this act of adoption was subsequently confirmed by the Hawaiian Legislature. He obtains his rank as a High Chief, from his mother, Kinau, who was related in the most intimate manner to the Kamehameha dynasty. She was the daughter of Kamehameha I, by Kalakua, who is better known as Hoapiliwahina, late governess of Maui.—Kinau being the daughter of Kamehameha I, made her the half sister of both Kamehameha II and III. She was also one of the wives of Kamehameha II, but after his death in England, she married Governor Kekuanaoa. As will appear, in a few days he will be twenty-one years of age. He was educated at the Royal School, when under the charge of Mr. A. S. Cooke. As a scholar he exhibited many good qualities. At the examinations of that school, he always appeared

well versed in the ordinary branches of a good English education. In book-keeping, surveying and arithmetic, he exhibited a more than ordinary acquaintance, as we are able to testify from our personal recollection. On the 11th of September, 1819, in company with his brother, Lot Kamehameha, and Mr. Judd, Special Commissioner, &c., &c., he embarked for the U. S., England and France. After visiting those countries, he returned to the islands September 9th, 1850, having been absent twelve months. During the last three or four years, he has been, more or less, actively engaged in the affairs of the government. He has been at the head of the military department of the kingdom, and an active member of the House of Nobles. As a member of that body, he has often exhibited an ability, as a parliamentary debater, which would have done credit to a person of more years and greater experience. He speaks the English language with ease and fluency, and writes it in a manner equally creditable. Messages and documents which have already issued from His Majesty, bespeak a mind by no means unimpressed with the weighty and responsible duties which he is called to discharge in the providence of God. (We would refer our readers to the Polynisian of 23d of December.) It remains to appear what will be the policy of the kingdom under the new king. We confidently believe that the affairs of the government will be administered in a manner becoming an enlightened ruler, and an enlightened age. A higher than human power shapes the destiny of nations, no less than individuals. "By me, kings reign, and princes decree justice. By me, princes rule, and nobles, even all the judges of the earth." Proverbs, VIII, 15 16.

P. S. The remarks respecting the visit of Liholiho to England, are founded upon the view of the subject as presented by Jarves and Bingham. Since writing the above paragpaph we chanced to meet Governor Kekuanaoa, and as he was one of the party, we asked him why the king visited England. His reply was, that Liholiho was desirous of having an interview with his *brother king, George IV*, and of conversing with him respecting the grant, which his father, Kamehameha I, had made of his kingdom to George III, at the time of Vancouver's visit. (See Jarves' History, page 89, Sand. I.. edition.) The death of Liholiho, said the Governor, occurred before he could have an interview with His Majesty George IV, but subsequently an audience was granted to the survivors of the royal party, when the object of the King Liholiho's visit was fully stated. George IV declined assuming the protectorate of the islands, but remarked to the party, you go back, make Liholiho's brother king, regulate the internal affairs of the kingdom, and I will take care outside. There was no written document to this effect. Mr. James Young, late Governor of Maui, acted as interpreter on the occasion. There may have been many other motives prompting Liholiho's visit to England, for Bingham remarks, "the hearts of kings are deep!"

HONOLULU FREE SCHOOL.

It is gratifying to know, as the tax gatherer is making his visits to collect the school tax among foreign residents in Honolulu, that the school was never in a more prosperous condition. The examination took place last week, when about fifty-five pupils were present, and exhibited a good degree of proficiency in their various studies. The next term commences to-morrow, Tuesday, January 2d, under the instruction of the same teacher, Mr. Ingraham.

☞ Our acknowledgments are especially due to Mr. Sullivan, newspaper agent in San Francisco, for repeated favors.

☞ "Captain, what's the fare to St. Louis?"

"What part of the boat do you wish to go cabin or deck?"

"Hang your cabin," said the gentleman from Indiana, "Ilive in a cabin at home; give me the best yo've got."

To the Ladies of the Hawaiian Islands.

The Trustees of the Honolulu Sailors' Home Society, have decided to have a Fair in this city next November, for the benefit of the "Home," and they have instructed me to appeal to you for your generous aid and cooperation. Similar establishments in the United States and Europe bear practical proof of their very great advantage to the sailor, and of their influence in promoting good order in the community.

Your most worthy efforts in the cause of humanity and benevolence have hitherto been successful, and the Trusteos feel assured that the "Sailors' Home" will commend itself to you as also worthy of your aid. They would present this object to the societies of ladies which may now be organized for benevolent purposes, and through them make a general appeal.

George M. Robertson, Esq., is the Treasurer, and communications on the subject of the Fair may be made to him. ELISHA H. ALLEN,

President of the Sailors' Home Society.

Honolulu, Dec. 25, 1854.

Information Wanted.

San Francisco, Nov. 3, 1854.

Rev. Mr. Damon—Sir: Having been informed that you very kindly take an interest in the welfare of sailors, whalemen, &c., I have taken the liberty to write you, to see if you could give me any information in regard to who two men were, whose skeletons were found (by Capt. ———, I think, of ship Townsand, which was burnt at sea some time the last summer,) on the Island of Massafuero, together with a whale boat. The two men are supposed by him to have starved and died. My object in writing this is to find the whereabouts of a young man, in whom I am much interested, who has been absent from his family nearly two years, and is supposed by sisters at New York, that he went on board the whale ship King Fisher, Capt. Palmer, of New Bedford. Please write me if you have ever heard of a boat leaving her, or any other ship, with two persons, or any other information you may be so kind as to give, and you will very much oblige me.

Very respectfully yours, &c.,

BENJAMIN COOK,

61 Jackson Street.

NOTICE.—The Honolulu Temperance Society will hold a meeting at the Bethel Vestry Room, Thursday evening, January 4th, at 7 1-2 o'clock.

☞ As business of importance will be transacted, a full attendanoe of members is requested.

☞ Persons not members are also requested to attend.

☞ Ladies as well as gentlemen are invited.

The Friend.

HONOLULU, FEB. 1.

WORDS OF WISDOM.

From the Chinese.

TRANSLATED BY DR. BOWRING.

Give me riches! I'll command
Every spirit in the land—
But the meanest beggar's door
Will be shut against the poor!

Spite of all you say or do,
What is false cannot be true!
For, when all is said and done,
Truth and Falsehood are not one!

The highest art of knowledge is
To give to man the highest bliss;
And highest bliss the man attains
Who o'er himself serenely reigns;
And to his neighbor freely deals
The love which for himself he feels.

Time is precious beyond price!
Present—like an arrow flies;
Past—forgotten, fades and dies;
Future—all in darkness lies;
Time is precious beyond price!

When the waters are serene,
All is most distinctly seen;
But when violently shaken,
All is broken and mistaken.
When the heart is free from care,
All is like the chrystal clear;
But, midst wailings, woes, and wranglings,
All is darkness and entanglings.

When the wine hath reached our heart,
All the hidden secrets start.

He who with himself contends,
Struggles for the noblest ends;
Passion's promptings thus subduing,
Peace, and truth, and right pursuing;
But when with another, strife
Plants with thorns the path of life,
Misery in the conflict lurks—
Evil thoughts, and words and works!

☞ We are gratified to notice the removal of U. S. Hospital from the centre of Honolulu, to a far more suitable and airy position, near the Mission-part of the town. The building now occupied is convenient and every way adapted for the purpose. Dr. Lathrop deserves much praise for the neat and cheerful aspect which he has given to the establishment, by furnishing new beds and bedding, and new furniture throughout. It always affords us pleasure to see Jack in any way made more comfortable.

☞ After many days of constant rains, Sabbath morning, January 28th, dawned most charmingly. The wind came around and from the North, blew most refreshingly. It was a most lovely morning. The mountains were clothed in robes of unwonted freshness; the air seemed so pure and balmy, that it was invigorating to inhale it. Our town was quiet and orderly, as our Sabbaths ordinarily are, in Honolulu. Groups of well dressed Hawaiians thronged the streets, on their way to and from their respective churches. The foreign community, too, was well represented, in the house of God. There was to be witnessed, however, one scene, that marred the Sabbath's holy rest, and peaceful quiet; it was a scene to which it pains us to allude and which we would gladly refrain from describing. The incident, to which we refer, was the sailing of three vessels of war out of our port on the Sabbath. These three represented respectively, England, France, and the United States. Here were three national vessels, representing, one the leading Protestant, and another the leading Catholic nation of Europe, and the remaining one, the Great North American Republic, boasting of its pre-eminence as a christian nation. These vessels formed a "combined fleet," holding a positive command of the Decalogue in defiance. As their canvas was loosened to the breeze, it seemed a virtual declaration to the inhabitants of these islands, "the Christian Sabbath is a day we do not respect." Those vessels had all pledged the Hawaiian Government that they would defend it against bands of lawless fillibusters, who might come hither to set the laws of this Kingdom at defiance; still, in defiance of a law older than that of any kingdom on earth, they left our port! It is a circumstance which it is difficult to account for, that these vessels should have formed this seeming combination to violate the Sabbath. Long as we have resided on these islands, a period of more than twelve years, we cannot recall a single instance that a vessel sailing under the Hawaiian flag, left port on the Sabbath. How humiliating to witness the representatives of old and established Christian nations, thus openly violate the Sabbath, in the eyes of this nation which, less than a half century ago, was sunk in idolatry and superstition. It is our firm belief that the Christian element is more influential among the Hawaiian people, than any other people on earth; most certainly the christian element is clearly apparent in the history of this nation during the last twenty-five years.

The views which we have here expressed are not entertained by us alone. Scores of people in Honolulu fully sympathize with us, in view of the scene to which we have alluded. Whatever may be the custom or practice in other ports, it is not the custom at Honolulu, for vessels to sail upon the Sabbath. Those vessels which do sail, on that day, form the exception. Long may be the period, before we shall be compelled from our sense of duty, as the conductor of a public journal, devoted to the advocacy of Christian principles, to allude to similar events.

How much happier individuals, families, vessels, nations and the world would be, were they universally to render obedience to the command; "Remember the Sabbath day, and keep it holy."

A SENSIBLE REPLY.—Some years ago, say, about November, 1843, the U. S. Frigate, "United States!" arrived Sabbath morning off the port of Honolulu, and came to anchor. An officer was immediately sent on shore to make arrangements for exchanging the customary salutes. At the moment the messenger arrived, the Governor was at church, and a messenger was sent to notify him, that every thing was ready for banging away "21 guns;" but the old Governor replied, "Apopo;" "To-morrow, I'll attend to it." So far was this reply from giving offence to Capt. Armstrong, it was well received and appreciated.

☞ In the short address of His Majesty, on the day of his inauguration, as he stood upon the steps of the Church, there was a reference of this nature, that the Lord's people were his people! This idea was very gratifying to the religious portion of the native population. In referring to the subject, an old pious Hawaiian remarked, "this looks as if Kamehameha IVth would *annex* his *little* kingdom to the Lord's *Great* Kingdom."

Inauguration of Kamehameha IV.

On the day following the funeral of the late king, his successor was duly inaugurated.—The ceremony of the inauguration took place at the King's Chapel, at 12 o'clock, January 16th. The large church was crowded to its utmost capacity, while thousands were assembled around the building. Prayer was offered by the Rev. Mr. Clark; the will of His late Majesty was read in both Hawaiian and English. After which the oath of office was duly administered to the king by Chief Justice Lee. Then followed the delivery, by His Majesty, of the following addresses, to his native subjects and to foreigners. After leaving the church, and while standing upon the steps in front, the King also addressed the assembled multitude. Truly it may be said that dignity, propriety and decorum, characterized all the performances.

Give ear Hawaii o Keawe! Maui o Kama! Oahu o Kuihewa! Kauai o Mano!

In the providence of God, and by the will of his late Majesty Kamehameha III, this day read in your hearing, I have been called to the high and responsible position of the Chief Ruler of this nation. I am deeply sensible of the importance and sacredness of the great trust committed to my hands, and in the discharge of this trust, I shall abide by the Constitution and laws which I have just sworn to maintain and support. It is not my wish to entertain you on the present occasion with pleasant promises for the future; but I trust that the close of my career will show that I have not been raised to the head of this nation to oppress and curse it, but on the contrary to cheer and bless it, and that when I come to my end, I may, like the beloved Chief whose funeral we yesterday celebrated, pass from earth amid the bitter lamentation of my people.

The good, the generous, the kind hearted Kamehameha is now no more. Our great Chief has fallen! But though dead he still lives. He lives in the hearts of his people! He lives in the liberal, the just, and the beneficent measures which it was always his pleasure to adopt. His monuments rise to greet us on every side. They may be seen in the church, the school house and the hall of Justice; in the security of our persons and property; in the peace, the law, the order and general prosperity that prevail throughout the islands. He was the friend of the Makaainana, the father of his people, and so long as a Hawaiian lives his memory will be cherished!

By the death of Kamehameha III, the chain that carried us back to the ancient days of Kamehameha I has been broken. He was the last child of that great Chieftain, but how unlike the father from whom he sprung. Kamehameha I was born for the age in which he lived, the age of war and of conquest. Nobly did he fulfil the destiny for which he was created, that of reducing the islands from a state of anarchy and constant warfare to one of peace and unity under the rule of one King. With the accession of Kamehameha II to the throne the tabus were broken, the wild orgies of heathenism abolished, the idols thrown down, and in their place was set up the worship of the one only living and true God. His was the era of the introduction of Christianity and all its peaceful influences. He was born to commence the great moral revolution which began with his reign, and he performed his cycle. The age of Kamehameha III was that of progress and of liberty—of schools and of civilization. He gave us a Constitution and fixed laws; he secured the people in the title to their lands, and removed the last chain of oppression. He gave them a voice in his councils and in the making of the laws by which they are governed. He was a great national benefactor, and has left the impress of his mild and amiable disposition on the age for which he was born.

To-day we begin a new era. Let it be one of increased civilization—one of decided progress, industry, temperance, morality and all those virtues which mark a nation's advance. This is beyond doubt a critical period in the history of our country, but I see no reason to despair. We have seen the tomb close over our Sovereign, bnt it does not bury our hopes. If we are united as *one individual* in seeking the peace, the prosperity and independence of our country, we shall not be overthrown. The importance of this unity is what I most wish to impress upon your minds. Let us be one and we shall not fall!

On *my* part I shall endeavor to give you a mild, and liberal government, but at the same time one sufficiently vigorous to maintain the laws, secure you in all your rights of persons and property, and not too feeble to withstand the assaults of faction. On *your* part I shall expect you to contribute your best endeavors to aid me in maintaining the Constitution, supporting the laws, and upholding our Independence.

"A few remarks addressed on this occasion to you, the foreign portion of the assembly present, may not be inappropriate.

"You have all been witnesses this day to the solemn oath I have taken in the presence of Almighty God and this assembly, to preserve inviolate the Constitution. This is no idle ceremony. The Constitution which I have sworn to maintain has its foundation laid in the deep and immutable principles of Liberty, Justice and Equality, and by these, and none other, I hope to be guided in the administration of my Government. As the ruler of this people, I shall endeavor, with the blessing of God, to seek the welfare of my subjects, and at the same time to consult their wishes. In these endeavors I shall expect the hearty co-operation of all classes—foreigners as well as natives.

His Majesty Kamehameha III, now no more, was pre-eminently the friend of the foreigner; and I am happy in knowing he enjoyed your confidence and affection. He opened his heart and hand with a royal liberality, and gave till he had little to bestow and you but little to ask. In this respect I cannot hope to equal him, but though I may fall far behind I shall follow in his footsteps.

"To be kind and generous to the foreigner, to trust and confide in him, is no new thing in the history of our race. It is an inheritance transmitted to us from our forefathers. The Founder of our dynasty was ever glad to receive assistance and advice from foreigners. His Successor not deviating from the policy of his father, listened not only to the voice of a missionary, and turned with his people to the light of Christianity, but against the wishes of the nation left his native land to seek for advice and permanent protection at a foreign Court. Although he never returned alive, his visit shows plainly what were his feelings towards the people of foreign countries. I cannot fail to heed the example of my ancestors. I therefore say to the foreigner that he is welcome. He is welcome to our shores—welcome so long as he comes with the laudable motive of promoting his own interests and at the same time respecting those of his neighbor. But if he comes here with no more exalted motive than that of building up his own interests, at the expense of the native—to seek our confidence only to betray it—with no higher ambition than that of overthrowing our Government, and introducing anarchy, confusion and bloodshed—then is he most unwelcome!

"The duties we owe to each other are reciprocal. For my part I shall use my best endeavors, in humble reliance on the Great Ruler of all, to give you a just, liberal and satisfactory government. At the same time I shall expect you in return to assist me in sustaining the Peace, the Law, the Order and the Independence of my Kingdom."

ROYAL APPOINTMENTS.

At a special Privy Council, held by the King, on Tuesday the 16th instant, it pleased His Majesty to make the following appointments, viz:

Her Royal Highness the Princess Victoria Kamamalu, to be *Kuhina Nui*.

William L. Lee, to be *Chancellor* of the Kingdom.

Keoni Ana, (John Young,) *Minister of the Interior*.

Robert Crichton Wyllie, *Minister of Foreign Relations*.

Elisha H. Allen, *Minister of Finance*.

Richard Armstrong, *Minister of Public Instruction*.

The *Kuhina Nui* took the oath required by the Constitution, which was administered to Her Royal Highness, by the Chancellor of the Kingdom, the Honorable William L. Lee.

His Majesty then addressed His newly appointed Ministers in the following terms:

Gentlemen:—On calling you to the high posts you respectively fill, I propose to make a few remarks, with the request that you will bear them constantly in mind. First, let me impress upon you the importance of unity of purpose and action, for I consider it impossible for the business of government to be effectively carried out, unless there exist a great unanimity of feeling among its officers. I have chosen you, because, I thought that being actuated by one common policy, your deliberations would be free from suspicious reserve, and your actions all tend to one end. In a Cabinet divided into factions, differing on fundamental points of policy, I could place no confidence; and should I find mine thus divided, I should feel it my duty to reorganize it. I am determined that my government, if any power vested in me can attain that object, shall be respected for its honesty and efficiency. Unsupported by these two pillars, no kingdom is safe. I desire every part of the machinery of government to move in unison; to subserve the great purposes for which it was intended; and to be conducted with the strictest economy. Though young, with the help of God, I shall endeavor to be firm and faithful in the execution of the high trust devolved upon me, and never let my feelings, as a man, overcome my duties as a King. From all my counsellors I desire frank and faithful advice, and those who advise me honestly, have nothing to fear; while those who may abuse my confidence and advise me more from personal interests than regard for the public good, have nothing to hope.

One word in regard to the nominations for office which according to law it becomes your duty to make, and I have done. Let your subordinates be recommended by at least these qualifications—honesty, temperance, industry and adaptation to the places they are to fill; and let them be men in whom you see good grounds for placing confidence.

May success crown your efforts and after years approve my judgment in calling you to office.

At the same Privy Council, it pleased His Majesty to make the following appointments:

M. Kekuanaoa, *Governor of Oahu*.

P. Nahaolelua, *Governor of Maui*.

P. Kanoa, *Governor of Kauai*.

His Majesty further appointed W. C. Parke to be *Marshal of the Hawaiian Islands*.

The King also announced to the Council, that those who were to form *His Privy Council of State*, would receive special Commissions so soon as they could be prepared by the *Kuhina Nui*.

At a special Privy Council ordered by the King on the 18th, it pleased His Majesty to make the following further appointment, viz:

His Royal Highness General Prince Kamehameha to be *Chamberlain*, in lieu of A. Paki, resigned.

Luka Kielikalani, *Governess of Hawaii*.

He issued Royal Commissions to those who are to form His Privy Council of State.

At the special Privy Council of the 17th, it pleased His Majesty to make the following military appointments, viz:

His Royal Highness Prince Kamehameha to be *General* Commanding-in-Chief.

Robert Crichton Wyllie to be *Secretary at War*.

[Polynesian,

A Poor Woman's Gratitude.—Mr. Gough, in one of his orations before a British audience, related the following incident. We doubt whether from any one of the beautiful and costly gifts, of which Mr. Gough has been made the recipient, from admirers of his genius and philanthropy, any one has more deeply touched his heart than this testimonial of the poor Edinburgh woman. Said he :—"While in Edinburgh, lately, a woman with two children called upon me, and though very poor, insisted that I should accept a present of a white handkerchief, saying :—'While you wipe the sweat from your brow, when you are speaking in this cause, let it remind you that you have dried the tears of my house.'"

☞ We clip the above tribute to Mr. Gough from a late paper, and would express the wish, that he might go on drying up the tears of 50,000 more in Great Britain, 50,000 more in the United States, and wherever else a poor woman is to be found with a drunken husband. We sometimes hear it said, by shutting up rum shops and refusing to license groggeries, men are thereby deprived of the means of supporting their families ; but is it not a harder case to allow a traffic which fills the world with drunken husbands, and makes their wives suffer more than tongue can tell or pen describe. There is one thing which was never yet fully described, that is, the heart of a high-spirited, pure-minded, and noble-hearted woman, who was cursed with a drnnken husband! Angels, it is said, rejoice over the repentance of one sinner—so will the wives of an 100,000 drunkards rejoice, when the "Maine Law" becomes the law of England and America.—Let that law be enacted and enforced, and it will dry up an ocean of tears, and hush a million of sighs.

P. S. Just as we finished writing the above paragraphs, there came to our sanctum a mechanic, who said he gets $24 a week for his work, but spends nearly all of it for rum !—He frankly acknowledged his degradation and misery, but added, "how can I help it ?"—At the time of his visit he was intoxicated, but yet he uttered bitter words of self-reproach, and cutting words of sarcasm upon those who received his hard earnings for rum. He took from his pocket a $2 50 piece, the last of his money, saying that too must go for rum, and then he would reform ! Our words of kind remonstrance were in vain, and he left, muttering, as the inebriate is wont to do. We pity the man, and we pity his family.—What a blessing the "Maine Law" would be to the inhabitants of Honolulu and the Sandwich Islands. What misery, wretchedness and remorse it would prevent ? We hope to see the day when this law, or some other, will prevent the drunkenness of the city. While we mourn that so many ruin themselves, body and soul, by intemperance, it is a source of unfeigned rejoicing that there are some, at least, who are firm and decided never more to "touch, taste, or handle" the vile poison.

Horne Island.

Among the myriad islands which dot the surface of the South Pacific ocean, is a little island about ten miles in diameter, lying near the Fegee group, called Horne Island. Its climate and productions are nearly similar to those of the Sandwich Islands. Its inhabitants are dark complexioned, and are said to be the most ferocious and savage of any in Polynesia. Until very lately they were cannibals. A correspondent of the *Pictou Chronical*, writing from a whale ship in the tropics, gives the following description of a visit to these *interesting* people for the purpose of procuring wood, water, yams, &c.:—

"On our approach, we were immediately surrounded by twenty or thirty canoes, filled with the most hideous looking wretches I ever beheld. Their hair, which is long and very coarse, stands erect, giving them a most ferocious appearance; and they kept up such an unearthly yelling, being overjoyed to see us, that we finally came to the conclusion that we might possibly by mistake have discovered a small corner of the infernal regions. After satisfying their curiosity and ascertaining our wants, they immediately returned to the shore to satisfy them, and in a short time several canoes came alongside filled with the choicest productions of the island, consisting of hogs, fowls, yams, cocoanuts, and fruits of all kinds. Then commenced a trade unsurpassed by any rag fair in Europe; but we were not a little surprised to find that our money was of no value to them and they refused to take it, therefore a regular barter commenced. Old shirts, handkerchiefs, pipes, tobacco, and fancy trinkets, took well with them. Our captain being an old Cape Cod Yankee, who had been seafaring for forty years, understood well what was required for traffic with the natives, and having, of course, come prepared for the occasion, laid in 40 hogs, 200 fowls, a large supply of yams, coacoanuts, &c., in exchange for what cost him not over $15, in the shape of red flannel, knives, hatchets and beads. It was quite amusing to see him bargain for his supplies, especially the yams, which grow here to a size weighing 15 to 20 lbs. One percussiou cap was to be given for one yam, but the old sea cock not being satisfied by taking small and great as they came, would repeatedly impress upon the natives the necessity of bringing large yams, by saying, "one cap, one yam, big ya-n," at the same time stretching his eyes and extending his hands to describe the size. I must say, although he treated us very well during the passage, if he ever had any conscience, it had little to do in trade with the natives of Horne Island."

Owing to the difficulty of procuring water the vessel was detained at the islands eight days, during which our hero paid frequent visits to the shore and became quite intimate with the King and all the nobility. The king was a black, rough looking fellow, six feet six inches in height. His entire wardrobe consisted of an old flannel shirt and a Panama hat. The costume of the other members of his family was even more limited. The mode of cooking food among these people is similar to that of the Sandwich Islanders, and is thus described:

"They bake their food in an oven or shallow hole dug in the ground, in the bottom of which a flat stone is laid, embedded in mud, and when it is sufficiently heated, the coals are taken out and several layers of leaves spread on the stones, after which the yams, plaintain, banana, &c., are carefully laid in, and a layer of leaves laid over the whole, which is quickly covered with earth. By this means the steam is confined and vegetables cook in a very short time. When taken out of the fiery bed smoking, and eaten with milk of the young cocoanut, they cannot be pronounced a bad dish.

THE PRAYING SAILOR BOY.

The Cornelio was a good ship (said one of the West Indi chaplains of the Seamen's Friend Society,) but nt one time we feored that she was on her last voyage. We were but a few days out of the harbor, when a severe storm of five days' continuance overtook us.

I must tell you of a feat performed by a sailor-boy in the height of the storm. The ship was rolling fearfully. Some of the riggidg got foul at the moinmast head, and it was necessary that soms one should go up and rectify it. It was a perilous job. I was standing uear the mate, and heard him order that boy to do it. He lifted his cap, and glanced at the swinging mast, the boiling, wrathful sea, end at the steady, determined countenance of the mate. He hesitated in silence a moment; then rushing across the deck he pitched down into the forecastle. Perhaps he was gone two minutes, when he returned, laid his hand on the ratliues and went up with a will. My eyse followed him till my head was dizzy, when I turnec and remonstrated with the mate for sending the boy aloft.

"He cannot come down alive. Why did you send him up?"

"I did it replied the mate, "tosav e life. We've sometimes lost men overboard, but never a boy. See how he holds like a squirrel. He is more careful. He'll come down safe, I hope."

Again I looked, till tears dimmen my eyes, and I was compelled to turn away, expecting every moment to catch a glimps of his last fall.

In about fifteen or twenty minutes he came down, and straightening himself up with the conscieus pride of havtng performed a manly act, he walked aft with a smile on his countenance.

In the course of the day I took occasion to speak to him, and asked him why he hesitated when ordered aloft.

"I went, sir," said the hoy, "to pray."

"Do you pray?"

"Yes sir; I thought that I might not come down alive; and I went to commit my soul to God."

"Where did you learn to pray?"

"At home; my mother wanted me to go to the Sundy School, and my teacher urged me to pray to God to keep me; and I do."

"What was that you had in your jacket?"

"My Testament, which my teacher gave me. I theught if I did perish, I would have the Word of God close to my heart."

Biography of Sir John Franklin.

Sir John Franklin was born in 1786, and would accordingly have been 68 years of age, had he survived to the present time. His native place was Spilsby, a small town in Lincolnshire, in the vicinity of the North Sea. From his earliest years, he betrayed a certain boldness of disposition and love of adventure. His father endeavored to cure him of his seafaring propensities, by permitting him to try the experiment of a voyage to Lisbon in a trading vessel. But this only produced the opposite effect. He was confirmed in his taste for the ocean, and would not be satisfied until he had procured the consent of his father to his entering the navy.

He obtained a midshipman's warrant in his 14th year. His first service was in the frigate Polypheme, where he was distinguished for his youthful courage and energy. He was in the battle of Copenhagen in 1801, and two years after accompanied his relative, Capt. Flinders, on a voyage of discovery to the South Sea, during which he was shipwrecked on the Coast of New Holland. At a subsequent period, he was in the Bellerophon at the battle of Trafalgar. In 1814 he was a Lieutenant in the Bedford, which brought the allied monarchs to England. He was concerned in the attack on New Orleans, where he gained great credit by his bravery and skill. In 1818, he commanded the brig Trent, in the Polar Expedition under Captain Buchan. After the failure of the search for the Northwest passage by Captain Ross, he received the commission in 1819, to undertake an expedition, by land, from Hudson's Bay to the mouth of the Copper Mine River, in conjunction with Richardson and Back, to co-operate with Capt. Parry, who was to visit the region by water.

On this expedition, he followed the coast as far as Cape Tournagain, 68 deg. 30 min. north latitude, and after incredible hardships, having been once rescued from death by the Indians, he returned to England in 1822.—He was promoted to the rank of Post-Captain, and three years after undertook a second expedition to the Polar Sea, visiting the coast between Mackenzie River and the Copper Mine River. By the middle of August, 1827, he had reached the seventieth degree of latitude, and the one hundred and fiftieth degree of longitude, but was compelled to return by the early setting in of extreme cold weather. In recognition of his merits on this expedition, he received the order of knighthood from George the Fourth. In 1830 he commanded a ship of the line in the Mediterranean, and afterward was appointed Governor of Van Dieman's Land, from which post he was recalled, in March, 1843.

Returning to England, in the spring of 1845, he was entrusted with the command of the fatal expedition in which his life has fallen a sacrifice. The two vessels, Erebus and Terror, in which the younger Ross had accomplished his expedition to the South Pole, were selected for the voyage, and two distinguished officers, Captain Crozier and Fitz James, were appointed as his companions.—The expedition sailed on the 19th of May, 1845, arrived at the Whale Fish Islands on the 4th of July, and was seen for the last time, in Melville Bay, on the 26th of that month. It was not until the return of Capt. Ross, 1849, who had been in search of the missing navigators, that general anxiety was felt for their safety.

In 1851, an expedition was fitted out by Lady Franklin, and another by the British Government, to seek the lost vessels. About the same time, our townsman, Mr. Henry Grinnell, despatched the two ships Advance and Rescue for the same purpose. The unsuccessful result of these expeditions is well known. During the past year, a large fleet was sent out by the British Government, to make renewed search for Sir John Franklin. Mr. Grinnell also despatched the Advance, under the command of Dr. Kane, on a similar errand. But all in vain. Before the announcement of the recent intelligence, no further hope was cherished that the lives of the brave explorers had been preserved.—Their names were some time since stricken from the admiralty list, and orders issued for the recall of the expeditions.—[N. Y. Tribune.

Relics of Sir John Franklin.

Intelligence supposed to be reliable has been received in England, that there have been discovered among the Esquimaux Indians, certain relics belonging to the lost expedition, under Sir John Franklin. This intelligence is communicated by Dr. Rae, in a letter dated York Factory, Aug. 4th, 1854. This factory is situated on the Hudson Bay, N. L. 56°, W. L. 138°. The substance of the report obtained from the Indians is as follows :—

In the spring four winters past, (spring 1850,) a party of white men, amounting to about forty, were seen travelling southward over the ice, and dragging a boat with them, by some Esquimaux; who were killing seals on the north shore of King William's Land, which is a large island named Kei-ik-tak by the Esquimaux. None of the party could speak the native language intelligibly, but, by signs, the natives were made to understand that their ship or ships had been crushed by the ice, and that the "whites" were now going where they expected to find deer to shoot. From the appearance of the men, all of whom, except one officer, (chief,) looked thin, they were then supposed to be getting short of provisions, and they purchased a small seal from the natives.

At a later date, the same season, but previous to the disruption of the ice, the bodies of about thirty white persons were discovered on the continent, and five on an island near it, about a long days' journey (say thirty-five or forty miles) to the northwest of a large stream, which can be no other than Back's Great Fish River, (named by the Esquimaux Out-koo-hi-ca-lik,) as its description and that of the low shore in the neighborhood of Point Ogle and Montreal Island agree exactly with that of Sir George Back. Some of the bodies had been buried, (probably those of the first victims of famine,) some were in a tent, or tents, others under a boat that had been turned over to form a shelter, and several lay scattered about in different directions. Of those found on the island, one was supposed to have been an officer, as he had a telescope strapped over his shoulder and his double-barrelled gun lay underneath him.

From the mutilated state of many of the corpses, and the contents of the kettles, it is evident that our miserable countrymen had been driven to the last resource—cannibalism—as a means of prolonging life.

There appears to have been an abundant stock of ammunition, as the powder was emptied in a heap on the ground by the natives, out of the kegs or cases containing it, and a quantity of ball and shot were found below high water mark, having been left on the ice close to the beach. There must have been a number of watches, telescopes, compasses, guns, (several double-barrelled,) &c., all of which appear to have been broken up, as I saw pieces of these different articles with the Esquimaux, and together with some silver spoons and forks, purchased as many as I could obtain. A list of the most important of these I enclose, with a rough pen and ink sketch of the crests and the initials on the forks and spoons. The articles themselves shall be handed over to the Secretary of the Hon. H. B. Co., on my arrival in London.

None of the Esquimaux with whom I conversed had seen the "whites," nor had they ever been at the place where the dead were found, but had their information from those who had been there, and those who had seen the party when alive.

In addition to these reports, Dr. Rae obtained and forwarded certain articles supposed to have belonged to Franklin's party, silver spoons, forks, and other small articles. These articles were engraved with letters and devices of such a nature as to leave no reasonable doubt respecting their owner ship.

"Such has been the dreadful fate of the fearless discoverer, who was followed in his perilous voyage to the Arctic seas by the united sympathies of Europe and America, and whose safe return would have been hailed with an enthusiasm of rejoicing, almost unbounded.—The bleached and frozen bones of thirty-five of his expedition tell a melancholy tale of the same fate for the remainder. But History has another noble name to rank among its heroes, and will hand down to posterity the annals of the voyages, and the proud yet melancholy fate of the Columbus of the North."—[N. Y. Observer

AMERICAN SAILORS.

We are informed that a great number of young men, nearly all Americans, have been received into the merchant service within a short time, as nearly every ship leaving port takes from four to eight. Poole, Pentz & Goin, shipping notaries, inform us that more have entered the service than ever before; and that merchants are feeling the necessity for having young men in the course of training for positions of command on ship-board,—more especially to provide men suitable for mates &c., who are now procured with so much difficulty. The prospect that some system of apprenticeship may be adopted by the United States Government, is also said to have exerted a wholesome influence. The new turn which matters have taken, is a hopeful circumstance. —N. Y. Journal of Commerce.

Ship Building on the Clyde.—There are established on the banks of the Clyde, at present, not fewer than thirty-two ship builders, who, during the last twelve montho have built or are building no less than 267 vessels, of the aggregate tonage of 167 760, tons, for which engines are being or have been manufactured of 23 835 horse-power. They are not small vessels, for they average 620 tons each. The cost of this prodigious fleet of vessels is estimated at £5,000,000 sterling.—Edinburg Witness.

The First Whalesman.—It may be interesting to our New Bedford and Nantucket friends to learn, as we do from an ancient chronicle before us, that the first person who killed a whale upon this coast was named William Hamilton. He was born in Scotland, and in early life settled upon Cape Cod, (place not stated,) whence he removed to Rhode Island, he being persecuted for killing the whale by the inhabitants of the Cape, as one who dealt with evil spirits. Mr. Hamilton died in Connecticut in 1746, at the advanced age of 103 years. His children died at the following ages: Joseph, 86; David, 79; Benjamin, upwards of 90; Eliza, 93; Thankful, 102; Mary, 52.—[Boston Journal.

HISTORICAL SKETCHES.

THE KUHINA NUI, OR PREMIERSHIP.

This office has been of great importance in the affairs of this government, ever since the days of Kamehameha I. During the reign of Kamehameha II., and the early part of the reign of Kamehameha III, the Kuhina Nui exercised almost regal power. There was realized an example of the old Roman paradox, *imperium in imperio*—a government within a government. It is an office, to a certain extent, hereditary. According to Hawaiian ideas, it is not an office which could be held by any person not a high chief, and even that chief must belong (if the expression may be allowed) to the Kaahumanu dynasty. The following paragraphs relating to this office, are copied from a volume published in 1842, and entitled "Constitution and Laws of the Hawaiian Islands."

"It shall be the duty of the King to appoint some chief of rank and ability, to be his particular minister, whose title shall be *Premier of the Kingdom.* His office and business shall be the same as that of Kaahumanu I, and Kaahumanu II. For even in the time of Kamehameha I. life and death, condemnation and acquittal were in the hands of Kaahumanu. When Kamehameha I, died, his will was, "The Kingdom is Liholiho's and Kaahumanu is his Minister." That important feature of the government, originated by Kamehameha I, shall be perpetuated in these Hawaiian Islands, but shall always be in subserviency to the law.

The following are the duties of the Premier. All business connected with the special interests of the kingdom, which the King wishes to transact, shall be done by the Premier under the authority of the king. All documents and business of the kingdom executed by the Premier, shall be considered as executed by the King's authority. All government property shall be reported to him (or her) and he (or she) shall make it over to the King,

The Premier shall be the King's special counsellor in the great business of the Kingdom.

The king shall not act without the knowledge of the Premier, nor shall the Premier act without the knowledge of the king, and the veto of the King on the acts of the Premier shall arrest the business. All important business of the Kingdom which the King chooses to transact in person, he may do it but not without the approbation of the Premier.

Our object will now be to furnish a brief biographical shetch of each illustrious personage, who has successively discharged the office of the Kuhina Nui, commencing with

KAAHUMANU I.
1819—1832.

She was a wife of Kamehameha 1, and a daughter of Keaumoku, one of the famous chiefs and warriors who assisted Kamehameha Ist in the conquest of the islands. Her descent may be traced to the kings of Maui, and she was born at Kawaipapa, in Hana, on East Maui. Her naturally haughty and imperious character, gave her great influence, even before the death of her husband; but after his death, during the reign of Liholiho, her power naturally became much increased, for it was for the purpose of giving stability to the authority of Liholiho, that she was invested with almost unlimited powers by Kamehameha I.

On the 9th October, 1821, she was married to Kaumûalii, the king of Kauai, who took up his residence upon the island of Oahu, and acknowledged the island of Kauai as a part of the Hawaiian Kingdom. She manifested at first a haughty reserve toward the missionaries, but subsequently learned to read and write. As the progress of learning and religion became more extended, she finally threw her whole influence on the side of the missionaries, and the spread of christianity among the Hawaiian people.

On the departure of Liholiho, in 1823, for England, he left the supreme affairs of the government in the hands of Kaahumanu and Kalanimoku. The heir apparent being only eight years of age, the regency of the government devolved upon Kaahumanu, but she received important aid from Kalanimoku. He was probably the most influential man in the kingdom, although inferior in rank to Kaahumanu. By foreigners he was significantly styled "Billy Pitt," and his influence during a portion of the reign of Kamehameha III, was as important to the well-being of this kingdom as was that of his illustrious namesake to the government of George III. He was the active agent in administering the affairs of the kingdom, and when the rebellion (1824) was quieted on the island of Kauai, he was at the head of the government or victorious army.

During the minority of Kamehameha III, Kaahumanu's influence continued to be very great. Her zeal was very great towards the establishment of the christian religion.—Whenever she made tours of the islands, it was her practice to afford the people unmistakeable proofs that she was decidedly in favor of the missionaries. This circumstance rendered her an object of both hatred and dread, by those of that age who were unfavorable to the triumph o christianity. On the arrival of a company of missionaries in 1831, she addressed a letter to an officer of the American Board of Missions in Boston, from which the following is an extract :—

OAHU, Sept. 11, 1831.

"I, and he whom I have brought up, (the young king) have indeed carried the word of our Lord through from Hawaii to Kauai; with the love of the heart towards God was our journeying, to proclaim to the people His love, and His law, and to tell the people to observe them."

Her death occurred on the 5th of June, 1832, iu the Valley of Manoa, on the island of Oahu, and her remains were deposited in the Royal Tomb in Honolulu. During her last sickness, she continued to express her firm attachment to the religion of Christ.—Those who were present have recorded many touching incidents, showing that although born in heathenism, and living for half a century under the degrading influence of idolatry and superstition, she did finally renounce all her corrupt associations, and embrace the gospel of Christ. She was succeeded by Kinau under the title of

KAAHUMANU II.
1832—1839.

Kinau, the illustrious personage concerning whom we now write, was decended from the royal line of the ancient kings of Maui. She was the niece of Kaahumanu I, and daughter of Kamehameha I and Kalakua, better known as Hoapiliwahine, the governess of Maui during 1841-2. She was a sister of Kamamalu, the Queen, who died in England, and also one of the wives of Liholiho. After his death she married the present governor of Oahu, and was the mother of His Majesty, Alexander Liholiho, Kamehameha IV, of Lot Kamehameha, and of Her Royal Highness, the present Kuhina Nui.

The character of Kinau was less stern and imperious than that of her predecessor Kaahumanu, but not less decided in favor of public morals and the welfare of the kingdom.—She is spoken of by those acquainted with her, as peculiarly amiable, mild, and dignified; sustaining her office with singular and becoming propriety. Her influence was felt in carrying out measures of reform which had been commenced. After her death the American missionaries bore the following testimony respecting her character :—

"She sustained the highest rank in the nation except the king. For stability of character she has left no equal. She was ever awake to the interests of the nation, and showed no ordinary skill in managing its concerns, even in the most troublous times. She set her face against the prevailing immoralities, and gave satisfactory evidence of a readiness to make any personal sacrifice for the purpose of promoting christian morals, and the best interests of the nation."

Her much lamented death occurred on the 4th of April, 1839; but her funeral was deferred until the 7th of June. Her remains were deposited in the royal tomb, in Honolulu, beside those of others of the illustrious dead of her nation. On the day following her funeral, her half sister, Kekauluohi, was proclaimed her successor in office, but with a full recognition of the fact tkat Kinau's infant daughter Victoria, was her superior in rank.

KEKAULUOHI.
1839—1845.

Her official title was the same as that by which she had been previously known.

The following official document, issued by the King, on the day of her inauguration, shows how punctilious the chiefs were to give every chief his or her proper rank :

"HONOLULU, June 8th, 1839.

"The exp[illegible]nation c Kamehameha III re-

specting the descent of the authority of Kaahumanu II to her heir and successor, Victoria Kamamalu II, in whose place, however, Miriam Kekauluohi is to act for the present. This is his proclamation :

"Hear, ye chiefs, patricians, plebeians, and people from other lands, for I make this explanation that you may understand.

"The authority hitherto possessed by my mother Kaahumanu II until her decease, is now transferred to my other mother (Miriam Kekauluohi) though Victoria Kamamalu II is her superior, but still under my direction.

"Furthermore : no documents nor notes, referable to government, after this date, which have not my own signature, and also that of Miriam Kehauluohi, at the bottom of said writing, will be acknowledged as government papers."

The following sketch of her life we copy from the Polynesian of June 21st, 1845 :

"She was the last adult member of that distinguished family which for the past 60 years, has, as it were, shared the Hawaiian throne with the kings themselves. Her grandfather, Keeaumoku, was the most noted of all the warriors of the time of Kamehameha I, and by his personal prowess placed that eminent man on the throne of Hawaii ; first by slaying with his own hand, his great antagonist Kiwalao, and subsequently, Keoua, the only remaining enemy on that Island. Being much older than Kamehameha, and a chief of such eminence, that wise king made him his principal counsellor, and relied on him as his chief executive agent in conducting the affairs of the kingdom.

In early life she was betrothed to Pomare, the former king of Tahiti, and had his life been prolonged, it is quite probable she would have been sent to him. She became, however, a wife of Kamehameha I. Upon his death, his son and successor, Liholiho, made her one of his queens. These facts serve to show from what a system of incestuous barbarism, missionary influence has redeemed the land. For, being a daughter of a queen of Kamehameha, she married either her own father or father-in-law, and afterwards became wife to either her own brother or son-in-law. Hence must have arisen a confusion of relationship that the utmost skill of even herself, as royal genealogist, could not have solved. She subsequently married Kanaina, by whom she had two children, the younger of whom, William Charles Lunalilo, survives.

Kekauluohi was in her childhood considered by Kamehameha 1st to have a good mind, and especially a retentive memory. She was therefore selected by him as a repository for the ancient lore of the country, which was of course stored only in the minds of the people, and consisted of the genealogies of the chiefs, proverbs or wise sayings of former kings, together with historical legends, elegies and songs. Genealogy was more particularly her department, though perhaps no one is now living who stands so high as she did even in the other departments.

The system by which she was taught was exceedingly rigorous. Persons were employed by the direction of the king, who acted as teachers, and she was confined with them in the closest manner for many hours in the day, with little interruption, for several years.

She early gave attention to religious instruction, and made a public profession of her faith in Christ in the year 1828. For a number of years she was an ornament to her profession, and her beneficial influence on others even of the highest class, was extensively felt. A similar spirit revived during the last few weeks of her life. Having received a large bequest from her uncle, the late Governor of Hawaii, she consecrated one tenth of it to religious purposes.

She had a large amount of property in her hands, the most of which she held as guardian for her neice, Victoria Kamamalu. Her own estate however was considerable, the whole of which she bequeathed to her son."

In the 4th volume of the U. S. Ex. Ex. will be found a well executed steel engraving of Kekauluohi, or as she was commonly known among foreigners, Auhea. She continued to discharge the duties of the Kuhina Nui until her death, which occurred on the 7th of June, 1845, for we find her name attached to a royal proclamation appointing a public fast, and the said proclamation is dated only five days before her death. She was succeeded by Keoni Ana, or as commonly known among foreigners, John Young.

KEONI ANA.
1845—1855.

The premiership now passed into the hands of a chief, although hitherto females had always discharged the functions of this office. The following proclamation will indicate the person and rank of the distinguished person who succeeded to Kekauluohi :—

At the Palace, on the 10th inst., His Majesty, the King, was graciously pleased to appoint His Excellency KEONI ANA (Governor John Young) to the exalted rank of KUHINA NUI (Premier) of the kingdom, in the room of the late lamented Premier, Her Royal Highness KEKAULUOHI.

It is His Majesty's pleasure that the Premier be distinguised by the style of HIS HIGHNESS.

GOD PRESERVE THE KING.

Governor Young is the son of the celebrated John Young, the English Sailor, whose name is so intimately associated with that of Kamehameha I. He was the King's companion in war, and most influential counsellor in peace.

At the time of Mr. Young's appointmeut, he was the Governor of Maui. He now became more intimately associated with Kamehameha III in governing the kingdom. The connection must have been peculiarly gratifying to His Majesty, for Mr. Young had been his most intimate companion from the earliest period of life. Wherever the king resided, Mr. Young was found with him. Their intimacy continued through life. They were nearly of the same age, and were similar in their tastes and feelings. Since the death of the late king, we have heard the remark made by an officer of government and an old resident, that, "the king and John Young were never a week apart all their lives."—This may be a strong expression, but it indicates the strong attachment existing between them. Mr. Young survives the late king, but he is a sincere mourner for His Majesty.

During the period that Mr. Young held the office of Premier, its limitations and powers have become more distinctly defined and accurately fixed, as will be seen by reading the following section, copied from the New Constitution of the Hawaiian Kingdom, adopted in 1852 :—

SECTION II; OF THE KUHINA NUI.

Art. 43. The King appoints some chief of rank and ability to be his Kuhina Nui, who shall be styled the Kuhina Nui of the Hawaiian Islands, and whose title shall be Highness.

Art. 44. The Kuhina Nui shall be the King's special Counsellor in the great affairs of the Kingdom. All business connected with the special interests of the Kingdom, which the King wishes to transact, shall be done by the Kuhina Nui under the authority of the King. All Acts, Royal Patents, Commissions, and other official documents, duly executed by the Kuhina Nui in the name and by the consent of the King, agreeably with article 35, unless specially excepted by the law, shall be equally binding as if executed by the King himself.

Art. 45. All important business of the Kingdom which the King chooses to transact in person, he may do, but not without the approbation of the Kuhina Nui. The King and Kuhina Nui shall have a negative on each other's public acts.

Art. 46. The Kuhina Nui shall have charge of the Great Seal of the Kingdom, of the Royal Standard, and of the National Flag; and in the absence of the King, he shall preside over the deliberations of the Privy Council.

Art. 47. Whenever the throne shall become vacant by reason of the King's death, or otherwise, and during the minority of any heir to the throne the Kuhina Nui, for the time being, shall, during such vacancy or minority, perform all the duties incumbent on the King, and shall have and exercise all the powers, which by this Constitution are vested in the King.

Art. 48. Whenever during the vacancy of the throne, or the minority of any heir to it, the office of Kuhina Nui shall become vacant by death, resignation, or otherwise, then the Privy Council, or the major part of them, shall during such vacancy have full power and authority to do and execute all and every such acts, matters, and things, as the King or Kuhina Nui might or could, by virtue of this Constitution, do or execute. And in such case the Privy Council, immediately after the occurring of such vacancy, shall cause a meeting of both Houses of the Legislature, who shall elect by joint ballot a person to fill the office of Kuhina Nui.

During the last few years Mr. Young has discharged the duties of both the office of Kuhina Nui and Minister of the Interior.—Since the death of His late Majesty he has resigned the former, but still discharges the latter. He has been succeeded by

VICTORIA KAMAMALU,
1855.

Who is now Kuhina Nui, under the title of Her Royal Highness the Princess Victoria Kamamalu. She is the sister of the king, being the daughter of Governor Kekuanaoa

and Kinau. She was born Nov. 1, 1838, and is now sixteen years of age. Our readers will observe her induction into office in another column of our paper. According to the ideas of Hawaiian chiefs, she is entitled to hold this office by hereditary right. Since the death of her mother, she has always been under the special guardianship and care of the Honorable John Ii, than whom a more suitable person could not have been found in the kingdom. Her education has been carefully attended to by the teachers of the Royal School; and for several years she resided in the family of Mr. Cooke, who was Principal of the school. Among her own people she has always been looked up to as a worthy representative of her illustrious mother, and the rightful heiress of the honors and dignities of the office of Kuhina Nui.

Funeral of Kamehameha III.

Agreeable to the Programme published in our last number, the funeral of His late Majesty was duly solemnized, on the 15th of January. The day finally chosen for the ceremonial exercises, proved exceedingly fine. At an early hour the troops were gathered, and the whole city assumed the attitude becoming the day. All places of pleasure and business were closed. The whole community, both native and foreign, devoted the day to the sole business of showing every becoming tribute of respect to the late King. The procession formed at the Palace gate, extended more than half a mile down King-street. All the streets through which the procession passed were carpeted with grass brought from the mountains. Groups of the people were gathered along the sides of the streets, and upon all the balconies and verandahs. It was highly gratifying to witness the order and propriety that pervaded the whole affair.—Great praise is due the marshals and all concerned, who were engaged in the preparations and in conducting the performances.

After the procession had passed through the principal streets of the city, it was conducted to the Royal Tomb, where the coffin was carefully taken from the "Car" upon which it had been drawn, and deposited beside those of the illustrious dead of the Hawaiian nation. There repose the remains of Kamehameha II and His Queen, who died in England; Kaahumanu, Kinau, Haalilio, and several other chiefs.

Appropriate military honors were exhibited at the Tomb, and salutes were fired by the Hawaiian military companies, as well as by the several companies of marines from the English, American and French vessels of war.

Religious services were performed at the Palace, before the procession started, and also at the Tomb.

The following is a copy of the will of His late Majesty, which was read on the day following his funeral, at the inauguration of his successor:—

WILL OF HIS LATE MAJESTY.

In the Name of God, Amen:—

I, KAMEHAMEHA III., by the grace of God, King of the Hawaiian Islands, being of sound mind, and desirous, while God blesses me with a clear understanding, to appoint and proclaim my successor to the Hawaiian Crown, agreeably with the 25th Article of the Constitution; and also to direct how my estate shall be disposed of after my death, do hereby make, publish, and declare this my last will and testament.

First. I hereby appoint and proclaim my adopted son Alexander Liholiho, to be the heir and successor to my crown; provided he shall not be disqualified to sit upon the throne, under the provisions of the 26th Article of the Constitution. And I request that the House of Nobles will join with me in appointing and proclaiming him as my heir.

Second. It is my will and command that, in case my adopted son Alexander Liholiho shall not survive me, or, surviving me, shall not be qualified to sit upon the throne, that his brother, Lot Kamehameha, shall be the heir to my crown; provided he is not disqualified by the Constitution: and in case he shall not come to the throne, then his sister, Victoria Kamamalu, shall be my successor, provided she shall be qualified by the Constitution. Beyond this, I have no wish respecting my successor to the throne.

Third. It is my command that all my just debts shall be paid by my executors, hereinafter named, out of my estate, as soon after my decease as shall by them be found convenient.

Fourth. I give, devise and bequeath unto my Queen, Hakaleleponi Kapakuhaili, in lieu of dower, provided she assent thereto, the following lands, to be held by her in fee simple, viz:

Hula,	Ahupuaa,	Puna,	Hawaii,
Kapalaalaea,	"	Kona,	"
Kalahuipuaa,	Ili no	Waimea, Kohala,	"
Anaehoomalu,	"	" "	"
Waipio,	Ahupuaa,	Hamakua,	"
Kaohe,	Ili no	Wailuku,	Maui.
Puhiawawa,	"	"	"
Lemukee,	"	"	"
Puuohala,	Ili no	Wailuku,	Maui.
Manienie,	"	"	"
Waikahalulu,	"	Honolulu,	Oahu.
Kailua,	Ahupuaa,	Koolaupoko,	"
Kaneohe,	"	"	"
Hakipuu,	"	"	"

Fifth. I hereby give, devise and bequeath all the rest and residue of my estate, of whatsoever kind and nature, to my adopted son, Alexander Liholiho.

Lastly. I hereby appoint Keoni Ana, William L. Lee, Ioane Ii and Mataio Kekuanaoa, to be the executors of this my last will and testament, to act jointly in giving it full effect, and with power to fill any vacancy that may occur by the death, resignation or refusal to act of either of said executors. For their trouble it shall be proper for them to divide among themselves, equally, the sum of one thousand dollars, to be realized from my estate, before the rest and residue thereof is made over to my adpoted child, under the fifth section of this will.

In witness whereof, I have hereunt oset my hand and seal this second day of April, in the year of Our Lord one thousand eight hundred and fifty three, at my Palace in Honolulu. This will is made and signed in triplicate.

(Signed,) KAMEHAMEHA. [L.S.]

Signed, sealed, and declared by His Majesty Kamehameha III., as His Last Will and Testament, in presence of us, who, in His presence, and in the presence of each other, and at His request, have subscribed our names as witnesses hereto.

(Signed,) A. PAKI,
B. NAMAKEHA.

Palace, Honolulu, Dec. 16, 1854.

We, the undersigned, members of His Majesty's Privy Council, having this day seen and heard the Last Will and Testament of His late Majesty Kamehameha 3d, hereby make known that we believe the same to be the true and genuine Last Will of His late Majesty.

(Signed,)

KEONI ANA,	A. PAKI,
B. NAMAKEHA,	R. C. WYLLIE,

☞ The Honorable Mr. Gardner, recently elected governor of old Massachusetts, by the "Know Nothings," was a sailor on board a whale ship a few years since. His electors may be "Know Nothings," but we guess he knows something. Sailors generally not only know how to sail *with* the wind, but *against* it, which is more than most men can boast

MARRIED.

At Watervleit, N. Y., on the 27th September, CHARLES E. HITCHCOCK and ELIZA P. HAMILTON. Mr. H. was formerly a resident of Honolulu, and editor of the Polynesian; but more recently of San Francisco, of the firm of Goodwin & Co.

In San Francisco, Dec. 31st, CHARLES A. POOR, Esq., of Honolulu, and Miss FRANCES A. BADGER, of San Francisco.

In Honolulu, by Rev. S. C. Damon, January 6th, Mr. WILLIAM HOWARD, to Mrs. MARGARET ROGERS; January 13, Mr. CARL G. SCHORE, to MAKEANU; and January 23, Mr. WILLIAM JACKSON, to HA KELE.

In Honolulu Harbor, January 27th, on board Am ship "Vancouver, by Rev. L. Andrews, ICHABOD BARTLETT, Esq., of Honolulu, to Miss CAROLINE F. GOULD.

January 29, by Rev. S. C. Damon, Dr. G. A. STURGES, of New York, to Miss ANNIE WHITECHURCH, of London.

DIED.

In Honolulu, January 21, at the City Hospital, Mr. GEORGE IRELAND, belonging to Monterey, Cal. He came passenger on board the "Pontiac," and died two weeks after his arrival.

Passengers.

By the Johanne Hansing, from Hamburg.—C. Buhle, F. Kruger.

By the Gazelle, for San Francisco.—Messrs. Signer, J. Leak, P. D. Hughs, R. Birnie, J. Kating, J. Sharkey.

By the Susan Abigail, from S. F.—S. D. Bahen, J. T. Paine, E. Partridge, S. Johnson, W. H. Conant, E. W. Churchill, E Gibson, A. Plume, A. Ailes, M. Charles, C. W. Huff, D. Charles and lady, C. Charles, L. Miller and wife, J. B. Gillis, Agee, A. Grinbaum, G. Miller.

By the brig Astoria, from Oregon.—H. C. Leonard, A. Brownson, Mr. Swasey.

By the Restless, for S. F.—Mr. Hart, Korn, Hart, E. Pillet, Capt. Allen, Mrs. Allen, senior, Mrs. Allen, junior, W. H Wilder, C. Derby, Dr. De Frouville, lady and child, Fox, Paul, Hart, Jordan, Barnard, Brown, Frazer, Tripp, Hundrer, Fryer.

By Lady Jane, from San Francisco, Mrs. Penhallow and son Mr. and Mrs. Jones, Mrs. Post, Miss P. Baker, Miss H. Baker' Miss A Baker, Mr. Jacobs, Mr. Davis, Mr. Hale, Mr. St. Dennis. Mr. Barney, Mr. Allen, two engineers.

By the schr. Frolic, for Melbourne.—J Twifler, Mr. Gibson.

By the Rialto, from San Francisco.—J. C Oook, J. Shaus, 2 chinamen.

By the schr. C. E. Foote, from San Francisco.—P. Cahet, J. P. Shields, A. Doench, L. L. Ridder, G. Peterson, W. Long, J. Artiste, Mrs. Duras, S. E. Howard, W. A Alden, S. Lee, J. P. Lierxie, P. Schioner, C. Hardwick, V. P Griswold, J. Jordan, N. Brown, C. Babbitt.

By the Frances Helen, from San Francisco.—W. M. Fuller, W. H. Hargraves, G. O. Osborn and lady, J. Ranch, E. Wright, L. L. Booth, Mrs. J. B. Leeds.

By the Fanny Major, from Melbourne.—Messrs. Lockwood, Hood, Heyer, Brewer, Rassbrail, Rowe and lady, Mr Harvey, Capt Christy lady and 3 children, T. Mossman and daughter, Miss Irwin, Cooper, Quimby, Kairus, Fourrier and wife, Mc Culloch, Bell,—8 in the steerage.

By the Susan Abigail, for S. F.—R. A. Lockwood, C. Tuellner, W. Lynch, R. Hudson, M. Norris, C. Bredinburg, J. M. Burchard, P. R. Bennett, M. V. B. Griswold, T. Karren, B. F. Johnson, J. Neff, L. Friedel.

By the Fanny Major, for S. F.—Mr. O'Sullivan, Mooney, A. Murry, Merrill, Wolfe, Robinson.

By the Nor'Wester, for Boston.—Capt. E. Chapel, lady and child, Mrs. T. Spencer, child and servant, G. T. Franklin, Baker, Dr. Clark, Rev. E. Johnson, J. T. Stevens.

By the bark Hermione, for S. F.—Mrs. Kimball, Mr. Ryckman, senior, Ryckman, junior, Wright, Robinson.

By bark Auckland, from S. F.—Dr. Franklin, W. W. Hatch, Dr. Knox.

By the Frances Palmer, from San Francisco.—Doct. B. F. Hardy and lady, Mr. E. McDonald and lady, C. A. Poor and lady, Mrs. M. Kinny and two children, Mrs. Darnell and two children, Mrs. Jacobs, James Thorp, J. R. Bradley, Mr. E Hopkins, W. P. Avis, O. G. Clifford, Sam'l Feldheim, H. C. Shaw, N. T. Bennet, Afong, W. M. Rice, J. A. Osborn, Baxter Downs, Wm. McCourt, E. Marble. L. Segar, Tuligas Barnarrt, Wm. Biddleman, Robt. Bragg, W. Comstock. Wyman Osborn, F. G. Livingston, J. Pascal, G. G. Adlington, Jno. H. Lord, Jno. H. Paty.

In the Ocean Pearl, for Valparaiso and Sandwich Islands.—Geo. F. Tufts and Alfred Tufts, of Charlestown, Charles H. Lunt, of West Roxbury, Edw. M. Brewer, Jamaica Plains, Edw. Everett, Wrentham, Mass, Miss Celia P. Wright, Northampton, Mrs. H. M. Whitney and two children, Rev. Mr. Hitchcock, wife and two sons, Mr. Baldwin and wife, and Mr. Pierson and wife, of Honolulu.

Per "M. A. Jones".—R. Taylor, Mrs. Montague.

Per "Vancouver."—Miss C. F. Gould, Mrs. J. A. Law, and two children.

Per "E. L. Frost."—E. Eastwood, S. B. Peterson, and Mr. Jenny.

Per "T. H. Allen."—D. F. Farrall, P. H. Doren, C. Coleman, E Sandheimer, Julien Morren, E. Campbell, Anton Lrobch, Mr. Edwards, James Jackson, Nickolas Brown, B. Gunn, Adam Frederick.

MEMORANDA.

The following report is given by Capt. Bryant, of the whale ship George Howland, recently arrived from the Marquesas:—

"The whale-ship D. M. Hall, of Fall River, Capt. Pratt, fell in with the ship John Land, Capt. Percival, in lat. 4 N., long. 102 W., with a signal of distress at her fore-topsail-yard-arm. Capt. Pratt went on board and found her leaking 7,000 or 8,000 strokes an hour. Capt. Percival asked for assistance, and offered $5,000 if the bark would lie by him 24 hours, which Capt. Pratt refused. Capt. Percival said money was hardly a consideration if Pratt would assist him in getting into port. Capt. Pratt refused to do any thing for the assistance of the John Land, unless she was abandoned to him. After some time taken to consider this proposition, it was acceded to by Capt. Percival. The crews were transferred,—Capt. Percival, officers and crew, going on board the bark. The bark's crew, after 48 hours trial, found they could not keep her free alone, when Capt. Pratt made a new contract with Capt. Percival, to the effect that if he would give him a cargo for his bark, he would re-deliver up the ship, and the two crews would join in working her into port; on which they took out cargo to the amount, in their judgment, of $50,000. The weather coming on bad, they stopped. After this the crews mutinied, and those on the ship hailed the bark, and demanded her to heave-to, which was done. They came on board and demanded the papers which conveyed the ship back to Percival, and obtained them. This put the whole control again in the hands of Pratt, who proceeded, against the wishes of Percival, to Nukuhiwa, one of the Marquesas Islands, where no authorities existed to take cognizance of the matter.

On arrival, Capt. Percival asked assistance from the French, to take charge of his men, who were in a state of mutiny.—Some were put in irons and taken on shore before the governor, but were finally released by his order, (who had a consultation with Capt. Pratt,) for which he probably received a gratification.

The foregoing is the report received from both parties by Capt. Bryant. Capt. Percival applied to Capt. Bryant for assistance, which was offered to the extent of his power, by discharging his ship and lighting the John Land, for the purpose of finding the leak, which a diver reported as under her fore-foot. Capt. Pratt threw impediments in the way, but would consent to it on condition that the crew agreed. They probably were tampered with, as they would allow it to be done.

Up to this time Capt. Percival and officers were on the bark, but it became Capt. Pratt's policy for Capt. Percival to command, (nominally,) his ship to Tahiti, and he went on board without his officers or passengers, or any one who could sympathise or advise with him,—constrained to do so, as Pratt said, by the crew. The bark and the ship sailed for Tahiti previous to Capt. Bryant's leaving. Capt. Percival had been so harrassed and troubled by the conduct of the crews, in destroying cargo, damaging cabin, and other mischievous acts, that at the time his mind was almost gone."

The above is the report of Capt. Bryant; and we give it in his own language, without pretending to be cognizant of the facts of the case, of our own knowledge. If, however, the facts are as stated, it seems to be a case of refusal to afford aid in circumstances of great peril, which we can hardly believe any captain and crew, of ordinary humanity, could have been guilty of. But if the story proves to be true, we have not the slightest doubt that the indignation of the world would be most justly exhibited towards the captain and crew of the bark, in such a manner as to drive them in disgrace from the profession. As the vessels had sailed for Tahiti, we shall probably hear more of this matter, and shall hold our columns open for Capt Pratt to explain his conduct if he sees fit to do so.

The John Land was bound from Boston to San Francisco, with a full cargo of merchandise.

The Friend.

HONOLULU, MARCH 1.

Hospitals and Sailor's Home.

It is highly gratifying, as we are frequently called to visit the Hospitals in Honolulu, to witness the efforts which are made by their respective proprietors, to make the inmates comfortable and happy. To render medical treatment successful, it is necessary to provide for the patient otherwise. Both the "City" and "U. S." Hospitals are creditable establishments. While so much has been done by private enterprise to provide for the sick sailor, and while the Stranger's Friend Society provides for the sick stranger, we hope the effort to erect a Sailor's Home will prove equally successful. Seamen, *in health*, should be carefully provided for. The "Home enterprise is most intimately connected with the credit and honor of the Honolulu public. Every foreign resident, and especially every merchant, should feel a deep interest in the success of the undertaking.—We are confident that a portion of the seamen discharged here, will avail themselves of the "Home," and the more seamen of all classes can be induced to resort thither, while in port, the more will they patronize the clothing and retail stores, not spending their wages for that which will ruin both body and soul. This is an enterprise which makes its appeal to all persons friendly to the moral and religious improvement of seamen. In the list of contributors for the "Home," it is gratifying to observe donations from Missionaries living at remote parts of the islands.—It is no less surprising than gratifying, that Hawaiians should contribute to build the Home. So far as we are able to form an opinion upon the subject, no enterprise, having for its object the benefit of seamen, has ever met with more general satisfaction among all classes of the community. Its importance is acknowledged, and its prospective usefulness most flattering. The missionary writing from Waimea, Hawaii, employs this language: "You have a noble enterprise on foot, the establishment of a Sailor's Home. The Lord crown it with success. We should like a little kuleana in this philanthropic institution." Our island readers will understand the allusion. May it not be hoped that more will desire a *kuleana* in the Sailor's Home? The time is drawing near, when the Trustees desire to secure a deed for the "lot," and also obtain a Charter, as a regularly incorporated institution, from the Hawaiian Legislature. If possible, it is highly important that these objects be secured as early as the 11th of May. Every thing, however, depends upon the raising of the sum of $5,000. It will be recollected that the Hawaiian Government requires this amount to be raised, within one year from the date of the grant of the "lot," as a pledge that the enterprise would be pushed forward. Although the year will not expire before next November, still it seems highly important that this sum should be raised as early as May. Should this be accomplished, the Trustees will feel authorized to commence operations, and erect buildings, suitable for the accommodation of seamen, who may visit Honolulu, during the next shipping season. The Trustees might put up a section of the building, leaving the remainder to be finished when additional funds should be raised. So far as we are able to estimate the amount paid over, and pledged, to be paid before the first of May, the total is not far from $3,500, leaving a balance of $1,500 to be raised in two months. Persons residing upon the islands, who have not subscribed and design to do so, will essentially promote the undertaking, by coming immediately forward and letting it be known what they are ready to do. Who that resides upon the islands, does not want a *kuleana* in the Sailor's Home?

THE WAR.

The Battle of Inkermann—Effects of the War upon England—Journal of Events at Sebastopol, from Nov. 23d to Dec. 13th—The future prospects, &c., &c.

Some of our readers may complain, that we have not kept them duly informed of the progress of the war now raging between Russia and the Allied Powers of the west of Europe. Since our December No. we have not published a word upon the subject. Having been hoaxed with the false report of the fall of Sebastopol, we concluded not to publish additional reports, until there was a tolerable certainty of their accuracy. From the various newspaper and official reports, we gather, that for hard fighting, the scenes of the Crimea will fully equal any battles of modern times. The three battles of Alma, Balaklava and Inkermann, have won for the Allied troops imperishable glory for bravery and heroism. The battle of Inkermann was exceedingly bloody and destructive to both the English and the Russians. A London correspondent of the *N. Y. Independent* writes as follows:

"The battle of the 5th is described as the bloodiest struggle ever witnessed since war cursed the earth. It was fierce beyond example, and the descriptions are too painful for perusal. Eight thousand British troops bore and repulsed four distinct charges by masses of half-intoxicated and maddened Russians, whose numbers were as seven to one; the fact that the killed and wounded amount to a third part of the British engaged, attest the fury of the conflict. The correspondent of the *Times*, who was on the field, remarks, that 'it has been doubted by military historians, if any enemy have ever stood a charge with the bayonet, but that here the bayonet was often the only weapon employed in conflicts of the most obstinate and deadly character. We have been prone to believe that no foe could ever withstand the British soldier wielding his favorite weapon, and that at Maida alone did the enemy ever cross bayonets with him; but at the battle of Inkermann, not only did we charge in vain—not only were desperate encounters between masses of men maintained with the bayonet alone—but we were obliged to resist, bayonet to bayonet, the Russian infantry, again and again, as they charged us with incredible fury and determination. The battle of Inkermann admits of no description. It was a series of dreadful deeds of daring, of sanguinary hand-to-hand fights, of despairing

rallies, of desperate assaults in glens and valleys, in brushwood glades and remote dells, hidden from all human eyes, and from which the conquerors, Russian or British, issued only to engage fresh foes, till our old supremacy, so rudely assailed, was triumphantly asserted, and the battallions of the Czar gave way before our steady courage, and the chivalry of France. * * Our Generals could not see where to go. They could not tell where the enemy were—from what side they were coming, and where going to. In darkness, gloom and rain, they had to lead our lines through thick, scrubby brushes and thorny brakes, which broke our ranks and irritated the men, while every pace was marked by a corpse or man wounded from an enemy, whose position was only indicated by the rattle of musketry and the rush of ball and shell.'"

The following statistics will fully confirm the truth of the foregoing paragraph:

"A telegraphic dispatch from Berlin, published in the London papers, says that the Russian Invalide announces officially the Russian loss on the 5th of November, to be 42 officers and 2,969 men killed, and 206 officers and 5,791 men wounded, giving the total of 9,008 killed and wounded. The number of prisoners taken by the Allies is not given.

"The following is the official report of the total casualties in the British army on the 5th: 43 officers, 32 sergeants, 4 drummers, 380 rank and file killed; 102 officers, 121 sergeants, 17 drummers, 1,691 rank and file wounded; 1 officer, 6 sergeants, 191 rank and file missing. Total, 43 officers, 32 sergeants, 4 drummers, 380 rank and file killed; 103 officers, 122 sergeants, 17 drummers, 1,710 rank and file wounded; 1 officer, 6 sergeants, 191 rank and file missing.

Killed,	462
Wounded,	1,952
Missing,	191
Total,	2,605

"The loss of the French in killed and wounded, was 1,736. Total loss of the Allies, 4,341.

"It appears that the Russian force engaged in the battle was 60,000 or 70,000, who were opposed for three hours by a little over 8,000 English. The latter, however, were subsequently joined by 6,000 French, and thus saved the Allies from a defeat. The battle lasted from between 6 and 7 o'clock in the morning, until between 3 and 4 in the afternoon."

While these frightful and bloody scenes have been transpiring, they have told upon the public sentiment in England and France. The following remarks, from the correspondent referred to above, present a picture of the state of things in England:

"England, Nov. 28, 1854.

"If the British Government had rushed into a war to gratify the passions of a court, the lust of power, or the greed of conquest or of commerce, then would this be a time for bitter reproach and remorse; for the land mourneth and days of sorrow are come. Victories equal to or beyond any that heroic valor has ever won, have been gained; but there is little exultation. The attitude of the nation is one of great and anxious expectation, with a large mixture of torturing anxiety and sorrow. Terrible is the suspense between the brief telegraphic dispatch telling of a battle with so many thousands killed and wounded, and the arrival of the fatal list of names. The shouts of victory fall dull enough upon thousands of ears which are strained to catch intelligence of beloved ones in the host. The English army is largely recruited from the class of agricultural laborers; and there is scarcely a village in the land which had not a living representative in the army. The officers are almost exclusively drawn from the highest class, and there is not perhaps a patrician family in the land that is not immediately, or by near consanguinities and alliances, affected by the fearful list of killed and wounded. The Viceroy of Ireland mourns a son killed. The Earl of Clare loses his only son. The Duke and Duchess of Sutherland mourn the death of their second son, Lord Frederic Leveson Gower; and so one might go on through the peerage."

The following journal of events we copy from the *N. Y. Tribune* of Jan. 5th, 1855, bringing the news down to the very latest dates:

SEBASTOPOL.

Nov. 23.—The war correspondent of *The London Times* says:

"Although it may be dangerous to communicate facts likely to be of service to the Russians, it is certainly hazardous to conceal the truth from the English people. They must know, sooner or later, that the siege has been for many days practically suspended, that our batteries are used up and silent, and that our army is exhausted by the effect of the excessive labor and watching to which it has been so incessantly exposed. The Russians know this well enough. The relaxation of our fire is self-evident; but our army, though weakened by sickness, is still equal to holding its position, and to inflict chastisement on assailants who may venture to attack. Nothing would so animate our men, destitute of all stimulating influences beyond those of undaunted spirits, as the prospect of meeting the Russians outside their entrenchments, and deciding the campaign by the point of the bayonet.

"On last night there was a brisk affair between the Chasseurs de Vincennes and the Russian Riflemen, in front of the Flagstaff Battery earth-work, and the Russians dispelled all absurd myths about their being in want of powder and ball, by a most tremendous cannonade. Assaults and counter assaults continued amid a furious fire, which lighted up the skies with sheets of flame from nine o'clock at night until four o'clock in the morning. The French actually penetrated behind the outer entrenchments, and established themselves, for a time, within the 'luciente,' but as there was no preparations for a general assault, they withdrew. Vollies of musketry and salvos of cannon roared through the camp during the whole night, but few lost their rest in consequence, for these affairs are now a nightly occurrence."

Nov. 26.—The fight between the French and Russian Riflemen, aided by artillery, was, as usual, renewed last night. The object of contention is a mud fort near the Quarantine Battery, which the French persist in holding, although useless. Preparations for the renewal of a general bombardment are being proceeded with from day to day; the great obstacle is the bad state of the roads.

Nov. 27.—Nothing occurred.

Nov. 28.—During the day the Russians fire on the British about one gun every five minutes; the English look-out man cries "Tower," Redan or Garden Battery, and the shot is returned; but the fire on the French is much more lively, and is kept up with some effect on their earthworks and parallels.

Every night about nine o'clock, the Flag Staff, Quarantine and Wall Batteries open a furious cannonade, which lasts from twenty to forty-five minutes, as hard as the men can load, right into the French lines, and then follows, instantly, a sally, the result of which is invariably the same. The Russians push a strong column out of the place, rush toward the first line, drive in the pickets and riflemen, get up to the first parallel, sometimes into it, occasionally beyond it and close to the second parallel, when they are received as they advance, by the French covering parties, with a deadly fire; they halt and fire in return, are charged by the French, who route and pursue them into the town, but who are obliged to retire by the flank fire of the batteries and street guns. In this way the French lose forty or fifty men, but the loss of the Russians in these alerts must be considerable. Frequently, about daybreak, the Russians repeat the performance.

Nov. 29—Storm, wind and rain. The Russians have much strengthened their defenses. They have scarped the ground in front of all their batteries, have constructed strong abatis in front of the lines, thrown up numerous earthworks, and made sunken batteries before all their redoubts, and a long scarp of slopes. During the night, a particularly strong sortie was made on the French. Hearing a noise, a French rifleman crept forward and saw a column of Russians, 2,000 strong, forming in the rear of the battery. The French, therefore, 700 strong, silently mounted the parapet of their own battery, and received the Russians with a deadly volley, then leaping down, attacked them with the bayonet, and compelled them to retreat.

Nov. 30—A heavy fire on the French during the night. The Grand Duke Michael was observed making a reconnoisance at a distance of 1,000 yards. Flags of truce were exchanged respecting money for the prisoners.

Dec. 1.—More rain. The state of the roads prevented the arrival of supplies, and part of the British forces put temporarily on short allowance. The deaths from fever and cholera reach 60 daily.

Dec 2.—Continued rain. The besiegers began to erect huts for shelter. Deserters say that the condition of the Russians in the field is worse than that of the Allies. Much bell-ringing and rejoicing heard in Sebastopol during the night, supposed caused by the arrival of provisions.

Dec. 5.—The Russians made a sortie upon the French lines, when eight divisions of French under Gen. Forri, repulsed them with much loss.

Dec. 7.—The Paris Moniteur says, the be-

siegers' batteries were re-established, and before three days, firing would be resumed. The Allies are sufficiently intrenched and provisioned to remain throughout the winter.

Dec. 13.—A Russian dispatch states that up to this date nothing of importance had occurred before Sebastopol. Some small sorties had been successful; in one of them the Russians captured some small mortars and spiked others of a large size. The fire of the Allies continued feeble.

In regard to the future, all seems to be uncertain. The following paragraphs from the London Times, would indicate that the Allied Army is not looking for a speedy termination of the war in the Crimea, or for the fall of Sebastopol :—

"There does not appear, so far as we can see, any hope of bringing the struggle in the Crimea to an immediate termination. Before our army can be sufficiently reinforced to attempt any thing effective in the field, the season will have arrived when the rage of man must be suspended in deference to the severity of the elements, and the business of mutual destruction must wait for its recommencement for the first opening of Spring. Our main care must be now to preserve our army in health and spirits till the opening of another campaign, when the victory will be to those who have best availed themselves of the Winter for the purposes of reinforcement. We believe that if it shall turn out, as we apprehend it will, that *we are compelled to desist from the active operations of the siege*, we shall at any rate be able to renew the campaign next year with a decided superiority of force, which will allow us thoroughly to invest the place, and to push on the siege with a certainty of success."

The Allies will Retain the Crimea.—It is further stated by the Frankfort *Post Zeitung*, that the Earl of Westmoreland and Baron de Bourqueney, in the name of England and France, have informed the Austrian Government that whatever negotiations may be proceeded with, the operations against Sebastopol will not be suspended. Further, that the Allies have resolved permanently to occupy the Crimea. From that peninsula their forces would operate against Georgia, while the Turks, supported by the Allied ships, would attack Anapa, and carry on the war elsewhere in Asia.

The Losses by the Storm in the Black Sea.

The London Times says:—The total loss of men at the various stations on the coast of the Crimea on the disastrous 13th, cannot be less than a thousand, besides those that have fallen into the hands of the Cossacks. The loss of vessels was thirty British and French wrecked, and half as many dismasted at Balaklava, and eighteen wrecked or dismasted at the mouth of the Katcha. Our men-of-war—thanks to the precaution of frequently trying their cables, have come off with no further damage than the loss of guns, or masts, or rigging, the twisting of their rudders, or the springing some leaks. The French have lost the Henri IV., a noble three decker, and a favorite war steamer. Thus far we have sustained no loss beyond the ordinary drain of war; but the greatest calamity is that of which we scarcely now know the full. The Prince, a magnificent new screw steamer of 1,700 tons, carried out the other day to Balaklava the 46th Regiment, all the winter clothing for the troops engaged in the siege, including 40,000 great coats, flannel suits, under-shirts, socks and gloves; beef, pork and other provisions; hospital stores for Scutari; and a vast quantity of shot and shell to carry on the seige. These are wholly lost, and nothing remains of the Prince but half a dozen of her numerous crew, who managed to get on the cliffs when she was "broken to powder" against them. The Resolute, with 900 tons of gunpowder, also went to the bottom. Thus, it seems, all the materials for carrying on the siege and providing against the severity of the winter have been carried off at one fell swoop; and, even if we think to content ourselves with merely maintaining our position on the heights before Sebastopol, it is evident that we are not in a condition to stand our worst foe the coming winter.

The Prince cut away her masts, and put on her steam, but the wreck of the mizenmast fouled the screw, and the noble vessel becoming helpless, immediately drifted against the rocks. Figures are but feeble language for the description of such a catastrophe, but the value of the Prince, as she floated, is put at £150,000, and her cargo at half a million. The 30 transports, utterly lost, with most of their crews, at Balaklava, are put down at £15,000 each. So here, at once, a million of money went to the bottom, in a form of which money conveys but a faint idea. The other losses enumerated above, the French ship-of-the-line and war-steamer, the transports lost on the western coast, the many vessels of all kinds disabled, make up another million to be added to the naked pecuniary estimate of the loss. But the true way of stating it is, that the army is utterly disabled for the present, and left to no other protection than Heaven and that valor which the British soldier is ever sure to display in the face of the greatest difficulties, the direst privations, and the most overwhelming numbers. Yet never was the ancient valor of our race put to so tremendous a trial. The tempest which is said to have been the most terrible ever known in that part of the world, and which overthrew three of the minarets of Sultan Achmet's Mosque at Constantinople, besides driving large vessels from their moorings before that city, did not spare the allies even on land. It blew down and greatly injured their tents, feeble protection as they are against the cold Crimean winter at the height of seven hundred feet above the neighboring surge. Such is the situation in which the army finds itself suddenly deprived of the much wanted supply of clothing sent out for the winter, and the equally needful ammunition for the siege.

Power of Kind Words.—Some little readers may ask, What are we to do when our companions provoke or injure us? Let me tell you about an old colored woman, who was walking along the streets of New York on an errand, with her tobacco pipe in her mouth, quietly smoking. A jovial sailor came along, and when opposite good old Phillis, he crowded her off the pavement, and with his hand knocked her pipe out of her mouth. He then stopped to hear her fret and complain at his trick. But what was his astonishment when she meekly picked up the pieces of her broken pipe, and giving him a look of mingled sorrow, kindness, and pity, said, "God forgive you, my son, as I do." It touched a tender chord in the sailor's heart and brought tears to his eyes, and giving her a handful of money, he exclaimed; "God bless you, kind mother; I'll never do it again."[Child's paper.

Foreign Commerce and Revenue.

The Secretary of the Treasury of the United States makes the following statement :—

"The imports of foreign merchandise during the fiscal year, ending June 30, 1854, were a fraction over $300,000,000. The exports of domestic produce were between $250,000,000 and $260,000,000. The difference between the imports and exports was made up on California gold, stocks, and mercantile obligations. The revenue from customs was about $65,000,000, and from all other sources $8,000,000."

Maine Law Triumphant in Connecticut.

THE TESTIMONY OF GOVERNOR DUTTON.

New Haven, Oct. 30, 1854.

E. C. Delavan, Esq. :

Dear Sir—I take the earliest opportunity of replying to your inquiries regarding the practical operation of the *Prohibitory Liquor Law* of Connecticut. I hazard nothing by asserting that no candid enemy of the Law will deny that it was proved more efficient than its sanguine friends anticipated. It has completely swept the pernicious traffic, as a business, from the State. An open groggery cannot be found; I have not seen a person here in a state of intoxication since the first of August. In our cities and manufacturing villages, streets that were formerly constantly disturbed by drunken brawls, are now as quiet as any other. The change is so palpable, that many who have been strongly opposed to such a law have been forced to acknowledge the efficiency of this. At the late State Agricultural Fair it was estimated, on one day from 20, to 30,000 persons of every description in life were assembled and not a solitary drunkard was seen, and not the slightest disturbance was made. The effect was so manifest that the law has been regarded with more favor since than it was before.

The statistics of our courts and prisoners, prove that criminal prosecutions are rapidly diminishing in number; *some jails are almost tenantless.*

The law has been thoroughly executed with much less difficulty and opposition than was anticipated. In no instance has a seizure produced any general excitement. Resistance to the law would be unpopular, and it it has been found in vain to attempt to set it at defiance. The longer the beneficial results of the law are seen and felt the more firmly it becomes established.

The ridiculous idea so industriously circulated, that the sanctity of domestic life would be invaded, has been shown to be a mere bugbear. *The home of the peaceful citizen was never before so secure.* The officers of the law have no occasion to break into his house, and he is now free from the lawless victims of intemperance.

Connecticut, by her own law, and by the laws of the adjoining States of Massachusett, and Rhode Island, is now effectually guarded against the invasion of one of the worst enemies of the human race on all sides, except the west. The principal obstacle in the way of complete success, consits in the importation of liquor from the city of New York, into this state in casks and demijohns, professedly for private use. May we not indulge the hope that this evil will soon be repudiated. The Empire State is the first in population, wealth, and influence she will stand foremost in the great effort to suppress immorality and crime, and to promote the happiness of the human race? Certain I am that if her citizens try the experiment of a STRINGENT PROHIBITORY LAW, *All the gold in California could not tempt her to abandon it.*

With the highest respect,

Your ob't serv't

HENRY DUTTON.

☞ The first piece of artillery was invented by a German, soon after the invention of gunpowder, and artillery was first used by the Moors at Algesiras, in Spain, in the siege of 1341.

HAWAIIAN TRACT SOCIETY.

This Society held a public meeting at the Bethel, Tuesday evening, February the 20th. The special object of the meeting was to hear the reading of the report of the Colporteur, Mr. A. M. Brown, who has been laboring in Honolulu during the last four months. In the absence of both the President and Vice President, Mr. Castle was called to the Chair. The Report was read by Mr. Robertson, the Secretary, and furnished a brief and most satisfactory statement of Mr. Brown's efforts to do good, especially among seamen.

The following extract from the Report will show that he has not been idle, in the way of distributing tracts, books and useful reading matter:

"I will now state, as near as I can, the amount of reading matter I have distributed:

Tracts, - -	120,000	pages.
Books from Tract Society,	150	volumes.
English Bibles, - -	25	
" Testaments, - -	25	
German Bibles, - -	25	
Spanish " - - -	15	
Portuguese " - -	24	
" Testaments, -	18	
" Small volumes,	150	
" Tracts, -	5,000	pages.
French " - -	3,000	"
" Bibles, - -	9	
Sailors' Magazines, -	40	numbers.
Youths' Dayspring, - -	200	"
Child's Paper, - -	150	"
Youth's Temp. Advocate,	100	"
Am. Messenger, - -	800	"
Youth's Circulating Library,	300	volumes.
Friend, about - -	1,000	numbers.

Besides other second hand books and papers.

"Here is a mighty army of silent preachers. Let us not forget to pray God to give them success in winning souls from the power of Satan unto God.

"I could have distributed profitably, three or four times the number of the Tract Society's small volumes. Every sailor should have at least one good book. That would make quite a little library on board each ship."

The following paragraphs will indicate the manner in which the Colporteur has employed his time :—

"I arrived at this port on the 14th October, 1854, and have spent four months as Colporteur. As the fleet were already gathering into port, my first business was to visit each ship, and converse personally with each man, as far as possible, and leave with them some tracts, and invite them to meeting. Almost without an exception, I was received kindly, and more than that, *all* seemed to appreciate the kindness of the stranger who felt interested for their souls, and numbers expressed vividly, and with tears, their gratitude, very many of whom were children of pious parents, and numbers that had enjoyed religion. In fact, I have been surprised to find a class of men so rough, and yet so accessible.—They seemed willing and desirous of being conversed with personally and faithfully.—The exceptions to this rule are scarcely worth mentioning—for even those, who at first were rough and repulsive, were unwilling to be left alone, and had, if any thing, deeper feelings than many others.

"I have visited most of the ships a number of times, especially just as they were going out of port, in order to converse with the men for the last time, and to furnish them with such reading matter as we had, to peruse at sea. I have furnished both ends of the ship, and often when taking the parting hand, many have said, *pray for me*, while the unbidden tear has started, and emotion has seemed to forbid utterance.

"My time has been spent in visiting the shipping, and conversing with this class of men wherever I found them—perhaps to the most profit, in the Hospitals and Fort. I have visited Mechanics' shops, Boarding Houses, and Rum holes.

"On the 22nd October, I preached my first discourse on the wharf, and continued to preach every Sabbath at half-past 9 o'clock, until sickness, bad weather, and the absence of the fleet, seemed to justify its discontinuance. Nine Sabbaths I preached on the wharf, two or three times at the fort, and for the last nine Sabbaths, I have preached in the U. S. Hospital, at quarter past 2 P. M. I have generally attended the regular meetings of the church, and after the first week, held extra meetings for prayer in the vestry room, until the fleet mostly left, and since that time we have held them in the Hospital, and in private houses, nearly every night in the week.

"And now, if it be asked, what good has been accomplished by all this, I answer—The "Allwise" only knows, and Eternity will show."

After the reading of the Report, a vote was passed by the Society, expressing its approval of Mr. Brown's labors, and the acceptance of the Report.

The Treasurer, Mr. Gulick, reported that only *four dollars* was wanting to make up the sum of $600,—being the amount pledged to Mr. Brown, for his services. To meet this and other expenses, a collection of $106 was taken up, and our only regret was, that so few were present to listen to the report and contribute their proportion, to sustain the operations of a Society so eminently useful.

After the business of the Society was disposed of, two strangers were introduced, who addressed the audience in a most becoming and appropriate manner.

The first speaker was the Rev. Mr. Cridge, a Clergyman of the Church of England, who recently arrived from England, via Cape Horn, and is bound to Vancouver's Island. He expressed the unexpected and unfeigned pleasure which he felt in meeting with the friends of the Tract cause in Honolulu; and stated that he was intimately acquainted with the operations of similar associations, in England. He spoke of the Religious Tract Society of London, an institution which may be said to be the parent of all other similar associations. In referring to some instances, wherein he had witnessed the usefulness of Tracts, as they had come under his personal observation, he remarked that the enemies of Evangelical truth, were also busy in circulating their tract publications, so powerful an instrument was the tract-enterprise for doing evil as well as good.

The other stranger who spoke, was Frederick Hennell, Esq., late United States Consular Agent at Melbourne, Victoria. This gentlemen reached the islands, via Cape of Good Hope, and has already sailed for San Francisco, on board the "City of Norfolk." His remarks were exceedingly timely, apt and instructive. They referred principally to seamen. Surely this gentleman, if any one, could speak appropriately upon this subject, for he was for many years connected with the Sailor's Home, in New York City, and other Sailor-boarding houses, conducted upon Temperance principles.

We doubt not that all who visited the Bethel that evening, left encouraged to go forward and labor more faithfully, and more confidently believing, that it was not a fruitless undertaking to endeavor to do good, in the way of tract distribution.

Fatuhiva.

Interesting and encouraging intelligence has been received from our missionaries at Fatuhiva, Marquesas Islands. Late news was brought by Capt. Hunting, of the whale ship "Jefferson." His vessel remained there several days, and he furnished the mission with supplies. While the "Jefferson" was lying there, the "Harvest" arrived, which took letters and packages for the missionaries. Referring to the supplies for whale ships, Mr. Bicknell writes thus, under date of January 2d: "They have not been able to obtain supplies, as the natives produce nothing. Wood and water are the only things which can be got here at present. Last June the natives put a tabu upon pigs and upon a large portion of their cocoanuts. When the breadfruit season comes in, feasts and dances are to commence, and then there will be a great slaughter among the hogs, and a sad waste of pork."

Respecting the prospects of the mission, Mr. Bicknell writes thus briefly:—"There is nothing discouraging in our prospects here. The work will be slow, but it will be ultimately successful. The poet says:

"There is a tide in the affairs of men,
Which taken at the flood, leads on to fortune."

I think the flood-tide of Marquesas history has been seized. A few years, I hope, will turn out a brighter prospect."

"A few weeks ago another Priest arrived amongst us. I believe he comes straight

from the nursery. I have had but one opportunity of speaking to him. Being a new hand in the field, I suppose he thinks it best to keep shy of heretics. The former one and myself are intimate. There is a contest between us. He is trying to influence me, and I am trying to influence him."

So it seems the great battle commenced by Luther in the 16th century, is still being waged on the remote island of Fatuhiva.

Respectiog the labors of the Hawaiian missionaries, we are gratified to learn that they have succeeded in mastering the language, and have prepared a Spelling Book, which they have forwarded to be printed at the Mission Press in Honolulu. When printed, it will contain about twenty pages. In addition to the elements of the Fatuhivan dialect, it contains the Ten Commandments, a short Catechism, some hymns, and other moral and religious truth, forming a book corresponding to the old "New England Primer." It is a pity the work could not oontain some of the N. E. Primer engravings, such as the *burning of John Rogers*, attended by his family!

HISTORICAL SKETCHES.

GOVERNOR ADAMS.

[BY. J. J. JARVES.]

Although his life was not one of stirring incident, yet there are some points in it worthy of note. He was the sole survivor of the iron-hearted chiefs that constitutud the household of Kamehameha I. The last branch has now dropped from the decayed trunk.—The stern old chieftain has been gathered to his fathers. His generation have passed away, and in these islands, we shall never again behold their prototype. Yet in their day, they were of essential service to their nation, and to form a correct estimate of them, they must be thrown back to the times in which they bore so conspicuous a part, and to the then character of the people over which they were called to rule. The present age is one step beyond them, but they prepared the way. They united isolated, hostile tribes, breathing mutual hostility, living upon rapine and war, into one peaceful, consolidated kingdom. Under their auspices good order, protection, justice, commerce and religion grew out of the chaos of heathen passions. They prepared the structure in rough for the finishing chisel of successors more enlightened, because possessing greater advantages of knowledge and experience with the Christian world.

Although the general caste of character of the old chiefs received a common impression from the state of former times, there were traits in each which were more particularly their own. Before commenting upon those of Kuakini, we shall first give an outline of his political career. When quite a youth, in compliment to the President of the United States, the cognomen of John Adams was bestowed upon him, and by that name he is most generally known. Adam's family, descended from the royal house of Maui, was one of the most distinguished and powerful of the reign of Kamehameha, and still retains its preeminence. Keeaumoku, his father, was a tried friend of that monarch, and one of the principal promoters of his fortunes. Being of prodigious personal strength, his valor powerfully assisted Kamehameha in securing the entire dominion of the group. In battle he slew with his own hand the legitimate king of Hawaii, Kiwaloa. He was no less distinguished in the cabinet, and Kamehameha promoted him to the rank of chief counsellor. His eldest son and heir was of the same name, but better known as Gov. Cox. Kaahumanu, the first Premier, Kalakua (Hoapile wahine) and Namahama, all three of whom were wives of Kamehameha, were his daughters. And at the present time in default of any heirs beyond the present king in the direct line from Kamehameha I, the heir presumptive to the crown is his great grandson. So that the Adams family, in whatever light it is considered, is of importance, second only to royalty itself, and still has left a numerous collateral branch, in the children of Kinau and the present premier, nephews and neice of Kuakina.

Adam's first office of importance under Kamehameha I, was that of captain of the ordnance at Oahu. Upon the King's last return to Hawaii in 1813, he was raised to the rank of counsellor. Immediately after the death of the King, Kaahumanu made him Governor of Hawaii; his original charge was limited to the district of Kona. In 1830 she further appointed him to the governorship of Oahu, which office he retained until December, 1831, when he returned to Hawaii.—Adam's administrations were vigorous and effective. Energetic in action, but reserved in manners, he assumed to himself much responsibility. It was difficult to secure his confidence in matters of council, as he relied much upon his own judgment. Even those who lived near him many years were never able to form that intimate acquaintance with him, his views and plans of operation that most missionaries enjoyed who resided in the vicinity of their respective ruling chiefs.—His character was eminently that of reserve in making known his policy. While in Hawaii, being remote from the seat of government and the influence of other chiefs mostly assembled around the King, he acted in a great measure independently of them, and sometimes contrary to their opinions. He may be considered in the light of a conservative of the old school, much attached to the ancient system of government, and only yielding to the new order of things, when the force of public sentiment and the authority of his superiors forced upon him a partial compliance. His acquaintance with the English language, and his thirst for knowledge, gave him a superiority in general intelligence, over most of the chiefs of his rank and afforded him a better insight into the nature of things than others attained. This superiority it would seem ought to have ranked him among the first to embrace the reformed system of government; but in his view, it foreboded the future subversion of what he much prized, arbitrary authority, and consequently the diminution of those facilities for aggrandisement, which had all along been the great ambition of his life. He was more enterprising indeed than other native rulers, and many of the objects which claimed his attention,—such for instance as the building of churches and the making of roads, were intended for the public benefit; yet in most of his enterprises, his aim was to accumulate property. But he was correct in his business transactions and a man of his word. As early as 1823, he lived at Kailua, in a good style for that period, in a small wooden two story house, the first erected on the Island. His habits of living then were a mixture of civilization and barbarism. He usually, though not always went clad with garments, kept a regular establishment of servants and soldiers, ate at a table and slept on a bed when at home. When entertaining foreigners, his meals were served after the civilized fashion, though very much in the manner it is done on board a ship. He was from the first a regular patron of schools, sending out scholars as teachers upon his numerous lands, as fast as the missionaries would teach them to read, and directing his head-men to furnish them food and kapas at the expense of the land. He was also a regular attendant at church on the Sabbath, and though he remained several years an unbeliever and was fond occasionally of caviling at the truth of the scriptures, yet he was never an open opposer, and set his people a good example in encouraging them to attend likewise upon preaching. He has been the great patron in the erection of almost all the permanent church buildings on the Island, and of some of them, he was at the sole expense of their completion, over and above what could be done by native labor This may more particularly be remarked concerning the stone chapel at Kailua, and for its expensive finish, as well as its many glaring defects, he bore the sole responsibility, without consulting the taste of his pastor.

It was about the year 1828, that he became a member of the church. Although he continued a member till the day of his death, yet he did not shine as a Christian to the degree of some of his contemporaries, who have passed away before him. His pastor considered that he was swayed by too many worldly influences, to always maintain a satisfactory Christian walk, and his love of gain often led him into dubious acts, from which his Christian friends would have dissuaded him, had he consulted them in time. But his taciturn policy, and his confidence in his own judgment, seldom led him to advise with his religious teachers, and naturally created a reserve on their part respecting offering that as gratuitous which might be disregarded.—With this exception, his private morals were regular; he was free from the many low vices which too often taint the savage character, and was on the whole a faithful magistrate.

Gov. Adams was the first man of his nation who ever learned to read. Long before an alphabet of his native language was formed, he had obtained sufficient knowledge of the English language to speak and read it with tolerable facility, although he never attained to the more difficult parts of the language, so as to understand the most finished works in English literature. The Bible was the book he understood best. He was fond of reading newspapers, but said he could not comprehend the meaning of many words, but a story simply written was well understood by him.—[Polynesian, 1845.

Wreck of a Whale-Ship--Perilous Adventures of the Crew.

Mr. Meek who arrived here in the "Equator" from Manila, furnishes us with the following account of the wreck of the whaleship Canton, 1st of New Bedford, A. J. Wing, master. The ship sailed from Tahiti for the Marian and Sandwich Islands. On the night of March 5th, at 12 45 A. M., she struck on a sand bank in latitude 2° 48' South, longitude 173° 38' West. The sea was very high at the time, and every wave made a clean breach over her. No land was visible. The crew managed to cling to the wreck during the gloomy hours of night, and at daylight contrived by the aid of one of the boats and a line carried to the desert sand island on which they struck, to reach the shore in safety, but almost worn out by their sufferings. There was no water or vegetation on the island, and starvation stared them in the face. On the 6th the stern of the ship was broken off by the sea, and fortunately nineteen casks of water floated ashore, and were secured. The same day the crew succeeded in saving three more in the boats, and by the assistance of an expert Kanaka swimmer were enabled to communicate through the rough sea with the wreck, from which they saved a quantity of bread and other provisions. Shortly after the ship went to pieces, and her cargo of twelve hundred barrels of oil was lost. The officers and crew, consisting of twenty-eight persons, remained upon the island until the 31st of March, when finding their supplies getting short and no prospect of relief, with a lingering and horrible death awaiting them if they remained where they were any longer, they put to sea in their open boats; and after forty-nine days of extreme hardship and destitution, being reduced to half a biscuit a day to each man, they arrived safely at Guam, one of the Marian Islands, belonging to Spain, where every kindness was extended to them by the Governor. Here they remained for some time, until the arrival of a whaler, when the second and third mates and four of the crew shipped on board her. Capt. Wing and the first officer took passage on a Swedish brig for Hongkong. Mr. Meek and four others went in a Spanish vessel to Manila, and fifteen of the crew still remained at Guam.—[S. F. Herald.

THE CROWN OF ENGLAND.—The following is an estimate of the jewels in this magnificent diadem :—Twenty diamonds, round the circle, £1,500 each, £30,000; two large centre diamonds, £2,000 each, £4,000; fifty-four smaller diamonds, placed at the angle of the former, £100; four crosses, each composed of twenty-five diamonds, £12,000; four large diamonds on the top of the crosses, £4,000; twelve diamonds contained in fleurs-de-lis, £10,000; eighteen smaller diamonds contained in the same, £2,000; pearls, diamonds, &c., upon the arches and crosses, £10,000; also 1,411 small diamonds, £5,000; twenty-six diamonds in the upper cross, £3,000; two circles of pearls, about the rim, £500. Cost of the stones in the crown, exclusive of the metal, £111,900.—*English Paper.*

A SAILOR'S IDEA OF A KING.—The following laughable anecdote shows Jack right out: As George III, (when he was Prince of Wales) was walking the quarter deck of one of his men-of-war, with his hat on, a sailor asked his messmate,

"Who is that fellow, who does not douse his peak to the Admiral?"

"Why, he is the king," was the reply.

"Well, king or no king," retorted the first, "he's an unmannerly dog."

"Lord, where should he learn manners," replied Jack, "he was never out of sight of land in his life."

THE SAILOR'S BIBLE.

The following transcript from the fly-leaf of a brave officer's Bible tells a simple tale of the dangers of a seamen's life, and the source of his confidence in the hour of his greatest trial, whether battling with the elements or his country's foe. It is as follows: "This Bible was presented to me by Mr. Raikes at the town of Hertford, January 1781, as a reward for my punctual attendance at the Sunday school, and good behaviour when there. And after being my companion fifty-three years,—forty-one of which I spent in the sea service, during which time I was in forty-five engagements, received thirteen wounds, was three times ship-wrecked, once burnt out, twice capsized in a boat, and had levers of different sorts fifteen times,—this Bible was my consolation, and was newly bound for me by James Bishop of Edinburgh, on the 26th of October 1834, the day I completed the sixtieth year of my age; as witness my hand."—Deeds of Naval Daring

Law of the Ocean.—Judge Sprague, in a late case in Boston, was clearly of opinion that the established usage and the weight of judicial authority in America, as well as the better rule of policy, were in favor of one simple rule for all cases of steamers meeting sail vessels, namely, that the steamer should always avoid the sail vessel, having her choice which side she shall go, and that the sail vessel should always keep on her course, whether she be going free or close hauled. In this decision a sailing vessel was mulcted in damages for having altered her course to avoid collision with a steamer, and the steamer having altered her course at the same moment, the collision was caused by the efforts which were made on both sides to prevent it.

HINT TO SMOKERS AND CHEWERS.

About some three years ago (writes the *Carmarthen Journal*) a laboring man in this town was consuming two half ounce of tobacco daily, and sometimes more, paying 1 1-2d for the half ounce. On going into the shop of Mr. T P., draper and grocer, as was his usual practice, and learning that the price of tobacco had been raised to 2d the half-ounce, he laid down his pipe and tobacco-box on the counter, requesting that Mr. P. would take charge of them until he called for them.—From that day forward he deposited a fourpenny-piece (being the sum that it usually cost him for tobacco) daily in a box, and, on opening it last Saturday, he had the gratification of beholding upwards of £20 accumulated in fourpenny pieces. He then very judiciously counted out £20 worth and placed them in the savings' bank, leaving the remainder as nest eggs to invite further deposits.

Independence.—To be truly and really independent, is to support ourselves by our own exertions.—*Porter.*

HONOLULU MARINE HOSPITAL.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz., a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this, what a Hospital should be.

Patients will also be received by Drs. Rooke, Hardy, Newcomb and Guillou.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

Poetry.

WORDS OF WISDOM.

Translated from the Chinese.

[BY DR. BOWRING.]

'Tis ever man's unhappy star
Life's opportunities to miss:
It is the time—he's wandering far!
'Tis not the time,—and there he is!

When the monk and the nun are near for wooing
With nothing to do, they are always doing.

There's medicine for the body's smart;
None, for the ailings of the heart!

For loss of health there is salvation;
But none for loss of reputation!

Affairs are in a pretty state,
When 'tis the thief who keeps the gate.

Before you blame another's sin,
Just, for a moment, look within!

A single footstep, if astray,
May lead a thousand miles away.

Would you read time's future mysteries?
Study first, time's ancient histories!

When your wisdom can empty the sea with a can,
It may learn all his thoughts from the looks of a man.

'Tis the lapidary's frictions,
Which gives brightness to the gem;
'Tis man's trials and afflictions
Which bring virtue out of them.

Let not household frailties roam;
Keep domestic faults at home!

The sharpest sword that e'er was bent
Could never wound the innocent!

Wealth to the worthy and the wise
Is both a privilege and a prize!
But to the foolish and the bad
'Tis the worst curse they ever had!

The mouth but gives a dying breath,
The living pen defieth death!

To-day's gay flowers of joy—to-morrow
Will bring the bitterest fruits of sorrow!

Just as the helmsman guides the bark
Thro' stormy seas and dangerous shoals;
The hand of Heaven,—when all is dark—
Our path directs—our course controls.

When man is uttering, "So and so!"
Heaven thunders an emphatic "No!"

Spend not your wisdom on a fool—
The stupid wastes his time at school.

The slightest touch impels the noblest steeds—
And half a word is all a wise man needs!

If even when seeing, I must doubt—
How would you have me believe without?

☞ We have received a communication from one of the missionaries on Hawaii complaining that due notice was not given respecting the sailing of vessels taking supplies to Micronesia and Fatuhiva. The fact is, that it has been, in most instances, impossible to issue such notices, because the vessels left suddenly. At present there is no prospect of communicating with Fatuhiva for several months. On the arrival of the missionary on board the "Ocean Pearl," bound to Micronesia, it is expected there will be provided some means for carrying him thither, say about next June. Persons on the remote parts of the Islands, wishing to write to either station, had better forward their letters and parcels to Honolulu, to await the first opportunity.

Remarkable Events.

MARCH.

2. Wesley died, 1791.
4. First Congress, 1789.
5. Madison born, 1757.
6. Bellamy died, 1790.
7. Bible Society first commenced, 1804.
10. Benjamin West died, 1820.
15. Jackson born, 1767.
16. Bowditch died, 1838.
17. St. Patrick's day.
18. Stamp Act repealed, 1766.
20. Newton died, 1727; Cranmer burnt, 1556.
22. President Edwards died, 1758.
24. Queen Elizabeth died, 1603.
25. The Hudson river discovered, 1690.
26. Beethoven died, 1827.
29. Charles Wesley died, 1788.
30. Peace of Utrecht, 1713.
31. Calhoun died, 1850.

☞ Capt. Wing (late commander of the whale ship "Equator," the account of the wreck of which will be found in another column,) arrived at Honolulu a few days since, passenger on board the "What Cheer," from China, and has already sailed for the United States.

☞ We are again indebted to Sullivan's Newspaper Office, of San Francisco, for files of late papers.

Information Wanted,

Respecting REUBEN G. ROGERS, belonging to New Bedford. He sailed from that port in ship "Canada," Oct. 1, 1851. Intelligence may be communicated to the editor, or the young man's father, Mr. James W. Rogers, of New Bedford. tf.

☞ **NOTICE.**—The Trustees of the Honolulu Sailor's Home Society will hold a meeting next Tuesday evening, March 6th, at 7 o'clock, at the Bethel Vestry. A punctual attendance is requested, per order of EXECUTIVE COMMITTEE.

MARRIED.

In Honolulu, by the Rev. S. C. Damon, February 6, Mr. JOHN THOMAS GRAHAM to NIAU; and Feb. 27th, ALEXANDER KELLY to KAMAKA.

DIED.

In Milford, N. H., December 11, 1854, Dr. ROBERT FULLER, aged 93 years. He wes the father of J. Fuller, Esq., of Honolulu. He was one of the few who lived to tell the present generation of events in America which occurred before the Revolutionary War. We saw him in '51, a hale old gentleman of 90 years.

In Honolulu, January 21, at the City Hospital, Mr. GEORGE IRELAND, belonging to Monterey, Cal. He came passenger on board the "Pontiac," and died two weeks after his arrival.

Passengers.

Sch. T. H. Allen, from San Francisco.—D. F. Farrall, P. H. Dorn, C. Coleman, E. Sundherman, J. Morren, A. Campbell, A. Trobch, Mr. Edwards, J. Jackson, N. Brown, B. Gan, A. Frederick.

Ship Vancouver, from Boston.—Miss C. F. Gould, Mrs. J. A. Law, and two children.

Brig M. A. Jones, from Sydney.—R. Taylor, Mrs. Montague, J. A. Vance, G. A. Sturges, Capt. Yates, lady and child, Mrs. Barnes, Miss George, Wyman, Allen, T. C. Porter, J. Thomassait.

Sch. E. L. Frost, from San Francisco.—E. Eastwood, S. B. Peterson, Mr. Jenney.

Sch. Vaquero, from San Francisco.—T. Ober, R. R. Kinney, Aikin, Aki, J. Kelley, Atoo, A. Richt, C. Wing, F. Tinker, J. G. Lowe, J. B. Peachy.

Bark Frances Palmer, for San Francisco.—Mr. Baker, Marvin, Quimby, Groves, Hammond, Grey, Lewers, Chester, Moore, Williams and family, (15 persons) Moore, Wright, Dewey, Osborne, Spear, Lawson.

Sch. Frances Helen, for San Francisco.—W. O. Allen, H. B. White, W. M. Price, E. Hitchins, N. Davis.

Ham. brig Johanne Hansing, for Callao.—C. G. St. Clair, lady and child, A. T. Hoyt, Hoyt, Mitchell, Chase, C. H. Gyncke, H. Smith, Murrey, C. Beck, A. Emes, D. Neil.

U. S. Ship St. Mary's, for San Francisco.—Barnum W. Field.

Per bark What Cheer, P. W. Graves, J. H. Wing, A. H. Haight, C. Carrol, 6 steerage and 183 coolies.

By the Vancouver, for Shanghae, B. F. Angel, late U. S. Consul for Honolulu.

By the Vaquero, for San Francisco, Mr and Mrs Baker, Fey, A. J. Wing, A. J. Haight, W. B. Carroll, R. Taylor, Allen, Chase, E. Overbeck, Rommerger, W. Murphy, Stevenson, S. H. Allen, G. Barnett, Stansheman, Coleman, E. Pitch, W. Brown, A. Troubits, J. Morell, D. Weil, Mr. Gardner, G. Gilmore. J. C. Bullions, with lady, child and servant.

By the Auckland, for S. F., Croswell, Mrs. Osborne and child, W. W Hahiber.

By the Pontiac, for Tahiti, W. P. Avis, G. Randon, S. F. Monet, B. Andre.

By the Hero, from Bremen, Mrs. Breckwedde and son.

By the Agate, from Portland, J. Riley, A. B. Wilson, T. Butler, Crandal, Flemming, McConnell, T. Pierce.

By the Restless, from San Francisco.—Mons C. de Varigny, Madame C. de Varigny, Capt. J. Allen, M. E. Mills, Esq., Jeremiah O'Neil, Mons. P. Maes, Chas. McCandler, H. Felkins, M. Enstaven, J. H. Sawyer, H. Peenks, M. Kowille, Wm. Frier.

By the Marquis of Bute, from London.—Miss Miller, Richard Walker, D. Montgomery, Margaret Clampton, eighteen passengers for Vancouver's Island.

By the City of Norfolk, from Melbourne.—Mr. W. H. Hamilton, D. C. Anderson, Edwin Booth, H. McDonald, Richard Blair, Walter Hicks, Edward Bray, Clement White, Mrs. Hamilton.

By the Leveret, from S. F.—L. Depeaux and wife, W. M. Depeaux, Messrs. Root, Birch, Wilson, Goddard, Strick, Hannaw, Cross, Smith, Eldridge, Wilborn, Lewis, Treat, Loose, Halland and Fatter.

MARINE JOURNAL.

PORT OF HONOLULU.

Arrived.

Jan. 27—Am sch. T. H. Allen, Waitt, 21 days from S. F.
29— " Sh. Vancouver, Jenkins, 134 ds. fm. Boston.
" Brig M. A. Jones, Barnes, 77 ds. fm. Sydney, via. Tahiti.
" Sch. E. L. Frost, Hempstead, 22 ds. fm. S. F.
31— " " Vaquero, Harris, 15 ds. fm. S. F.
Feb. 1— " Bark Auckland, Nelson, fm. Lahaina.
Feb. 5—Am. bark What Cheer, Baker, Hongkong.
7—Br. bk. Conrad, Fox, Liverpool, 8½ mos. via Rio Jan.
5—Am. wh. ship Cincinnati, Williams, Lahaina 1500 wh. 60 sperm.
9—Am. wh. ship Herald, Derrick, San Francisco.
9—Am. wh. ship Jefferson, Hunting, Sag Harbor, 16 mos.
Feb. 14.—Am. bark Lark, Gibbling, from a cruise.
14.—Mexican brig Hero, Weydemann, 134 days fm. Bremen. Merchandise to Melchers & Co.
16—Am. wh. bark Shepherdess, Watrous, Mystic, cruise.
16.— " brig Agate, Collins, 40 ds frm Portland, O. T.
Feb. 17—Am Steamer City of Norfolk, Green, 62 ds fm Georgetown, via Tahiti.
19—Am Schr. Restless, Brown, 23 ds fm San Francisco.
Br Ship Marquis of Bute, Moir, 147 ds fm London.
20—Am Ship Samuel Robertson, Washburn, 26 mos. out.
22—Br. Bk. Leonidas, Morrison, 141 ds fm Liverpool.

The Friend.

HONOLULU, APRIL 2.

☞ Since our last paper was issued, the Trustees of the "Honolulu Sailor's Home" have held several meetings, and made the necessary arrangements for inviting "Builders and Contractors" to forward their proposals for erecting a building about 60 feet on Merchant st., and 44 feet on Bethel street. This building is to be three stories high, with verandahs in front and rear. It is the design of the Trustees that this building shall be ready for occupancy the coming autumn.—The corner room on the second story, (say 37 x 24,) will be reserved for a Reading Room and Museum. It will be one of the most suitable rooms for that purpose which could be selected in the whole building. Unless some unforeseen obstacle hinders the enterprise, this room will be fitted up in a style and manner every way worthy of the establishment.

The time has not yet arrived for the Trustees to enter upon the business of fitting up the establishment, but the prospects, thus far, are quite encouraging. In prosecuting this enterprise, it is no uncommon occurrence, to meet with those who profess to believe in the impracticability of the undertaking, while others content themselves with presenting and dilating upon its difficulties. All we can reply is, such undertakings have succeeded elsewhere, and accomplished much good, and we can see no valid reason, why a fair experiment should not be tried, in Honolulu. As to the need of a Sailor's Home, such as it is now proposed to build, there can be but one opinion, among sensible persons, acquainted with the accommodations, which have been provided for seamen, discharged here. This necessity yearly increases.—More seamen are discharged at Honolulu, than formerly. Ship owners and ship agents, by changing the manner of prosecuting the whaling business, have introduced new customs and practices among seamen. Formerly ships left the whaling ports of the U. S. and discharged no part of their "catchings" until the ship returned home, after a one, two, or three year's voyage, but now ships leave to be absent an indefinite period, sending home their oil after each season's cruise.—This new feature has introduced an almost universal practice of shipping seamen by the "season." To meet the necessity of the case, a good Sailor's Home should be erected in Honolulu. Ship masters, and ship owners too, have been heard to say, "There was no need of a "Home" in Honolulu—it would only induce seamen to leave their ships." To this, there is but one reply,—"Gentlemen, it is your own course of conducting the whaling business, which has led seamen to become 'seasoners." You have created the necessity for the "Home." You have laid the burden upon the benevolent of Honolulu, of providing a good "Home." You are surely called upon by every sentiment of justice, honor and humanity, to second this enterprise, and by your generous contributions, enable the friends of the cause to make one honest and fair experiment. *You* will receive direct pecuniary benefit, for it is to be hoped that hereafter, your ships will be manned by better, more healthy and more temperate men."

Now is the time for donors to forward their subscriptions. By glancing at List "No. 5," it will be seen that the sum of $500 is required to complete the amount required by the Government, before a deed of the land will be granted.

After all, some are ready to say, sailors will not patronise the "Home." Very well, let us build a good, convenient and handsome "Home." Let us fit it up, and render it every way worthy of patronage; then, if Jack will not take up his quarters in it, let the building stand unoccupied until every nail rusts off, every board falls, and every timber decays; it would then prove one of the noblest monuments which was ever built, to commemorate the good wishes and good intentions, of the community towards the "sons of the ocean." Who anticipates such a result? If seamen permit it, they are a very different class of men from what we have found them to be. Jack may be a queer fellow,—an odd specimen of humanity,—but he is no fool!

☞ Our readers will find in our columns, a long letter copied from the "London Illustrated News," giving an account of the attack on Petropaulovski, and written by an English officer, who was present. We have copied the letter, although long, because it appears to be written in a fair, truthful and candid style. The statements correspond, with the verbal accounts of the officers in their visit, at Honolulu, subsequent to the attack. It will be recollected by some of our readers, that, we did not even allude to the affair, when the intelligence first reached the islands, and we refrained for the simple reason, that the accounts published were so conflicting that we did not know what to believe. It was reported that "two Americans" had intentionally guided the landing party, in a wrong direction. That report was subsequently denied, and the assertion made that one of the *Americans* was an *Irishman*, and the other a *German*. We do not pretend to assert what was the exact truth, in the case. All we know however is, both were runaway sailors, from an American whale-ship. The writer of the letter, now published, does not pass any reflection upon the error of the *American guides*, and the inference is, that *Jack*, American, Irish, or German, was guilty if no breach of trust.

Future operations of H. Missionary Society.

We have been requested by the Directors of this Society, to call the attention of Missionaries, at the remote stations, to the importance of reporting the names of such persons among their people as they may deem properly qualified to join the Micronesian Mission. It is confidently expected that measures will be taken to communicate with that Mission, soon after the general meeting in May. A suitable vessel may be bought, or chartered, unless other opportunity offers. It is known that a Missionary of the "Board" is now in Honolulu, destined for that Mission; and another Missionary is on board the "Ocean Pearl," expected here in a few weeks. It seems altogether desirable to extend the operations of that Mission now, if ever—hence the importance of sending out more Hawaiian Missionaries, if suitable persons can be found who are ready to go.

There is another point to which we would call the attention of the Missionaries at the remote stations. It will be recollected that the Directors of the Society were authorized, at the last annual meeting, to employ one-fourth part of the funds of the Society for domestic purposes, to aid indigent churches, &c. A portion of that appropriation still remains in the Treasurer's hands. It is known that there are portions of the islands where the people are poor and need help. Whenever their cases are properly represented, appropriations will be made.

The Culture of Silk and the Vine.

The culture of silk has been tried at the Sandwich Islands, and found to be impracticable. Some fifteen years ago high hopes were entertained that this would become a silk producing country, but long since those hopes have been abandoned, and they probably will not be revived until an exceedingly dense population occupies the Hawaiian Islands.

The culture of the vine, we imagine, would be doomed to the same fate, should it be undertaken, as a mere matter of pecuniary speculation. At present the cultivation of the vine, for the purpose of producing wine, is forbidden by the laws of the Kingdom.—Should that tabu be entirely removed, we do not imagine that it would lead to any extensive cultivation of vineyards for the purpose of wine manufacture. It was made tabu for consistency's sake, we suppose, more than for any other purpose. Inasmuch as the Government, for good and satisfactory reasons, made tabu, the manufacture of such vile drinks as awa, the product of the ti-root, sweet potatoes, molasses, &c., &c., we suppose it included the cultivation of the vine for wine manufacture. This, however, does not include the cultivation of the vine for eating purposes. Never yet has the vine been cultivated to sufficient extent to supply the market with grapes, one of the most delicious, nutritious and harmless fruits. Hitherto grapes have sold at prices ten fold, yes, a hundred fold higher than they would have paid to have been manufactured into wine. If the removingof the tabu upon the manufacture of wine *would* increase the cultivation to an extent sufficient to supply our markets with a choice variety of grapes, and at a reasonable price, we should be glad to see it done. We say this not because we desire to see wine manufactured here, and we have no expectation that it would, even if the Government should offer *a bounty*. Let not the tabu, however, be removed, if the hydra-headed monster, Alcohol, shall be allowed to raise erect, his awa-head, ti-root-head, rum-head, or any other of his heads.

The following remarks upon the culture of the vine and silk, we copy from the first volume of Bancroft's History of the United States. The historian was led into this train of remark, in noticing the action of the Virginia Assembly, when it first began to legislate, under a written Constitution, in 1621:

"The business which occupied the first session under the written constitution, related chiefly to the encouragement of domestic industry; and the culture of silk particularly engaged the attention of the assembly. *But legislation, though it can favor industry, cannot create it.* When soil, men, and circumstances, combine to render a manufacture desirable, legislation can protect the infancy of enterprise against the unequal competition with established skill. The culture of silk, long, earnestly, and frequently recommended to the attention of Virginia, is successfully pursued, only when a superfluity of labor exists in a redundant population. In America, the first wants of life left no labor without a demand; silk-worms could not be cared for where every comfort of household existence required to be created. Still less was the successful culture of the vine possible. The company had repeatedly sent vine-dressers, who had been set to work under the terrors of martial law, and whose efforts were continued after the establishment of regular government. *But the toil was in vain. The extensive culture of the vine, unless singularly favored by climate, succeeds only in a dense population; for a small vineyard requires the labor of many hands.* It is a law of nature, that, in a new country under the temperate zone, corn and cattle will be raised, rather than silk or wine."

Those lines of the foregoing paragraphs which are italicised, were so printed at our suggestion. The truth is, this paragraph contains valuable hints, for legislators in this or any other land. So much must not be expected of any government. Governments may not be able to make the people industrious, but they can hinder industry. In years past, the Sandwich Island government has stood out resolutely against the manufacture of intoxicating drinks, and we hope it will continue the same policy, so long as the flag of the Kamehamchas shall wave. This is one of its glories.

"And that ye study to be quiet."

Orderly, peaceful; living in the practice of the calm virtues of life. The duty to whieh he would exhort them was that of being subordinate to the laws; of avoiding all tumult and disorder; of calmly pursuing their regular avocations, and of keeping themslves from all the assemblages of the idle, the restless, and the dissatisfied.

"And to do your own business."

The injunction here is one of the beautiful precepts of Christianity so well adapted to promote the good order and the happiness of society. It would prevent the impertinent and unauthorized prying into the affairs of others, to which many are so prone, and produce that careful attention to what properly belongs to our calling in life, which leads to thrift, order, and competence. Religion teaches no man to neglect his business. It requires no one to give up an honest calling and to be idle. It asks no one to forsake a useful occupation, unless he can exchange it for one more useful. It demands, indeed, that we shall be willing so far to suspend our ordinary labors as to observe the Sabbath; to maintain habifs of devotion; to improve our minds and hearts by the study of truth; to cultivate the social affections, and to do good to others as we have an opportunity; but it makes no one idle, and it countenances idleness in no one. A man who is habitually idle can have very slender pretensions to piety. There is enough in this world for every one to do, and the Saviour set such an example of untiring *industry* in *his* vocation as to give each one occasion to doubt whether he is his true follower if he is not disposed to be employed.

"And to work with your own hands, as we commanded you."

This command is not referred to in the history (Acts xvii.,) but it is probable that the apostle saw that many of those residing in Thessalonica, were disposed to spend their time in indolence, and hence insisted strongly on the necessity of being engaged in some useful occupation. Comp. Acts xvii. 21. Idleness is one of the great evils of the heathen world in almost every country, and the parent of no small part of their vices. The effect of religion everywhere is to make men industrious; and every man, who is able, should feel himself under sacred obligation to be employed. God made man to work (comp. Gen. li 15; iii. 19,) and there is no more benevolent arrangement of his government than this. No one who has already enough for himself and family, but who can make money to do good to others, has a right to retire from business and to live in idleness (comp. Acts xx. 34r Eph. iv. 27;) no one has a right to live in such a relation as to be wholly dependent on others, if he can support himself; and no one has a right to compel others to labour for him, and to exact their unrequited toil, in order that he may be snpported in indolence and ease. The application of this rule to all mankind would speedily put an end to slavery, and would convert multitudes, even in the church from useless to useful men. If a man has no necessity to labour for himself and family he should regard it as an inestimable privilege to be permitted to aid those who cannot work—the sick, the aged, the infirm. If a men has no need to add to what he has for his own temporal comfort, what a privilege it is for him to toil in promoting public improvements; in founding colleges, libraries, hospitals, and asylnms; and in sending the gospel to those who are sunk in wretehedness and want! No man understands fully the blessings which God has bestowed on him, if he has hands to work and will not work.—[*Barne's Notes on* 1 *Thessalonians*, 4: 11.

Religious Changes in Ireland.—In a recent number of "*The Dublin Nation*," appeared a long article on this topic, in which the editor says:

"The Irish nation is fast dissolving, as the Jewish nation dissolved before the curse of God—as the Carthaginians dissolved before the sword of Rome—as the Red Indian race silently dissolves before the face of the white man. *Ireland is ceasing to be a Roman Catholic nation.* Priest Fitzgerald, in a recent speech, admits, 'Our nation 'and our church are perishing.' An organ of Romanism says, 'Shall the soupers and tract distributors accomplish 'the work which all the force of England for three hundred years has been unable to effect?' "

Again:

"We are afraid that neither the priesthood nor people of this country have any idea of the system of proselytism carried on under their eyes. Its agents and its emissaries—from the wealthy fanatics of Exter Hall down to the meanest Bible reader in Connaught—are continually at work, and God only knows the evil they have wrought. It is time, and God knows, full cause, to preach a crusade against it. It has had incalculable success."

Fatuhiva Correspondence.

Superstitions, Idolatry, Tabus, &c., &c.

Mr. Damon:

Dear Sir:—An opportunity presents itself of redeeming the promise I made in my last, of giving you an account of the superstitions of these people. Were I within speaking distance, I should be inclined to ask permission to retract it, for I find that the subject of Marquesan superstitions has been discussed before. What I may have to say may, perhaps, prove tedious instead of interesting.

Human nature is here seen without disguise. The truth is conspicuous, that "men love darkness rather than light." Marquesans have a tact for believing almost any thing but the truth. It is hard to find out what they really do believe—each family appears to have a set of notions of its own.—However, they all believe that there is a soul. The souls of the dead are what they worship as gods. Some think that after death the soul goes to a place situated below the earth, called "Havaii pe;" others think it "goes up into the skies;" but the greater number believe that it lives in the burying-grounds. From the fact of the offerings to the gods being always taken to the burying-grounds, I conclude that the last is the prevailing opinion among all the different tribes.

I had an opportunity, a few months ago, of witnessing the manner in which these natives deify the souls of the dead. The ceremony consisted of singing and clapping of the hands, accompanied by the music of the drum and the conch-shell. The chorus to the chants was, "Thou art a god, thou art a god." The ceremony was kept up two nights, commencing at sunset and closing at sunrise. Pauses in the singing and music were filled up by the cries of the women.

The gods are of different ranks; some are feared by their relatives only, others by the whole tribe; and one called "Tuopana" is an object of dread to the whole island. He is styled the "guardian of the country," and appears to have risen to importance through being the father of many children. Marquesans think that he who has the most children has the greatest claim to veneration. The dances for which the natives are now preparing, are in honor of the father of this god.—They say, that if they "honor the father, the son is likely to be propitious, and so send them plenty of breadfruit and keep away diseases from them." But I am inclined to think that the debauch which is to accompany the dances, will be more likely to produce the evils that are so much dreaded, than to avert them.

The chirping of the cricket is supposed to be a sound made by the gods. The natives very often address questions to this noise. If it continues to sound after the inquiry is made, an affirmative answer is given; but if it ceases, the answer is negative. By a sort of ventriloquism, the priests, in their nightly mummeries, throw the voice upon the roofs of their houses, in imitation of the sound.—The imitation is not altogether perfect, but the natives are credulous enough to believe it so. The priests gain great applause by this art; they make the natives believe that they have power to call the gods, and to drive them away again at pleasure. Marquesan credulity disposes them to believe almost any thing their priests tell them. A short time ago a native, living a few paces from me, ate a piece of a tabued hog, and took sick shortly afterwards. A priestess from a neighboring bay undertook to cure him. She told him, in the first place, that he had offended the gods by eating one of the tabued pigs. One of his legs being much swelled, she said it was the pig—the gods had put it into his leg—and in order to cure him, she must extract it! She commenced the work of extraction by drawing forth the bristles of the hog; afterwards, she successively drew forth the firewood, stones, and the leaves used in roasting it—but its body she was unable to find. I did not witness these wonders, but the natives asserted positively, that she performed them all; and moreover, that the roof of the house was covered with gods, and she had hard matter to keep them off while she was engaged in the work of extraction.

Previous to this, another priestess took out cocoanut leaves, sticks, stones, and several baskets of dirt, from a woman's eye. The natives tell this for a fact. I only received a silly grin, when I asked if a person's eye would not be a convenient place to have a tarrow-patch.

I have attempted to show up these follies, but I feel persuaded now that the natives cleave to them, not so much because they believe them, as because they are agreeable to the depraved heart. They will ever form a part of the Marquesan's character, as long as his heart remains unchanged.

Dreams are one of the greatest taxes on property. If a Marquesan dreams about a pig, or a bunch of bananas, or breadfruit, it is a tribute to the gods, and must be offered. The bananas and breadfruit are carried to the burying-grounds, and generally falls a prey to the priests. The pig is permitted to roam at large, with an insurance against a sanguinary death.

Some have admitted that dreams are caused by indulging in late suppers. The cause, they say, is nothing—the fact is the thing—dreams are dreams, by what manner soever they may be caused. The soul is supposed to leave the body, and to travel to the regions of the dead, to hold converse with the gods. This notion keeps alive the dread of the gods; it seems, in fact, to be the main support of the Marquesan's religious belief. Tell him that his gods are the creatures of his imagination, he replies, "they are realities, for I have seen them in the hour of sleep."

The notion exists, also, that Marquesans cannot have the same god as the foreigner. This, I suppose, is the belief in all heathen countries. Here, however, the natives lay particular stress upon it, and say that they will not give it up, until the missionaries, by some sign or miracle, show them the truth.

The tabus draw their firmest support from their connection with religious belief. The gods are supposed to punish every violation of them. This is a complicated system; it affects every movement in society. Selfishness and the desire to degrade the women appear to be the basis of it.

Yours truly, J. BICKNELL.

P. S. We are about the same as when I last wrote. All well, excepting the wife of one of the teachers. My hopes are brightening every day, or perhaps I should say, my heart is getting stronger every day. The natives still keep aloof from us, and tell us oftentimes, that they do not want to serve our God. This, however, does not discourage us much, because God has said that the hearts of men are in His hands, and He can turn them whithersoever He willeth. This assurance gives us strength; it bids us draw encouragement—not from prospects, but from the promise of His assistance.

The ship Clematis, Capt. Benjamin, is at anchor in the bay. She has just taken in a supply of water. Captain B. has been put to some trouble, in consequence of his men being supplied with liquor by the white men here.

The Nautical, Capt. Luce, was off the bay yesterday. She reports that two of her men were killed on Tahuata.

The chief Panau, of Resolution Bay, was worsted in an engagement with another chief, and obliged to remove his quarters to Hivaoa.

J. BICKNELL.

Ireland.

Ireland is one of the most beautiful islands on the globe; and one of the most fertile and productive. Whilst destitute of the grandeur of Switzerland, and of the warm, sunny skies of France and Italy, there it lies anchored on the western extremity of Europe, in varied scenery, in quiet beauty, in exhaustless fertility, the very gem of the sea. It is not of volcanic origin,—nor, like some of the Islands of the Pacific, is it the work of marine insects—it is obviously a direct creation of God; and, no doubt, lay under his eye, and was an object of his special regard, when he "saw everything that he had made, and behold it was very good." There it lies on the western borders of Europe the last land on which the moistened eye of the emigrant lingers, who is seeking a home in the New World; and the first to gladden the eye of tourist, when he goes forth from our land to seek instruction and recreation amid the classic or historic scenes of the Old. The very first sight of the bold headlands, or of its beautiful fields, almost perpetually verdant, sloping to the ocean, bearing a fruitful harvest down to high water mark,—tell the whole story. None seeing it will afterwards wonder at the love of the Irishman for his home.

In his mind and heart it is associated with all that is beautiful in nature, mild climate, genial in soil, and sweet in home! Nor will any wonder, that some speculators have been disposed to refer to Ireland, not only the legend of the famous island of Atlantis, mentioned by Plato and other writers, but also the still earlier fables of the Isle of Calypso, and the Hesperides, and the Fortunate Islands, and the Elysian Fields of Homer and other ancient poets. Ireland had its civilization before England and from its schools learing went over Europe, whilst England was yet in darkness. Ireland's history has yet to be truly written. Thus far, it has fallen into partizan hands, like the life of Napoleon by Scott, or that of Cromwell by Hume, and the Cavaliers. Ireland has a history; may it have a historian worthy of it! The man who will do for Ireland what Carlisle has done for Cromwell, will write his nome upon the rock forever. Nor do we despair of this. The Muse of history has commenced revealing the secrets of past ages, and although "like the fabled sybil, she only reveals, leaf by leaf," our faith is strong that she will make revelations sufficient to enable some of Ireland's many gifted sons to do her full historical justice. [N. Y. Observer.

New Public House Act for Scotland.

In the "Bristol Temperance Herald" for August, '54, there is a long article showing the beneficial effects of a "new Act," regulating the sale of intoxicating liquors in Scotland. The principal features of the law are the following:

1. Beer and spirit dealers shall not sell or give intoxicating liquors, to be drunk on the premises.

2. Another clause prohibits the *licensing of any toll-house, unless it be six miles from any other licensed house in the same county.* This is a decided boon, more especially to farm servants, in taking agricultural produce to market; but in general also to all who have occasion to travel on public highways. These licensed toll-houses proved so many snares and traps, and were productive of immense mischief.

3. The act further prohibits a blacksmith keeping a public house, or selling intoxicating drink in the vicinity of his smithy.

4. One provision, in its bearing upon the rising generation, merits attention: it prohibits the keepers of places for the sale of intoxicating drinks, *allowing boys or girls to assemble therein,* or supplying liquor to boys and girls apparently under fourteen years of age. This at once, of course, renders illegal those drinking saloons which have proved so detrimental to the youth of our country. The act also prohibits the sale of drink *to persons in a state of intoxication.*

5. It prohibits the opening of places for the sale of intoxicating liquor before eight o'clock in the morning, or keeping them open after ten at night.

6. It prohibits the traffic during the whole of the Sabbath. *'Capital!'*

7. The act provides that *any policeman or constable may at any time enter all places for the sale of intoxicating drink.* This, though brought forward by some as a hardship to those in the traffic, peculiar to this act, was in existence before. In addition, it extends this provision to all places of public refreshment, whether licensed for the sale of intoxicating liquors or not—an extension of the provision, necessary to admit of putting down illicit traffic. Such is a summary of the act: of course it has its penalties, which need not be mentioned, farther than to state that, besides pecuniary fines, or imprisonment for non-payment, three convictions of contravention of the act incapacitates the person from ever holding a license again.

In glancing over the principal features of this law, we are almost led to the conclusion that *somebody* must have furnished the lawmakers for Scotland with a copy of the Hawaiian license laws. Between the two "Acts" there is certainly a striking resemblance. It certainly should be highly encouraging to Hawaiian legislatures, that older countries are following in the wake of this young kingdom! Surely, the present is no time to take *any steps backward,* but rather to follow up former "Acts" of legislation by more stringent measures.

The new Act went into operation, in Scotland, in the month of May, '54. The good effects began to appear very soon. A gentleman writing from Edinburgh under date of June 12th, employs the following language:

"I yesterday (Sabbath) walked over the chief streets, and through the famous old haunts of drunkenness, and had I not seen the marvellous moral change with my own eyes, I could scarcely have credited it. I formerly took the statistics of one wicked, *wicked,* square, and went through it again and again last year, both by night and by day, and it was then a very pandemonium. The most indecent things were openly done, the most blasphemous things loudly spoken, at that time. The act has hushed and cleansed the whole place. Yesterday it seemed pervaded by the calm and purity of a real Sabbath– a Sabbath in earnest. The police are doing their duty. I have had conversation with several, and there is a sympathetic spirit in all of them, as far as I can judge, with the new law. All of them confess that it is working well—that the decrease of trouble and committals is beyond all question."

Now, let it be remembered that this is the same city in which there were counted, on one Sabbath afternoon and evening, upwards of forty thousand visits to the public houses and dram-shops. In reference to the same city, but bringing out a different feature in the effects of the act, arising in part from the suppression of the Sabbath traffic, we find the following in an editorial article of the *Edinburgh News* of 1st July:

"Thursday last was devoted to the examination of this matter among the largest workshops and other kinds of works in Edinburgh; and the universal testimony of employers is, that the change for the better, since the introduction of the new law, is quite decided and unmistakeable; and this, two ways: first, because their men—we of course speak generally—all come now on Monday mornings, which many of them nearly never did before; and this, not only because no Sunday debauch has quickened their "drouth," but because nothing can be got to quench it until so close upon breakfast time, as to make the drink not worth the havtng to anv, except the more depraved among the workmen. Morning drinking was really that which cost the most of the men their day or days of drinking, and all employers whom we saw, placed this amongst the prominent advantages of the new bill, both to the men and to the public. Nor is this advantage confined to Edinburgh."

We could quote other extracts showing the beneficial effects of the "new Act" in Glasgow, Dundee, and other towns of Scotland. How hopeful and how encouraging! Three cheers for Scotland!

☞ It was announced in our January No. that some enterprising men had established a whaling post at Kalepolepo, in Maui. We are happy to learn that they have succeeded in capturing three humpbacks. Well done, boys. This is making a better season of it than most of the ships!

The Beer Shops.

There is no one subject which is now so much a source of general complaint, and so detrimental to public morals, as the beer shops of Honolulu, and report says that Lahaina and Hilo are no better off. They have been licensed by the government, but they subject the government to endless vexation. The police courts and police officers furnish abundant evidence upon this subject. The question arises, what shall be done? We answer, apply the "Maine Law," sweep them off, shut them up, or get rid of them at any rate. If merely *small beer* was disposed of at them, they would not, perhaps, be so vexatious, but the truth is, they are a fruitful source of drunkenness to His Majesty's native subjects, and their baneful influence is upon the increase. If it should be that any of the Representatives of the Lower House should be found pleading for their continued existence, and should successfully argue his cause, then we hope the Legislature will pass an act authorizing that no license shall be granted except to those persons who live next door to the dwellings of such Representatives. The injured public may rest assured, that if those men are elected next year, they will go for abolishing these corrupting and festering nuisances. We were recently informed that the liquor sold under the name of beer, contained, in some instances, a very strong *decoction of tobacco.* Persons under its influence exhibit more the symptoms of madness than they do of drunkenness.

Since writing the above remarks, the following extracts from a late English paper have attracted our notice:

For several weeks in succession a warm controversy has been going forward in the columns of the *Bristol Mercury,* between Mr. Wadge, a Bristol publican, and Mr. Thornton Herapath, an eminent chemist of this city. The latter gentleman in a lecture recently delivered, stated that beer and other malt liquors were extensively adulterated with the extract of the berries of Cocculus Indicus, which allegation the landlord of the *Globe,* on behalf of his fraternity, strenuously denied. In last month's *Chemist* there is a communication from Mr. Herapath, proving from chemical analysis and extracts from the works of some of our most celebrated chemists, that his charges can be fully substantiated. We have only space to subjoin an extract from Mr. Accum, who has written much on the adulteration of Food.

"Every person is aware that to increase the intoxicating quality of beer, the deleterious substance called cocculus indicus, and the extract of this poisonous berry, technically called "black extract," or by some, 'hard multum' are employed. The latter is ostensibly destined for the use of tanners and dyers. The quantities of cocculus indicus berries as well as of black extract brought

into this country, for adulterating malt liquors, are enormous. There are particular chemists [druggists] who make it a regular trade to supply drugs and nefarious preparations to the unprincipled brewers of porter and ale. Most of the articles are transmitted to the consumer in the disguised state or in such a form that their real nature cannot possibly be detected by the unwary. An extract, said to be innocent, sold in casks containing from half a cwt. to five cwt. by the brewers' druggists, under the name of 'bittern' is composed of calcined sulphate of iron (copperas) extract of cocculus indicus berries, extract of quassia and spanish liquorice. This fraud constitutes by far the most censurable offence committed by unprincipled brewers; and it is a lamentable reflection to behold so great a number of brewers prosecuted and convicted of this crime. From these statements and the seizures that have been made of illegal ingredients at various breweries, it is obvious that the adulterations of beer are not imaginary."

These statements, from so eminent an authority as Mr. Accum, with others that have been brought forward in the present controversy, will, we expect, prevent the publicans, or their friends, from continuing a contest that puts them in a worse position every step they take. So notorious is the practice alluded to by Mr. Herapath, that we wonder prudential considerations did not at the outset induce them to follow the example of an old sailor,—who, when convicted of an act of outrageous conduct, observed, "It's a shocking bad piece of business, and the less said about it the better."

[From the Albany Evening Journal.]

The Maine Law.

The rise and progress of laws in various States, prohibiting the sale of intoxicating drinks, is briefly exhibited by the following abstract:

1851—Passed by Legislature of Maine.
1852— " " Minnesota.
" — " " R. Island.
" — " " Mass.
" —Ratified by the people of Minnesota.
" —Passed by Legislature of Vermont.
1853— " " Michigan.
" —Ratified by the people of Vermont.
" — " " Michigan.
" —Its submission to the people pronounced unconstitutional by the Supreme Court in Minnesota.
" —Pronounced unconstitutional by U. S. Supreme Court in Rhode Island.
" —State Supreme Court equally divided in Michigan.
1851—Pronounced unconstitutional in Massachusetts.
" —Passed by Legislature of New York.
" —Vetoed by Governor.
" —Passed by one branch of Legislature of New Hampshire.
" —Passed by Legislature, but two branches fail to agree in Penn.
" —Passed by Legislature of Ohio.
" —Voted for by people of Wisconsin.
" —Pronounced unconstitutional in Ohio.
" —Passed in modified form by Legislature of Rhode Island.
" —Passed by the Legislature of Connecticut.

It will be observed that it has passed the Legislatures of seven States and a Territory. It has fallen, through legislative disagreement, in four. It has been submitted to the people, and ratified by them, in four. It has nowhere been repealed by the Legislature, though it has been four times set aside by the Judiciary, and in one, re-enacted in a modified form.

It will probably be the subject of discussion in the Legislatures of all the Northern States, this winter, and in those of Maryland, Virginia, Delaware, South Carolina, Georgia, Kentucky, Tennessee and Texas.

The London Times.

A correspoudent of the Providence Journal thus narrates a visit to the office of the great English paper:

"Among many other famous places in London, I have visited the office of the London Times. To view the establishment, application must be made by letter to the manager. This dispatched, a reply was promptly received by post, and on the card was named the hour when the presses could be seen in motion. Mr. Applegarth, a brother of the inventor of the press there used, and for many years a superintendent of the machinery, a very amiable gentleman, conducted me through the various departments, freely answering inquiries, and explaining everything as he went along. Some idea of the resources and extent of the Times office may be had from the single fact that upwards of $300,000 are paid annually for stamps, a penny, or two cents, being paid on each number of the paper issued. The daily circulation is 52,000 copies, each number, including the supplement, containing sixteen pages. Two hundred reams of paper are used every day, each weighing from 86 to 88 pounds, making in all from eight to nine tons. The quality of the paper every one knows who has read the Times. Each sheet costs the publisher a penny and a half, or three cents, before it is printed. One of these presses were put in motion at one o'clock P. M. to print an edition to be sent off by the mail an hour later. Twenty men were employed on the press, part of them above in a gallery to supply paper, and a part below to receive the printed sheets as they came out. The noise of the machinery was so great that it was difficult in conversation to be heard. The number an hour is 12,000.

By holding a watch and counting, I discovered that each man received from twenty-two to twenty-four a minute. Now and then a sheet with an imperfect impression would be hastily thrown out by one of the sharp-eyed men below, and once or twice, at the stroke of a bell, all the weels stopped, and the great machine rested for a moment, then, at another signal, commenced the stunning clatter again. I was shown the vaults were the large stock of paper is kept. So much is now used that the supply is sometimes short of the demand, and the price is much advanced. For some time an advertisement has been standing in the colums of the Times, offering a reward of $5,000 for the discovery of a substitute for rags in the manufacture of paper. This is made by the proprietor of the Times. I believe the man has never been met who has seen the editor of the Times, but I am convinced there is such a personage, for I have heard his name pronounced, and been shown his room and chair. The editing of the paper is carried on within the publication building to a greater extent than has been stated.—There are convenient rooms fitted up for the purpose, and also for the use of reporters.—During the sessions of Parliament a large number of skillful reporters are employed.—These are relieved every half hour, and are conveyed to and from the legislative place in cabs, no one remaining on duty longer than the prescribed time. In viewing an establishment like that of the Times, and reflecting upon the vast influence, it exerts, one cannot but be filled with wonder and awe."

Too Bad.

Good brandy, is in our estimation a bad drink, but bad brandy is intolerable. Only think of the abominable mischief which must result to brandy drinkers throughout the world, by the fact, that *whiskey* and *rum* are in process of being manufactured into brandy!

The following paragraph from the New York *Journal of Commerce*, shows the manner in which the deficiency of the vintage is made up:

PURE BRANDY.—Since the French government have forbidden the distillation of cereals, a very active export demand has sprung up here for *raw whiskey* and *common rum*, and prices have materially advanced, with large freight engagements for France. When it comes back it will not be recognized, either by the smell, taste, or price.

Is not this too bad? Shams of all kinds we abominate, but the idea of brandy drinkers being so horribly imposed upon, is altogether monstrous! Surely, ye Hawaiian Legislators, you will not think of removing the high duty on French Brandy, for the year to come! Only imagine, the *vile compound* that must now be palmed off, under the name of French Brandy. No wonder it turns the ruddy cheek of health, to the color of the peach-blossom; no wonder it maddens the brain; no wonder it disorganizes the vital functions; no wonder it produces delirium tremens! If it be indeed a fact, (and who will doubt it?) that French brandy is manufactured out of New York whiskey and New England rum, surely we have a new argument for total abstinence. We should imagine, brandy drinkers at the Sandwich Islands would turn tee-totallers, to escape being *humbugged*, and paying seven or eight dollars a gallon for rye whiskey and N. E. rum!

☞ The whaleship "Lark" took a humpback whale off Kawaihae, Hawaii, about two weeks ago, which yielded 45 barrels, and sold for about $1,400 in the Honolulu market. The vessel was lying at anchor at the time. More whales were seen, but the rugged weather prevented their capture.

The Attack on Petropaulovski.

[Extract from a letter received from an Officer of one of Her Majesty's ships engaged in the late attack on the Russian Settlement of Petropaulovski, in Kamschatka.]

September 9th, 1854.

We arrived off Petropaulovski, Kamschatka, on the 28th August, after a very tedious passage from Honolulu. We were becalmed very frequently, and the rain poured down without ceasing for eight or ten days. Our squadron comprised Her Majesty's ships *President*, *Pique* and *Virago*, the French flag ship *La Forte*, *l'Eurydice* and *Obligado*—the whole forming a very imposing force. All the ships were painted entirely black, to render their strength more doubtful to the Russians.

On making the high land of Kamscatka, our excitement was very great, having little or no idea of the position and strength of the batteries we were about to attack. About 2 P. M. on the 28th, Admiral Price and the Secretary went on board the *Virago*, and proceeded to Awatska Bay to reconnoiter. We were kept in suspense till about midnight, when the Admiral returned; and we then got but a faint notion of the strength of our enemy. On the following morning all the squadron made their way to Awatsky Bay, the approach to which is very grand—high mountains (volcanoes) appearing on either side, covered with snow, and looking magnificent among the clouds. On one side of the bay, on a hill about 700 or 800 feet high, we perceived a lighthouse, in front of which and commanding the entrance, is a large gun, which, as we neared the land, was fired, to give the alarm to the batteries and town, situated out of sight of the entrance and about eight miles up the bay. We passed this point in great style, the *President* (with the Admiral's flag flying) leading the way. We anchored out of gun-shot of the batteries, which were all manned and ready to receive us.

The Admiral then ordered the *Virago* to proceed towards a battery of five guns, and have some long-range fire (about 2000 yards) at it. The battery opened fire at once, and I think the *Virago's* guns did not do much execution on this day. After opening the ball she took up her position amongst the squadron. I am afraid I can convey but a very vague idea of the strength and admirable position of Petropaulovski. The Russians have certainly done their best to render it impregnable, and they have, in our operations against them, proved good soldiers and brave men. Awatska Bay, in which this hornet's nest is situated, is of great magnitude. large enough to enable fifty sail to manœuvre in it with ease and safety. The place is situated at the base of a mountain, about 12,000 or 14,000 feet high—a volcano covered entirely with snow: we had the pleasure of witnessing it in action, which was worth seeing. The town lies in a hollow, and another huge mountain is behind it. The shape of the harbor is something like a horse-shoe, and at the entrance to the port, on one side, is a battery of three heavy guns; and a little further in, towards the town, is another long battery of eleven guns, well built, with embrasures, and from its peculiar position on a spit of land, running nearly across the harbor, rendered it very formidable, as behind it lay the Russian frigate *Aurora* and corvette *Dwina*, with their broadsides facing the entrance to the harbor. We called this lot "The Snake in the Grass."

There appeared to be at anchor when we arrived, in addition to the two ships above named, two merchant vessels—one bearing the Hamburg and the other American colors. Opposite these two batteries, and on the other side, is a circular battery of five guns (heavy ones too) which commands the entrance entirely. Around the hill on which this battery is placed, and in a hollow, is a battery of seven guns, commanding the bay, and a little further in, on the same side of the hill, is a low battery of five brass guns, which also commands the bay. In addition to these there are three other batteries in and about the town, making a total of eight batteries and the citadel—the whole mounting probably fifty guns. On the 29th, the day after our arrival, an unfortunate and awful calamity occurred, which for a time stupified every one in the squadron: our beloved old Admiral Price fell mortally wounded, sad to relate, from a pistol bullet fired by his own hand. As early as six A. M., he was on deck, and even ascended the rigging of the *President* as high as the main-top, to obtain a better view of the enemy's position—during the forenoon he visited the French Admiral and returned to his own ship quite cheerful. We were all getting under way to commence operations, when the Admiral went below and passed in to the quarter gallery. At that minute the report of a pistol was heard by all on board the *President*, and it was soon known that the poor old Admiral had shot himself. This was about half past 10 A. M. The medical officers were immediately with him, and as soon as the poor old gentleman recovered from the shock of his wound, he became quite calm and composed, much more so than all who were with him.—He appeared to know all who approached him, and spoke in the most kindly terms of his officers and men. The *Pique* was moving in to open fire when this distressing event took place; she was signalled to anchor, and her captain (Sir F. Nicholson) went on board the *President*. Soon afterwards, the French Admiral (who is a very aged and infirm officer) arrived with his surgeon; he was greatly overcome, and I am told was so agitated as to be obliged to leave the cabin to compose himself. Admiral Price desired Sir F. Nicholson to take charge of Her Majesty's ships, and to follow out the previously arranged measures for taking the place, expressing himself confident of our success. The chaplain of the *President* was with the Admiral in his last moments. On this sad day of course nothing was done; but on the next, operations were commenced in real earnest; the battery called "The Snake in the Grass" fell to all of us, as also the Little Battery and the Circular one—all of these facing the harbor. The ships engaged on this day were, *President*, *La Forte*, *Pique* and *Virago*. The Little Battery was soon silenced, and a party of our marines and seamen landed and spiked the guns. The ships' guns effectually silenced those of the Circular Battery for that day, and we all turned our attention to the "Snake," which proved a very troublesome and ugly customer; a rapid shower of shell and shot soon cleared it and we then piped to dinner. After dinner we had another go at our friend, who opened fire on *La Forte* with great precision, and several shot-holes in her hull attest the accuracy of their aim. *La Forte* had one man killed this day. *President* soon came within range, and between her and *La Forte*, the battery was soon completely done up. To show the perseverance of the Russians, there was a sentinel whom all our shots could not drive away; he appeared to walk his post quite unconcerned, and there he stuck throughout; luckily for him, I believe, he received no injury. The *Virago*, on steaming out, received a shot in her 'counter,' which damaged the ship but wounded no one. We all hauled out of range towards evening, satisfied with our first attempt.

On the 2nd September the body of our lamented Admiral (Price) was put on board the *Virago* and conveyed to an unfrequented part of the bay, and there consigned to the earth. The place of burial is marked at present with the letters D. P., cut on a tree by the Admiral's servant.

After some debate between Sir F. Nicholson and the French Admiral, it was resolved to attempt the place again on the 4th September, by landing a party of seamen and marines from the French and English ships. They were to be guided by two Americans, acquainted with the place, who had been fallen in with by the party who went to bury the Admiral, and brought on board the *President* to afford information about the place. On Sunday, 3d September, all arrangements were made for the landing; the men all properly equipped and instructed as to what was before them the next day. All were confident of the success of their hazardous expedition. At half-past one on Monday morning the hands were called—the intention being to make the attack at daybreak. After a breakfast, preparations were made to go on board the *Virago*. The landing-party sent to her, amounted nearly to 700, of whom half were French. They were all well armed and ready for anything. A vast number of officers accompanied the party. By six o'clock all were on board the *Virago*. Taking in tow *La Forte* and the *President*, she steamed in towards the batteries. The plan of attack was, that the *President* should engage a battery of seven guns, called the "Saddle Battery;" and *La Forte* to do the same with a battery of five guns, called the "Gorge," the *Virago* to effect the debarkation of the landing party. The *President* was first dropped by the steamer, about 600 yards from the Saddle Battery. At first her firing was not very good, but after a little practice she got the correct range, and her guns soon cleared the battery, doing great injury to the guns therein. Again one Russian alone stuck by the battery, and he kept us on the alert, as we thought he might point one of the guns and fire when opportunity offered. It was amusing to see him dodge behind the earthworks when a gun was fired, and then stand up and observe our movements with a telescope. In the early part of this engagement, serious damage was done to the *President;* a shot entering a port on the main deck, killed two of the gun's crew and wounded all the rest. The ship was in close quarters with the battery, and had a benefit; several shots entered her side on the lower deck, and one passed through a chest belonging to a junior officer of the ship, leaving, strange to say, his clothes uninjured, which remains in the same state, and affords a source of amusement to him and his messmates. *La Forte* silenced her battery

without sustaining any loss of life; and as soon as this was done, the landing party was disembarked.

Sad to relate, their subsequent proceedings led to the most fatal consequences. It had been arranged that the party was to form in military array, on the beach, before proceeding into the bush. Instead of this, immediately on landing, each division took their own course, and instead of entering the town together by a road, found themselves ascending a hill at the back of the town, amongst angled and thick brushwood, in which it was impossible to distinguish an enemy from a friend. In the severe and random firing which was kept up, there is little doubt but that many French and English met their deaths without Russian interference. Our loss was most serious, and I believe the French lost quite as many men as we did, and more officers. Captain Parker, of the Marines, under whose management the party landed, but whose arrangements were not attended to, was shot dead soon after landing. Two Lieutenants of the *President* received severe wounds. After an ineffectual struggle against their unseen enemy, a retreat was sounded. All the party had to descend a high hill. From the ships, our men seemed to be falling down the sides of the hill as if shot—some headlong, some rolling, and all in the greatest confusion. When the landing party returned on board, which they did by 10.45 A. M., the ships hauled out of the range of the batteries to attend to the wounded and repair damages. The melancholy result of this attempt is as follows, as regards the English ships:

H. M. S. *Pique:* Lieut. A. Bland, Mate G. Robinson, Midshipman L. Chichester, Lieutenant McCullum, R. M., slightly wounded; Lieutenant Clements, R. M., severely wounded. Eight seamen and 4 marines killed; 5 seamen and 2 marines dangerously wounded; 5 seamen and 5 marines severely wounded; 4 seamen and 1 marine slightly wounded. Total killed and wounded, 39.

H. M. S. *President:* Captain Parker, R. M., killed; Lieutenants Howard and G. Palmer, R. N., severely wounded; Lieutenant W. G. Morgan, slightly wounded. Five seamen and 5 marines killed; 2 seamen dangerously wounded; 15 seamen and 11 marines severely wounded, 4 seamen and 4 marines slightly wounded. Total killed and wounded, 50.

H. M. S. *Virago:* Mr. Whitelock's boats, 1 seaman, 2 marines, killed; 3 marines dangerously wounded: 1 seaman and 3 marines severely wounded; 7 seamen and 1 marine slightly wounded. Total killed and wounded, 18. Total English killed and wounded. 107.

Since this day we have made no further attempt on the town. It is doubtless a very strong place, and will at any time afford hot work for our ships. Our disappointment has been great, as we have come upwards of 7000 miles from Valparaiso to obtain what may almost be termed a repulse. We left Petropaulovski on the morning of the 6th, and about two hours after getting outside, had the good fortune to discover two strange sail in sight—one a schooner and the other a large ship; the last we took for the *Pallas* or *Diana* Russian frigates. The *Virago* was dispatched after the smaller craft. She turned out to be a Russian merchant-vessel bound to Petropaulovski with provisions, &c. The *President*, being the fastest sailer of the squadron, went in chase of the larger vessel. The weather was thick, and the Russian tried to escape; but after a few hours, and owing to the skillful manœuvring of Captain Burridge, the *President* was close alongside. The stranger proved to be the *Sitka*, of 700 tons, carrying ten guns, one of the ships of the Russian American Company, last from a place called Agan, in the sea Ochotsk, bound to Petropaulovski, with the winter store of provisions, ammunitions, &c., for the garrison. She had on board a Colonel and other Russian officers, with twenty-three Russians, passengers to Petropaulovski; also her crew, twenty-eight in number, who are with us now. They appear good-tempered fellows; their mates are very intelligent men. None of the crew are Russians, but Germans, Swedes and Dutch. We have also a little fellow of fourteen, a midshipman, as prisoner. They are all well treated, and allowed to do just as they please. We are now going ten knots in a gale of wind, with the *Virago* in tow.—A prize crew is on board the *Sitka*. I fear the prize money will be but small; we junior officers might get about 30s. each.

Until another Admiral's flag is hoisted on the station, we shall be under the orders of Captain Frederick, of the *Amphitrite*, who becomes a Commodore of the first class *pro tem.* We find it hard times in the messing line—nothing to drink and less to eat—no fresh meat since the middle of July. The French squadron are going to San Francisco, while our ships go to Vancouver's Island to complete our water, which is running so short that six pints have to suffice each of us for breakfast, dinner, tea and washing.—[*London Illustrated News, Dec.* 16, 1854.

CITY HOSPITAL.

THE UNDERSIGNED having leased the "Gravier Property," on King street, have thoroughly refitted the building, and are now prepared to receive Patients, for Medical or Surgical treatment.

Strangers visiting the Islands for the benefit of their health, and Residents, will be received into the Hospital, and provided (if desired) with Private Rooms, at a moderate expense.

NOTICE TO SHIPMASTERS.

Seamen will be received into the Hospital upon the most favorable terms; and in the event of the Master being required to discharge a Seaman in consequence of illness, the *three month's extra* wages required by the U. S. Government, will be received in full of any claims upon the Ship or Master for his support or treatment. The undersigned are prepared to give Bonds to the U. S. Consul, to indemnify him against a Seaman received into the City Hospital becoming a charge upon the U. S. Government.

B. PITMAN,

BYRON'S BAY, HILO, HAWAII.

DEALER in General Merchandise and Hawaiian Produce. All Stores required by Whale Ships and others, supplied on reasonable terms and at the shortest notice.

WANTED—Exchange on the U. States and Europe. Oct. 2, 1854.—3m

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for cash, goods, or Bills on the United States.

HONOLULU MARINE HOSPITAL.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz., a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this, what a Hospital should be.

Patients will also be received by Drs. ROOKE, HARDY, NEWCOMB and GUILLOU.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

42-tf GEO. A. LATHROP, M. D.

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

Information Wanted,

Respecting REUBEN G. ROGERS, belonging to New Bedford. He sailed from that port in ship "Canada," Oct. 1, 1851. Intelligence may be communicated to the editor, or the young man's father, Mr. James W. Rogers, of New Bedford. tf

MARRIED.

In Honolulu, March 15th, by Rev. S. C. Damon, Mr. MARTIN SEGER, to JANE LOREAU.

DIED,

At Marine Hospital, Honolulu, March 15, ALEXANDER BAXTER, a seaman, aged 19 years, a native of Peterhead, Scotland, and belonging to the British ship "Leonidas." This young man, unfortunately, the day before his death, fell down the hatchway of the ship, and received a fatal injury He was much esteemed by his ship-mates, and mourned by the master. Capt. Morrison made arrangements for erecting a marble tombstone to the young sailor's memory, in the Seamen's Lot, of N. V. Cemetery.

RICHARD DOLBIN, of New York City, boat steerer on the whale ship James Andrews, of New Bedford, at sea, on the 2d day of March, 1855, of consumption, the ship being at the time near the Sandwich Islands, but was unable to reach them before his burial, owing to weather.—[*Communicated.*

On board the ship Liverpool, THOMAS POLLAN, Native of Hull, England; disease of the heart.

In this city, on Friday, 2d inst., ADA, infant daughter of Chas. A. Taner, Esq.

In Honolulu, at Mr. Lamb's Boarding House, February — Mr. GEORGE G. OSBORNE, belonging to San Jose, California.

In Honolulu, March 12, Dr. PAGE, late from California, but originally from Boston.

In this city, of Consumption, on the 8th inst, Mr. JOHN GULICK, who arrived the same day from San Francisco, on board the Francis Palmer. Mr. G. was from Benicia, California, and had been sick for about 8 months previous to his death.

In Honolulu, at Merchant's Exchange Hotel, March 11, Mr. CHAS. S. EDDY, late from Marysville, California.

In Honolulu, Feb., at City Hospital, Mr. ADOLPHUS DORCH, native of Germany.

In U. S. Hospital, Honolulu, March 6, Mr. CAHER, late from California, but originally from Ireland.

In Honolulu, on the 21st inst., Mr. Robert Barker, an old resident at the islands, aged about 45 years.

At Lihue, Kauai, on the 9th inst., of consumption, Dr. WYLIE, from California,—formerly from Indiana, where we understand he has a family residing.

Passengers.

By the Ocean Bird, from Oregon—Charles Porter.
By the E. L. Frost, for S. F.—Petty.
By the T H. Allen, for S. F.—Dr. Post, wife and daughters, Mr. Brown, T. Price, M. Barney, Love, J. C. Hillman, E. Janard, Wm. Duffiin, G. Davis, J. Rodrick, Wm. Shoplock, Mr Earlclo.
By the Francis Palmer, from S. F.—Mrs. J. Paty and child, M. B. Beckwith and lady, John Gulick, lady, child and servant; H. A. Spear, Wm. Fell, A. Moses, E. A. Heyden, A. R. Edwards, Lewis Knesel, C. S. Dow, Dr. G. W. Williams, A. G. Coffin, E. Austin, B. F. Chapman, M. Amberg, H. B Saxton, 4 Chinamen, S. B. Mayhew, D. Lake, S. H. Cooper, B. J. Antrim, Dr. F. Page.
Per Restless, for San Francisco—J. Allister, Mrs. Isaacs, P. Livingston, G. A. Sturgess and lady, Sprague, J. B. Gilles, D. C. Waterman, Butts, Mills, Horther, J. A. Avery, Peachy.
By the Agate, for Astoria—A. E. Wilson, G. T. McConnell
By the Frances Palmer, for S. F.—W. L. Lee and lady, Miss Hamlin, Mrs. Gulick, child and servant, Messrs. Feldheim, Simmons, Hale, W. C. Parke, B. Perkins, Robinson, Hokeong, Aon, Miller, Barker, Chas. Dana, Col. Steele, C. S. Dow, Maes, Dr. Newcomb and family, Mr. and Mrs. Jacobs, Mr. and Mrs. Darnell, E. P. Bond and family.

TO THE EDITOR OF THE FRIEND:

SIR—The accompanying piece of composition is from the pen of a foremast hand, and accidentally found its way aft. You have permisssion to give it a place in your paper, if in your judgment it deserves so high an honor. We think there is quite a display of wit—perhaps better judges will discover a poetical genius.

Ship MAGNOLIA, April 5th, 1855.

Jack caught napping.

I sing the deeds of yesternight,
Of what befell a luckless wight,
Who careless was to keep awake,
And rather thought to comfort take.
Whilom had passed the tedious squall
And quite had ceased the rain to fall;
The moon again bestowed her light,
And all bespoke a pleasant night.
The watch had clustered near the hatch
In hopes a cheering nap to catch,
And some there were who were quite oppressed,
And these consigned themselves to rest.
Some were engaged in spinning yarns,
And some looked out for Mr. B****s.
Soon these were mute in strange alarm,
For, see, a tall and spectral form
So softly round the tryworks creeps,
And o'er the windless slyly peeps.
His step so soft you feel no shock,
As vestured in that Gurnsey frock
He stands—and now he seems to trace
The features of each sleeper's face;
Nor fail you, if you look, to spy
The mischief lurking in his eye.
The heedless dreamer fears no ill,
And called by name, he slumbers still.
O Bill! if you but knew the fate
Impending from the second mate,
How quick you'd bounce upon your feet,
And quicker from the deck retreat.
But now sweet dreams are o'er you stealing,
Home born pleasures you are feeling,
Your friends and parents seem to me et
And each in turn your welcome greet'
But see the figure quickly glide
With bucket to the starboard side.
Behold him bending o'er the rail
Just long enough to fill his pail.
Now—see he quickly leaves the waist
And back he comes in greater haste—
Souse comes the water—what a dash!
No force pump gives a harder splash.
The victim's shrieks, appalled with fright,
Disturb the stillness of the night;
His senses are almost ignored,
He thinks he's fallen overboard.
With dripping limbs he's bid to hie
Upon the gallant yard to dry.—
We hope kind master you will deign
To hear your sleepy heads complain.
We own ourselves quite wild and wilful,
And in our duty most unskilful;
Tardy, saucy, lame and lazy,
And in our watches often drowsy;
And that our cheeks can scarcely blush
When so besmeared with tar and slush.
But barring all this sad neglect
Your every order we respect.
True as the needle to the pole
We'll labor for you, heart and soul.
May pity enter in your heart
And all her lenience impart.
The hydrophatic institute
We never held in much repute
And Bill declares he can't endure
The chilling cold water cure.
If tired nature chance to doze,
Oh, please, don't come and wring one's nose;
Or to our nodding give a check
By making us patrol the deck.
With this and that we'll own you then
One of the very best of men.

THE ORIENTAL.—We gladly acknowledge a file of this paper, and shall rejoice to place it upon our list of exchanges.

The Oriental:

OR, TUNG-NGAI SAN-LUK.

Devoted to the dissemination of information relating to Christian Missions and the Eastern Hemisphere, and to the religious and general improvement of the Chinese.

"Behold, these shall come from far; and lo, these from the north and from the west; and these from the land of Sinim" [China.]—Isaiah 49: 12.

Rev. WILLIAM SPEER, Editor.

PUBLISHED WEEKLY, IN ENGLISH AND CHINESE.

A newspaper of this character, well conducted, cannot fail to do good among both Chinese and Americans. The Chinese abroad need firm and judicious friends. They may have their faults, as a nation, but that affords no ground for unkind treatment in foreign lands. If one half of the reports of their ill-treatment at the Chinca islands are true, and if the sordid views of some Californians are adopted, we dread the final results of cooley labor. It will prove not one shade better than slave labor, in the strictest sense of the term. We trust that those employing coolies in the Sandwich Islands will never afford ground for even the suspicion that the Chinese laborers are to be treated *as slaves*. Better, a thousand times, that they all should be reshipped for the Celestial Empire.

Wreck at Barber's Point.

We regret to record the wreck of a new and beautiful French whaler, at the southwest point of this island, known as Barber's Point. The vessel was the "Marquis de Turenne," just out from Havre, and bound to the fishing ground. The vessel struck in the night, and could not be got off. No lives were lost. The cargo was landed and the vessel dismantled by the crew. The whole has been sold at auction, bringing from $7000 to $8000 for the benefit of the underwriters. The vessel made a remarkably quick passage from France, in less than one hundred days.

☞ The Minister of Finance reports to the House of Representatives, that the dog tax for nine months, ending December 31, 1854, was $3,481 62! Let not our foreign readers imagine that Hawaiians raise dogs for the table, as in days of yore! We are surprised, however, at the tax. What, only 3,481 and sixty-two one-hundreths of a dog, on the Sandwich Islands! We venture the opinion, there are more than that number on Oahu! Perhaps, however, the tax-gatherers are moved with compassion, at the miserable plight of some of the poor creatures, and permit them to pass, untaxed. It appears that the legislators are still discussing the subject of a dog tax. Will they not pass a law, to kill off three-fourths?

☞ Some anonymous friend has sent us two copies of Dr. Winslow's Address upon the subject of education, before the late Educational Convention of California. We are glad to learn that our old fellow-resident on Hawaiian shores, is doing good service in the establishment of the common schools of California. Being a New England man, he comes out with New England ideas, bold, eloquent and practical.

☞ Every vessel brings us files of late papers from Sullivan's Newspaper Depot in San Francisco. Among these favors, we find late American magazines, including Harper's. It appears that Mr. Sullivan is the agent for this periodical on the Pacific coast.

We commend the following paragraphs to the careful perusal of our island readers.—They are copied from a paper, not professedly advocating the cause of temperance. The writer appears to take a plain and common sense view of the subject, such as every patriot and good citizen, would wish to see adopted by the whole community. The authorities cited, are such as bespeak a careful reading. The remarks of Mr. Jarves, the original proprietor and editor of the "Polynesian," are especially deserving of attention. These remarks show conclusively that drunkenness does abound in wine-growing countries, although the contrary, we often hear asserted :—

AMERICAN WINE.

Is it desirable that this country should become a vine-growing country? that wine should be made and used as freely in New England as in France or Germany? Emphatically, we answer *No!* Neither in a politico-economical, or in a moral, nor in a national and patriotic point of view, is it desirable. Throw out of sight the question of practicability—concede that, if we choose, we can raise the best and purest wines, in sufficient quantities to supply the wants of the nation—still we maintain it is not desirable, and the day that shall witness such an event will find this people far, very far below their present level. It is a delusion to believe, as many do, that there is far less drunkenness in the wine-growiug countries of Europe than in the United States. We will cite a few authorities. J. Fennimore Cooper, the novelist, being in France, in 1826, says:—

"The necessity of passing the *barriere* two or three times a day has made me acquainted with the great amount of drunkenness that prevails in Paris. There is quite as much low blackguardism and quarreling here, as is to be found in any seaport I know."

It should be remembered that Cooper had been an officer in the U. S. Navy, and knew very well what seaports are. And again, in 1832, Cooper being in Rudesheim, on the Rhine, in the heart of the richest wine region in Europe, says:—

"It is a singular fact that in none but the wine-growing countries are the true uses of the precious gift understood. In them, wine is not a luxury but a necessary; its use is not often abused, and its beneficial effects can scarcely be appreciated without being witnessed. I do not mean that there is no drunkenness in these countries, for there is probably as much of the vice in France, Germany, Italy and Switzerland, as there is with us; but they who drink hard generally drink some of the vile compounds which exist every where under the names of brandy, *aguar diente*, or something else."

We quote the whole passage, though portions of it seem to point against our position, because we disdain to misrepresent any man's views, and because we wish to show that even in the opinion of a man who himself loved a bottle of good wine, and who in this letter is writing to one whose *habits*, as Cooper himself tells his friend, are such that it is difficult to give him any new ideas in the matter of French and German wines; yet in the deliberate opinion of such a man, the profuse presence of the best wines in the world is no protection against the universal tendency, rooted deep in human nature, to pass from the first stages to the later—to begin with self-command and end with self-abandonment.

In a subsequent letter, Cooper says:—

"Men will seek some stimulus or other, if it be obtainable, place them in what situations you will. My own eyes have shown me how much drunkenness exists in the vine-growing countries of Europe. I came to Europe under the impression that there was more drunkenness among us than in any other country, England perhaps excepted. A residence of six months in Paris changed my views entirely. You will judge of my surprise when first I saw a platoon of the Royal Guard—literally a whole platoon, so far as numbers, and the order of their promenade was concerned—staggering drunk, within plain view of the palace of their master.—From this time I became more observant, and not a day passed that I did not see men and even women in the same situation in the open streets. Usually, when the fact was mentioned to Americans, they expressed surprise, declaring they had never seen such a thing. They were too much amused with other sights to regard this; and then, they had come abroad with different notions, and it is easier to float in the current of popular opinion than to stem it. In two or three instances I have taken the unbelievers with me into the streets, where I have never failed to convince them of their mistake in the course of an hour.—These experiments, too, were usually made in the better quarters of the town."

Now hear what the author of "Parisian sights and French principles," a work published by the Harpers in 1852, has to say upon this subject. It may be premised that, although the name of the author is not printed in the title page, yet every body knows that James Jarves, Esq., of Boston, is the author. He is a man of the world, who has lived in the Sandwich Islands some years—knocked about most parts of the habitable globe, and is no fanatic. On the question of total abstinence, he says:—

"There is an agent far more direct and active in the degradation of the French nation than either taxation or extravagance.—No one who has made a tour of curiosity around the *octroi* wall of Paris can have failed to make the discovery. Here, for at least three days in the week, he will find at least from 20,000 to 30,000 of the most dissolute of both sexes, occupied in drinking and debauchery of the worst kind, in temporary liquor shops. The increase of licensed retailers of wines and spirit throughout France, has been rapid since 1830. Then there existed but 250,000! Now there are upward of 350,000—an increase of 100,000 in twenty years, and of 20,000 during the last three years, under the Republic. This augmentation has been among the lower class of dramshops, of which there has been an increase of 70,000 within nineteen years, paying a license of only six francs each."

He quotes from Villerme to show that at the provincial town of Lille, drunkenness prevails as in Paris. Villerme, describing the grog-shops of that place, thronged by the working men, says: "All drank the detestable corn brandy or beer. I now affirm that I have never seen at once so much pollution, misery and vice."

In Paris it is estimated there are 17,000 habitual drunkards, of the most brutal character. The Mayor of Paimpol, in his official report, says:—

"I affirm that the greater part of the paupers of this town owe their misery to the excess of drinks, particularly brandy; that almost all the disorders and crimes which come before me, have been committed by persons either drunk or given to intoxication."—"Such evidences," says Jarves, "should destroy the common delusion that because light wines are cheap in France, intoxication is rare. Brandies, of the most deleterious nature, are equally cheap and more generally used."

We stop not because we have begun to exhaust the evidence on this point, but because this article is long enough.—[*Hartford Courant.*

The Wine Bottle.

Some unknown correspondent has forwarded the following extracts from an American paper, for publication. We gladly give such a statement of facts an insertion in our columns. We are of course ignorant of the locality where these persons resided, but of the general facts we have no doubt. Such melancholly examples are constantly occurring.

The following story is literally true, with the omission of names for places, and the substitution of others for those of individuals. With a trifling alteration this sketch of biography would be true of multitudes in our land:

GURDON SPRING was the son of a respectable farmer in ——. He was the third of ten sons, all of whom were trained to the strictest economy and industry. The *wine bottle* was never seen in their father's house. At the age of nineteen, Gurdon became the clerk of a neighboring merchant. Many of his early habits fitted him for his new calling. He gained and merited the confidence of his employer, who recommended him to more extensive and lucrative business in ——. After becoming "a thorough merchant," and having established "a good name," which "is better than precious ointment," he commenced business for himself in ——. Success attended his laudable efforts, and every month added to his "trade," and profits. In two years from his settlement in this place, he was the husband of Sarah Gould, a young lady of cultivated mind, polished manners, and hopeful piety.

They commenced housekeeping in a frugal way. The *wine bottle* was kept on the *bureau*, but it was seldom used. Time moved on. Mr. and Mrs. Spring were the happy parents of five sprightly, handsome children. Their wealth grew faster than their family. Relatives and friends made frequent calls and long visits. The *sideboard* was well provided with the choicest wines and cordials. *Parties* became more frequent, as the children advanced to man and womanhood, and extended their acquaintance.

In 182—, the father died honored and respected; leaving an estate of $52,000. John the eldest son, chose the profession of surgery and medicine. Before he obtained his parchment making him M. D., he was often

"the worse for liquor." He has squandered his patrimony, and is now a useless vagabond on the earth. Robert the next son, studied law. Bright were his prospects and high the expectations he raised in the bosom of his relatives and friends. He prided himself on the gentility with which he handed the bottle and glass of wine. He often "played for amusement, but never for any thing more than to make the game interesting. When exhilarated with wine, but far from being drunk, for he had not yet been seen in that situation, some *black-legs*, under the guise of gentlemen, induced him to play. The *wine bottle* was often shoved round; "'Squire Spring's gentility in handing the glass" was frequently noticed, and before the next morning's sun he had lost every dollar, earned and left him by his father. He often played "to win back his former losses," and drank deep to silence an upbraiding conscience. In a fit of *delirium tremens*, he applied the pistol to his ear, and rushed unbidden, and unprepared to the judgment bar.

William, the third son, was "kept in the store." He continued the business after his father's death, and soon married a lovely, intelligent wife. The *wine bottle* was always on the dinner table, and convivial parties, frequent and brilliant. His business was neglected or entrusted to clerks. Wine "mocked" him, and led, not only to the neglect of business, but to bad bargains, bad company and bad habits. He became a bankrupt and a drunkard. His wife died of a broken heart, and William is now often seen standing at the corners of the streets, with a saw and buck on his shoulders, a ragged, bloated, remnant of a man.

Jane married one of her father's clerks. Both of them loved the *wine bottle*. Her patrimony was soon wasted. They have four children. Both of the parents are intemperate, poor, and often quarrelsome.

Sarah the youngest of Mr. Spring's children, came "into company" after the Temperance cause had done much to purify and bless mankind. She saw the desolations produced by the *wine bottle*, on those whom she tenderly loved. She early signed the PLEDGE, though ridiculed by her brothers and sister for so doing. She dismissed three suitors because they would *occasionally* take a glass of wine. She said and practiced, "TOTAL ABSTINENCE OR NO HUSBAND." At the age of twenty-three, she was married to a worthy clergyman, whose talents and influence are felt through a wide circle. She is useful, honored and happy.

Youthful reader! is there any benefit results from drinking wine or other intoxicating liquors? How many estates have you known squandered, reputations lost, hearts broken and lives destroyed, by commencing the *moderate* use of such drinks? What course will you pursue in regard to them?

The Rev. G. H. Nobbs.

[PASTOR OF PITCAIRN'S ISLAND.]

It will be recollected by some of our readers, that in 1852, this individual left Pitcairn's islands and visited England for the purpose of receiving ordination, as a clergyman of the church of England. Having visited that country, he returned and renewed his useful labors among the inhabitants of the island. The following remarks, respecting his early life, may be interesting. They are copied, from a new work published, in London, by the "Society for promoting christian knowledge:"

The arrival of Mr. George Hunn Nobbs at Pitcairn's Island, in the year 1828, may be considered a providental occurence for the well being of the inhabitants. Admiral Morseby has remarked, that the success of twenty-four years' labor is an abundant proof, that, under the blessing of God, this faithful teacher has educated in the principles of our Church, as one united family, a community, whose simple and virtuous lives are so pre-eminent. A brief notice of his career, and of the circumstances which led him to the spot, cannot fail to be interesting, especially as he has now received the proper sanction and authority to minister as a clergyman of the Church of England.

Mr. Nobbs, who was born in Ireland in 1799, was in his youth a midshipman in the British navy, having first gone to sea when not much more than 11 years of age. He afterwards held a commission in the Chilean service, under Lord Cochrane, now Earl of Dundonald, and became lieutenant in consequence of his services.

Among other important occurences which took place during this period, and in which Mr. Nobbs bore a part, was the courageous enterprise of cutting out the Spanish frigate *Esmeralda*, of forty guns which was lying in the bay, under the batteries, of Callao, in Peru. The capture was accomplished late at night on the 5th of November, 1820. An address from Lord Cochrane had been delivered to the marines and seamen, which concluded with an injunction, that the Chilenos should act with valour, 'and that the English should do as they had always done, both in their own country, and elsewhere.' An account of this remarkable transaction, the success of which surpassed all that could have been imagined, is met with in Mrs. Graham's (afterwards Lady Callcott's) "Journal of a Residence in Chili in 1822."

Lieutenant Nobbs was also engaged in a severe conflict with a Spanish gun-brig near Arauco, a fortress of Chile; when in command of a gun-boat, after sustaining the loss of forty-eight men killed and wounded, out of a party of sixty-four, he was taken prisoner by the troops of the piratical Spanish general, Benevideis.

The prisoners were all shot, with the exception of Lieutenant Nobbs, and three English seamen. These four, after remaining for three weeks under sentence of death, were, quite unexpectedly, exchanged for four officers attached to Benevedeis' army. Mr. Nobbs had seen his fellow-prisoners, from time to time, led out to be shot, and had heard the reports of the muskets consigning them to a dreadful death.

Lady Calcott states that Benevideis was the son of the inspector of prisons, and had been a foot-soldier of the first army of the Chilenos in the cause of South American independence. From her description of his character and actions, the reader will infer, that Mr. Nobb's rescue from his hands was indeed a providential event.

Having been made prisoner by the royalists, Benevideis entered their army, and, being taken soon after, was sent to be tried as a deserter; but he escaped by setting fire to the hut in which he was confined, and soon distinguished himself among the royalists by his talents and bravery. Again he was taken prisoner, and sentenced to be shot in company with many others. He fell with the rest; but, though thought to have been executed, was not killed; and he afterwards joined the patriots. Being, however, suspected and accused by their general, San Martin, of treachery, he once more turned against them; and hence arose the atrocities with which Benevdieis is charged. He murdered his prisoners in cold blood; and his great delight was to invite the captured officers to an elegant entertainment, and after they had eaten and drank, march them into his court-yard, while he stood at the window to see them shot. Some, to whom he had promised safety, he delivered over to the Indians whose cruel customs with regard to prisoners of war he well knew; and they were cruelly murdered.

His cause having failed, he fitted out a privateer, to provide himself with food and ammunition; and at length, on the 1st of February, 1822, finding he could hold out no longer, he attempted to escape to some of the Spanish ports in a small boat; but he was recognized, seized, and sent to Santiago, where, on the 21st, he was tried, and sentenced to death. On the 23d he was dragged from prison, tied to the tail of a mule, and then hanged in the palace square.

Mr. Nobbs, having quitted the Chilean service, after many hardships and dangers, took passage to England in 1822, in the ship *Elizabeth*, which had shortly before touched at Pitcairns Island. The commander of that ship, in the course of conversation, expatiated so frequently on the happiness of the people of Pitcairn, that Mr. Nobbs seriously intended to go thither, if his life should be spared; and he set out, with this object in view, in the beginning of 1826. His wish was to lead a life of peace and usefulness to his fellow-creatures. He had at that period been four times round the world: and he left England with the full and avowed intention of going to Pitcairn's Island. He was detained for a long time in Calcutta; from whence, after a very narrow escape from shipwreck in the Strait of Sunda, he crossed the Pacific to Valpariso. There, and afterwards at Callao, he suffered a further detention; but ultimately he succeded in leaving Callao in a frail bark of eighteen tons burden, having expended one hundred pounds sterling on the vessel and her outfit. He was accompanied by only one person, an American named Noah Bunker, and arrived at Pitcairn in October 1828. His companion died soon afterwards; and the vessel afforded the materials for a house for Mr. Nobbs. John Adams received him with kindness; and after Adam's death, in March 1829, Mr. Nobbs, who had been engaged in keeping school from the period of his arrival, was appointed the teacher.

When he first entered upon his charge, the number of inhabitants was only sixty-eight. From that time he has been with them, through evil report and good report, as their pastor, surgeon, and schoolmaster, with the exception of a few months, when he was removed from the island, in consequence of the intrusion of Mr. Joshua Hill, who arrived from Otaheite in 1832.

☞ The following remarks upon "Retributive Justice" we copy from the editorial columns of the "Alta California." If these remarks had been met with in a professedly religious newspaper, a volume of sermons, or tract society publication, we should not have transferred them to our columns. Religious writers, and ministers of the gospel, are continually discoursing in this strain of remark. It is not a little surprising, but exceedingly gratifying, to find the "Alta" editor, take up the theme, and thrust home the argument, in the very face of those who are themselves illustrations of the truth of these remarks. We opine, the law of retributive justice may yet make the publishers of the "Alta," regret that they ever issued a "Sunday edition" of their paper. The law of retributive justice is no respecter of person!

We hope our readers will give this article a second reading. The argument and mode of illustration will apply, to the latitude of Honolulu, London, and Paris, as well as to San Francisco. 'Whatever a man soweth, that shall he also reap,' writes an inspired apostle. Justice has her laws as well as nature. Retributive Justice may be compared to those deep under currents of the ocean. They are not apparent upon the water's surface, but still they are moving forward, with silent but irresistible power. Men in the hurry of life and bustle of society may beunscrpulous in their principles, and set the laws of God at defiance, but ere long they are sure to be arrested. "The way of the transgressor is hard."

Retributive Justice.—When Cain found that his offering was not acceptable to the Lord, the tradition has it that he exclaimed, "there is no justice in the earth.,, But Cain was an unsafe guide, and doubtless learned afterward that there was such a thing in the earth as retributive justice.

There have been a great many people in California within the last five years, who have been impressed with the same idea that posessed Cain. They have seen men crowned with prosperity who have followed the most devious practices, and it has seemed that the wicked only could prosper, and that wealth, honor and preferment waited only on the footsteps of swindling, chicanery and fraud.

The men who have made money here so very rapidly, have in many instances done it by means both immoral and dishonest. Gigantic schemes for swindling the public have been carried through with the most brazen effrontery. Water lot bills and Peter Smith sales have made many a man rich, while a seat in the city government has been thought as good as a sure fortune. But there is such a thing as justice in the earth, and each year and almost each day discloses an illustration of the truth of the adage, that "ill-gotten gain shall not prosper."

There is an old saying, that whatever comes over the back of a certain mythical personage, is sure to go under his belly. This is but the natural order of things; we need not explain it as a special Providence, nor attribute it to any supernatural agency. If men engage in illicit practices and are successful, they are emboldened to engage in others more dangerous and more dishonest. So long as they are successful they look not back. They go on from one wild venture to another, governed by no principle of honesty or right, and heedless of consequences so that they put money in their pockets. But the end of such things is ruin and disgrace. When men set aside the principles of honesty, and think by shrewdness and finesse to outwit the evil one, they are sure in the end to over-reach themselves. Those people whose every action is governed by honesty and fair dealing have nothing to conceal, and they have no reason to fear lest an enemy or a shrewder than they shall find out their schemes and ruin their prospects.

It has been a common remark, that in this country the most disreputable business is the most profitable—that gamblers, rum-sellers and intriguing speculators, made money when it was hard for men of superior capacity to make an honest living by any legitimate and creditable business. But a compensation is sure to follow if the people will only have the patience to await for it. It does not follow that the gamblers or the men who make their money by other immoral practices, will necessarily become poor. But they will find in time that their practices have made them proscribed men—that though their money may command admission to all public places of amusement, though they "fare sumptuously every day," yet it will be impossible for them to be respected and admitted into the families and on a social equality with those who have less money made in a more creditable way.

It matters little how much money a man can make by the criminal practice of gambling, he will be always shunned, abhorred, by the very men whose esteem he most courts. He may be well fed and lodged and make more display than his neighbors, but he knows and must know that whoever looks upon his fine house, or his gay equipage, will exclaim—"this is all paid for in blood-money—blood-money taken from the weak and poor, without an equivalent, while the victims have by him been hurried to ruin, beggary and death." They know all this, and they know that no amount of wealth can make it different. They have dipped their hands in crimson, and there is not rain enough in the "sweet heavens" to wash them white again.

There are few men who prosper in their worldly matters by such practices, that do not sooner or later curse the day they ever bowed themselves before the god of money, and received upon their foreheads the brand of society. They learn sooner or later that their wealth is of little avail; that it brings not happiness, and that it can never purchase the good opinion of men.

The inevitable tendency of this law of retribution is such, that all those that have accumulated their wealth by reckless and dishonorable means, will soon be swept away. Their prosperity and greatness will be short-lived, and other and better men, whose money has been accumulated by honest means, will see that there is a law of retribution—that there is such a thing as justice in the earth.

Late News.

All items of foreign news are eclipsed by the astounding and unexpected announcement of the death of the Emperor of Russia. We copy the following paragraphs from the New York Herald of March 20th:

"Nicholas is dead. In an hour, in a minute, the hand of Death has changed the face of European politics.

"Dead, perhaps from apoplexy, possibly by poison. He was ill, it seems; so ill as to give an impetus to the British funds. And may have died in the course of nature, being a man of full and plethoric habit, withal much wearied and harassed by recent events. On the other hand, murder runs in the family. His father was murdered soon after he was born, one of his brothers helping to strike the old man down. His grandfather was barbarously murdered by the orders of his wife, the Empress Catharine, her lover, Orloff, strangling him.

"It is hardly probable that the world will ever know the truth of the matter; in Russia such things are secrets, and curiosity is fatal; but it was a maxim of Ryleief's, that a revolution in Russia, to be worth anything, must cost the Czar his life.

"But whether he died by the hand of man or the hand of God, it matters little. He is dead, and according to Russian precedent, his plans and his policy have died with him. His son, the Cesarovitch Alexander, is known to be a peace man, and the head of the German party. It would be exactly in accordance with former practice for Alexander to inaugurate his reign by reversing his father's policy."

Arrival of the Rev. J. D. Strong.—We are happy to announce the arrival of the Rev. J. D. Strong, by the clipper ship "Spitfire." He is expected to enter immediately upon his duties as Pastor of the 2d Foreign Church in Honolulu. We cordially welcome him as a fellow-laborer in the Gospel ministry, and trust that a long career of usefulness awaits him.

☞ We have received the December No. of the Samoan Reporter, but have not space to notice its contents.

☞ We would acknowledge our indebtedness for repeated favors of late papers, to S. C. Hillman & Co.'s Periodical Depot, Hotel street, (opposite National Hotel), Honolulu, H. I.

☞ The "Concert" given by Mrs. Hamm at the Court House, a few evenings since, was numerously attended, and passed off to the delight of the audience. Those desirous of enjoying the services of a competent teacher of music, may congratulate themselves on the arrival of this lady in Honolulu, who proposes giving private lessons, and instructing a large class of juvenile pupils. We hope she may find abundant encouragement.

Appeal to Humane Ship Masters.

RAROTONGA, March 22, 1855.

Rev. S. C. Damon—Dear Sir:—I take the liberty of addressing you, though personally unknown, and yet well known through the '*Friend*' of yours, which we have sometimes the pleasure of welcoming at Rarotonga.

Feeling assured that you are always ready to every good word and work, and thinking you could aid us, by inserting the following notice in your Friend respecting Penrhyn and Humphrey's Islands, you would much oblige us.

Some few years since, a canoe filled with natives, was picked up at sea by some American whaler, and the poor people were kindly treated by the Captain and safely landed on Manuae, (Harvey's Island.) It coming to the knowledge of the Missionaries of Rarotonga that they belonged to Humphrey's Island, or Manahiki, it occurred to them that this was a providential circumstance not to be disregarded as they had long been wishing for an opportunity of introducing the gospel to those benighted islanders. Accordingly two native evangelists from the Institution here were designated to this work, and Captain Morgan was requested to call on his way thither at Manuae, and take these poor cast-a-ways on board the Mission vessel. The kindness of the Captain and native Missionaries during the passage towards the Humphrey islanders insured for them a good introduction among their countrymen. They were kindly received, but the first intelligence received was that they had been robbed of all their little property except what had been secured in a box that had a lock on it, otherwise they were kindly treated. Since then it has pleased the Great Head of the Church so to bless the labors of these devoted men, that nearly the whole population have embraced christianity,—two places of worship have been built, and the acconnts received were so pleasing as to induce us to send Maretu, one of our best native teachers, to assist our brethren in administering the ordinances of baptism and the Lord's Supper to those who may be considered sufficiently advanced in knowledge and piety to be admitted to those privileges. Maretu, with his wife, went from us with the promise that if possible the "John Williams" should call for them and return them here ere she left the Island for England, but owing to untoward circumstance this could not be effected, and we have hitherto had no opportunity of getting them returned by any other vessel. It has occurred to me, that as many whalers come from the Sandwich Islands here during the latter months of the year, that some friendly Captain would oblige us by calling for them at Humphrey's Island and bring them here. Any expenses incurred on their account would be gladly refunded, either in money or provisions, as the Captain may wish.

You are no doubt acquainted with Penrhyn's Island, from the account given of it by Commodore Wilks. In January, 1853, the brig 'Chatham' was wrecked there as you already know. Mr. Lamont, one of the owners, who, after living there with others on fish and cocoanuts, for nearly 12 months, was brought here, accompanied by two natives, who resided sometime among us. As these natives were very anxious to return, the 'J. Williams' on her way to Humphrey's Island, called there also, and two single Missionaries and one married were landed with the natives on Penrhyn. Captain Morgan gave us an interesting account of their boisterous reception,—a report has since reached us that they also have suffered the loss of all things, that their little stock of clothing and tools has been taken from them, but that otherwise they were kindly treated.

Having nothing but cocoanuts and fish at either of these islands, there can be no other inducement than that of kindness, to call and give these devoted Missionaries an opportunity of writing to us, and of supplying their wants, should they be in need. We should be most happy to refund whatever expense may be incurred on their account.

I send for your acceptance a copy of our Rarotongan Bible, and also a Grammar, got up principally for the benefit of the Institution and native schools. If you can ascertain that the Hervey islanders residing on your island would wish to possess copies of the Scriptures in their own language and inform me of the number required, I shall be most happy to forward them the first opportunity.

Accept a small donation of five dolars for your Sailor's Home.

I am, Yours, truly,

AARON BUZACOTT.

Statistics of Hawaiian Kingdom.

We glean the following statistical information, while reading the reports of the King's Ministers:—

Foreigners naturalized, during 1854, - -	126
Land sold, 10,618 08 acres, for $12,899 16; or at about $1 10 per acre.	
Expenses of Government, during 1854,	$318,621 19
Cash on hand, Dec. 31, 1854, - -	54,337 18
Imports, 1854, - - - - -	1,396,786 24
Exports.	1854.
Foreign, - - - - - - -	311,092 07
Domestic, - - - - - -	374,029 70
	585,122 67
Expended for schools, 1854, - -	$24,969 28
Number of scholars, - - - - -	11,782
Do. of natives, learning English, -	600

[Communicated for the Friend.]

OBITUARY

Of Mrs. A L. CONDE, *Wailuku, Maui.*

D, at Wailuku, Maui, March 30th, Mrs. ANDELUCIA L., wife of Rev. D. T. Conde, aged 44 years. Mrs. C. was a native of Jericho, Vermont. She was the subject of religious impressions from early life. Her parents were faithful in the discharge of Christian duties, and taught their children to walk in and out before the Lord She was humbled in view of her own depraved heart, and admired the great and glorious plan of salvation, through a crucified Redeemer. She sought the Savior sorrowing for her own sins, yet feeling assured that Christ was able and willing to cleanse, purify and save, all "who will come to Him" with broken and contrite hearts. As such, she sought and found Him, as all may who will come on the terms He offers.

As a new nature was implanted within, new feelings and desires were developed. Her heart was drawn out in love and tenderness towards the poor, afflicted and despised. Her taste for reading was changed. The Bible was a sweet companion, also books on experimental religion. A hope was growing up in her which nothing could destroy. She felt conscious that it was founded on Christ alone. She had often adoring views of the Savior, and felt that God's will was hers.

"My willing soul would stay
In such a frame as this,"

were lines often sung by her.

At times, she had a great dread of death. She cried unto God, and received the comforting assurance that Christ would go with her through Jordan. This she fully realized years after. When her limbs were palsied by the cold chills of death, and her tongue had ceased to speak, she signified that Jesus was with her.

While a young lady, she went about doing good to those who needed kindness, sympathy and instruction. Her desire to benefit others increased, and her heart was drawn out in love towards the heathen. She consecrated herself anew to God, to do as He should bid. She was directed to the Indian Mission in western New York, where she labored with acceptance and success a year. She then became the wife of Rev. D. T. Conde, and came to the Sandwich Islands in 1836. Her warm, affectionate heart could not leave kindred and friends without the sundering of many ties. But she loved Jesus, and earthly attachments could not deter her from duty. Her cherished hope was, soon to meet loved ones where hearts would be united and never again separate. She longed to have the poor and despised share in the joys of heaven.

Hana, on East Maui, was her home for some 11 years. There she labored faithfully for her own degraded sex, and was much beloved by them. She was a lady of refinement and intelligence, and her heart often longed for sympathy and communionship of kindred spirits, while her husband was about His Master's work. Hana is a remote place, and difficult of access—hence she seldom saw Christian friends.

The darkness and ignorance of heathenism has none o that sweet, tender and cheering influence to impart, which is so essential to the refined Christian heart. Mrs. C. ever felt kindly and tenderly towards those around her, and she fully appreciated their uncouth acts of kindness in return.

Cares multiplied—her strength began to fail—no medical aid was near—no Christian female near to administer to her necessities or relieve her of a single care, or speak a kind and encouraging word. She sometimes left the station, with her family, but the tedious and uncomfortable journey abroad would rather debilitate than strengthen her system. She loved the heathen, and desired to do them good, and with reluctance left Hana, with her family, in 1847, to seek a more congenial climate at Wailuku.

Maternal cares had so increased, and her strength was so much diminished, that she was unable to do as much for the natives as in former years. Still, her interest in them never relaxed. Her soul was full of sympathy and kindness; and when the cares and coldness of the world came withering to her heart, and her feelings were not reciprocated, she would shrink back in grief, and go to Jesus—a never-failing friend.

She suffered long from a troublesome cough. Last December she was attacked with inflammation of the left lung, which was soon followed by symptoms of that fatal disease, consumption.

She was not alarmed when told of her situation, but desired, if it were God's will, to be spared longer to her family. When convinced that the disease was progressing, she relinquished her husband and six children to the care of God, and turned her thoughts towards eternity.

Her Christian character, so early formed, was now more fully developed. Her trust was in Jesus, and His presence was ever with her. Darkness would sometimes obscure, for a time, the light of faith, but it soon disappeared, and the light was more brilliant than before.—Thus she gradually approached the dark river of death. When she had reached its shores, the waters receded for a time, and gave her an opportunity to speak. She desired those around her to sing

"On Jordan's stormy banks I stand,
And cast a wishful eye."

Other hymns were sung at her request. She said to a daughter, "I am dying. It is easy to die—very easy. You must not be afraid to die. It is not dreadful to die." She seemed to hold communion with unseen spirits. She prayed for her husband and children as only a mother can pray, and with her cold lips, kissed and gave them a last farewell.

When almost gone, she was asked if she was in distress She replied in the negative. Again was asked, If Jesus was with her? She faintly replied YES. The cold dark waters again returned, and her spirit left its home of clay.

"The angel of the covenant
Was come, and, faithful to his promise, stood
Prepared to walk with her through death's dark vale.
Her eyes were 'closed without a cloud'—
They sat as sets the morning star, which goes
Not down behind the darkened West, nor hides
Obscured among the tempests of the sky,
But melts away into the light of heaven."

Her remains were laid by the side of her dear little Mary, as she had desired. When the isles of the sea shall give up their dead, and the nations of the earth are called to judgment, this loved friend will again appear, clothed in robes of white, at the right hand of Jesus, and with her, as pure and white, some who were once poor, degraded and despised Hawaiians. C.

Examination at Oahu College.

A public examination will take place at this institution, on Tuesday, the 8th inst., commencing at 9 A. M., and closing at 3 P. M.

Declamation and singing in the evening, at 7½ o'clock.

Residents and strangers are respectfully invited. Per order of Trustees.

Honolulu, May 3, 1855.

Pitcairn's Island.

We have recently been favored with several letters from the inhabitants of Pitcairn's Island. In all of them there is a most grateful allusion to the articles of clothing, and agricultural implements, which were forwarded a few months since, by some of the good people of Honolulu. We have been requested to express the thanks of the islanders, to all the benevolent donors. Mr. Frederick Young, Magistrate, has thus written us, in behalf of all the inhabitants.

It has been reported that the island was becoming quite too small for the support of the increasing population. So seriously has the pressure become, that a portion of the inhabitants are now contemplating a removal to Norfolk Island, lately a penal settlement of the British Government. Our readers will learn interesting particulars, respecting the contemplated migration of the Pitcairners, by perusing the following extracts from a letter, written by Mr. Buffet, whom some of our readers will remember, visited Honolulu seven years ago. Before inserting the extract, we would make the following statement respecting the island and its population.

Our readers, we are confident, will hardly credit our statement, that the island is only four and a half miles in circumference, —one mile and a half being its greatest length. This mere speck in the ocean, contains scarcely as many acres as a good sized farm, in the United States. The area, suitable for cultivation, would not probably equal the farm of an Oregonian, one mile square, or 640 acres; yet upon this limited area, there subsists a population of about 200 souls.—The increase, during the last few years, has been exceedingly rapid, as will appear from the following statistics :

	Births.	Deaths.	Males.	Females.	Total.
1840,	2	0	53	55	108
1841,	7	3	54	57	111
1842,	3	2	53	59	112
1851,	12	2	85	81	166
1852,	4	0	88	82	170

So very limited and narrow are the "farms" to be divided among the young Pitcairners, that Mr. Buffet writes, that "many of the present generation, do not possess a half acre of land." Under these circumstances a removal appears to be absolutely necessary, but we prefer that Mr. Buffett should tell his own story:—

"Our sincere friend and benefactor, Rear Admiral Moresby, late commander-in-chief in the Pacific, has interested himself in our behalf, in England, and funds have been raised to the amount of £500, which is at interest at 3½ per cent. for the benefit of the islanders, and we have received official letters, that allotments of land will be given us on Norfolk island, after the removal of the convicts. At a meeting held in London, Admiral Moresby and the Bishop of New Zealand being present, the Bishop proposed to have a part of Norfolk island to establish a College for his neophytes, but I cannot inform you how it was settled. We know not how soon a vessel may arrive to remove us, neither can I inform you how many will remove. As for myself I cannot say, as it will depend upon my children; some of them wish to go, others to remain, so that I am in a dilemma; but my opinion is, that it is best to go, although parting from the old island will be very hard.

"Mr. Nobbs has received a letter from a clergyman now in Scotland, who resided some years on Norfolk island. I will give you an extract:

" 'I know of no island that would suit the Pitcairners as well as Norfolk island. The anchorage is certainly very bad, and there are only two parts of the island where landing can be effected, the south side and the north side. Moreover, I know of no island that is so well calculated to supply 300 or 400 persons with the necessaries of life, yea, the luxuries of existence, as it is capable of producing every thing that can promote the well-being of a community. There are two or three thousand acres of fine land now in cultivation, and as much more (if labor be no objection) might be rendered fruitful. The soil produces melons, peaches, apricots, bananas, pineapples, grapes, figs, guavas, lemons, and all tropical and English fruits.—Sheep, oxen, pigs, poultry, and abundance of good fresh springs of water are there. Coffee, sugar cane, arrow root, maize, English wheat, pepper, cinnamon, tobacco, are exuberant.

" 'Whalers are constantly seen off the island. The climate is not hot, the thermometer never lower than 60 and not above 80 in the shade. The island is very healthy, no epidemics are known there, and if Mr. Nobbs is desirous that the race should increase and multiply, he will be satisfied with the island's capabilities, for it teems with life. There is one pleasing exception to this; no venomous creature, not even a gnat, is found on the island. The buildings on the island would not disgrace England's metropolis, and they are more than sufficient for the taste and accommodation of the Pitcairn people, or any similar number of inhabitants. There is very good fishing from the rocks in all directions. At present, there is plenty of stock of all kinds on the island, and no lack of implements of husbandry, should the island be given up as a convict station. There will be no difficulty in the Pitcairn Islanders finding there every thing to assist them in commencing life. I can only say, had the community, instead of being chiefly convicts there in my time, been as innocent as the Pitcairn Islanders, I should in all probability have spent my life in that earthly paradise, Norfolk Island.' "

Honolulu Sailor's Home.

☞ Although the Sailor's Home is not yet built, or even the corner stone laid, still the agitation of the subject has already accomplished much good. It has called forth a most cordial expression of kindly feeling towards the "sons of the ocean." They cannot say, "no man cares for us." Throughout the foreign community on the Sandwich Islands, the subscription for the "Home" has been generous and prompt. The time allowed by the government, for raising the sum of $5,000 for the purpose of securing the lot, was one year, but ere the period had half expired the amount was fully raised.—Four-fifths of this amount, was raised too, among the people of Honolulu. We hope that seamen will appreciate this movement. From several of the missionaries living at remote parts of the islands, far away from Honolulu, we have received letters of encouragement, and substantial contributions. A lady on Molokai, writes after this manner:

"What can we, on Molokai, do for the Sailor's Home? I have thought of proposing that we should make a hundred pairs of sheets and pillow cases for it, if some of the importers in Honolulu felt disposed to find material for us to work upon. We could do this if we had six months time for it. The proposition may be premature, but I am so confident of the success of the whole affair that I see, in fancy the walls already erected. When the query comes up, "How are these articles to be provided?" then you are at liberty to call into account my suggestion, and if worth any thing I will look about to see what we can actually do. I have an industrious company of young people around me whose benevolence may well be called out."

Very truly, yours, A. S. A.

[LETTER FROM REV. MR. COAN.]

HILO, March 17, 1855.

REV. AND DEAR SIR:—Please draw on C. & C. for thirty-five dollars in favor of the Honolulu Sailor's Home. Twenty-five dollars of this sum are from the native church at Hilo, to which the pastor begs to add ten dollars. It is a mere trifle and will not much increase the funds for your noble and philanthropic enterprise; but it will, at least, show our cordial interest in the good work. The pittance we send is by no means commensusurate with our desires; but as there are many good and important objects which we encourage, we divide our mite with others.

We feel a sincere and deep interest in the happiness, temporal and eternal, of all our seafaring brethren, and the Hilo church gives annually from fifty to one hundred dollars to the Seamen's Friend Society, besides more than double that amount to procure Bibles, Testaments, Tracts and other useful reading matter for seamen who visit our port.

We hope "The Home" will soon be built and furnished; that it will be well conducted, constituting a peaceful and delightful retreat for the weary and storm-tossed mariner. The sailor needs a *Home*, and may the one you are contemplating be a sweet resting place from toil and turmoil, and a bright emblem of that *heavenly Home*, where, after life's storms and tossings are ended, the good shall be gathered, and where "the wicked shall cease from troubling and the weary be at rest." Yours, in love for the sailor,

T. COAN.

Opinions of persons abroad, respecting Honolulu Sailor's Home.

Late mails have brought us most encouraging epistles from persons residing in other lands, respecting the contemplated Sailor's Home in Honolulu. We have thought it might be both gratifying and encouraging to spread before our readers extracts from some of these letters. Most unexpectedly, have our English friends in the South Pacific, sent forward their *alohas*. These expressions of interest, with their *substantial* accompaniments, are most encouraging pledges of good will.

Extract from Rev. H. Royle's letter dated, Aitutaki, March 24, 1855:

Rev. and Dear Sir:—

"We have forwarded by the 'Electra,' Captain Brown, a contribution to your Bazaar for November next of productions of native manufactures. White and dyed native cloth, hats and plait for bonnets wrought by the members of the Maternal Association, with one hundred dollars from the male members of the church at Aitutaki. Captain Brown could not promise to convey the articles direct, but thought he could leave them at Guam."

Extract from the Rev. G. Nobb's letter dated, Pitcairn's Island, March 5th, '55:

Respected Friend:—

"I received per 'Amphitrite' your kind, and most acceptable letter: the reasonable and very practicable suggestions and requests contained therein shall be promptly attended to. In fact the vessel by which I forward this will take a few of the articles designed by this community as an humble and grateful offering in furtherance of the noble and most christian object you have in view, the institution of a 'Sailor's Home.' That this most praiseworthy and beneficial design of yourself and your worthy coadjutors may be fully developed, is my humble but earnest prayer."

Extract from Mr. Buffett's letter dated, Pitcairn's Island, March 4th, '55.

"And now, sir, for the Fair. The 'Amphitrite' made a very short stay, and we had no articles on hand; but after her departure your letters were read, and your humble servant gave a bit of an oration, saying as our community consisted of sailors, and the offspring of sailors, and being the professed friends of Him who went about doing good, it was our duty to do what we could, and it was unanimously agreed that we should prepare what we could before the 20th inst. for the Fair, that our mite might go for the benefit of the *Home.* We embrace this opportunity of sending a few articles, and if another opportunity offers we will forward some more.

"We send you 2 cases, containing 1 small bureau, 5 boxes, 1 watch stand, 1 stand for whales' teeth, and 7 cocoanut canes, per favor of Capt. Covell, ship Illinois."

Extract from a letter of J. Hunnewell, Esq., dated Boston, Feb. 8th, 1855:

Rev. Sam'l. C. Damon:—

Dear Sir:—I have commenced the subscription paper you sent to me to aid the Sailor's Home at Honolulu, with $150, for myself and son; and Mr. Chas. Brewer has added $100 more, making $250, for a start, and have seen several Boston gentlemen and shown your number of the "Friend" that gives your appeal and the Constitution, &c., &c. A part of that, with some additional remarks, will be made to appear in some of the Boston papers. After that, a personal appeal will be made to some of the Boston merchants. I shall likewise make an appeal to the ship owners of New Bedford, and shall request your home Secretary, the Rev. Mr. Spaulding, to extend the appeal to the ship owners of New London, as he will no doubt to those in New York, and report progress to you hereafter, and remain

Very respectfully, yours,
JAMES HUNNEWELL.

BIBLES! BIBLES!—Just received and for sale, at the Chaplain's Study, Bibles of various sizes and styles of binding. These books are imported by the *Hawaiian* Bible Society, and sold at the American Bible Society prices in New York, with the additional charge of actual expenses.

HONOLULU MARINE HOSPITAL.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz., a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this, what a Hospital should be.

Patients will also be received by Drs. Rooke, Hardy, Newcomb and Guillou.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

21—Bk. Italy, Weld, cruise.
Sh Herald, Allen, Ochotsk.

PORT OF HILO.

Arrived.

March 7.—Ship Chandler Price, Curn, N. Bedford, 6 mos out.
10.—Ship Mary, Marchant, Edgartown, 33 mos out, 960 bls. wh on board.
—Barque Robt Morrison, Pease, N. B., 7 mos out, 190 bls. sp
14.—Ship Eliza Adams, Howes, N. Bedford, 4½ mos out,
16.—Ship Java, Wood, Fairhaven, 11 mos 60 sp. 380 w
March 30—Ship Euphrates, Killmer, N. B., 5 mos, 55 sp.
April 1—Illinois, Covell, N. B., 17 mos, 150 sp.
4—Henry, Bunker, Nantucket, 17 mos, 85 sp, 60 wh.
Splendid, Smith, 5 mos, 18 sp.
April 5—Am. bark St. Mary's, Martin, 20 days from San Francisco, bound to Sydney, put in for water, 16 passengers.
19—Am. wh. ship South Boston, Randolph, Fairhaven, 5 1-2 mos., 140 bbls. sperm oil.

The S. B. was the only ship in port, April 20th.

Memoranda.

Bark "Fanny," Daniel B. Nye, Jr., left Nukahiva March 9, for Kawaihae, with 660 bbls on board. Spoke Feb. 20, bk Sea Fox, Comery, 300 sperm, bound to Marquesas. Reports laying at Nukahiva, the following ships: Geo. Washington, Allen; Wareham, with 250 bbls sperm, the cruise; ship Cornelius Howland, Luce, N. Bedford, 6 months out, 150 bbls sperm; ship Cambria, Pease, N. Bedford, 6 months out, 60 bbls sperm, ship Henry, Bunker, Nantucket, 85 bbls the cruise; bk Isabella Smally, N. Bedford, 50 bbls the cruise, and was taking the above ship's oil on freight—she is to cruise three weeks and home direct; ship Jeannette, Pierce, N. Bedford, clean, sailed two days previous for the Japan Sea; ship Gazelle, Upham, Nantucket, 30 months out, 800 bbls sperm. Capt. Upham was very sick, and expected to live but a short time.

The President left at Valpairaso the French brig Obligado, and at Callao the Forte and Alceste; the latter with a broad pendant. The Am. Frigate Independence, 60. Com. Mervin, was at Valparaiso. The Revenue Cutter Jno. Adams sailed in March for Panama. The President lost a man overboard April 9th, and a marine died the same day

The British bark St. Mary's arrived at Hilo, Hawaii, on the 5th inst, 19 days from San Francisco. This is the vessel reported in the San Francisco papers as having run away with a constable, who had been put in possession of the vessel under attachment, and whom it was supposed she would land at these islands. She is bound for Sydney.

Capt. Upham of the Gazelle, died while at one of the Marquesas Islands; his wife and son have arrived at Lahaina.

The whaleship Bart. Gosnold spoke, off Massafuero, March 5th, ship or bark Vigilant; N. B., 32 mos. out; 120 spm. since leaving the Sandwich Islands Feb 28th, off St. Carlos, Chiloa, spoke ship Roman, Cumsky, 50 bbls. spm since leaving the islands.

The Clipper ship Spitfire at S. F. reports having spoken on the 28th of January, near Cape Horn, the schooner Bustamente of Hartford, 51 days from New York bound to the Sandwich Islands. She is now 140 days out, and is fully due, if such a vessel is bound here.

WRECK OF A WHALER.—The whaling bark W. T. Wheaton, Capt. Comstock, of New London, was wrecked in Santa Cruz harbor on Friday last. She had gone in to get provisions, and was left at the mercy of the ground swell and land current by the falling of the wind. She went upon the breakers, and is supposed to be a total loss. She had no oil. No lives were lost.—*Alt. Cal.*

The Friend.

HONOLULU, JUNE 15.

[For the Friend.]

Written on reading an account of the death of Wm. Emerson, who died on board the ship Arctic, April 24th, 1852, lat. 48 deg. 39 min. N., long. 158 deg. 28 min. E., by a young lady in Massachusetts.

THE DYING YOUTH.

And must I die? Must I die here,
Upon the ocean's foam;
Far, far from all the loved ones dear—
Far from my own sweet home?

Must I die, and mother not be near
To soothe me and caress?
Without a father's voice to cheer
My fainting soul, and bless?

Must I breathe in a stranger's ear,
Thoughts that my bosom swell,
As the Angel's warning voice I hear,
And bid to earth farewell?

Far down beneath the cold, dark wave,
Must I make my lonely bed?
Where the rushing waters ceaseless lave—
There rest my weary head?

Ah, yes; for even now I feel
The death damp on my brow;
Coldly its shadows o'er me steal—
Yes, yes, I'm dying now.

Fainter and fainter, in mine ear
The murmurings of the deep;
The sighing winds I list to hear—
They come not—do they sleep?

Or do they pause in their wendings free,
To catch my latest sigh,
And bear away, beyond the sea,
To my home, my last good-bye?

Ah! then full soon will my message be
Borne to the distant shore:—
Winds, waft it gently o'er the sea,
As ye tell them I'm no more.

No more—no more—for in thy sight,
All-wise, All-seeing One,
Ruling in love, it seemeth right;
Thy will, not mine, be done.

☞ The Trustees of the Sailors' Home have completed their contracts with responsible parties for digging the cellar, and erecting the buildings in the "Home" lot. The work is now in progress.

REMARKABLE EVENTS.

June 1. Tennessee admitted, 1796.
3. Harvey died, 1657.
4. St. Paul's Church, London, burnt, 1661.
6. Alexander the Great born, 356, B. C.
8. Jackson died, 1845.
10. British Parliament abolish slave-trade, 1806.
12. New York incorporated, 1665.
13. Summerfield died, 1825.
14. Washington Commander in Chief, 1775. Battle of Marengo, 1800.
16. Great eclipse of sun, 1806.
17. Battle of Bunker Hill, 1775. John Wesley born, 1703.
18. Battle of Waterloo, 1815. War with Great Britain, 1812.
19. Pascal born, 1623; Magna Charta signed, 1215.
20. Mrs. Barbauld born, 1743.
21 Thales died, 545, B. C.
22. Bonaparte's second abdication, 1815; M. Henry died, 1714.
23. Union of Utrecht formed, 1579.
26. Julian the Apostate died, 363; Doddridge born, 1702.
27. Battle of Monmouth, 1781.
28. Madison died, 1836.
29. Apostle Peter crucified, 65; Henry Clay died, 1852.
30. Montezuma died, 1520.

☞ We would call the reader's attention to the "Lecture" published in our columns. The esteemed author is now advanced in years, and is fully informed upon those topics which he has discussed. We would acknowledge our indebtedness for a copy of this lecture, to the author's son, now a lieutenant on board H. B. M. S. Trincomalee. It is with gratitude we also acknowledge our indebtedness to the author himself, for his kindness in forwarding, (at his Son's suggestion,) copies of the "Rules and Regulations" of several Sailor's Homes in England. Information at this time is exceedingly opportune, in as much as it will enable the Trustees of the Honolulu Sailor's Home, to conduct their operations with judgment and intelligence. We would, here remark, that the importance of Sailor's Homes has increased of late, very much in England.—They are "patronized" by members of the royal family, and especially by aged Admirals and other officers of the British Navy. So much importance has the subject assumed that there is now published in London, a monthly Journal, exclusively devoted to the advocacy of "Homes." A copy of this Journal, for March, 1855, is now lying upon our table, and for a broken file published in past years, we are indebted to Capt Trollope, of H. B. M S. "Rattlesnake." We shall be exceedingly glad to place this Journal upon our list of exchanges.

In a late "Ill. L. News" we notice a donation of £300, (and £200 conditional) by Queen Victoria and Prince Albert, for the Royal Portsmouth Sailor's Home.

Professorship of Languages, Oahu College.

This department is now vacant by the retirement of the Rev. D. Dole, who has been connected with the establishment at Punahou during the last fourteen years, or from its commencement. We do most sincerely regret that combination of circumstances which should have led him to feel obliged to resign. This subject is the especial occasion of regret at the present time, in as much as the college is in its infancy and unendowed. In accepting the resignation, the Trustees bore the most unqualified testimony to the zeal and fidelity which had been manifested by him during the long period of his service in the cause of education. The majority of the children of the Missionaries at the Islands, have been educated under his superintendence. Several of these have been prepared for college by him, and are now contending for the highest honors in some of the colleges of New England. Others have come forward, and are now qualified for the pursuits of active life. As a school, "Punahou," under the administration of the Rev. Mr. Dole, has been one of the brightest ornaments of the Sandwich Islands. Its usefulness would have been much increased, had "the Mission," allowed him to have adopted his favorite policy of admitting children of persons unconnected with that body. We are most happy to state that, that "exclusive policy" has been abandoned.

We understand that Mr. Dole designs establishing a school at Koloa, on Kauai.—Should he be enabled to accomplish this purpose, we presume no parents who may commit their children to his care, will have occasion for regret.

The Trustees have taken means to fill the professorship, vacated by Mr. Dole, and should they be successful, it will be duly announced.

☞ In the "P. S." of the Rev. Mr. Snow's letter found in another part of our columns, will be found an intimation that the crew of the ship "Canton" may be lost.—We are happy to report that all are alive.—Capt. Wing has visited Honolulu, on his way to the United States.

A LECTURE

On the character, condition, and responsibilities of British Seamen. By Rear-Admiral Sir William Edward Parry.

PREFACE.

The following thoughts were addressed to some five or six hundred Seamen in the Victoria rooms, at Southampton, on the 19th of December, 1853. The task was undertaken at the request of my esteemed friend, Archdeacon Wigram, who thought that some such address from a brother-sailor, might be productive of good to that numerous and important class of his parishioners.

How far the Archdeacon's hopes have been realized, it is not for me to determine; and we both know that the event is in much better hands than our own. I can only say that I was kindly listened to by a large assembly, consisting principally of seamen; and suggestions having since been offered from several influential quarters, that it would be desirable to print the Lecture for general circulation among sailors, I now do so, with the double hope of promoting the welfare of those into whose hands it may fall, and also of contributing something towards the funds of the "Pourtsmouth Sailor's Home,"—one of those admirable institutions, whose importance is just beginning to be felt and acknowledged; and which will, I trust, continue to be multiplied and supported, till every British seaman finds a comfortable and respectable "home" in every British Port.

If time and circumstances had permitted, I should have been induced to dwell, at some length, on the importance to our sea-faring population of paying greater attention to a devout and orderly observance of the Sabbath;—a duty which is, I fear, sadly neglected at most of our sea-ports. "The Sabbath," says our Lord, "was made for man." I wish I could persuade our sailors that "the Sabbath was made" for *them*, as much as for any other class of their fellow men—made for the health of their bodies, and the salvation of their souls; not, as too many of them seem to think, for the dishonoring of God, the encouragement of profligacy, and the practice of sin.

And, although the remarks in the following pages were intended to be addressed exclusively to seamen "before the mast," with the hope of exciting in them a just sense of their responsibilities, yet I trust that any officers, whether of the Naval or Mercantile Marine, who may peruse this little book, will kindly take it in good part, if an old sailor reminds them that still weightier responsibilities rest upon *them*. Sailors, like other persons, naturally look up to their superiors for example; they will "follow in the wake" of their officers, not only in what concerns the duties of their ship, but in what relates to their moral conduct and conversation. Whenever, therefore, an Officer is unhappily, guilty of any of the vices alluded to in the following pages, as too often marking the conduct, and disgracing the character of British seamen, let him remember that he is assuredly exercising upon some—perhaps on many—*a positive influence for evil*; of which he cannot see either the full extent or the ultimate consequences; evil, which may not only affect the future character and prospects of many a good seaman in this life, but will in all probability follow them—and *him* too—into eternity.

It would be well if every officer would act up to the admirable spirit of the first Article of War for the governance of the British navy, which solemnly enjoins the duty of discountenancing everything that tends to "the derogation of God's honor and the corruption of good manners." W. E. P.

Greenwich Hospital, March, 1854.

On the Character, Condition and Responsibilities of British Seamen.

Among the most striking, and, I think, the most promising features of the present age—at least in our own country—is the practice of distinguishing our fellow men into separate *classes* of society, and thus addressing them in the spirit of friendly admonition, with a view to the bettering of their condition and the improvement of their character. This seems a reasonable and judicious mode of proceeding; for, just as, in the children of a single family, we see a great diversity of natural dispositions and propensities, rendering it expedient to adopt towards one child a treatment different from that of another, so, in the great family of man—in the various departments of society—from the highest to the lowest, we may observe certain peculiarities, and even certain prejudices, belonging to each class individually, the natural result of their respective callings and habits of life. And it is by dealing with each class separately through the medium of these peculiarities, and addressing ourselves distinctly and directly to the removal of these prejudices, that the best hope may be entertained, with the blessing of God, of producing the desired effect upon men's minds, of reaching their consciences, and touching their hearts.

It is in accordance with this principle, and in the humble hope of your deriving some advantage from our adopting it, that I am invited to meet you here this evening. It is my purpose on this occasion to speak to seamen, and to seamen only; and I count it a pleasure and a privilege to do so. For I have spent a great part of my life among them. I think I know them well. I am sure that I esteem and value them highly. I can truly say that I rejoice in every opportunity of doing them good; and I hope to be permitted this evening to address to them a word of friendly and affectionate advice.

I wish to speak to you, my friends, as following the same calling in life which I have myself followed for more than fifty years. I desire to address you as members of the same profession to which I have myself the honor to belong; in short, as a sailor speaking to sailors. And the subject I propose to bring to your notice is this:—The Character, the Condition, and the Responsibilities of British Seamen.

But I know that whatever I shall say and you shall hear will be all in vain, will be utterly powerless for good, unless God give us his blessing. Without this it would be as well for me to speak to empty walls, and for you to close your ears to my address. I rejoice, therefore, that the voice of prayer and supplication has already ascended this evening within these walls; and I now earnestly invite you, once more to lift up your hearts with me to God to ask his blessing on our present engagement, so that we may not have come together this evening in vain.

In speaking of the character and condition of British seamen (for I conceive that these two are closely connected,) there is, I apprehend, very much to lament, but also much to be thankful for; much to regret when we contemplate them as they still are, but much to afford encouragement and hope when we consider what they were when I first entered the navy, more than fifty years ago. I do not stand here to-night, my friends, to please you by some false though flattering tale, some delusive description of what seamen now are.—I should be unworthy of your attention if I did. But still I may say, with perfect truth, that they are greatly improved in character since the time that I first knew them. It is true that they were very much the same then as they are now, in their active and hardy habits, their endurance of fatigue, and their contempt of danger. These qualities have always been the acknowledged characteristic of the British seaman, and, I trust, will long continue to be so. But at the time I speak of, our seamen were, in many essential respects, *a degraded class of men*. Notwithstanding their valuable, and even noble qualities as sailors, I have no hesitation in saying (for I say it from personal knowledge) that they stood lamentably low in the scale, as moral and accountable beings. If in the year 1803, you beheld the British seaman close-reefing the maintopsail in a severe gale or furling it in a hurricane, constructing a raft from a hopeless wreck in the midst of the most fearful breakers, fighting at his gun against the deadliest odds, or dashing in a slender six-oared gig to board an enemy's vessel, you saw, indeed, a specimen of dogged perseverance, of daring intrepidity, of cool unflinching determination, such as, I believe, the world could scarcely equal, certainly such as nothing could excel.

But, behold him apart from any of these trying duties—the gale abated, the enterprise achieved, the battle won—behold him returned into harbor, landing at some seaport, his hard-earned wages in his pocket, and the man left to his own devices—and truth compels me to say that, under these circumstances, there was little in him left to admire or imitate—almost everything, alas! to deprecate and deplore. The reckless folly, the more than childish extravagance, of lighting his pipe with one-pound notes, or forcing a handful of silver into the hand of the first beggar he met on the beach, might well excite a smile upon the gravest countenance.—But reckless folly and childish extravagance were not the most deplorable delinquencies with which the seaman on shore might be charged. A slave to drunkenness, and every other sensual passion which tends to degrade and defile the body and to destroy the soul; rushing headlong into the wildest excesses; abandoning himself to the indulgence of every sin; he became an easy prey to the vilest of both sexes, who are always lying in wait to pounce upon the warm-hearted but unguarded sailor.

I should have been glad to draw a veil over these dark shades in the character of the British seaman fifty years ago, but it is *truth* at which I aim, however painful and humiliating the truth may be; and I would willingly leave it to a jury of any twelve im-

partial and right-minded seamen of my own standing, to decide whether I have overdrawn this melancholy picture.

Now, it may reasonably be asked, how came it about that, in a civilized country, and forming part and parcel of a Christian community, there should exist a large and important class of men to whom such a description as this applied? How came it that those very men who were the carriers of England's mighty commerce throughout the world, a chief source of their country's power and wealth, the intrepid protectors of her national interests in every region of the globe and the undaunted defenders of her shores from foreign aggression—how came it, I say, that such men as these should exhibit traits of character so debased, so degrading, so inconsistent with those other qualities which everybody was ready to admit and admire in them?

It must, I think, be acknowledged that these unfavorable features in the sailor's character might be attributed in no small degree to the peculiar nature of his calling. Spending a very large portion of his life upon the ocean, exposed to constant hardships and dangers, which made him careless of many of the comforts of life, and too often reckless of life itself—cut off for weeks, and even months together, from intercourse with other classes, and deprived of the humanizing and softening influences of social, and especially of domestic life—the sailor was apt to become unlike any other of his countrymen. The very privations which he necessarily suffered in the course of each successive voyage, and the very discipline to which he was subject while at sea, rendered him but too prone to break the bounds of moderation and decorum when those privations ceased, and the wholesome restraints of discipline were removed.

But making every allowance of this kind, and fully admitting the sailor's own share of blame in his various excesses, there can be no doubt that the character and condition of our seamen, as a class, were very greatly influenced, in the days I speak of, by the fact of their being a *sadly neglected class*. I can confidently say that in the early part of the present century they were little cared for either in their physical or moral condition, I mean, as to their bodies or their souls. So long as they performed the business of their calling; while commerce was successfully conducted, cargoes duly shipped and carefully delivered, battles fought and won, and the enemy not only kept from our own harbors, but continually chased into their own—and all this by the skill and valor of British seamen—few seemed to care for the bettering of their condition or the improvement of their character. I am borne out in this assertion, because, at the period of which I speak—fifty years since—I believe there existed only a solitary institution (which I shall presently name) which might in any degree tend to promote these desirable objects. In speaking of sailors, the common language was, "Well, Jack, with all his faults, is a very good sort of fellow in his way." "The British Tar" and "The Wooden Walls of Old England" formed the burden of Dibdin's well known naval songs. The national sentiments of which our gallant sailors were the chief subject, were popular in the streets, and applauded in the theatre. But popularity and applause conferred upon them no substantial benefit; for few seemed to bestow a thought upon their condition or moral character, much less their souls. Nay, it was not an unfrequent thing in those days to hear people say—I have myself heard it said a hundred times—that the real value of a sailor's character would be lost, that he would become good for nothing, if you attempted to alter him: which was as much as to say (though, perhaps, no one ventured to say it in so many words) that a good sailor must necessarily be a drunkard, a debauchee, a Sabbath breaker, a profane swearer—that these hateful vices, so dishonoring to God and so disgusting to man, formed an indispensable feature in the character of a British able-seaman!

It would, I conceive, be a libel on the present generation not to admit, that the same culpable indifference to the best interests of our seamen no longer exists. In truth, a much better feeling in behalf of our seafaring population has gradually sprung up. It may be interesting, then, for us to consider what have been the means employed from time to time, and not unsuccessfully, during the past half century, for this purpose.

And first—as being of the highest importance—let me draw your attention to the various means employed, so far as I am acquainted with them, for improving the moral character of our seamen.

Now, in speaking on this part of our subject, I set out with these two preliminary remarks:—

1st. That nothing deserves the name of moral improvement; which is not based on religious principle;

And 2ndly. That all religious principle is based on the Bible, which contains the word and will of God.

From this it follows, that I set little or no value on any schemes for the improvement of our sailor's moral character but such as are founded on these principles; for I know that no reformation, however plausible, can be genuine—no moral improvement, however promising in appearance, will be abiding—which rests on any less solid basis than that of Christian principle. And it is to my mind a very comfortable and hopeful fact, that many such plans have been set on foot during the last fifty years, either for the exclusive benefit of seafaring people, or by which they may profit, if they will, in common with other classes of their countrymen.

First on the list let me name Bible Societies, whose sole object it is to print and circulate, in great numbers, copies of the word of God, without note or comment of any kind. The very first of these societies took up the cause of seamen: and it was to this to which I alluded in saying that, at the commencement of the present century, I knew of only one that had done so. It originated in the year 1779 with a very humble individual, who entertained the pious thought of distributing the Holy Scriptures among a body of troops then assembled in Hydepark, London. This idea was communicated to that eminent philanthropist, the late Mr. Thornton, who immediately contributed £100 towards the furtherance of the plan, and continued to give the like sum annually. In the following year (1780) a society was regularly organized, and at first called "The Bible Society," being then the only one of the kind in existence. In 1804, its object having been extended to the navy, its designation was changed to "The Naval and Military Bible Society," in consequence of the formation in that year of another, called "The British and Foreign Bible Society." And ever since has the Naval and Military Bible Society continued to furnish Bibles and Testaments to our soldiers and sailors at very reduced prices. In our men-of-war they are to be found in every mess; and these blessed volumes, in a compact form, with their neat little brass clasps, have been carried in thousands of our soldiers' knapsacks into almost every part of the world. This society distributed in the last year alone, above 23,000 copies of the Word of God.

In 1804, as already stated, the same plan was adopted, on a much more general and extensive scale, by the formation of "The British and Foreign Bible Society," so called because it prints and circulates the Holy Scriptures, not only in the several languages of our own country, such as English, Irish, Welsh, and Gaelic, but also in no less than 170 different languages and dialects; so that all the people who understand these different languages may now read or "hear in their own tongues the wonderful works of God." I must just add, that this most excellent Society, having itself circulated no less than twenty-six and a half millions of copies of the Word of God, besides being instrumental in circulating about nineteen millions more making a grand, and I must say glorious, total of forty-five millions—thus bringing the Bible within the reach of some six hundred millions of the human family—is now passing through its fiftieth year of labor and usefulness and honor—which is, therefore, properly called its JUBILEE YEAR.

[*To be continued.*]

SHIPWRECKS.—It is stated in the report of the National Institution for Preservation of Life from Shipwreck, that nearly 800 wrecks, with the loss of 870 lives, took place during the year 1853. The report shows, that besides having spent about £7,000 on lifeboats, and £9,000 on rewards for saving life, this society, which has now been established upwards of 30 years, has voted to brave men 79 gold medallions and 539 silver medals, the last gold medallion having been granted to Captain Ludlow, of the American whaling ship Monmouth (now of the 'Black Eagle,') in testimony of his gallant and persevering conduct on occasion of the wreck of the English emigrant ship Meridian, on the island of Amsterdam, in August last. Her Majesty's Government have also marked their approbation of his noble conduct, by offering to him a present of 100 guineas and a gold chronometer by Dent. The society has about 38 lifeboat stations on the coast, the crews of which are paid for exercising the boat four times a year. The cost of a new lifeboat, with carriage and boat-house, cannot be reckoned at less than £300. Her Majesty has contributed recently £100 to the society, but its income was £600 below the expenditure in the past year.—[Lon. Times, May 18.

JUDGMENTS.—It is with our judgment as our watches, none just alike, yet each believes his own.—Pope.

Hawaiian Anniversaries.

We shall furnish our readers with a brief report of the anniversary proceedings of our various Societies, according to the order of time when they occurred.

Hawaiian Evangelical Association.—The meetings of this association, commenced on the fourth Wednesday of May, at the Mission School House. The following persons have been present during the numerous sessions, which have been continued for two weeks; from

Hawaii. Hilo.—Rev. T. Coan, and Rev. D. B. Lyman. Waimea,—Rev. L. Lyons. Kealakeakua,—Rev. J. D. Paris. Kailua,—Rev. A. Thurston.

Maui. Lahaina,—Rev. D. Baldwin, and Rev. S. E. Bishop. Lahainaluna,—Rev. W. P. Alexander, and Rev. J. F. Pogue. Wailuku,—Rev. Mr. Conde.

Oahu. Honolulu,—Rev. E. W. Clark, Rev. L. Smith, S. N. Castle, A. S. Cooke, Rev. D. Dole, Rev. S. C. Damon, Rev. R. Armstrong, Rev. L. Andrews, Rev. J. D. Strong. Ewa,—Rev. A. Bishop. Wailua,—Rev. J. S. Emerson, and Rev. P. J. Gulick. Kaneohe,—Rev. B. W. Parker.

Kauai. Koloa,—Rev. Dr. Smith. Waimea,—Rev. G. B. Rowell.

P. S. The Rev. Mr. Krause, Missionary of the London Missionary Society, from Bolabola, Society Islands, was invited to sit with the association, in its deliberations.

Hawaiian Missionaries' Children's Society.—The anniversary exercises of this Society occurred, Saturday evening, May 26th, at the Mission School House. An address was delivered by the President, A. G. Thurston, Esq. The Secretary, W. Chamberlain, Esq, read an interesting report, and Mr. Seymour, the Treasurer, presented a report of the Society's financial condition.

After the usual anniversary exercises were closed, a marriage ceremony was performed, between two members of the Society, which will be found reported in the customary portion of our columns.

Hawaiian Missionary Society.—The anniversary exercises of this Society, took place at the Bethel, Tuesday evening, May 22nd. The Rev. A. Thurston, presided.—The corresponding Secretary, Rev. E. W. Clark, presented an interesting report of the Society's operations, during the past year.—This Society assists in the support of the Micronesian Mission, and entirely supports the mission to Fatuhiva, Marquesas.

The Treasurer, S. N. Castle, Esq, presented a report of the receipts and appropriations of the Society. The income of the Society during 1854, was, $2,889 51. The greater part of this amount was contributed by the native churches.

On Sabbath evening, May, 27th, Rev. W. P. Alexander, preached the annual sermon in behalf of the Society, at the Court House. Text, Matthew, 6, 10: "Thy kingdom come." A collection of $129 was taken up to aid the funds of the Society.

Hawaiian Bible Society.—This Society held its 14th anniversary at the Bethel, Wednesday evening, May 30th. The President, Judge Lee, being absent, Judge Robertson, a Vice President, was called to the Chair.—The report of the Secretary was read, and will be found in another part of our columns. The Treasurer, A. S. Cooke, Esq., presented his report, showing that the Society has funds on hand to the amount of $475 75.

The annual sermon before the Society was preached at the Bethel, Sabbath evening, May 20th, by Rev. S. E. Bishop. Text, Ephesians, vi, 17: "And take * * * the sword of the spirit, which is the word of God."

Hawaiian Tract Society.—This Society held its anniversary at the Bethel, Thursday evening, May 31, Judge Andrews in the Chair. The Secretary, G. M. Robertson, Esq., read the record of the various meetings which had been held by the Society during the past year, together with the Colporteur's report.

The Treasurer, O. H. Gulick, Esq., read his report, showing that the Society had received and expended for the business of colportage, $706 00; and that from various sources, the Society had collected, and had now on hand, funds amounting to near $400.

The Rev. L. Lyons preached the annual sermon before the Society, at the Court House, Sabbath evening, June 3d. Text, Psalms, 11: 16: "Upon the wicked he shall rain snares, fire and brimstone, and an horrible tempest: this shall be the portion of their cup."

Stranger's Friend Society.—This Society held its third anniversary at the residence of W. A. Aldrich, Esq., in Honolulu, Thursday, June 3d. An uncommonly large number of ladies attended. The following reports of the Secretary and Treasurer will exhibit the effects of the Society during the past year:

Third Annual Report of the Stranger's Friend Society.

A kind Providence has brought us to the close of the third year of our existence as a Society. The faithful reports of the two preceding years have given us every important item respecting our association during that period. Although there is but little of stirring incident connected with our proceedings, there is still enough of moment to keep alive our earnest interest, and to preserve, in active exercise, the warm sympathies of our hearts. We realize but little of the want and woe which darken and desolate large portions of our world, yet we see enough constantly to verify the declaration of our Divine leader, "The poor ye have with you always."

A record of the transactions of our Association during one year, may, with little variation, be the record of many. It is a record of pleasant gatherings of the members at each others' houses—of the industrious plying of the needle, combined with kindly social converse—listening to appeals from, and receiving to our care the sick and suffering strangers within our gates—now and then rejoicing in the recovery of an invalid, but oftener, by far, erasing their names from our list of beneficiaries, only as death terminates at once their wants and their lives.

During the past year our meetings have been held, as usual, semi-monthly. The average number of members present has been 30. The utmost confidence and friendly feeling continues to exist among us, and the interest manifested for our continuance and prosperity remains unabated. Our President, Mrs. Newcomb, and our Secretary, Mrs. Lee, together with our Treasurer, Mrs. Hillebrand, and one or two members, have left us for a visit to the U. States. We miss their faithful and efficient co-operation, and hope the loss will be but temporary.

We have had, during the year, frequent applications for aid from the sons of want and sorrow. On one occasion, *five* were received at once to our list of beneficiaries. That was a time of some anxiety to us. Our treasury was low in funds, and although we knew that the hands and hearts of our numerous friends were ever open to our appeals, we shrank from taxing their generosity too frequently. Still, duty seemed plain, and the applicants were all received. Several others were subsequently added to our list, and a number of unsolicited and unlooked-for donations received soon after, have assisted very materially in meeting our increased expenses.

The whole number aided during the past year has been 20. The Treasurer's report will inform us of the amount of funds disbursed, as well as all other matters connected with our financial affairs.

Our Society has no "incidental expenses" to make draughts upon our treasury—no agents to pay or handbills to print. All expenses necessary to sustain our meetings are cheerfully met by the members; so that every dollar we receive, whether for our work or as donations, goes directly to provide suitable care and comforts for our beneficiaries. Neither have we any medical bills to pay. At the formation of our Society, several of the physicians in Honolulu most generously proffered their gratuitous services to us in attendance on our sick, and they have continued the same unto the present time; thus showing that they are not weary in well-doing. May they receive an abundant reward from Him who said, "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me."

Our excellent Seamens' Chaplain has also continued his useful labors in our behalf, not only in making us acquainted with those who need our aid, but also in frequently visiting our beneficiaries, and imparting to them the comforts of the gospel, which, in its value to the soul, far outweighs all that can be done for the perishing body.—Some, we hope, have been savingly benefitted by his ministrations.

To-day our Society commences the fourth year of its existence. Whatever of novelty invested it at the outset, has passed away; but the continued interest of the members proves that it was formed—not from the impulse of romantic adventure, but from a firm principle of duty and an earnest desire to smooth the rough way of life before the feet of a few fellow-travelers less favored than ourselves.

In the accomplishment of our plans we shall need much patient, persevering, and often self-denying effort. Ours is not a work to be done up, finished off and laid aside; it is a work for life. There will always be those whose poverty and suffering make tender appeals to our hearts, "and whensoever we will, we may do them good." But it is a work which brings with it its own sweet reward.

We therefore renewedly pledge ourselves to the poor

and needy, that we will hearken to their cry and minister to their necessities. With a nearly exhausted treasury, we renew this pledge, relying chiefly on our own exertions to replenish its funds, and trusting also to a generous community, that they will, among the many demands from other sources upon their benevolence, continue to remember kindly, the Ladies' Stranger's Friend Society,

Respectfully submitted. A. W. SMITH,
Acting Sec'y.

REPORT OF TREASURER OF "THE STRANGER'S FRIEND SOCIETY," FOR THE YEAR ENDING JUNE 9TH, 1855.

Mrs. M. N. FORD, Treasurer,
In acc't with "Stranger's Friend Society," Dr.

To bal. cash on hand. June 9th, 1854,	$181 99	
" am't received for membership,	48 00	
" " " work,	89 00	
" " by donations,	233 50	
" am't repaid the Society,	60 00	
" " of interest on investment,	240 00	$852 49
Pr. Contra.		Cr.
By am't disbursed during the year to indigent invalids,	$809 86	
By bal. cash on hand June 9th, 1855,	42 63	$852 49

☞ We have been requested to state, that the small balance of funds in hand has already been expended, and that there are bills now due exceeding $50. Heretofore this Society has always found itself in funds at its annual meeting, but the uncommonly large number of beneficiaries, during the last few months, has drawn heavily upon its treasury. Some have suggested that *the fund* should be expended; but with all deference to their opinion, we should strenuously oppose that measure. ($240 per annum is an essential aid to the Society's benevolent operations.) If necessity reqnire, we should rather an appeal should be made upon the benevolent public, and we doubt not the requisite funds would be forthcoming.

ROYAL HAWAIIAN AGRICULTURAL SOCIETY.—This Society commenced its anniversary meetings Tuesday, June 12th, at 10 o'clock, A. M., Mauna Kilika. In the absence of the President, Judge Lee, Dr. Wood, one of the Vice Presidents, was called to the Chair.—He presented a concise and interesting report of the Society's proceedings during the past year.

Dr. Rooke, from the committee, on sweet potatoes, presented a valuable report, stating among other interesting items of information, that among the natives, there were known no less than 52 varieties of the sweet potatoe.—He annexed their names,

A letter was read from Dr. Frick, in regard to indigo and its manufacture. It is to be hoped that something highly important may result from the discussion of this subject.

The annnal address was delivered in the evening, before the Society, at the Bethel, by the Hon. G. M. Chase, U. S. Consul at Lahaina. The high merits of the performance were duly acknowledged, by requesting a copy for publication, in both the English and native languages.

"The Fair," came off on Wednesday, but we have no space for comments. We would merely add, that the Treasurer reported $3,300 of funds, invested at 12 per cent, besides $529 49 as cash in hand.

DEATH OF PAKI.

This distinguished Chief, of the highest rank, and Noble of the Hawaiian Kingdom, died a quarter past 2 o'clock on the morning of the 13th inst. Had he lived until August, he would have been forty-nine years old, although by some he is supposed to have been fifty-two. He was the son of Kalani mailuna, and in direct descent from the Royal Family of Keawe and Kalanikauleleiawi. He was born on the island of Oahu, but brought up upon Molokai. His wife, Konia, was a Chiefess also, of the highest rank. She survives him.

For reasons which it would be extremely difficult to explain to foreign readers, the family from which he was descended, has been for many years, or generations, under a cloud. "Rebel" blood ran in their veins, but it was still acknowledged as "Royal." It might be said, that there was not power enough in the kingdom to suppress its influence. For many years that influence has been commanding—the more so, as the distinguished representative of the family has maintained so high a degree of probity, dignity, temperance and christian profession. To whatever excess others might proceed, they have found in Paki a stern, dignified and uncompromising reformer. As Chamberlain of His late Majesty, he sustained an honorable and noble character. Others might forget their rank and station, but he was "faithful found."

The residence occupied by Paki, situated in the very heart of our city, is admired by all for the taste and beauty with which it is laid out and ornamented. It would do credit to a gentleman of the most cultivated and refined predilections.—Long will he be remembered in this community and by foreign visitors. Among his own people and the retainers of his family, he was greatly beloved, and his death will be sincerely mourned. Truly do we mingle our sympathies with those who mourn, that never more shall we behold his noble, portly, dignified and chief-like form in our streets, or mingling among the Chiefs and rulers of the kingdom. It makes us draw a long and deep sigh, to record the death, one after another, of the Hawaiian Chiefs. They are fast passing away, and "ne'er shall we look upon their like again."

Departure of Missionaries for Micronesia.

On the 24th of May, embarked the Rev. Dr. Pierson, and wife, accompanied by an Hawaiian, named Kanoa, and his wife, on board the American whaleship "Belle," Capt. Handy. It is the intention of Capt. Handy to cruise upon the "Line," and among the Kings' Mill and Malgrave Islands, before landing the Missionaries at Strong's Island. By persons acquainted with Captain Handy, and the parts of the ocean over which he intends to cruise, this is regarded as a rare opportunity for missionary exploration. If we were not so much crowded for room, we should add additional remarks upon this subject.

On the evening before sailing, an interesting meeting was held at the Bethel, at which addresses were made, by Dr. Pierson, Messrs. Coan and Clark, and his Excellency Governor Kekuanoao.

The following is a translation of remarks by Kanoa.

Resident fathers of this nation and princes who have come into this assembly, great is my love to you.

I declare to you that the former condition of this nation was that of ignornnce, nakedness and extreme brutishness and poverty. Now we are changed, we have knowledge, we are greatly enlightened.

I also declare to you that the cause of my going out on this mission is on account of my exceeding great debt to the kingdom of God. I have land and cattle, and horses, and parents and brethren, and I have looked on all these things, but they will not cancel my debt, therefore I give my whole body and soul without reserve, for this salvation, because this treasure was freely given to us, therefore we freely give without murmuring,

And we ask of you ye fathers of this people, to pray earnestly to God for us, as we sail to strange lands; for we know not the thoughts of that people; but our God is a very present help in time of distress.

The sovereign of this nation has declared that the man who walks after righteousness is his man; but that the man who goes in the way of unrighteousness is none of his; therefore, O Hawaiian people, let our love gush forth at this word of our King.

Farewell my dear friends, from Hawaii to Kauai. Let us not be sundered, let us cleave to one another for we have all one Father. And when we are gone do not cut the rope that unites us, but hold on to us still. Again, farewell. KANOA.

SAILOR'S HOME INSTITUTION.

The Sailors' Homes throughout the country have been invited by the Central Institution, to afford aid to the widows, wives and children, of sailors, soldiers and marines, involved in the present war; also to the wounded and sick who may require temporary rest when passing through any town where Homes are established. The preference given by good sailors in general to Sailors' Homes, instead of the vile places to which they were compelled to resort before Homes were established, is very much on the increase; and the Homes established at Portsmouth and Devonport are of very great benefit to our men-of-war's men. Very gratifying accounts have been received from Dublin, Cork, Queenstown and Belfast. At the latter places, in consequence of two shipwrecks, 27 men are lodged in the Home, and private lodgings obtained for 25 more, and the committee have received £1700 towards building a new Home. At Dover, 51 shipwrecked seamen have been received into the Home during the year; a large sum has also been subscribed for the purpose of building a Home, and the Harbor Commissioners have given a piece of ground for the site. At Cardiff a magnificent Home, built at the sole expense of the trustees of the Marquis of Bute's estate, is nearly complete, and will be ready for the reception of inmates in the course of a few weeks, and the benevolent Marchioness will build a church for the use of the Home, at her sole expense. At Sunderland, 1,264 men, of all nations, have been inmates of that Home during the year.—[*London Illustrated News, 13th January*, 1855.

VESSEL SUNK BY A WHALE.—Capt. Jones, of the British schooner Waterloo, of Portmadoe, reports that whilst in the North Sea, on a voyage from an English port to Sheidam, and about 50 miles from Lowestoft, he and his crew "perceived a large whale to windward, coming down for the vessel, partly out of the water, and swimming at a very rapid rate; and when about ten yards from the ship's side, dipped and struck the vessel under water, abreast of the fore-rigging, on the port side, with his head, with a fearful blow, when the vessel was perceived to heel and crack, and after striking the vessel the whale plunged in the deep headforemost, and rose his tail on high, nearly touching the foreyard, and then disappeared." The vessel leaked rapidly, and in a few hours afterwards sunk, he and the hands escaping in the long boat with difficulty. We wonder if the schooner was well insured.—[Boston Traveler.

LOOCHOO AND JAPAN.—"The visit of Dr. Bettelheim," says the N. Y. Observer, "to this city, is awakening much attention. A committee of clergymen of various denominations has been raised to digest a plan of operations in behalf of promoting a Mission to Japan, and we trust that their measures will be greatly successful. We are glad to know that the Missionary may be heard next Sabbath evening at the Tabernacle."

We trust that efficient measures will now be adopted in regard to Japan. The Hawaiian Missionary Society, one year ago, forwarded to the Am. Board $1,000 for this object.

Secretary's Report of H. B. Society, offered, May 30, 1855.

Another year's operations of our Society have closed, and the friends of the Bible cause have assembled to celebrate the XIVth anniversary of this institution. The natural inquiry of every one is, what has been done during the year, which is now forever past?—Has the Word of life been widely scattered? Have all those means been employed which are necessary for the greatest amount of efficiency and usefulness; and to what extent has the circulation of the Scriptures been carried forward?

Our Society is not a publishing, but a distributing association? The field of its operations is the foreign population of the Sandwich Islands, and the numerous classes of seamen visiting the various ports of this kingdom Taking one view of the subject, the field of our operations is quite limited, but taking another view, and the field is as long and as broad, as it appeared to our Divine Savior when he declared, "The field is the world."

During the year, the number of Bibles and Testaments, disposed of by the Society is as follows. It should be understood that this number includes both those sold and those gratuitously distributed.

	Sold and distributed.		On hand, May, '55.	
Bibles,	Bibles.	Testaments.	Bibles.	Test's.
English,	250	252	440	600
German	49	12	82	0
French,	48	3	10	5
Spanish,	107	31	28	0
Portuguese,	285	92	350	24
Welsh,	2	5	4	0
Danish,	13	10	0	0
Swedish,	19	15	8	18
Dutch,	0	0	4	0
Total,	773	420	871	647

The amount derived from the sale of Bibles and Testaments, is $243 02.

The actual cost of all the Bibles and Testaments which have been received into our depository, with the accompanying expenses, has been $1485 71; thus showing a debit of $1210 69, remains to the charge of benevolence, and to be paid either by the friends of the Bible here, or in the United States. I do not refer to this as an actual debt, which as a Society we are bound to pay, because Bibles and Testaments to the amount of $1289 29 cents have been donated to our Society, by the American Bible Society. While there is no legal obligation in us to refund this balance due the parent Society, still there is an obligation of a higher nature. There is a moral and religious obligation for us to do all in our power to "give the Bible wings," that it may fly abroad over the broad Pacific, and like the dove of Noah, bear the olive leaf of peace to a famishing multitude of our fellow men. O! if there be one benevolent enterprize of the age, which is untainted by sectarianism, and has inscribed upon its banner, "good will to the nations," it is the Bible Society which has adopted and practices the fundamental principle, *of scattering abroad, the Holy Scriptures without note or comment.*—God sent his only begotten Son to proclaim his Word to a lost world, the Bible Societies of Europe and America, have undertaken to carry forward and consummate this heaven-born enterprise. Our Hawaiian Society emulates to become an auxiliary in this sublime work, and volunteers to do all in its power to place the bread of life and water of salvation within reach of those who are hungering and thirsting after spiritual nourishment.

It is gratifying to learn, that our humble efforts are not altogether ineffectual. Many a Portuguese family in the Cape de Verd Islands has now a copy of the Scriptures in the Portuguese language that would have remained destitute, had not our Society like an angel of mercy, stood upon the shore at Hilo, Lahaina, and Honolulu, and proffered an open Bible to the groups of Portuguese sailors who land upon our shores at certain seasons of the year.

I must invite your minds to contemplate the effects of Bible distribution in another quarter of the globe. A few weeks since, I received a letter from the agent of the Am. B. Society, at San Francisco, the Rev. Mr. Buel. Some of the members on hearing his name, may recall a person, who as a seaman on board an American whaleship, visited these islands nine years ago. "I write at this time more particularly to state a fact which came to my knowledge a few days since, which will encourage you in your vocation as a sower of the seed by all waters.—An individual called upon me, the other day, to obtain Spanish Testaments, to circulate among the old Californians. He gave this history of himself, that he had been a member of the Roman Catholic church from his birth, but lately had abjured its faith and attached himself to the Methodist church. He was engaged in an active controversy with the Catholic Priest and had excited among the Romanists, a good deal of enquiry on the subject of the Priest's teachings, which he was desirous of meeting, by circulating among them the scriptures. I found him exhibiting an intelligence on religious truths, and an apparent understanding of first principles, which surprised and delighted me, and which I could not account for in one so lately a convert, until he told me that for ten years he had had the Bible in his possession, and had been studying its contents. This Bible he obtained in this way—eleven years ago, he was a seaman on board the U. S. S. Warren, lying in the harbor of Honolulu. He had a shipmate who was so intemperate that he was ruining himself. He said to him "John you must go to Mr. Damon and sign the pledge." "Why don't you?" replies John. To this was answered "I can control myself—I know when to stop—but you make a beast of yourself." "Well" returned John "I will sign, if you will." So off the two went to your study, and signed the pledge, and you gave each a Bible. The Bible given to my informant, was, as he told me, *the light* which led him to learn the false teachings of Rome and embrace the gospel. I write this for your encouragement, as it encouraged me, and I trust in the day when the secrets of all hearts shall be revealed, it will be found, that to many souls, the Bibles which we have been instrumental in circulating, have proved the source of blessing, the means of conviction to the sinner, and of comfort and edification to the christian. So we shall not have labored in vain, if we have labored with the accompanying power of the Holy Spirit." How apt an illustration have we in this instance of the saying of Solomon, "Cast thy bread upon the waters and thou shall find it after many days."

Besides furnishing Bibles to seamen, I have been enabled to scatter abroad many among foreigners in various parts of the islands. Several schools have been supplied. The call for English Testaments seems, to be increasing among the natives. Others I have sent to Micronesia and Fatuhiva. The importance of keeping our depository of Bibles, fully supplied, is becoming more and more important.

In concluding this brief report I cannot refrain from congratulating the friends of the cause, and members of this association, in as much as they are engaged in a most useful and philanthropic enterprise, upon which rests the blessing of God.

S. C. DAMON.
Sec. of H. B. Society.

Honolulu, 30th May, 1855.

This Fast Age.—English papers mention that the news of the death of the Emperor Paul, in 1801, was *twenty-one days* in getting to London. That of the late Emperor Nicholas, *four hours and a quarter* at the utmost, according to Lord Clarendon's statement in the House of Lords of the time it had been received at the Foreign Office.

Reward of Beneficence.—That man who to the utmost of his power augments the great mass of public or individual happiness, will under every institution, and in spite of all opposition, be the happiest of all men himself.—Rochefoucault.

[For the Friend.]

Intelligence from Strong's Island.

STRONG'S ISLAND, Oct. 27, 1854.

REV. S. C. DAMON:—*Dear Sir:*—We have buried a white man to-day who has been living upon the Island since last March. He died a little past 4 o'clock P. M., after a sickness of some six days. He always went by the name of "Andrew." He refused to let any one upon the island know anything further of his name—"Not," as he told me upon one occasion, "that I have disgraced the name, but it is for fear I may." However, he told me, as I visited him the day before he died, that whenever he thought there was any danger of the sickness growing fatal, he would give me up his family name; but when I visited him again yesterday, as he wished, he was a corpse—died about five minutes before I reached him.

I have picked up the following in one way and another, and if you think best, you are at liberty to publish in the "Friend" such portions of it as you choose.

I learned from his own lips that he was a native of England; that his family when he was quite young, say 1804 or 1805, came to America and took up their residence in Boston. Some of the family still reside there, and they are "well to do in the world." Told me he had an uncle residing there by the name of "Sturges;" also that he had a brother-in-law residing in Sydney, in whose employ he had been till some difficulty turned up, after which he left, and soon spent the little money he had, then went into the boating business on one of the rivers, and then tried whaling.

I heard from other sources, that he left Sydney in the bark Jane, owned by Wm. Town; was in her some 8 months, then left her at one of the Group islands called Videbo. How long he remained there I am unable to say, nor do I know how he got to Hope Island, where he shipped with Capt. Wood, of the "Gay Head," N. B., and was with him some eight months before he came here. He told some of the foreigners that he had an uncle in Baltimore by the name of McDonald.

If this should meet the eye of any of his family, I think these are circumstances enough for them to recognise him. My own impression is very strong that his family name is *Sturges*. Since he has been residing here, he has lived with a colored man by the name of Francis C. Lawton, formerly of N. Bedford. He has kept very much to himself, and so far as I know, has been very industrious. His careless exposure to our wet weather was one of the causes of his death—he took a violent cold. Soon as I learned of his illness, I visited him every day, and rendered him such assistance as I was able, for all of which he expressed very strong feelings of gratitude. The last time I saw him, he said he was getting to be quite an old man. I asked him how old? He replied, "56 last May; born in '98." As I left him, he took my hand in both of his and shook it, with tears in his eyes, and a half articulate "God bless you for your kindness." I then hoped to do more for him, but was only permitted to close the eyes of the stranger as he slept his last sleep. I visited him this last time in a most drenching rain, with my little school boys to pull my boat. I found it difficult to be reconciled to his sudden departure, when I was just hoping to learn something more of his history.

But not a few are the men about these islands in this part of the Pacific, of whom little, even less, is known than we knew of "Andrew." We were surprised, on our first visit in the Caroline, to see how little this class of men knew of each other. It was oftentimes quite a difficult thing to learn the name of a man, they had been so long accustomed to go by the terms Bob, Harry, Jack, Blacksmith, Cooper, Carpenter, etc. The "Hinglishman" and the Yankee were generally distinguishable. We hope and pray, and would labor if we knew how, that this state of things might be changed—that this class of men might become co-laborers with us in the work of raising these poor natives from their degradation and pollution, to the enjoyment of a Christian civilization. We should be glad of a little good, practical instruction in this department of doing good; for it is the most difficult "patch" to cultivate in the whole farm. Some say, "Let it alone, the more you work it the worse you make it." Others might say, "Go into it—dig it up—stir it—let the light of Heaven shine upon it." Others, perhaps, would say, "Let some man-o'-war come and pick 'em all up, and put 'em in some Botany Bay or some 'Tophet' or other." For one, I should like to know how those manage who do the best with such materials—get the most wheat for the Lord's garner, the most jewels for their Master's crown. Ever Yours, B. G. SNOW.

P. S.—There are occasional items of more or less interest which come to our knowledge, some of which it might be well to preserve; and if you have no intelligence later or more to the point, you are at liberty to publish.

In the *Friend* of Nov. 16, 1853, is an account of the "destruction of a vessel and murder of her crew." A ship that was in our harbor last month, reports having seen the Rodolph late as Nov. 9, '51, bound in to the south side of Drummond Island; and that nothing had been seen or heard of her since. She was after cocoanut oil, and was probably taken by the natives of that island.

WRECK OF THE SHIP CANTON, WING, N. BEDFORD.—I learn by a ship in this fall, that the above ship was wrecked last March, on Mary's Island, of the Phenix Group—ran on from an error of the chart. The bark Bell, Handy, Fairhaven, was there in April, saw the wreck, and read the letter left by Capt. Wing. They were on the island some three weeks, till the water failed, then they all left in four boats—9 men in each boat—for Byron's Island. The ship Othello was at Byron's Island five months after that, but no report of the crew. There are more than fears that all are lost, though some ship may have picked them up. B. G. S.

CITY HOSPITAL.

THE UNDERSIGNED having leased the "Gravier Property," on King street, has thoroughly refitted the building, and is now prepared to receive Patients, for Medical or Surgical treatment.

Strangers visiting the Islands for the benefit of their health, and Residents, will be received into the Hospital, and provided (if desired) with Private Rooms, at a moderate expense.

S. P. FORD, M. D.

Information Wanted,

Respecting REUBEN G. ROGERS, belonging to New Bedford. He sailed from that port in ship "Canada," Oct. 1, 1851. Intelligence may be communicated to the editor, or the young man's father, Mr. James W. Rogers, of New Bedford. tf

INFORMATION WANTED—Respecting THOMAS H. CORNELIUS, who served in the Mexican War, and is supposed to be somewhere, afloat or ashore, in the Pacific ocean. Should this notice attract his attention, or any person acquainted with his residence or roamings, he is requested to communicate with the Seamen's Chaplain at Honolulu.

Honolulu, April 16, 1855.

ALSO—Respecting ADDISON POWELL, supposed to be on board the whale ship "Pantheon," Capt. Hazard.—If the vessel touches at Honolulu, the young man is earnestly requested to call upon the Chaplain.

Honolulu, April 16, 1855.

MARRIED.

In Honolulu, May 24, by Rev. S. C. Damon, Ashong, (Chinaman) to Paneohua; (Hawaiian.)

June 2nd, John G. Munn, Esq. to Kahoukolu.

May 19th at Kawaiahao, Honolulu, by Rev. J. D Strong, O H. Gulick to Ann Eliza Clark, both of this city.

At Kailua, Hawaii, March 14th, by Rev. T. E Taylor, W. R. Simerson to Keawekane, (native,) both of Kealakekua.

DIED.

April 6th, at 2 P. M., died in Borabora, Society Islands, Mrs. M. A. KRAUSE, wife of the Rev. E. R. W. Krause, Missionary on that island. A pattern of ardent devotedness to the Redeemer's cause of a humble and most amiable disposition, she was beloved by all who knew her.

At Tahiti, on the morning of the 13th of April, at the age of 17 or 18 years, ARIIANE, the eldest son of Queen Pomare.—This son was the main pillar of Pomare's hope and happiness. It appears that no money had been spared for his education. He is said to have been a young man of much intelligence, affability and kindness, and was looked upon, both by foreigners and natives, as a person well qualified to take the place of Queen Pomare, after her decease.—[Argus.

At Lahaina, ISAIAH LEWIS, of disease of the heart.

Died in Honolulu June 8, Mrs. Margaret Love, aged 39 years, wife of Mr. Robert Love.

In Nantucket, Mass., March 19th, Valentine Hussey Esq., aged 71 years, for the last eight years Secretary of the Commercial Insurance Office, and father of Mr. C. F. Hussey of this place.

In Honolulu, May 29th, Mrs. Johnson, wife of S. Johnson, Carpenter and Builder, after a short illness of two days.

In San Francisco, April 16th, J R. Reynolds, son of Stephen Reynolds, Esq. of Honolulu, Sandwich Islands, aged 21 years.

The Friend.

HONOLULU, JULY 17.

[Reported for the Friend.]

Fourth of July in Honolulu.

The 79th Anniversary of American Independence was commemorated by a grand festival at the Court House.

A large number of ladies and gentlemen, American residents of Honolulu and several from the other Islands participated in the proceedings and we venture the remark, that in no part of the world, did a company pass a more pleasant day or close it with more patriotic or better feelings.

The table was spread in the large upper room of the Court House for two hundred persons, and was just comfortably full. The collation prepared by Mr. Franconi, was abundant and elegantly got up and tastefully arranged. The room was handsomely decorated. A fine band of music was in attendance who "discoursed sweet music" during the dinner and in response to toasts and speeches. Odes were sung by Mrs. Hamm and her class, adding much to the entertainment, "Hail Columbia" "The Star Spangled Banner" and "Sweet Home" could not have been given better. "Yankee Doodle" by Mr. Hamm and "Uncle Sam's Farm" by the young ladies, were received with much eclat. In truth the whole affair was admirably arranged, and the proceedings in all respects creditable and praise-worthy. It was an enthusiastic, heartfelt celebration of the day, a day dear to every American, and doubly so to those in foreign lands, because it so pleasantly reminds them of the land they love so well, the country whose flag protects them, and wherein are "home and friends" dear to the heart, and never to be forgotten.

Hon. D. L. Gregg, U. S. Commissioner, presided at the table during the day, and it will not be amiss to say here, that the ease and dignity, the prompt and ready manner in which he done the honors of the chair, helped to give zest to the occasion.

About half past three the table was cleared and the Declaration of Independence was read by D. A. Ogden, U. S. Consul. After which the time till dark was occupied with toasts and speeches, the ladies remaining during the entire period, imparting to the proceedings, animation, and an elevated tone and pleasure, peculiarly appropriate to the day and occasion.

During the proceedings the health &c. of King Kamehameha was given and responded to by the entire company with a right hearty good will.

The first regular toast, *The day we celebrate and the Declaration of Independence*, was responded to by Mr. Ogden. He alluded to the day and the declaration and the reasons why the one was honored and the other cherished; he also spoke of the early history of the United States, the men of the revolution, the growth and present condition of the Union, and the causes which had operated to produce results so striking. The remarks of Mr. Ogden, as were all the speeches, were listened to with marked attention and enthusiastically cheered.

The second toast, *The President of the United States*, was received by the entire company, rising and giving nine hearty cheers. After which Mr. Gregg, at the call of the meeting, responded in a speech appropriate to the subject and sentiment; he alluded to the dignity of the office, and the importance of the position of the chief executive of the great Republic, and paid a handsome tribute to the present worthy Chief Magistrate of the United States.

The third toast, *Education*, was responded to by Mr. Fuller, in a short, well timed and instructive speech, in which the sentiment of the toast was enforced and illustrated by reference to the influence and results of "universal," or the education of all the people, in several of the States of the Union.

The fourth toast, *The Army and Navy of the United States*, called out a very handsome and deserved tribute, to their prowess, efficiency, and successes in the field of battle, from Doct. Lathrop.

The fifth toast, *Agriculture, Manufactures and the peaceful arts of Industry*, was responded to by Doct. Wood, in a speech which he has kindly furnished for publication, and which will speak for itself.

The sixth toast, *The Press*, was responded to by Rev. Mr. Damon, in a very interesting speech, in which the freedom of the Press was commended, and its importance forcibly set forth. During his remarks Mr. Damon exhibited the 19th number of the 84th *volume* of the old "Massachusetts Spy," first published in Boston, 1771, before the Revolutionary War, with its motto, "The Liberty of the Press essential to the security of Freedom."

The seventh toast, *Republicanism*, was answered by Judge Harris, in a short, interesting speech, in which he demonstrated the truth and justice of the sentiment of the toast.

The eighth toast, *Washington and Lafayette and the heroes of the revolution*, was drank standing and in profound silence.

The ninth toast, *The Union of the States*, was responded to by Mr. Allen, who earnestly and eloquently spoke of the advantages of the Union of the States, and deprecated the spirit of disunion, expressing a strong conviction and hope, that so great a calamity would not soon if ever befall the American people.

The tenth toast, *The Whaling Fleet and Merchant Marine of the United States*, was responded to by J. C. Bullions of the firm of R. Coady, & Co., by a capital speech in which, was commingled good sense, eloquence, and sparkling wit. The importance of the whaling fleet and the worth and services of those engaged in it, and the extent, efficiency and present magnitude of the Merchant Marine of the United States, were truthfully and forcibly set forth.

The eleventh toast, *Religious Freedom and Toleration*, was responded to in a short and interesting speech by Rev. Mr. Strong, in which the sentiment was well enforced and illustrated.

The twelfth toast, "*The Dignity of Labor*," was answered by A. B. Bates Esq, in which

he set forth in eloquent, becoming terms, the true and dignified position of the laboring man, his importance to the world as the creator of wealth, and as the real conservator of every other interest.

The thirteenth toast, *The Ladies of America*, was very handsomely responded to by Doct. Guillou, who paid an eloquent tribute to the worth of his fair Country Women and very touchingly alluded to them an their value as mothers, wives and sisters, and to their duties and influence in each relation.

This closed the regular toasts and speeches. The shades of evening were coming on, and necessity rather than inclination forced a separation. During the sitting of four hours, neither restiveness or impatience was manifested, but every one seemed pleased and happy, and left the festive board, and hall apparently with love of country burning brighter, and hearts made happier and better, by the day's entertainment. "Three times three" cheers were given with a will, to "Native land" and "absent friends," and the assemblage separated. Long will the observance of July 4th, 1855, in Honolulu be remembered.

REGULAR TOASTS.

1st. The Day we Celebrate and The Declaration of American Independence. —Let the former be every where honored by Americans, by cannons, bonfires, illuminations, and every manifestation of a happy people. The latter is immortal because it is truthful, and is everywhere the text book of freemen.

Instrumental Music, by Band,—Marsellais.

2d. The President of the United States.—The Representative of Sovereigns

Music by Band.—Washington's March.

3d. Education.—The corner stone of Republican Institutions, may it find a sure foundation in the minds of all the human race.

Music by Band.—Waltz.

4th. The Army and Navy of the United States.—Efficient to protect the Republic from foreign invasion, and invincible in the field and on the seas, when engaged in battle for its defence.

Vocal.—Yankee Doodle.

5th. Agriculture, Manufactures and the Peaceful Arts of Industry.—The great engines of American progress, may they continue to flourish, and yield wealth, prosperity and greatness, to young America as their legitimate fruits.

Music by the Band.—Speed the Plow.

Vocal.—Uncle Sam's Farm.

6th. The Press.—When untrammelled the Palladium of Liberty, may its fetters be everywhere loosed that it may become as free in all as in our own land.

Music by Band.—Waltz.

7th. Republicanism.—With justice and equality for its base, wise laws for its regulations and an intelligent and virtuous people for its subjects it is the perfection of reason in government.

Music by Band.—National Air

8th. Washington, Lafayette, and the Heroes of the American Revolution.—In defence of Liberty they pledged "their fortunes," to achieve the independence of the United States they perilled "their lives," in the great conflict of the American Revolution they preserved "their sacred honor" and were victorious; everywhere good men delight to honor and Americans to venerate and love their memory.

(Standing and in silence)

9th The Union of the States.—A confederation of sovereignties, in all internal and local affairs free and independent, and in all foreign and general questions "one and inseparable;" traitor to the principles of Liberty is the man, who could by thought or act aid their dissolution.

Vocal.—Star Spangled Banner.

10th. The Whaling Fleet and Merchant Marine of the United States.—Their increase and improvement, betokens the progress of a people governed upon the principles of political equality.

Music by Band.—Life on the Ocean Wave.

11th.—Religious Freedom and Toleration.—Cardinal principles of freemen and to be yielded only with liberty and life, for when the conscience bows to other dictation than to God, the man becomes a slave.

12th. The Dignity of Labor.—Where political equality exists the working man is raised, as he creates wealth and power and controls the expenditures of the revenue, he contributes to accumulate.

Music by Band.—Waltz.

13th. The Ladies of America.—At home or abroad they are treated with respect as the sisters, wives and mothers, whose influence is exerted to educate and control freemen.

Vocal.—Sweet Home.

ADDRESS OF DR. R. W. WOOD.

Mr. President, Ladies and Gentlemen.—The justness of the sentiment, to which I have been called upon to respond, though quite modern, in its conception, has received a practical demonstration, in the history of the people of the United States, where perhaps it has met with more favor, than in any other country.

If we cast our eyes over the United States, and contemplate those elements of growth, prosperity and greatness, which chiefly distinguish her from the States of the old world; her vast Agricultural and manufacturing resources, not merely sustaining a population of twenty five millions, but affording them also the means of individual, as well as national wealth and aggrandisement, besides feeding, if need be, the famishing multitudes of the old world; and capable, it has been estimated, of sustaining, at least one hundred millions, without exhausting, or materially impairing her natural resources; with a commerce second to none, with a line of sea coast, bordering on two oceans, some two thousand miles in extent; and with a navy scarcely equal to that of a fifth rate power; without standing armies, without fortified towns, without military ostentation, or temples dedicated to the trophies of war; the sentiment to which utterance has just been given, seems a fit motto, for a people so circumstanced, and affords a key to the secret of her unparalleled growth and prosperity.

If on the other hand, we cast our eye over the continent of Europe, now bristling with bayonets, resounding with the war tramp, and echoing the war cry, from one extremity of the continent to the other; or if independently of the scenes now being enacted there we consider merely her *peace* establishments, her immense navies, her standing armies, some of which have attained to colossal proportions, her fortified towns and fortresses, her arsenals, with their ponderous, and to her people, oppressive paraphernalia of war; it must be inferred, that other sentiments are there dominant, as to what constitute the true elements of national strength, prosperity and greatness. And this discrepancy is the more remarkable, as it exists between races of similar origin, and not very dissimilar, in point of culture, and in the knowledge of those humane and liberal arts, which have for their object the amelioration of the condition of the species. The only explanation, which suggests itself is, that what have been discovered to be the true elements of national prosperity and greatness on one side of the Atlantic, have not yet been discovered to be so, on the otherside.

As to this rising state of Hawaii (if we Americans may be allowed an allusion to the country of our adoption) just emerged from the darkness of a barbarous age, and without forms or precedents of its own, following the lights of civilized states, it may become us, to leave it for her rulers to determine whether the more expensive and ostentatious forms, of old military dynasties, or the more simple and practical ones of the new hemisphere, be best adapted to the condition, wants, necessities, capacity and genius of the Hawaiian race; what forms will pander least to the besetting sin of Hawaiians—passion for display—what, will be least prejudicial to those lessons of christian morality, the observance of which, they have been taught to regard, as the only reliable *hope* for them, of internal prosperity and happiness, and for them also, the only security against aggression from abroad. We may, however, be excused on an occasion like the present, for dwelling with a little emphasis, though under another flag, on what we consider the advantages, of our own peculiarly American institutions, theories and tendencies.

And here, we need not occupy much time, by comparisons, between the old and the new world, for if the United States go on increasing, in wealth and numbers, for the next fifty years, at the rate of increase for the last fifty years, a case will be presented, in which comparison will cease to have any force.

The agricultural and manufacturing interests of the United States have propably been the main elements of her growth and prosperity. The history of the latter has been one of struggles, under embarrassments, and against obstacles, incidental to all new enterpri es, in new countries and though but just past its infancy, during which, it was at times like the Republic itself, near being strangled, it is now giving every indication, of a speedy attainment of Herculean strength and proportions. And there is at last a prospect, that at no distant day, the course of trade, be-

tween the United States and Europe, in respect to the more important articles of manufacture, will be reversed, and the sending of coals to Newcastle cease to be an absurdity.

The illimitable Agricultural capabilities of the United States have already been referred to. But in order to shew the aptitude of her citizens, for this branch of industry, it will be sufficient to refer to the State of California, which, a few years ago, was without agriculture, without commerce, and almost without inhabitants; and is now the only great mining country in the world, which produces enough, not only for the consumption of her home population, but is exporting also, the products of her soil, as well as those of her mines, to other parts of the world. Shewing clearly, that with the American people, the Genius of agriculture can suffer no eclipse or disparagement, in the presence even of those glittering treasures of El Dorado itself!

We cannot omit to notice in this connexion, the growing jealousy of European dynasties towards the great Republic; a jealousy, which has for its object, certainly, not her naval or military supremacy, not her formidable standing armies, her impregnable fortresses, her absorption of other states by conquest, the warlike spirit of her people, or aggressive propensities of her government under the infliction of wrongs by feebler states. This jealousy has apparently for its object very different elements of national growth and power. They are the vast natural resources of the Republic; the wonderful fertility of genius, and indomitable energy of application, with which her citizens, turn these internal resources of individual, as well as national aggrandisement, to the greatest account; the extraordinary growth and expansion of her towns; her facilities for territorial enlargement, by peaceable negotiation and purchase; the physical and moral, and under her free institutions irrepressible energy and power, for every legitimate purpose, of her masses, and the prospect, perhaps, that such a country, with such a people may, at no distant day, become the granary and the workshop of the world.

How striking the contrast between the present condition and prospects, thus presented, of the American Republic, and those of the monarchical states of the old world Spain, who has never been surpassed, in the extent and glory of her military conquests, now sunk into comparative insignificance—Austria, not to mention neighboring states; with the present advantage of a forty year's peace, a period nearly commensurate with the age of our Republic, on the first outbreak of war, bankrupt, and almost without credit. England, whose naval and military supremacy has, for the last century, been recognized, the world over, is now in danger of losing, by a too confident trust in her military prestige, that proud ascendancy, for which, she has been mainly indebted, to her commerce and manufactures.

The lust and pride of military ostentation, are incompatible with the spirit and genius of the industrial arts. Standing armies, so far from being an element of strength or security to a state, are rather, the vampyres, which fatten on its life blood, and eat out its substance. Under any circumstances expensive, as well as treacherous supports. In this age of progress, of freedom, and of the ascendancy of the industrial arts, they are the last remaining hope and resort, of that pernicious and obsolete dogma of the dark ages, the divine and absolute right of Kings, the last remaining crutch of tottering dynasties, of panic stricken despotisms, of superannuated, decrepit, and helpless aristocracies

From such elements of national strength and greatness, we turn with pleasure, to some indications of the progress of the peaceful arts, in this rising state, the discovery of which, in mid ocean, by a British navigator was nearly coincident, with that memorable event, the Declaration of Independence, which to day we celebrate. Removed about half the circumference of the globe, from Plymouth Rock—to-day brought within thirty five days of New York, an achievement which in respect to its consequences, is more to be exulted in, than the victory of a Waterloo, or the taking of a Sebastopol. And in contrast with that tempest of desolation, now spreading itself over the Crimea and Black Sea, we see these seas, whitened with the wings of a peaceful commerce, with her thousand hope inspiring banners, throwing to the breeze the beloved stars and stripes. We see here also a growing town, teeming with its warehouses, its counting-rooms and workshops, resounding with the clatter of the mechanic arts, the rattle of the drayman's car, the throbbings of the steam engine, and the trippings of Vulcan's hammer. Within our horizon, other signs also of progress, not less promising, are visible, but time fails me, and I pass them.

As the landing of the pilgrims on Plymouth Rock, foreshadowed a mighty and better destiny for that people, so the landing of their descendants on this Archipelago, points significantly, as it does prophetically, to the great and better future which awaits them. We can not, if we would, close our eyes to the ever onward movement, of that mighty but peaceful torrent of Anglo American emigration, which has already swept over a continent, and the ripple of whose surges has reached these shores; and which, by a continuous, ever swelling stream of Anglo Saxon vitality, has now virtually united the waters of the Atlantic, with those of the Pacific; exhibiting on its surface, it is true, some spurious growths, incidental to an excess of vital energy, but giving indications also, of a sanative power, which, in due time, shall rid it of all hurtful excrescences, and restore its circulation to a pure and healthy state. How different the mission, and the armor with which they are clad for it, of these adventurous, dauntless multitudes of husbandmen and artisans, from that of those world renowned warriors, who, three hundred years ago, followed their Castilian leaders to the conquest of the cities of the Montezumas and the Incas. And in respect to the former, what more have those, who are waiting for the fulfilment of ancient prophecy, to hope for—panoplied, not in the habiliments of war, but bearing the emblems of the peaceful arts, the ploughshare and the pruning hook, the quadrant and the compass, the spindle and the loom; less imposing, but mightier, to the pulling down of the strong holds of human bondage. And should the smiles of Providence on their enterprise, awaken the jealousy or provoke the frowns of rival states, arrogating to themselves the right to prescribe bounds to it, or, at any time, to issue their fiat, thus far and no farther; under the specious but false, and most paradoxical of all pretexts, the conservation of a lasting peace to mankind, the "West," as well as the "East," may they first consider that best of all precepts, for the conservation of peace and good neighborhood, "charity begins at home." And before they tender to us their teachings, in the principles of human progress, may they cast aside those old, worn out, lying masks, under which, the rival despots of Europe, lusting for power and self aggrandisement, are now, seeking to bamboozle and ride down the people.

Highly Interesting Relic.—The bullet by which Gen. Joseph Warren was killed at Bunker Hill in 1775 is still preserved. It is an ounce ball, and was exhibited by Alexander H. Everett, on the delivery of an oration at Charleston, June 1836, in which he exclaimed: "This is one fellow-citizens, which I now hold in my hand! The cartridge paper, which partly covered it, is stained, as you see, with the hero's blood." This ball is now deposited in the Library of the United States Historic-Genealogical Society, with the original affidavit of Rev. William Montague, formerly pastor of Christ Church in this city, who made oath that he obtained the ball in London, of Arthur Savage, once an officer of the Customs of the port of Boston who gave Mr. Montague this account of the ball: On the morning of the 18th of June, 1775, after the battle of Bunker, or Breed's Hill, I, with a number of other royalists and British officers, among whom was General Burgoyne, went over from Boston to Charleston to view the battle-field. Among the fallen we found the body of Dr. Joseph Warren, with whom I had been personally acquainted. When he fell, he fell across a rail. This ball I took from his body; and, as I never shall visit Boston again, I will give it to you to take to America, where it will be valuable as a relic of your Revolution."

The Pure Juice of the Grape.

Many of our fashionable wine-bibbers, while drinking themselves into delirium tremens, hug the idea that they are enjoying the pure juice of the grape. Deluded souls! The shadow of a vine-leaf never cooled the fruit from which their beverage was pressed. So general, so well-nigh universal are liquor adulterations at the present day, that, should this state of things continue, pure wine will ere long be considered as a *myth*, like the fabled nectar of the gods, which poets might blab about but never drank, and every day mortals might covet, but never saw. See what stuff is palmed upon our credulous tipplers from upper tendom down to the broad domain of the undiscriminating million, under the name of pure wines.—*Prohibitionist.*

A New York Vegetable.—It is said that the *Tannye*, or Sandwich Island potatoe, has been introduced into cultivation in several of the Southern States. It is described as a "delicious vegetable," and the plant is very productive. The editor of the San Antonia Texan says that a gentleman in that vicinity raised six bushels of the article upon a piece of ground fifteen feet square.—*Agriculturist.*

Sabbath School Picnic.

In accordance with a custom established by H. M. Whitney, Esq., Superintendent of the Bethel Sabbath School, the members of that school and many other children of Honolulu, were invited to a Picnic, at his residence, July 7th, at 3 o'clock, P. M. Our readers will find below, the order of exercises. The attendance of both children and adults, was larger, this year, than on former occasions. It was a scene to inspire the most kindly feelings and hopeful wishes for the rising generation. The joyous laugh, the glowing cheek, the cheerful smile, the animated voice, the light step, the gleeful play, indicated, that much might be hoped for from our youths, if to "the twig," there was given the right inclination. This is not all theory, for the U. S. Consul, Mr. Ogden, standing amid the group of merry children, and interested parents, told us in words of stirring eloquence, that whatever he possessed of correct moral sentiment and right action, and for his standing in society and the world, he was indebted to the instructions received in the Sabbath School. In the course of his remarks, he made a beautiful allusion to the Bible, in its adaptation, to infant instruction to the young. Other gentlemen present entertained the assembly with appropriate remarks.

As the gathering of children dispersed, several hearty cheers went up for some present, and for others absent. The young King of Hawaii, in the first year of his reign, received several hearty cheers, breathing a loyal enthusiasm. The President of the United States, had three cheers, that, we doubt not would have called forth a speech if he could have heard them; and Queen Victoria, too was cheered, in a manner showing that British blood flowed in the veins of some.

We would remark that the British Consul General, the French Consul, and the U. S. Commissioner, honored the occasion by their presence. In the course of the exercises frequent allusions were made to the Picnics of former years, and becoming acknowledgment, was made by Mr. Whitney, in distributing the prizes, that the children were indebted for the present of books, to Mr. Angell, late U. S. Consul, who was present last year, and was so much interested in the scene, that he left funds, to purchase prizes for the current year.

ORDER OF EXERCISES.

At the Bethel Sabbath School Anniversary, July 7, 1855, 3 o'clock, P. M.

1. Prayer.—By the Pastor.
2. Singing—
"To-day we come with singing,
And gladness in our breast."
3. Remarks.—By Pastor.
4. Music.—By the Band.
5. Address.—By Hon. D. A. Ogden.
6. Music.—By the Band.
7. Distribution of Prizes.
8. Singing.— "O come let us sing,
Our youthful hearts now swelling."
9. Collation.—(one hour.)
(with music by the band.)
10. Addresses.—By Mr. Gregg and Mr Armstrong.
11. Music.—By the Band.
12. Singing—"A song, a song of gladness.
For though we here may part."

The Late Fire.

On Saturday evening, July 7th, a fire broke out, in the "Varieties" Theatre, which in an incredibly short time, consumed that building, and spread to those adjoining, destroying three retail stores, and threatning to lay the town in ashes. By the vigorous exertions of the Engine Companies and the citizens the flames were arrested. The danger to the buildings in the vicinity was very great Most fortunately there was scarcely any wind, that evening. The Bethel escaped, but not however without marks of the fire. About forty feet of a new fence was burnt and more than once the belfry was on fire, but the timely assistance of certain friends arrested the flames. We would testify our appreciation of their services, by mentioning their names, but we fear some equally deserving name, would escape our recollection. We cannot however refrain from alluding to the timely efforts of Capt. Myers of the "Tarquina," and Capt, La Blache, of the "Geo. Washington," the only shipmasters in port. All who assisted may rest assured, that the Chaplain, appreciates their services, on that occasion. Had the Bethel been burnt it is difficult to imagine, where the conflagration would have been arrested, in that direction, and we may add, if it had been consumed, it would have required much labor and much expense to have replaced buildings upon the premises.

☞ A Missionary Ship of only 100 tons burden, has been launched at Poplar, England, for the use of the Bishop of New Zealand in his Missionary labors among the islands of Polynesia; it is named "*The Banner of the Cross.*"

An Example.—Mr. Ransom, head master of the School for Royal Naval Shipwright Apprentices, in Portsmouth dock-yard, has been appointed successor of Dr. Woolley, in directing the mathematical studies of the school of mathematics and naval construction. He is entirely a self-taught man, and worked in a coal pit, as a common collier, till he was nearly thirty years of age.

☞ We would acknowledge certain articles forwarded for the forthcoming "Sailor's Fair," by Capt. La Blache.

Late News.

By the arrival of the "Frances Palmer," Paty, Master, 12 days from San Francisco, we have received two weeks later news from Europe and the United States. We cannot learn as anything of special importance has transpired, in regard to the seige of Sebastopol. The resignation of General Canrobert, Commander-in-Chief of the French army, has led to the appointment of Gen. Pelissier. No progress has been made towards a peaceful termination of the war. Sweden it is supposed will join Russia; Austria and Prussia maintain their neutrality. The Allied Powers evince no disposition to abandon the seige. The "Boston Journal" of June 5th, contains the statement that a Captain Lincoln, commanding the American Bark "Maria," has been stabbed by a Police officer in Buenos Ayres, under circumstances most atrocious, as set forth by five British and five American Shipmasters.

The following from the "Boston Journal," shows that Capt. Royce, of Artic-memory, who discovered that "ground" in 1848, is now bound to other regions to discover whales :—

The New Whaling Ground.—The ship Hannibal, Capt. Royce, sailed from New London, 21st inst., for a whaling voyage in the Spitzbergen Sea. This sea has not hitherto been visited by American whalemen, and should it prove a profitable ground for their enterprise, it will not be long before its waters will be covered with their ships.

Judge Lee's arrival in U. S.—We rejoice to announce the safe arrival of Judge Lee and lady in the United States. It appears that they proceeded to New York via New Orleans. It is the fervent prayer of his numerous friends, that with renewed health and reinvigorated constitution, he may soon return and resume his labors at the Islands.

Ericsson Again.—This steamer having been refitted and machinery remodelled, has made another trial trip, and report says, "eminently successful." Something extraordinary may yet come ! !

Dedication.—Last evening, July, 16th, a new and beautiful hall, in the stone store of C. Brewer Esq, was dedicated to the principles and objects of Odd Fellowship. The hall was tastefully fitted up, the audience good, and the exercises conducted with much solemnity and propriety. The condition and prospects of the "Excelsior Lodge," of Honolulu appear in the highest degree prosperous.

☞ William Mores, supposed to reside somewhere on Sandwich Islands, will find a letter, at the Chaplain's Study, from his friends, in Holland, N. Y.

Late News from Petropoulovski

By the arrival of the Bark "Nile," Capt. Stott, Master, we learn the following particulars: The "Nile" arrived off the harbor the last of May, and found the "President," "Dido," three English Steamers and one French vessel. Two days before her arrival, one of the English Steamers had entered the harbor and learned that the town was entirely deserted. The evacuation of the town took place on the 17th of April, when 1,400 Russians, including soldiers, men, women and children, embarked on three vessels of war and two transports, as supposed, for a Russian settlement, in the Bay of Anadir. The English Fleet blockaded the harbor, for several days, before the discovery was made, that the town was evacuated. The Courier from St Petersburgh, bringing the order to evacuate the town, came through in 85 days

Before the "Nile" entered the harbor she was accidentally run into by an English Steamer, and subsequently the English Admiral sent out a Steamer to tow the vessel safely into port. The Master of the "Nile," and two American gentlemen on board, Messrs. Williams and Griswold, speak in in the highest terms of the courteous treatment which they received from the officers of the "Allied Fleet."

We would add, that three Americans were found at Petropoulovski, one of them Mr. Pierce, was agent for a Boston Mercantile House, which has been for a long period engaged in the Russian trade. They had the American flag flying.

Before the Russians evacuated the place, they had done their best to put the town in a state of defence. New forts had been built, and some fifty guns had been remounted. The "Allied Fleet," after entering the harbor, destroyed such Government works as they found.

The "Nile" remained 16 days, and having disposed of a part of her cargo to the English, sailed for Honolulu.

☞ It will be recollected that the Russian Frigate "Diana" was wrecked some months ago at Japan. From the passengers on board the "Nile," we learn that the Captain, or Admiral, built a small schooner from the wreck, and took with him 180 of his crew. During the blockade, it appears that with this vessel he visited Petropaulovski, remained one night, and sailed for parts unknown, but as is supposed, for the river Amoor. The remainder of the "Diana's" crew were taken on board the "C. E. Frost," a small vessel which left Honolulu a few months since.

☞ The "Nile" makes no report respecting whale ships, for she fell in with none.

The Camel Americanized

Or the "ship of the Desert," becoming the clipper of the Prairies.

The following remarks upon the introduction of the Camel into America, we copy from the Oriental of May 26th.

The introduction of the people of China to this country is about to be followed, before ten years have passed, by that of an animal which, with the horse, history traces back to the bounds of their present empire. The camel and the horse, two of the most useful to man of all the inferior creatures, were first found domesticated in the desert regions north and west of the Great Wall. The horse pursued the European when this continent was opened on the East. The camel follows the Asiatic at the commencement of a new era upon its West. According to Humbolt, the Hiong-un, in Eastern Asia, belong to the nations who earliest tamed and trained wild camels. Their bones have been discovered in a fossil state in Northern India, near the Himalaya Mountains. Chinese books assert that the wild creature yet ranges the head water, of the Hoang-ho River. Layard found sculptures containing camels at Nineveh: he thinks they came from the East, not from Africa. The books of Genesis and Job represent them as already in use in Western Asia and Egypt. From those periods, the camel has been slowly introduced into all parts of the world. It is but recently they were first carried to Java, in the Indian Archipelago. Before many years they will probably be found over the whole Continent of America.

The camel may be used in harness. The Jews and Babylonians attached it to the chariot twenty-five hundred years ago, (Isaiah 21 : 7.) Lieut. Lynch transported, by its aid, his boats from the Mediterranean to the Sea of Galilee, when engaged in the examination of the Jordon and Dead Sea. Some of them are trained to great swiftness. In Persia, Ahasuerus employed them to convey despatches. Raynal says that the Arabs train them to run against horses; which, though less nimble, they beat by their greater endurance. A curious notice of their speed occurs in Heroditus, (book III : §102.) He says that the people of India who go into the deserts to collect gold dust, "proceed each with three camels fastened together, a female being secured between two males, and on her the Indian is mounted, taking particular care to have one which has recently foaled, (probably for the sake of the milk.) The females of this description are in all respects as swift as horses, and capable of bearing much greater burdens." Camels nowadays, however, are chiefly remarkable for their great endurance of privation and fatigue. It is said they carry burdens of from five hundred to fifteen hundred pounds, and at a rate of from twenty-five to forty miles per day. They cross dreary wastes where neither food nor water can be procured for a week or more at a time. They subsist with ease upon the dry and scant herbage with other beasts reject. They can abstain from water for a period of six or seven days; and the brackish pools of which no other animal will drink satisfies their thirst.

The government of the United States has granted $30,000 towards the introduction of the camel, for the benefit of its military posts in the Great West. Major Wayne is about to start for the East to purchase about fifty of these animals in Persia, where there is a kind which has been in use for military purposes for centuries. The Persians have a corps of artillery called "Zembourek," in which guns are transported on the backs of dromedaries, from which they are also fired. The ship Supply, late of the Japan squadron, has been sent for these camels. It is thought they will be landed in Texas, the climate of which will suit them, and whence they may be despatched to the points where needed. The newspapers state that parties in Ohio and Kentucky will probably engage in rearing the camel. In California they will find a congenial climate; and great inducements will be here offered to those embarking in this enterprise.

We shall hail with gratification the introduction of this noble old beast of the Bible into our country. We shall link its presence with a thousand interesting pictures of Eastern life. And we may see a mixture of the literal with the figurative in the fulfilment of the prophecy in that grandest chapter of the Old Testament, (Isaiah 60.) "The multitude of camels shall cover thee, the dromedaries of Midian and Epah; all they from Sheba shall come: they shall bring gold and incense: and they shall shew forth the praises of the Lord."

Size of London.—London extends over an area of 78,029 acres or 122 square miles, and the number of its inhabitants, rapidly increasing, was two millions, three hundred and sixty two thousand, two hundred and thirty six (2,362,236) on the day of the last census. A conception of this vast mass of people may be formed by the fact that, if the metropolis was surrounded by a wall, having a north gate, a south gate, an east gate, and a west gate, and each of the four gates was of sufficient width to allow a column of persons to pass out freely four abreast, and a peremptory necessity required the immediate evacuation of the city, it could not be accomplished under four and twenty hours, by the expiration of which time the head of each of the four columns would have advanced a no less distance than seventy five miles from their respective gates, all the people being in close file, four deep.—*Cheshire's Results of the Census.*

The "Ode for Youth," intended to be committed to memory by every child in the Insurgent camp of the Chinese—and in the event of their triumph, probably by the child of every official throughout the land—contains the following lines on

REVERENCE TO JESUS.

"Jesus, his first born Son,
Was in former times sent by God.
He willingly gave his life to redeem us from sin.
Of a truth his merits are pre-eminent.
His cross was hard to bear,
The sorrowing clouds obscured the sun;
The adorable Son, honored in Heaven,
Died for you children of men.
After his resurrection he ascended to Heaven;
Resplendent in glory he wields authority supreme.
In him we know that we may trust,
To secure salvation, and ascend to Heaven."

☞ NOTICE.—A committee of the Trustees of the Sailor's Home would give notice that the ceremonies attending the laying Corner Stone, will take place on the morning of the 31st, the anniversary of the Restoration. Due notice of the proceedings will be given. It is expected that His Majesty will preside upon the occasion.

Per order,

Honolulu, 17th July, 1855.

THE NAZARITE'S VOW.—*An Address delivered before the Sons of Temperance, in San Francisco, Sunday, March 4th, 1855. By C. F. Winslow, M D.*

Recently a pamphlet was forwarded to our address, bearing the above title It is an interesting publication. It cuts right and left, and the wine-drinking parsons, orthodox or heterodox, Catholic or Protestant, Jew or Gentile, high church or low church, Missionary or Anti-missionary, get a severe thrust. It is something quite original as a Temperance Address, and contains many good hits and hints. The author it will be recollected, by some of our readers, formerly resided at Lahaina. The address, contains the following paragraphs relating to American Missionaries, in the Sandwich Islands.

"It gives me the highest gratification to bear a testimony to the lofty Christian virtues of self-denial and self-discipline which have distinguished the American missionaries at the Hawaiian Islands from the day of their landing to the present time. This embraces a period of thirty-four years. Notwithstanding they left the United States in 1820, at a time when the most respectable sideboards were crowned with the choicest liquors, and before the great temperance principles of the old and new covenant were asserted as a basis of reformation from practices which had become engrafted on Christian society by the immemorial delinquencies of a reckless priesthood,—notwithstanding this, when they landed at the Sandwich Islands they entered into a solemn obligation with their own hearts, and with each other, to walk before God after the order of Aaron, and to follow strictly the injunctions of Paul, in their ministrations to a heathen race And during a long residence among that swarthy and frail people, I can bear the most ample testimony to the blessed results of the apostolic example of the missionaries; for during that period I never saw a native intoxicated, nor make use of intoxicating drinks, with one exception, and the lofty rank of that exception placed him above all law, and above the beneficial effects of church discipline However loudly that noble band of self-denying men and women may be slandered by private enemies or ungenerous strangers, I am prepared, by the largest and freest intercourse with their private views and practices, both in their homes and throughout their fields of labor, to bear unqualified testimony to their persevering abstinence, and to their endeavors in all respects to walk worthy of their consecrated calling; and though differing somewhat from them in religious opinions, and on some important points of temporal policy and church discipline, still I do declare, that, as a band of indefatigable and self-sacrificing Christian teachers, no rank nor race in the order of priesthood from the days of Aaron down through the long line of prophets, apostles, and martyrs, are more deserving of the respectful and affectionate remembrance of posterity, than the earlier missionaries of the Hawaiian Islands. I have seen them under all circumstances of seclusion in their lonely abodes, in their domestic gladness and in their private griefs and trials; and the sublimest hour of Christian joy and triumph that it has ever fallen to my lot to witness was when one of those earlier apostles—still in the strength of a green old age, but bowing beneath the weight of incurable disease—was yielding up the ties of earth and kindred and duty to a half-converted race, and winging his way to just rewards in the realm of immortal glory. They have all fulfilled their vows of separation, and they have offered no strange fire before the Lord to bewilder and lead astray the feeble race among whom they have built altars on which to offer themselves living sacrifices to the Most High. That swarthy race, in the providence of God, is but temporary, and must soon pass away; but if the pyramids of Egypt remain through countless ages as the mementos of pagan rites, and of sacerdotal sway over nations that have vanished, and if the sculptured cliffs of Idumæa can still be pointed at as a memorial of God's condemnation of a wicked priesthood, then shall the lofty and swelling domes of Hawaiian Mountains rise from the blue waste of the Pacific, as everlasting monuments to the virtue and self-conquest of the early American missionaries; and their volcanoes shall become sacred altar-fires, from which shall ascend perpetual incense to the memory of their faith, and patience, and temperance, and self-sacrifice, and general conformity to the stipulated requirements of the Law and Gospel."

A True Lawyer.

Alexander Hamilton was once applied to as a counsel by a man having the guardianship of several orphans; who would, on coming of age, succeed to a large and valuable estate, of which there was a material defect in the title deeds, known only to their guardian, who wanted to get the estate vested in himself Hamilton noted down the faithless executor's statement, and then said to him, "Settle with these unhappy infants honorably to the last cent, or I will haunt you from your skin like a hare." The advice was strictly followed, and the man who gave it was an ornament to the bar and to the age he lived in.

☞ The Edinburgh Advertiser has the following anecdote of the late Lord Robertson. When the 4th Regiment, which had distinguished itself before Sebastopol, and in which Patrick Robertson, the youngest son of the deceased judge, is now a captain, promoted without purchase for his signal bravery in repelling a sortie of the Russians, was ordered to the East, the father thus admonished his son: "Of course, you go, Patrick, and will most likely be shot—if you don't go, you deserve to be shot."

☞ The Hawaiian Missionary Society, has made a strong appeal to the American Board, to send out a vessel, of 150, or 200 tons, to be employed for missionary purposes, —sailing to and from Micronesia, and among other Polynesian island. It is proposed to call it, "*The Morning Star.*"

From the Albany Argus.

Yankee Doodle.

In the summer of 1755, the British army under command of Abercrombie, lay encamped on the east bank of the Hudson River, a little south of the city of Albany, awaiting reinforcements of militia from the Eastern States, previous to marching upon Ticonderoga. During the month of June, these raw levies poured into camp, company after company, each man differently armed, equipped and accoutred from his neighbor, and the whole presenting such a spectacle as was never equaled, unless by the celebrated regiment of merry Jack Falstaff. Their *outre* appearance furnished great amusement to the British officers. One Dr. Shackburg, an English surgeon, composed the tune of Yankee Doodle, and arranged it to words, which were gravely dedicated to the new recruits. The joke took, and the tune has come down to this day. The original words, which we take from Farmer & Moor's Historical Collections, published in 1824, we have not, however, met with before in many years:

Father and I went down to camp,
Along with Captain Goodwin,
Where we see the men and boys
As thick as hasty pudding.

There was Captain Washington
Upon a slapping stallion,
A giving orders to his men—
I guess there was a million.

And then the feathers on his hat,
They look'd so tarnal fina,
I wanted peskily to get
To give to my Jemima.

And there they had a swampin gun
As large as log of maple,
On a dounced little cart,
A load for father's cattle:

And every time they fired it off,
It took a horn of powder;
It made a noise like father's gun,
Only a nation louder.

I went as near to it myself
As Jacob's underpinnin,
And father went as near again—
I thought the deuce was in him.

And there I saw a little keg,
Its heads were made of leather,
They knocked upon't with little sticks
To call the folks together.

And there they'd fife away like fun,
And play on cornstalk fiddles,
And some had ribbons red as blood,
All wound about their middles.

The troopers too, would gallop up
And fire right in our faces;
It scared me almost half to death
To see them run such races.

Old uncle Sam come there to change
Some pancakes and some onions
For lasses cakes, to carry home
To give his wife and young ones.

But I can't tell you half I see,
They kept up such a smother;
So I took my hat off—made a bow,
And scamper'd home to mother.

THE DUKE'S FAVORITE BOOKS.—On a little table close by the plain iron bedstead of the duke of Wellington, were always to be found four apparently well handled books, the Bible, Leighton's Commentary on St. Peter, Howe's Living Temple, and Baxter's Saint's Rest. Many of the books in his bed room library were on divinity, by the most evangelical writers. Many years before his death, hearing a brother officer ridiculing the idea of the Bible being a revelation from God, he advised him to read Paley's evidences, telling him that he once thought as he now did, but he read Paley and was convinced. That officer afterwards became one of the holiest men in the British army, and thanked the duke for his timely reproof.

NEW MISSION TO THE MARQUESAS.

In late New York papers, ("Independent and N. Y. Evargelist,") we have read notices respecting the visit to the U. S. of Robert Mills, an American sailor, who has been residing many years upon the Marquesas Islands, and now appeals to the friends of Missions in the United States to establish a mission there. The following extract from a letter dated New London, May 4th, relates to this subject. We are desirous of gaining more information upon this subject. Mr. Mills, it is said, once wrote the American Missionaries, at these Islands. Can that letter be found? How does it happen that Mr. Mills should never have hea d of the mission from these islands to Fatuhi-a, one of the Marquesas Islands? Did not the Secretaries of the American Board, in Boston, inform Mr. Mills upon the subject of the Fatuhiva mission?

"We have heard this very day (May 4) a visiter from the great oceanic region where your lot is cast I refer to ROBERT MILLS, from the Marquesas Islands, of whom you doubtless know the history Left about sixteen years ago, with the boats crew of a whale ship on one of those islands he married the daughter of the chief of the largest of the group, and has exerted himself very effeetually it is said to benefit the inhabitants About two years ago he left the Islands in the hope of procuring a Missionary to return with him and settle among the natives. He arrived at Salem, Mass, last October, via Australia, Van Dieman's Land & New Z-aland. He has met with disappointments and obstacles everywhere, and in this country upon which his most sanguine hopes were fixed has encountered the unexpected difficulty resulting from the engagements of the American Board with the London Miss. Soc. by which the former are restricted from establishing missions in the Pacific, south of the Equator. He was about to abandon his enterprise and return disheartened to the Islands, when the subject was brought to the notice of the Am. Miss. Association, and countenanced by them. Funds were however wanting, and an appeal was made to the Christian public in behalf of this special object *a Marquesas Missions*. Rev. Mr. Jocelyn, one of the Secretaries of the A. M. S. is now on a short tour with Mr. Mills; they have been to New Bedford, and arriving here to-day, Mr. Haven brought them home to dinner with him, and he is doing what he can to aid their collections this afternoon Mr. B. N. Seymour of the Union Theological Seminary, N. Y., is the person who has offered himself for this field of labor, if the requisite funds can be obtained. There is now every little doubt of the success of the undertaking. We rejoice in the prospect before us, that another group of the Pacific Islands is advancing towards civilization and christianity. F. M. C.

BRITISH MISSIONS.—The entire sum of money raised by the churches of Great Britain for missionary purposes, is about $1,750-000; by those of America, $750,000 making altogether $2,50,000.

☞ In our last Number, we published a portion, of Admiral Parry's Lecture, upon the character of British Seamen, and intimated that the Lecture was "to be continued," but in some unaccountable manner, the pamphlet has been mislaid, or loaned; if the latter, we hope it may be immediately returned. We do most sincerely regret that we cannot proceed with its publication. In this connection, we would remark, that another work, by the same distinguished Admiral, has fallen into our hands, which is entitled, "*Thoughts on the Parental Character of God, by, Captain Sir Wm. Edward, R. N.* (4th Edition.) *London*, 1854.

It is an interesting circumstance, that a British Admiral in the autumn of life, should have the inclination, and find the leisure, to write a small treatise upon the "Parental Character of God." It is a charming theme, and being discoursed upon, in a quiet, subdued and chastened spirit, is presented to the reader's mind as a most delightful subject for contemplation. "It should be borne in mind," he writes "that so long as we remain in this world, we are, in the sight of the Omniscient God, only in the c ildhood, and even in the infancy of our being" "ETERNITY! how easily said! how little contemplated! how impossible fully to conceive! how familiarly pictured by the utmost sketch of the most vivid imagination! And yet it is for this that we are here to be trained. We are under tuition here for a state of existence hereafter, compared with which the longest life is but a moment, and the dearest objects on which we now set our affections lighter than the dust in the balance." Such elevating and ennobling sentiments cannot be too widely diffused abroad. Would that we had copies enough of this little book, to place one in the hands of every Admiral, Commodore, Captain, Lieutenant, and Sailor, that should visit the Islands.

WELSH MINISTER FOR SAN FRANCISCO.—The Rev. Mr. Lewis, lately a member of the Presbytery of New York; has come out under the care of the Presbyterian Board of Domestic Missions to labor among the Welsh population. These are we think, without an exception, protestants. No foreign people, in our country exceed the Welsh in simple, fervent, persevering piety. We have often preached to them (in our own language) when the tears would be running down many cheeks. Though without a regular pastor for nearly two years, they have regularly maintained their prayer meetings and bible classes in their native tongue. A considerable number of the Welsh are scattered through the mines, at Jamestown, Iowa city and elsewhere. We trust, and pray to God, that our brother may be abundantly blessed in his missionary work.—*The Oriental.*

MARRIED.

June 21st by the Rev. T. E. Taylor, Mr. J N. Travis, to Miss Lucy Hall, all of Kona Hawaii.

DIED.

In Le Roy, N. Y., on the 5th May, Mrs. HARRIET B., consort of Dr. William Sheldon, aged 75 years. Mrs. S. was the mother of A. B. Bates, Esq., of Honolulu. She lived a life of devoted piety, and died, mourned by all who knew her.

In Wrentham, Mass., on the 16th of May, DANIEL EVERETT, Esq., aged 72 years, father of A. P. Everett, Esq. of Honolulu.

On board Ship "Nor Wester," Pacific Ocean, Feb. 9th 1855, CYRUS B. CLARK, M. D, of Consumption, aged 24 years. Dr. Clark came to the Hawaiian Islands from California for the benefit of his health and to take passage for the U. States around Cape Horn, some three or four months before his death. But disease was too deeply seated upon him to be arrested, either by medical skill or a change of climate. He died thirteen days out from Honolulu, and his remains were consigned to the deep in Lat. 5° 00' S. Long, 158° 24' W.

The deceased was a native of Westfield, New Jersey, where are a circle of friends to mourn his early death He had a strong desire to live to reach his home and friends, but seemed resigned to the will of his Heavenly Father, dying in the hope of a blessed immortality. A few days before his death he pointed a fellow-voyager to the 2d Chapter of Ephesians, and to the 3d Chap, from the 14th verse to the end, the truths of which filled him with delight. "Blessed are the dead who die in the Lord." COMMUNICATED.

At U. S. Marine Hospital, Honolulu, April 1, Daniel Holland an American, belonging to Alabama, but late from California; April 4th. James Boyd; May 10th. Manuel Pierre, a Portuguese; May 8th. George Bond; May 25th. Lewis Knox; June, 10th. Thomas Newton, son of John Newton, England; June 19th. Asahel B. Scott, Southbury, Conn., June 30th. Carl Gottlob Schoene, Sackson, Germany.

In Honolulu, June 28th. Richard, Augustus, (col.) native of St. Helena, but leaving a wife and children in Fair Haven Mass.

Passengers.

By brig Agate, from Oregon.—W. Monteith, G. Davis, C Daley, S. Dris.

By the Vaquero, for San Francisco.—Messrs. Wing, Work, Potter, Kendrick, Flanders, Baldwin, James Dapper, wife, and three children, Geo. Astor and wife.

By the Yankee from San Francisco.—Mr. and Mrs. D Long and child, Mrs. J. Oat and three children, Miss Hamlin and servant, Mr. and Mrs. Hueck and two children, Mrs. S. Rush, Misses M. and J. Rush, Miss Bella Palmer, H. F. Poor, G. S. Cushing, Jas Ware, W. Tuckerman, W. E. Rafferty, R. Boyd, R. Gambo, W. H. Tompkins, J. Anderson.

By the King Fisher, from S. F.—S. W. E. Venisse, Wm. B Rice, C. Alpeers, G. Hosse, C. Miller, A. Gutman, R. J. Tiffany, H Dimond, W. B. Moore, C. Jones, Wm Johnson, C. Robbins, six Chinamen and one Chinese lady.

By the Metropolis, from Oregon.—H. C. Leonard

By the Yankee, for S. F.—W St M. Bingham, R. Robbins R. G. Tiffany, A. G. Wheelock, Mr. Hewett, lady and two children, W. N. Ladd, Mr. Wilson, lady and two children, J. H. DeWolf, J. C. Spaldings and lady, M. M. Muzzy, D. Ingraham, H. T. Fitch, C. White.

Poetry.

THE SAILOR'S MOTHER.

One morning (raw it was and wet,
A foggy day in winter time)
A Woman on the road I met,
Not old, though something past her prime:
Majestic in her person, tall and straight;
And like a Roman matron's was her mien and gait

The ancient Spirit is not dead;
Old times, thought I, are breathing there;
Proud was I that my country bred
Such strength, a dignity so fair:
She begged an alms, like one in poor estate;
I looked at her again, nor did my pride abate.

When from these lofty thoughts I woke,
"What treasure," said I, "do you bear,
Beneath the covert of your Cloak,
Protected from the cold damp air?"
She answered, soon as she the question heard,
'A simple burthen, Sir, a little Singing Bird.'

And thus continuing, she said,
"I had a Son, who many a day
Sailed on the seas, but he is dead;
In Denmark he was cast away:
And I have travelled weary miles to see
If aught which he had owned might still remain for me.

"The Bird and Cage they both were his:
'Twas my Son's Bird; and neat and trim
He kept it, many voyages
This Singing-bird had gone with him;
When last he sailed, he left the bird behind;
From bodings, as might be, that hung upon his mind.

"He to a Fellow-lodger's care
Had left it, to be watched and fed,
And pipe its song in safety;—there
I found it when my Son was dead;
And now God help me for my little wit!
I hear it with me, Sir, he took so much delight in it."
—[Wordsworth's Poems.]

LAYING CORNER STONE OF HONOLULU SAILOR'S HOME.

RESTORATION DAY, July 31st, 1855.

In accordance with a time-honored practice, the Trustees of the H. S. H. S. made arrangements for laying the Corner Stone, with appropriate ceremonies. They selected the Anniversary Day of the Restoration of the Hawaiian Flag, by Admiral Thomas. In the opening of his remarks, the President, Mr. Allen, made a happy allusion to this important event in Hawaiian history. The weather was highly propitious, although quite warm. At the appointed time the Trustees moved in procession from the Bethel to the spot where the ceremonies were to be celebrated. A numerous concourse of foreign residents and natives were assembled upon the premises.

In this connection it would be gratifying if we could inform our readers respecting the origin of the ancient practice of celebrating the laying of the corner-stone of important public buildings. Members of the Masonic order, might tell us that the practice dates as far back as the days of Solomon. But the Patriarch Job, who lived long before Solomon's day asks, "who laid the corner-stone thereof?" referring to the creation of the earth This allusion indicates that such a practice is co-eval with the very origin of house building! However that may be the practice seems to be highly appropriate. The propriety, however, of erecting Sailor's Homes is a very modern affair. The earliest record which we can discover relating to a Sailor's Home is the report of the proceedings of a public meeting, held in London, at the "London Tavern," January 8th, 1829, to devise measures for erecting an institution of this description, on the ruins of the "Royal Brunswick Theatre."

Since that period, or during the last quarter of a century, Homes have continued to increase in numbers, magnitude, and usefulness; as will appear from the facts and statistics in the President's speech. In the progress of events an enterprise, contemplating the erection of a Sailor's Home, has been undertaken in Honolulu. The sympathies and contributions of the benevolent, here and elsewhere, have thus far remarkably favored the undertaking. The ceremony attending the laying of the Corner Stone took place in accordance with the following programme:

ORDER OF EXERCISES
AT
LAYING CORNER STONE
OF
HONOLULU SAILOR'S HOME,
TUESDAY, July 31st, 11 o'clock, A. M.

1. PRAYER, By REV. S. C. DAMON.
2. LAYING THE STONE AND ADDRESS, By HIS MAJESTY, KAMEHAMEHA IV.
3. MUSIC, By "MISSISSIPPI BAND."
4. ADDRESS,

By E. H. ALLEN, Esq., Pres. of H. S. H. S.

5. MUSIC.
6. ADDRESS,

By REV. R. ARMSTRONG, in Hawaiian Language.

7. BENEDICTION, By REV. J. D. STRONG.

After the opening prayer, the President read a Schedule of the contents of the box, to be placed under the Corner Stone, as follows:

1. Bible in the Hawaiian Language, gilt bound.
2. History of Hawiian Islands, (3rd edition,) by J. J. Jarves, Esq.
3. Daguerreotypes, 1st, of Kamehameha I.
   do. do. 2nd, of Kamehameha II.
   do. do. 3rd, of Kamehameha III.
   do. do. 4th, of Kamehameha IV.
   (two copies large and small.)

Copies of "Polynesian," "Friend," "New Era," and "Elele."

6. Report on Schools and Education.
7. Various Publications, relating to the Home.
8. Copper coins, with the impression of "Kamehameha III."

After the ceremony of depositing the "box" had been completed, His Majesty delivered the following highly appropriate remarks:

The laying of the corner stone of an edifice destined to add to the welfare and happiness of Seamen is an occasion interesting to every member of this community. The hardships with which the sailor contends, and the dangers which he braves bring us ease and security. Had he never steered his ships into our waters, Honolulu might simply have retained its position as a fishing village or become by this time a deserted beach. I hope the day has passed for any class of men to be valued only for their strength, and adaptability to the purposes of others. *The sailor, the miner, the seamstress, and even the slave, for generations to come, will all have cause to bless the Nineteenth Century.* In raising this Home, we endeavor to act in accordance with the Spirit of the Age, by seeking to ameliorate the condition of a preponderating element of our foreign and a very considerable one of our native, population.

The moral wants of the sailor, demand our care equally with those that are physical. The facilities offered to him on shore as a reasonable and responsible being should be multiform, in order to

counteract the disadvantages inseparable from a life at sea. For his own sake, and that of every community he visits, he should ever be found an orderly and intelligent member of society; institutions of this character will help to make him so. Entertaining these feelings towards sailors, I did not hesitate to assist in the ceremony of to-day, and I esteem myself happy that my name is associated with this good work.

We have taken the liberty to *italicize* one sentence of His Majesty's speech. It struck us at the time of its delivery with peculiar force, and we regard the sentiment therein expressed as quite *suggestive*. This century is peculiarly characterized for its numerous, benevolent and philanthropic enterprises. It is not an era of Utopian schemes for the amelioration of the human races, but of thorough-going and substantial usefulness. Men are no longer viewed in the mass, but as individuals. The common people have rights and privileges which must be respected. "*The laborer is worthy of his hire,*" is a sentiment which now pervades the world, far more generally than ever before.

THE PRESIDENT'S SPEECH.

We have witnessed the interesting ceremony of laying the Corner Stone of a Sailor's Home. It seems to be peculiarly the day appropriate for the purpose, for it was on the thirty-first day of July, 12 years ago, that the national flag of this kingdom was restored by a noble representative of the men of the sea, and now the Government and People cordially unite in the noble enterprise of rearing here a happy home for that very class. It has long been admitted, that while the life of the Sailor is full of toil and danger; and that his labors benefit and enrich others, that his condition, physical, moral and religious, has been very much neglected.

The object of this enterprise is to benefit the sailors who visit this port by furnishing them a comfortable home, a quiet place for rest, and the full opportunities of living a sober and respectable life. We hope to promote their moral and professional improvement, and to furnish them the means of religious instruction. Similar institutions have been established in Great Britain and the United States, and they have been the means of great good. To show you that this is not an experiment, and that the sailors have derived great advantages from institutions of this kind, I refer you to the Sailor's Home in New York, which has been established thirteen years, and during that period the number of boarders has been 43,856, and the number from January to May last was 3,800. There are two similar establishments in the same city, and their influence and prospects are gratifying. The Sailor's Home in Boston has had 2,458 boarders within the last year, and in all these establishments it is very evident that the sailors have made a decided improvement. The amount of money deposited in Boston, by seamen, in the Savings Bank, was $40 000. This is the natural result of their improvement, and a good evidence of an increasing thrift. There are several institutions of this sort, of great usefulness, in the smaller seaports of the United States. The Sailor's Home in Well street, London, was established in 1835, and since its opening to the year 1854, it has received 66,846 boarders, and during the last year it has extended its benefits to 5,931 seamen, of every clime and every language. It is a striking and encouraging fact, that the number of boarders has constantly increased - in 1836 there were 528, and in 1854, 5,931. The Directors represent that "the seamen are less intemperate, that they have a greater regard for the claims of kindred, and a stronger desire to assist those dependent upon them." They represent that the Cashier of the Institution has received more than thirty thousand pounds, which has been forwarded for the benefit of their relations, or disbursed by the sailors themselves in the family circle, and for enjoyment of home—so that we may well say, that this is not an untried experiment.

In view of the great number of seamen who visit this port, an institution of this sort has long been needed. No decided efforts were made till last November to establish one here.—The late King had an extraordinary taste for navigation, and in fact a deep interest for those who voyaged on the sea. He earnestly desired that those who visited the Islands should find a happy home during the time they remained on them, between their voyages. He cordially recommended to His Privy Council, that this valuable lot of land on which the foundation is laid, should be forever dedicated for the benefit of the seamen of all nations who visit this port. His Council unanimously responded to this recommendation. It was among the last of his generous acts. It was left to his present Majesty to confirm and ratify what his noble predecessor had so generously recommended, and this Sailor's Home will stand as a monument of their generous sympathy for the trials and hardships of a sailor's life.

Our whole people have evinced a deep interest in this project, and have generously responded to a call for aid. The whole amount subscribed is $6,342,85, about one thousand of which was by the men of the sea. Six hundred and fifty was contributed by Mr. Hunnewell, and other good citizens of Boston and vicinity, who feel a deep interest in the Home, having seen the advantages of similar institutions in their own city. Mr. Hunnewell, formerly resided here, and is kindly remembered by the Chiefs and others who knew him in the early days of civilization here. It is gratifying to us and creditable to him that he cherishes so warm an interest in the welfare of the Islands. We doubt not that the wealthy and enterprising ship owners in the ports of the Atlantic, especially New Bedford, Fair Haven, New London, Stonington, and other towns in that neighborhood, whose vessels are supplied with men at this port, will generously second our efforts. They are directly interested in having men of good habits, and good health in their ships and this is the only practicable way to insure it. The contracts which we have entered into amount to $7513 including a subscription of $500, payable in lumber, so that you will see that our contracts have exceeded our means as yet provided by about $1200. This excess was unavoidable. Had we not incurred this responsibility we could not have gone on with the work. We trust that some advantages will result to the sailors during the next fall season, although we do not expect to have it in complete operation till next year. We regret that our means were not sufficient to enable us to have the whole establishment in complete order to give a cordial welcome home to the sailors when they visit us after the present season of toil and danger. From the sea-faring class we have full confidence of liberal aid. Should our expectations from these various sources be disappointed, we have a never failing resource in the generous and efficient aid of the ladies of Honolulu. The more they give to relieve the distressed, to promote the better condition of society, the richer they seem to be. The prosperity of this kingdom will depend to a great extent on commerce and navigation. It is wanting in those great resources which a continent possesses. The Arctic, the Ochotsk, are to us, what the productive lands of the interior are to the coast. On these seas are gathered in the harvest, and here is the most convenient place for the deposit and shipment of the results of the season's labor. Besides we occupy a position convenient for ships voyaging in the Pacific to visit for men and supplies. The number of whale-ships which visited this Port in 1854, was 189, and the number of merchant vessels was 125, and the number of sailors in these vessels was 7,685. There were also during the year 25 national vessels, of all nations, having on board 8,695 men: very few of these, however, leave their vessels. A large number of sailors annually visit here who are discharged at other ports in the group. For instance, at the port of Lahaina there were 224 whale ships last year, and I trust at no distant day our valleys and plains will be occupied with the pleasant residences of the men of the sea.

The mode of conducting the business of whaling has been materially changed within a few years. Formerly the crews were shipped in the Atlantic ports, and most of them continued on board during the voyage and were discharged at the home ports; now, for a large number of ships, they are shipped for the season and are discharged when the ships return from the cruise, so that a large number of seamen remain here for weeks in the fall and winter. This fact of itself shows the important necessity of furnishing additional and better accommodations. It is peculiarly important for this port, not only from the large number of sailors, but from the fact that most of them have made long voyages before they reach our ports, generally from four to eight months of laborious and dangerous services. I refer not only to the voyages of the merchant vessels, but to the cruises of the whalers. They require a comfortable home for refreshment, and if they can be kept under good influences, it is fortunate for them. They are a peculiar class often wayward and unreasonable as the landsmen think. They are suspicious and confiding to the extreme as the case may be. What they want is kind and honest treatment. The exposures of sailors on shore are the cause of bad morals in numerous cases. Life on the ocean ought to be as conducive to good morals, as life on the land. I have no doubt that neglect of early education is a source of much of their bad habits in after life. A large class commence this employment at an early age, and lose all advantages of the school and parental training. This deficiency may be supplied in some degree by affording them facilities for improvement when on shore. In some institutions of this kind, instruction is given in reading, writing arithmetic and navigation. This is very important, especially to the younger class of sailors, in whom may be aroused an ambition to rise in their profession that ultimately they may be masters. To accomplish this, their moral and intellectual condition must be improved and elevated.

The navigation and commerce of the world has increased in a ratio, for the last few years, wholly unprecedent, and unexpected by the nations who control the business of the ocean. Great impulse has been given to manufactures and to productions of the soil, by the numerous labor-saving machines. The steam engine has wrought a revolution not only on the land, but on the sea. The clipper ship has in a degree the interchange of production—indeed, there has been a general improvement in the construction and sailing of ships. Seeing this great increase in tonnage and commerce it is not wonderful that an increased interest is felt in the educational and moral culture of this large and useful class of persons, who do the labor in this vast business. It is estimated that there are a million of persons employed on the sea; and it is a pursuit which offers great inducements for industry, intelligence and integrity.

I congratulate you on this event, auspicious for the better condition of seamen at our port. A regard for the foreigners who visit us, an interest in the prosperity of the port and the Kingdom, and the higher and holier regard for humanity, should urge us on to the most vigorous efforts for the success of this enterprise. May this corner stone long remain as the support of a cheerful, happy home, for all those who come from "old Ocean's grey and melancholy waste."

The foregoing remarks of the President, are exceedingly timely and appropriate.—They furnish to our readers and the friends of the Home, a brief history of our enterprise and our present condition. The public will here learn what has been done, what is now doing and what it is hoped may be accomplished. The public will see that the Trustees are determined to go forward just as fast as the means placed at their disposal will allow, but they are as firmly resolved, that the enterprise shall not fail through the accumulation of a crushing debt. It is hoped that the edifice may now be erected, and that for many years to come, the institution will prove as useful and beneficial, as its most sanguine friends may anticipate. May the words "Sailor's Home," be inscribed upon the flag which shall float over it, ever cheer the hardy mariner as he approaches our shores, reminding him, of that *home in that better land*, to which the christian voyager may direct his thoughts amid the cares, labors, trials, vexations and disapointments of man's passage o'er the sea of life.

HOTEL KEEPER IMPRISONED AT TAHITI.—We have at various times been complained of for publishing remarks reflecting upon the authorities at Tahiti, for their allowing the introduction of spirits among the natives. To show that we have either been misinformed or prejudiced in our statements, the following facts have been cited. The Governor has signed a proclamation making it a criminal offence, subjecting the guilty party to imprisonment, should any person be discovered selling to natives. In violation of this law a certain Hotel keeper, (a Frenchman,) was arraigned and found guilty. He was sentenced to one month, imprisonment, and a forfeiture of his license during the period of his confinement. If these facts are as now stated, and we have no reason to doubt their correctness, the French authorities at Tahiti merit the same honor and commendation that all law-abiding and law-loving men, will award the authorities of Boston, for imprisoning Stevens the keeper of the Revere House, (see another column.) So it appears that Republicanism and Despotism are alike severe upon rum-sellers. Both by their official acts, make rum-selling in certain cases a criminal offence. We have not been informed whether the poor and incarcerated Hotel keeper at Tahiti threatened the Governor with the visit of a French man-of-war!

OLD FOLKS.—In 1850 there were 20,000 persons in the United States, who were living when the Declaration of Independence was signed in 1776.

In the United States in 1850, 2,555 persons over 100 years of age.

In France in 1851, 102 persons over 100 years of age.

In North Carolina in 1850, there was an old Indian woman, 140 year old.

In several of the States in 1850, there were found persons, white and black, from 110 to 115 years old.

JUST AS WE EXPECTED.—Papers by a previous mail reported Mayor Neal Dow, of Portland, the originator of the "Maine Law," was arrested and would be punished for violating the "liquor law." This appeared to us very strange, because we could not believe that a man of his standing, would have been so foolish as to commit himself in a matter of this kind. To be sure he was *tried*, and so he was *honorably acquitted*. The simple facts in the case are detailed in the following extract from the *N. Y. Independent*, and confirmed in several other papers:—

The facts in the lamentable affair at Portland are simply these. In anticipation of the opening of a City Agency for the sale of liquors, in accordance with the new law of Maine, a committee appointed by the Board of Aldermen of Portland, of which Mayor Dow was chairman, purchased $1,600 worth of liquors in unbroken packages. These liquors arrived before the agency was formally opened, and were stored in the City Hall. They were invoiced to the "City Agency of Portland," and that invoice was accepted and the purchase ratified by the Board of Aldermen. The rumsellers and their partisans raised the report that Mr. Dow had purchased liquors, and was holding them contrary to his own law. A warrant was taken out for the arrest of Mr. Dow, and a mob repaired to the City Hall and attempted to force open the building and seize the liquors. The police warned them off in vain; the mob grew more violent; the riot act was read; and at last a corps of infantry fired upon the mob, killing one man and wounding several. But for this extreme measure the mob would have forced an entrance into the Hall, would have made free with the liquor, and then have gone forth to wreak their hatred of the law upon the property and the lives of citizens. There is but one rule to be observed with a mob, and that is to disperse it by powder and ball after fair warning of that measure has been given. In some of the preliminary steps Mayor Dow may have been imprudent. We have no disposition to glorify him, or to associate the question of prohibition with his individuality. But at the last, when a mob was raising against the property of the city, which he is sworn to protect, he could but do as he did, and show that at all hazards he would maintain the public peace. No matter what occasioned the riot, there was but one way to put down the mob. The lesson will be salutary. Here, where the spirit of the Mayor is so well known, no riot will be attempted, or if attempted, can possibly succeed.

☞ We would call the attention of our readers to the advertisement requesting information respecting "Edward B Coe." A letter accompanying the request contains the following additional item of information, dated Buffalo, May 25, 1855:

"Intelligence has just come from a sailor that he was seen on the island of "Kohoga," one of the Marquesas, in 1852; and still more more recently, about thirteen months ago.—He was in the employ of an Englishman."

CURIOUS STATISTICS RESPECTING MURDERS IN EUROPE.—The following statements are made upon the authority of Mr. Hobart Seymour, in a letter to Lord Palmerston.

In England 4 murders per annum, to each million of inhabitants.

In Ireland, 19,	per annum,	to	1,000,000
In France, 31,	"	"	"
In Austria, 36,	"	"	"
In Sicily, 90,	"	"	"
In Papal States, 113,	"	"	"
In Naples, 471,	"	"	"

These tables furthermore show that for 72 murders, per annum in England, there are 1,968, annually in Italy.

The following statistics respecting births are very significant as to the state of public morals.

In London, in 1851, the number of births for the year was—

Legitimate,	75 097
Illegitimate,	3,203
Paris, same year:	
Legitimate,	21,689
Illegitimate,	10,634
Brussels, 1850:	
Legitimate,	3,448
Illegitimate,	1,833
Munich, 1851:	
Legitimate,	1,762
Illegitimate,	1,702
Vienna, 1849:	
Legitimate,	8,881
Illegitimate,	10,360

☞ It is often asked, why Mexico and the Republics of South America are so unstable, and incapable of self-government. One good reason is doubtless assigned in the following extract.

Some years ago, a sagacious statesman from one of the South American republics, who had long mourned over the failure at self-government in his own country came to the United States for the purpose of examining our institutions and learning the secret of our prosperity. One of the first scenes which he witnessed was a military display; and supposing the enthusiasm that prevailed was indicative of a general passion for arms, he remarked, "That sir, will ruin you. It is the passion of the people for war, and their reliance on the sword to carry their points, which has been our bane and ruin in South America; and unless you check it in season, it will prove your ruin, too." But afterwards he spent an evening in New Haven, where males and females of the most accomplished class in the city were assembled; on retiring from the party, he said, "I have found it now. I have ascertained the secret of your success in self-government, and of your character, prosperity, and greatness as a republic. You owe it to your WOMEN. I never saw the like before. Such mothers must, and others can, make a nation like yours. Give us in South America such women for mothers, and we should, ere long, follow hard after you in the race of national prosperity and happiness."

Arctic Search Expedition.

The expedition to the Arctic sea in search of Dr. Kane and his companions, sailed on its mission on Thursday last, May 31st, from the Brooklyn Navy Yard. It consists of but two vessels—a bark called the Release, and the Arctic, a propeller. The bark was towed by her steam consort down the bay, receiving hearty cheers from every vessel that was passed on the way out the harbor. They anchored on Thursday evening near Sandy Hook, and did not put to sea until Saturday. Friday, it will be remembered, is an inauspicious day, in the estimation of sailors.

Exactly two years previous to Thursday, Dr. Kane with a crew of sixteen men, sailed in the small bark Advance, in search of Sir John Franklin. His vessel was outfitted for a cruise of three years; and it was supposed, that by means of hunting and fishing, the time might be lengthened a year or more. Since July, 1853—six weeks after his departure—the adventurer has not been heard from. He is thought to have entered Smith's Sound, and passed through to seek for the supposed open sea that lies beyond, where he imagined Franklin had gone The winter following being one of great severity, the conjecture is that the Advance was frozen in so firmly that the summer did not free the bark from its prison of ice. It was the intention of Dr. Kane to leave a supply of provisions at Cape Alexander before entering the Sound; and if he has since been released from the icebergs, and has escaped the fate of the voyager whom he sought to rescue, he is probably at this place at the present time.

The commander of the present expidition is Capt. Hartstein, and his first officer Lieut. Simms. Every precaution has been exhausted in equipping the vessels. A Prohibitory Liquor Law is kept in force on shipboard, although a store of spirits has been laid in to provide against emergencies. The experience of former navigators within the Arctic circle has been carefully collected, and the Secretary of the British Admiralty has furnished to Capt. Hartstein all the recent maps and Charts of the North Polar Sea. The supplies of provisions had been personally superintended by Henry Grinnel, Esq., who has taken great care to furnish a stock of preserved meats, in addition to the usual stores of exploring ships The expedition goes out lacking nothing with which it could be supplied. If there is needed for any ship sailing on a mission of mercy, the sympathy and God-speed of those who occasion her departure, it is surely a vessel bound for a region where summer itself is a perpetual winter, and which is infested with perils more than any other spot on the surface of the sea. It is therefore hoped that not a few prayers have already reached the ear of Him who ruleth the waters, and holds the winds in his hands, that these vessels---which, though stoutly built and skilfully manned, are yet, amid the icebergs and tempests of the North Pole, as an egg shell in the hand, may be divinely guided and protected on their voyage and may rescue the noble mariner whom the fate of Franklin may not yet have overtaken. —[*N. Y. Observer.*

IRON SHIPS.—Of wooden vessels there are but three building on the Clyde at the present moment, while of iron ships there are no fewer than thirty-five.

A New Feature of Civilization.—The terms civilized and uncivilized may quite as aptly be applied to quadrupeds as to bipeds—to herds of cattle as to masses of men. Doubtless most of our Island readers will agree with us, that many of the cattle and horses of the Sandwich Islands are untamed and uncivilized. What would an English dairy-maid think of fastening a cow's head to a post, tying the poor creature's legs, and then being compelled to milk in company with a calf! Or what would a Yankee farmer think of driving his team with ropes attached to the horns of each bullock! The truth is, the Sandwich Islanders derived their method of treating animals from the racing, lassoing, ranching, wild and half civilized Californians, or Mexicans—a degenerate race of Spaniards, whose "tender mercies are cruel," proverbially, towards dumb animals. We are happy to notice that a new method has been introduced, presenting altogether a higher feature of civilization, for we maintain that the degree of a nation's civilization is as apparent in the treatment of its herds as of its children! So much for an introduction to a few remarks upon the method of treating a large herd of cattle by Mr. Moffitt, upon the pasture grounds of Mr. Hopkins. In making a hurried trip around the Island a few days since, it was the good fortune of our party to be kindly entertained for a day by Mr. Moffitt. We had often heard of his fine stock and of his improvements. The particular feature to which we would refer, is his success in *training* or *civilizing* his herd, numbering from one to two thousand. This has been accomplished by mildness, gentleness and kindness. The *lasso*, that badge of Mexican or Spanish horsemanship, is dispensed with when he rides among his herds, which roam about as quiet, mild and tame, as the cattle upon a small farm, where the owner and his children go among them daily. Mr. Mcffitt has set a most excellent example to all graziers, and if followed, would prove of immense benefit. "On taking charge of this herd," he remarked, as we rode among the fat, sleek and good-natured cattle, "I determined to break their hearts, or they should break mine. Those which I could not subdue by kindness, I condemned to capital punishment, and sent them off to Honolulu to be executed!" Thus it appears that the good people of Honolulu have been feasting upon the incorrigible, untamed, uncivilized and condemned portion of Mr. Moffitt's herd!

☞ We rejoice to learn that the steamer "Kalama," is expected to commence in a few days, running among the Islands. We are assured that she has been been thoroughly refitted and substantially repaired. Before she commences her regular trips, a survey by disinterested parties will be made upon her seaworthiness. We trust the public will have no occasion hereafter to make complaint.

Stevens of the Revere House.—Mr. Stevens was this morning sentenced by the Court to the House of Correction, as will be seen by a report in another place. He requested the reporters not to use his name in the papers. We have no disposition to treat Mr Stevens uncivilly, but we cannot see the justice of such a request, and cannot make any discrimination. With all suitable deference to Mr. Stevens, we entertain the belief that persons who sell immense quantities of liquor in splendid palaces are doing very much more mischief than those who sell in the dirty cellars in Ann street It is proper to add that Michael Scanlan, sentenced to-day, made no such request of the reporters.—*Boston Telegraph.*

Annexation of the Sandwich Islands.

The acquisition of the Sandwich Islands by the United States is an event of more importance than the public of this country may generally suppose. In the first place, it shows that the Americau goverment, forgetful of the emphatic warning given by Washington, is determined to obtain foreign possessions, and to extend its sovereignty over places not situate on the North American continent. This policy on the part of the American goverment is not new. Some years ago they attempted to purchase from Spain one of the smaller of the Balearic Islands, for the ostensible purpose of having a port in the Mediterranean, in which the American squadron could refit. Spain, however, very properly thought that it would be unwise either to sell or even lease a portion of her territory to so go ahead a nation as the United States, and thus their first attempt to obtain a *locus standi*, and a right to dabble in European politics, was defeated by the prudence and discretion of the Spanish goverment. Very recently it has been stated that the Americans have been in treaty for the purchase of the small republic of San Marino, no doubt with a view, some day or other, to the possible annexation of the whole of Italy to San Marino, when Yankee institutions and power shall have been sufficiently consolidated in that spot These rumors have been contradicted. and,therefore, we must content ourselves with believing that American rapacity is at present exclusively devoted to the acquisiton, *per fas aut nefas*, of Cuba, and the purchase of the Sandwich Islands, in the North Pacific Ocean. The condition of these latter islands can never be viewed with indifference by the people of this country. On the principal one of the group—Hawaii —our great circumnavigator, Capt. Cook, met his death, in an affray with the natives. In more recent times, English and American missionaries have succeeded in converting the heathen inhabitants to a knowledge of Christianity; the arts of civilized life have been introduced; a settled form of goverment has been established, and trade and commerce have sprung up to an extent which hardly could have been expected in so remote a part of the world. In fact, the ports of this group have been found to constitute excellent stations for the large number of vessels employed by the Americans in the whaling trade; and American merchants and American missionaries have latterly exercised so much influence over the native government, that every one must consider the acquisiton of the Sandwich Islands by the United States a most natural and convenient arrangement for both parties—the king being pensioned off, and the group being admitted into the American Union as a sovereign though transmarine State. Louisiana, at the commencement of this century, was sold by France to the United States; the Sandwich Islands are now to be sold to the same power by the native goverment; and we must congratulate the Americans upon their honesty in paying a pecuniary consideration, when they might easily have followed the precedent which was set by another nation in reference to Tahiti, and have obtained them by the same means. It may be asked, if the United States have long exercised paramount influence in the Sandwich Islands, why should the ceremony of annexation be gone through, and a new State added to the Union? This question can only be answered by reference to the geographical positon of these Islands, midway between California and China and Japan—countries which have recently attracted so much of the spirit and enterprise of the people of the United States. The great discoveries made in the Eastern and Pacific Oceans by Quiros, Mendana, Ta-man, and other foreign navigators, were completed by Captain Cook; and most of the countries and groups in both these oceans were taken possession of by him on behalf of the British Crown. At the present time we have under our rule Australia and New Zealand, and the benevolence and piety of the people have sent missionaries to almost every island, but we have made no systematic attempts either to retain in our own hands the rich commerce of that portion of the world, or indefinitly to extend our political influence there. France possesses New Caledonia and Tahiti, and now the United States will have the Sandwich Islands, which they can easily make a most important military and naval station. Three years ago the British trade in the South Seas and Pacific amounted to three millions; but the American trade is much more considerable, and the North Pacific is now traversed by an immense fleet of American whaling vessels, giving employment to about twenty thousand men. If the Americans are desirous of acquiring a monopoly of the trade of China and Japan, they have only to start a steam communication between California and those countries, making the Sandwich Islands their great central station. The multitudes of groups of islands, rich in native produce which are scattered over the Pacific and Eastern oceans, afford most extraordinary facilities for the extension of steam communication. This extension can be made more conveniently by America than even by England; and if the acquisition of the Sandwich Islands by the United States should lead to that result, we should regard it as a circumstance auspicious to the commerce of the world, by affording means for the developement of the vast natural resources not only of these tropical Islands, but of the empire of Japan, the parts of which have recently for the first time been opened to the intercourse of the stranger through the enterprise and public spirit of the American govenment.—[London Morning Post, Oct. 20, 1854.

Late News from the Crimea.

Intelligence received by the last mail shows that the Allied Army was making a decided impression upon the strong fortifications of Sebastopol. Some very important positions had been secured, and towers taken. The most important news, however, relates to the successes of the Allied Fleet in the sea of Azoff. The Fleet had driven the Russians from that sea,and cut off immense quantities of supplies coming down the river Don, intended for the Russian Army in the Crimea. The Allies also were making advances in the region of Perekop, and the reasonable prospect was entertained that they would have the Russian Army confined to the Crimea and cut off from the main part of the Rusian Empire. The Allied army amounted to 200, 000 soldiers.

John Newton's Table Talk.

I have tried to make crooked things straight, till I have made these knuckles sore, and now I must leave it to the Lord.

If I want a man to fly, I must find him wings, and if I would successfully enforce moral duties, I must advance *evangelical motives*.

I should have thought mowers very idle people, but they work while they whet their scythes. So devotedness to God, whether it mows or whets its scythe, still goes on with its work.

My course of study, like that of the surgeon, has principally consisted in walking in the hospital.

My principal method of defeating heresy, is that of establishing the truth. One proposes to fill a bushel with tares. Now if I can fill it first with wheat, I will defy his attempts.

A Christian in the world, is like a man who has a long intimacy with one, who at length he finds out was the murderer of his father, and the intimacy ceases.

We are surprised at the fall of a famous professor; but in the sight of God that man was gone before—it is only we that have now discovered it.

The devil told a lie when he said—All these things are mine, and to whomsoever I will I give them. For if he had the disposal of preferments, you and I, brother C——, should soon be dignitaries.

If an angel were sent to find the most perfect man, he would probably not find him composing a body of divinity, but perhaps a cripple in a poor-house; whom the parish wish dead, but humbeld before God with far lower thoughts of himself than others think of him.

If two angels came down from heaven to execute a divine command, and one was appointed to conduct an empire, and another to sweep a street, they would feel no inclination to change employments.

In divinity, as in other professions, there are the *little artists*. A man may be able to execute the buttons of a statue very neatly; but I could not call him an able artist. There is an air, there is a taste, to which his narrow capacity cannot attain. Now in the church there are your dexterous button-makers.

I would not give a straw for that assurance which sin will not damp. If David had come from his adultery and talked of his assurance at that time, I should have despised his speech.

There is the analogy of faith, which is a master-key, which not only opens particular doors, but carries you through the whole house. But an attachment to a rigid system is dangerous. Luther once turned out the Epistle of James, because it disturbed his system. Dr. Owen will be ashamed of his wisdom and clearness, five minutes after he has been in heaven. I shall preach perhaps very usefully upon two opposite texts, while kept apart; but if I attempt nicely to reconcile them, it is ten to one if I don't begin to bungle.

When a man says he received a blessing under a sermon, I begin to inquire who this man is. The Roman people proved the effect they received under a sermon of Anthony when they flew to revenge the death of Cæsar.

The Lord has reasons far beyond our ken, for opening a wide door when he stops the mouth of a useful preacher. John Bunyan would not have done half the good he did, if he had remained preaching in Bedford, instead of being shut up in Bedford prison.

Dr. Taylor, of Norwich, said to me, "Sir, I have collated every word in the Hebrew Scriptures seventeen times, and it is very strange if the doctrine of the Atonement which you hold is there, and I have not found it." I am not surprised at this. I once went to light my candle, with the extinguisher on.

Now prejudices, from education, learning, &c, often form an extinguisher. It is not enough to bring the candle—you must remove the extinguisher.

I have many books that I cannot sit down to read. They are indeed good and sound, but like half-pence, there goes a great quantity to little amount. There are silver books, and a few golden books—but I have one book worth more than all, called THE BIBLE; and that is a book of bank notes.

Ministers would overrate their labors, if they did not think it worth while to be borne and spend ten thousand years in labor and contempt, to recover one soul.

I feel like a man who has no money in his pocket, but is allowed to draw, for all his wants, upon one infinitely rich. I am, therefore, at once a beggar and a rich man.

A Good Recommendation.

"Please, sir, *don't* you want a cabin boy?"

"I *do* want a cabin boy, my lad, but what's that to you? A little chap like you ain't fit for the berth."

"Oh, sir, I'm real strong. I can do a great deal of work, if I ain't so very old."

"But what are you here for? You don't look like a city boy. Run away from home, hey?"

"Oh no, indeed, sir; my father died, and my mother is very poor, and I want to do something to help her. She let me come."

"Well, sonney, where are your letters of recommendation? Can't take any boy without those."

Here was a damper. Willie had never thought of its being necessary to have letters from his minister, or his teachers, or from some proper person to prove to strangers that he was an honest and good boy. Now, what should he do. He stood in deep thought, the captain meanwhile curiously watching the workings of his expressive face. At length he put his hand into his bosom and drew out his little Bible, and without one word put it into the captain's hand. The Capt. opened to the blank page and read:

"WILLIE GRAHAM; presented as a reward for regular and punctual attendance at sabbath School, and for his blameless conduct there and elsewhere. From his Sunday School Teacher."

Capt. Mc Leod was not a pious man, but he could not consider the case before him with a heart unmoved. The little fatherless child, standing humbly before him referring to the testimony of his Sunday School teacher, as it was given in his little Bible, touched a tender spot in the breast of the noble seaman, and clapping Willie heartily on the shoulder he said: "You are the boy for me; you shall sail with me; and, if you are as good a lad as I think you are, your pockets shan't be empty when you go back to your good mother."

—*Journal of Commerce.*

New Book of Travels.

Next to the pleasure and gratification of visiting foreign countries, and viewing the manners and customs of the various nations of the earth, is that of perusing well-written books of foreign travel. Two volumes have recently made their appearance in England, and been republished in the States, worthy of being read. We refer to "Travels in Tartary, Thibet and China, during the years of 1844-5-6, by M. Huc; translated from the French by W. Hazlitt." The preface to these volumes is so brief that we venture to publish it entire. We would merely remark that through the kindness of a neighbor, we have been favored with the perusal of the finely illustrated English edition:—

PREFACE.—The Pope having, about the year 1844, been pleased to establish an Apostolic Vicariat of Mongolia, it was considered expedient, with a view to further operations, to ascertain the nature and extent of the diocese thus created, and MM. Gabet and Huc, two Lazarists attached to the petty mission of Si-Wang, were accordingly deputed to collect the necessary information. They made their way through difficulties which nothing but religious enthusiasm, in combination with French elasticity, could have overcome, to Lha-Ssa, the capital of Thibet, and in this seat of Lamanism were becoming comfortably settled, with lively hopes and expectations of converting the Tale-Lama into a branch-Pope, when the Chinese minister, the noted Ke-Shen, interposed on political grounds, and had them deported to China. M. Gabet was directed by his superiors to proceed to France, and lay a complaint before his Government of the arbitary treatment which he and his fellow-missionary had experienced. In the steamer which conveyed him from Hong Kong to Ceylon, he found Mr. Alexander Johnstone, secretary to Her Majesty's Plenipotentiary in China; and this gentleman perceived so much, not merely of entertainment, but of important information in the conversations he had with M. Gabet, that he committed to paper the leading features of the Reverend Missionary's statements, and, on his return to his official post, gave his manuscripts to Sir John Davis, who, in his turn, considered their contents so interesting, that he embodied a copy of them in a despatch to Lord Palmerston. Subsequently the two volumes, here translated, were prepared by M. Huc, and published in Paris.—Thus it is, that to Papal aggression in the East, the Western World is indebted for a work exhibiting, for the first time, a complete representation of countries previously almost unknown to Europeans, and indeed considered practically inaccessible; and of a religion which, followed by no fewer than 170,000,000 persons, presents the most singular analogies in its leading features with the Catholicism of Rome.

We would gladly present our readers with copious extracts did our limits permit, but we must confine ourselves to a few. The following description of the "Lamasery of Tchort-

chi," may be interesting to some of our readers:

About 2,000 Lamas inhabif the Lamasery of Tchortchi, which, it is said, is the favourite Lamasery of the Emperor, who has loaded it with donations and privileges. The Lamas in charge of it all receive a pension from the court of Pekin. Those who absent themselves from it by permission, and for reasons approved by the superiors, continue to share in the distributions of money and the provisions that are made during their absence; on their return they duly receive the full amount of their share. Doubtless that air of ease pervading the Lamasery of Tchortchi is to be attributed to the imperial favours. The houses in it are neat, sometimes even elegant; and you never see there, as in other places, Lamas covered with dirty rags. The study of the Mantchou language is much cultivated there, an incontestable proof of the great devotion of the Lamasery to the reigning dynasty.

With some rare exceptions the imperial benefactions go very little way towards the construction of the Lamaseries. Those grand and sumptious monuments, so often met with in the desert, are due to the free and spontaneous zeal of the Mongols. So simple and economical in their dress and manner of living, these people are generous, we might say astonishingly prodigal, in all that concerns religous worship and expenditure. When it is resolved to construct a Buddhist temple, surrounded by its Lamasery, Lama collectors go on their way forthwith, provided with passports attesting the authenticity of their mission. They disperse themselves throughout the kingdom of Tartary beg alms from tent to tent in the name of the Old Buddha. Upon entering a tent and explaining the object of their journey, by showing the sacred basin in which the offerings are placed, they are received with joyful enthusiasm. There is no one but gives something. The rich place in the" badir "ingots of gold and silver; those who do not possess the precious metals offer oxen, horses, or camels. The poorest contribute according to the extent of their means; they give lumps of butter, furs, ropes made of the hair of camels and horses. Thus, in a short time, are collected immense sums. Then, in these deserts, apparently so poor, you see rise up as if by enchantment, edifices whose grandeur and wealth would defy the resources of the richest potentates. It was doubtless in the same manner, by the zealous co-operation of the faithful, that were constructed in Europe those magnificent cathedrals whose stupendous beauty is an abiding reproach to modern selfishness and indifference.

The Lamaseries you see in Tartary are all costructed of brick and stone. Only the poorest Lamas build for themselvs habitations of earth, and these are always so well whitewashed that they closely resemble the rest. The temples are generally built with considerable elegance, and with great solidity; but these monuments always seem crushed, being too low in proportion to their dimensions. Around the Lamasary rise, numerous and without order, towers or pyramids slender and tapering, resting generally on huge bases, little in harmony with the tenuity of the constructions they support. It would be difficult to say to what order of architecthe Buddhic temples of Tartary belong. They are always fantastical constructions of monstrous colonnades, peristyles with twisted columns, and endless ascends. Opposite the great gate is a kind of altar of wood or stone, usually in the form of a cone reversed; on this the idols are placed, mostly seated cross-legged. These idols are of colossal stature, but their faces are fine and regular, except in the preposterous length of the ears. They belong to the Caucasian type, and are wholly distinct from the monstrous, diabolical physiognomies of the Chinese Pou-Ssa.

Before the great idol, and on the same level with it, is a gilt seat where the living Fo, the Grand Lama of tho Lamasery, is seated. All around the temple are long tables almost level with the ground, a sort of ottomans covered with carpet; and between each row there is a vacant space, so that the Lamas may move about freely.

When the hour for prayer is come, a Lama, whose office it is to summon the guests of the convent, proceeds to the great gate of the temple, and blows, as loud as he can, a sea-conch, successively towards the four cardinal points. Upon hearing this powerful instrument, audible for a league round, the Lamas put on the mantle and cap of ceremony and assemble in the great inner court. When the time is come the sea-conch sounds again, the great gate is opened, and the living Fo enters the temple. As soon as he is seated upon the altar all the Lamas lay their red boots at the vestibule, and advance barefoot and in silence. As they pass him they worship the living Fo by three prostrations, and then place themselves upon the divan, each according to his dignity. They sit cross-legged; always in a circle.

As soon as the master of the ceremonies has given the signal, by tinkling a little bell, each murmurs in a low voice a preliminary prayer, whilst he unrolls, upon his knees, the prayers directed by the rubric. After this short recitation follows a moment of profound silence; the bell is again rung, and then commences a pslam in double chorus, grave and melodious. The Thibetian prayers, ordinarily in verse, and written in a metrical and well-cadenced style, are marvellously adapted for harmony. At certain pauses, indicated by the rubric, the Lama musicians execute a piece of music little in concert with the melodious gravity of the psalmody. It is a confused and deafening noise of bells, cymbals, tamborines, sea-conchs, trumpets, pipes, &c., each musician playing on his instrument with a kind of ecstatic fury, trying with his brethren who shall make the greatest noise.

The interior of the temple is usually filled with ornaments, statues, and pictures, illustrating the life of Buddha, and the various transmigrations of the more illustrious Lamas. Vases in copper, shining like gold, of the size and form of tea-cups, are placed in great numbers on a succession of steps, in the form of an amphitheatre, before the idols. It is in these vases that the people deposit their offerings of milk, butter, Mongol wine and meal. The extremities of each step consist of censers, in which are ever burning aromatic plants, gathered on the sacred mountains of Thibet. Rich silk stuffs, covered with tinsel and gold embroidery form, on the heads of the idols, canopies from which hang pennants and lanterns of painted paper or transparent horn. * * * *

The Blue Town is especially noted for its great trade in camels. The camel market is a large square in the centre of the town; the animals are ranged here in long rows, their front feet raised upon a mud elevation constructed for that purpose, the object being to show off the size and height of the creatures. It is impossible to describe the uproar and confusion of this market, what with the incessant bawling of the buyers and sellers as they dispute, their noisy chattering after they have agreed, and the horrible shrieking of the camels at having their noses pulled, for the purpose of making them show their agility in kneeling and rising. In order to test the strength of the camel, and the burden it is capable of bearing, they make it kneel and pile one thing after another upon its back, causing it to rise under each addition, until it can rise no longer. They sometimes use the following expedient: While the camel is kneeling, a man gets upon its hind heels, and holds on by the long hair of its hump; if the camel can rise then, it is considered an animal of superior power.

The trade in camels is entirely conducted by proxy: the seller and buyer never settle the matter between themselvs. They select indifferent persons to sell their goods, who propose, discuss, and fix the price; the one looking to the interests of the seller, the other to those of the purchaser. These "salespeakers" exercise no other trade; they go from market to market to promote buisness, as they say. They have generally a great knowledge of cattle, have much fluency of tongue, and are, above all endowed with a knavery beyond all shame. They disqute, by turns, furiously and argumentatively, as to the merits and defects of the animal; but as soon as it comes to a question of price the tongue is laid aside as a medium, and the conversation proceeds altogether in signs. They seize each other by the wrist, and, beneath the long wide sleeves of their jackets, indicate with their fingers the progress of the bargain. After the affair is concluded they partake of the dinner, which is always given by the purchaser, and then receive a certain number of sapeks, according to the custom of different places.

In the Blue Town there exist five great Lamaseries, each inhabited by more than 2,000 Lamas; besides these, they reckon fifteen less considerable establishments—branches, as it were, of the former. The number of regular Lamas resident in this city may fairly be stated at 20,000. As to those who inhabit the different quarters of the town, engaged in comerce and horse-dealing, they are innumerable. The Lamasery of the Five Towers is the finest and the most famous; here it is that the Hobilgan lives—that is, a Grand Lama—who, after having been identified with the substance of Buddha, has already undergone several times the process of transmigration. He sits here upon the altar once occupied by the Guison-Tamba, having ascended it after a tragical event, which very nearly brought about a revolution in the empire.

A TELEGRAPH TO EUROPE.

The idea of a submarine telegraph between Europe and America, having long been regarded as merely visionary, is now about to be embodied into the most palpable practicability. A line of communication is to be constructed by a joint company, composed of men of wealth and enterprise on both sides of the water, and the whole work is engaged to be completed so as to be able to transmit instantaneous telegraphic messages from continent to continent by the beginning of 1858; that is, in little more than two years and a half. According to the prescribed plan of operations, the European company will lay the wires from the coast of Ireland to Newfoundland, from which place the American company will continue the work the city of New York. The line crossing the Atlantic will be 1,750 miles in length, and the American portion 1,200—making in all nearly 3,000 miles.

Ocean soundings which have been made from time to time, show that a sandy plain covered with comparatively shoal water, extends from Newfoundland all across the Atlantic within two hundred miles of the west of Ireland. Into this shoal the line will be sunk. The cable is to be a bundle of six telegraphic wires, and will weigh eight tons to the mile. Its whole length will of course be so heavy, that several steamers will be required to convey the material. When one vessel has paid out her complete coil of wire the extremity will be joined to the portion which comprises another cargo, and so on until the several ships-loads are connected in this continuous line. But little difficulty is expected in the progress of laying the wire. When the cable is once sunk, it will remain forever in its place. On account of its great weight and slender compass, it will speedily become imbedded in the bottom, out of the reach of accidents from ships' anchors, the attacks of marine animals, and the disturbance of the elements.

This great enterprise is not to be looked upon merely as colossal experiment, which, on being tried, may prove a disastrous failure. It will be remembered that the English government have already laid a line of wire from Balaklava to Varna, of which 350 miles are under water; and if a submrine telegraph of this length has been constructed, and is now in successful operation, there is no reason why the width of the Atlantic may not be measured by a similar line. We hail the prosecution of this gigantic work, and look forward to its triumphant completion, not only as affording a closer and more convenient medium of communication between the Old world and the New, but as a sure pledge of a more sympatheic connection of the nations of the world than has yet existed in history, which, under the influence of Christianity, shall finally lead all mankind into one universal brotherhood.—[N.Y.Obs.

THE WILL OF AN IRISHMAN WHO DID NOT UNDERSTAND ARITHMETIC.—"I will and bequeath my beloved wife, Bridget, all my property, without reserve; and to my eldest son, Patrick, one half of the remainder; and to Dennis, my youngest son, the rest. If any thing is left it may go to Terrance McCarty."

THE EARTHQUAKE AT BROOSA.—The Rev. C. N. Righter, at Constantinople, writes to the N. Y. Observer:

"From Broosa we have the most frightful details. Shocks continued all night, and the inhabitants fled from their houses to take refuge in tents. The greater part of the buildings that withstood the first earthquake, were destroyed by this. Fire broke out in four districts, and four hundred and fifty victims perished. The shocks are still repeated every hour with more or less violence. The whole city (numbering 100,000) is deserted. The fountains of drinking water have been cut off, and heated water is flowing in the streets. Mount Olympus, near by, gives forth a hissing noise, and at intervals fearful explosions like the sound of many thunders. The ancient tombs of the sultans on the mountain side have been rent assunder, and precipitated below. The house of Abdel Kader, French prisoner of war, has been destroyed, and he in great dejection is encamped under a tent upon the plain. All the European population, and many of the Protestant Armenians, have fled to Constantinople. The poor with no means of escape, are in great distress.—The Sultan has generously given 500,000 piastres, or $15,000, for their relief, and dispatched several steamers to convey them to the Capitol. Mussulman, Christians, and Jews, are alike taken on board the imperial steamers.

"Thus the most beautiful and flourishing city of the Turkish Empire, is now a scene of utter desolation and distress."

REWARD FOR KINDNESS TO A STRANGER.—It is stated that Mr. Albert Morgan, of Boston, formerely proprietor at the Pavilion, Gloucester, received intelligence a day or two since, that an Englishman, named Mortimer Erskine, recently deceased, had left him the sum of £25,000. The donation is one of gratitude for the kind care which Mr. Morgan and his family bestowed on Mr. Erskine in 1849, at which time he was taken sick with the small-pox, while stopping at the Pavilion, at Gloucester. The Boston Mail says that the information came through the British consul, Mr. Eliot, who in a day or two will place in Mr. Morgan's hands a draft for $500, with which to pay his expense to England, to take possession of his property.

☞ In the United States, physicians have estimated that 20,000 persons die every year from the use of tobacco. In Germany the physicians have calculated that, of all the deaths which occur between the ages of 18 and 26, *one-half originate in the waste of the constitution by smoking.* They say that the article exhausts and deranges the nervous powers, and produces a long train of nervous diseases, to which the stomach is liable, and especially those forms that go under the name of dyspepsia. It also exerts a disastrous influence on the mind.

The London *Punch* says: "It appears that the Sandwich Islands have recently become annexed to America. The natives, no doubt, knew from conviction on which side their bread was buttered, and asked the United States if they would like to take a Sandwich."

"A SOFT ANSWER."—A college student, proud of his logical acquirements, was ambitious of a private disputation with Henderson, a famous scholar of Oxford. Some mutual friends introduced him, and having chosen his subject, they conversed for some time with equal candor and moderation; but at length, Henderson's antagonist perceiving his confusion inevitable, in the height of passion threw a full glass of wine in Henderson's face. The latter, without altering his features, or changing his position, gently wiped his face, and then coolly replied, "This, sir, is a digression; and now for the argument."

$200 REWARD!

INFORMATION WANTED.

EDWARD B. COE, an American citizen, formerly a resident of Rochester, New-York. left home for California, September, 1849. It is known that he remained in that country until about September 17th, 1850, when he left San Francisco. It is supposed that he shipped on board of some vessel then lying in port bound on a foreign voyage, as he had an inclination to follow the sea, having previously made a whaling voyage in the ship 'Milo,' of New Bedford, during the years 1843, 1844, 1845.

Circumstances connected with his relatives at home render it necessary that such definite information should be obtained as will enable them to communicate with him immediately. Should this circular meet his eye, he is earnestly solicited to write home.

The undersigned adopts this method to call the attention of his fellow citizens and others, residing in foreign countries, to the wants of this circular, and as an inducement to their exertions to furnish the earliest information of Mr. Coe's present situation or locality, Edmund N. Leslie offers a reward of Two Hundred Dollars to any person who shall be the first to send such information as is required above; or in case he should NOT be living, then positive information of his death, together with all the facts connected therewith.

Mr. Coe is 33 years of age, about 5 feet 3 inches in height, with short upper lip exposing the teeth. It may be well to mention that his name "E. B. Coe" is tatooed on each arm. In 1852 he passed by the name of "Charles Haskell. All communications to be addressed to

O. H. MARSHALL, Buffalo, N. Y., U. S. A., or
EDMUND N. LESLIE, Skaneateles,
May 1st, 1855. Onondaga Co., New York.

INFORMATION WANTED, Respecting John Curley alias John E. Smith belonging to Roxbury Mass. He left the United States on board the "Desdemonia," Capt. Nye. He was a blacksmith by trade, and is reported to have worked in Honolulu.

INFORMATION WANTED—Respecting WILLIAM MICHEAUX WATERBURY, a seaman, supposed to be on board whale ship "Garland." Should he visit Honolulu, he is requested to report himself to Seaman's Chaplain, who will furnish him interesting news from friends.

INFORMATION WANTED—Respecting ALBERT S. DRAKE, on board "Canton Packet." Should he visit Honolulu, he is desired to call, at Chaplain's Study.

INFORMATION WANTED—Respecting JUSTUS VON BOYNEBURGH, most probably called, JUSTUS BERGEK. He was at Lahaina, Nov. 1853, and intended to sail for New Bedford, in the ship "America," Fisher, Master. Did he sail or not? If he sailed did he arrive at New Bedford?

INFORMATION WANTED—Respecting THOMAS H. CORNELIUS, who served in the Mexican War, and is supposed to be somewhere, afloat or ashore, in the Pacific ocean. Should this notice attract his attention, or any person acquainted with his residence or roamings, he is requested to communicate with the Seamen's Chaplain at Honolulu.

Honolulu, April 16, 1855.

ALSO—Respecting ADDISON POWELL, supposed to be on board the whale ship "Pantheon," Capt. Hazard. If the vessel touches at Honolulu, the young man is earnestly requested to call upon the Chaplain.

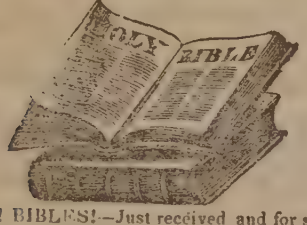
Honolulu, April 16, 1855.

Information Wanted.

Respecting REUBEN G. ROGERS, belonging to New Bedford. He sailed from that port in ship "Canada," Oct. 1, 1851. Intelligence may be communicated to the editor, or the young man's father, Mr. James W. Rogers, of New Bedford. tf

SOMETHING NEW.—What and where? Over the bridge towards Ewa. A new soap factory. Some enterprising persons, have started the manufacture of soap, and we hope they may succeed. We have examined a specimen, and it certainly appears well.

REMARKABLE EVENTS.



August 1. Battle of Nile, 1793, the younger President Edwards died, 1801.
3 Arkwright died, 1792.
6. Ben Johnson died, 1637.
7. Battle of Thermopylæ, 480, B. C.
8. Canning died, 1817.
9. Louis Philippe proclaimed, 1830.
10. Dr. Arnold born, 1740.
12. Albert Gallatin died 1849.
13. Jeremiah Taylor died, 1667.
14. Sheridan died, 1788.
15. Bonaparte born, 1769.
16 Battle of Bennington, 1777.
18. Fulton's steamboat successful, 1807.
19 Pascal died, 1662.
20. Ashburton treaty ratified, 1842.
21. Great earthquake at Palermo, 1726.
23. Washington city captured, 1814
24. John Owen died, 1683; massacre of St. Bartholomew, 1572.
25. Herschel died, 1822; mother of Washington died, 1789.
26. Adam Clark died, 1832.
30. Professor Webster hung for the murder of Dr. Parkman, 1850
31. Bunyan died, 1688.

CARD.

THE TRUSTEES of the "Sailors Home," would gratefully acknowledge the kindly feeling manifested towards the Institution, by the following parties, to Mr. Thomas for his judicious preparation of the mason work for the Corner Stone, to Mr. Antrim, for daguerreotypes of Kamehameha II, and IV, (two copies,) to Mr. Stangenwald for daguerreotype of Kamehameha III, and to Mr. Siders, for the copper box, deposited beneath the corner stone, and also to Mr. McGinnis, the proprietor of the water cart on the occasion of laying the corner Stone. Per order.

A CARD.

THE TRUSTEES of the Sailor's Home would most respectfully acknowledge the gratuitous services of the "Mississippi Band" at the laying of the Corner Stone. Per Order.

BIBLES! BIBLES!—Just received and for sale, at the Chaplain's Study, Bibles of various sizes and styles of binding. These books are imported by the *Hawaiian* Bible Society, and sold at the American Bible Society prices in New York, with the additional charge of actual expenses.

BARNES' NOTES.—For sale at the Chaplain's Study complete sets of Barnes' Notes on the New Testament, Isaiah and Job.
ALSO—Webster's Spelling Book.
☞ Any sailor unable to read, and desirous of learning, will be supplied with Webster's Spelling Book gratuitously, unless he prefers paying for it.

FOR SALE—At Chaplain's Study, complete sets (5 volumes) of d'Aubigne's History of the Reformation published by American Tract Society.

FOR SALE—At the Study of the Chaplain, numerous publications of the American Tract Society. These books are imported by the Hawaiian Tract Society, and are sold at cost price.

B. PITMAN,
BYRON'S BAY, HILO, HAWAII.

DEALER in General Merchandise and Hawaiian Produce. All Stores required by Whale Ships and others, supplied on reasonable terms and at the shortest notice.

HONOLULU MARINE HOSPITAL.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz., a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this, what a Hospital should be.

Patients will also be received by Drs. ROOKE HARDY, NEWCOMB and GUILLOU.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

A CARD.
Doctor M'Kibbin, Surgeon &c.,

INFORMS the inhabitants, and visitors of Honolulu and neighborhood, that he intends practicing in the different branches of his profession, and hopes he may rest his claims to their confidence, on an experience of nearly forty years as a practitioner in a large seaport and manufacturing town; to the principal hospital of which he was for many years attached as operating Surgeon.

In private practice, the diseases of women and children have received much of his study and attention.

Residence,—the house lately occupied by J. C. Spalding Esq Union Street. 9-tf

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINOS.

Kealakeakua, Hawaii.

Poetry.

For the "Friend."

The unfading Rose and Lily.

Our rose-leaves are scatter'd,
They float upon the blast;
We cannot gather them again,
We may not hold them fast.
The Lily withers by the stream,
And in the garden-glade,
They had their time to smile and charm,
The time hath came to fade.

But there's a changeless beauty
That bides both storm and frost;
That clings to Winter's hoary crown,
When the forest glory's lost,
It gathers richer brilliance
As earthly flowers decay,
The Rose and Lily of the soul,
They cannot fade away.

L. H. S.

The Friend.

HONOLULU, SEPTEMBER 29, 1855.

"He Would not Write Me?"

Who would not write? A certain wanderer, who visited Honolulu some months since, would not write to his mother, so she informs us by the last mail from England. But after a time, like the prodigal, "he came to himself," and then he did write to her. O what joy those letters afforded that mother! For years however, he would not write. O what anguish that mother experienced, on account of her long absent son! We hope the various hints we have thrown out in our paper, will induce very many absent sons, to write to their mothers or other friends. Young man, you are inexcusable for neglecting your duty. Do not delay a single mail. Do not say that you get no letters in reply, you doubtless, would if you would let your friends know your whereabouts.

☞ When our seafaring friends are considering the question whether they will or not, make a donation for the "Home," there is one fact we would bring before their minds. It is this—when the enterprise was first started last shipping season, the good people of Honolulu and the Islands, were urged to take it up and carry it forward, *by some of your own number, including, both masters and officers.* Seeing that you appeared to be in earnest, it called forth a generous response from the land. See the Appeal! While you have been abroad, gathering up treasure from the ocean your friends have been doing what they could to erect the "Home." It now remains for you to complete the enterprize. You must rig the ship, and prepare the sails. The hull is ready. She is clipper built—good and staunch, to launch her and get her ready for a prosperous cruise, requires your aid. It must be forthcoming, or she must remain upon the stocks! Will you permit it? Give us three hearty cheers, "a few drops of your catching," and you'll see her glide off into the stream!

☞ We would call the attention of all seamen to the "Appeal" published in another portion of our columns. Seamen will readily perceive what has been done, and they may rest assured that the trustees of the "Home" are desirous of urging forward the enterprise just so fast as the state of the treasury will allow. If possible they desire to make immediately some temporary arrangements for the lodging and boarding of seamen. This, however, will depend upon the prompt response which must be forthcoming from the sea. The present is the time to render efficient aid. A few hundred dollars now will prove of the greatest importance. Let seamen co-operate with landsmen and the work will be carried forward to a successful result.

☞ We would gratefully acknowledge by a late arrival, a donation of books, a donation of $10.00 for the Friend, and a poetical communication for our columns, from Mrs. L. H. Sigourney, of Hartford Ct.

☞ The whale ship Empire has taken 5,200 barrels of oil in 37 months.

New Eruption on Hawaii.—A large volcanic eruption is now taking place near the summit of Mauna Loa. A large stream of lava has been flowing for several weeks into the broad basin stretching out between Mauna Loa and Mauna Kea. The stream has declined into the forest lying in the rear of Hilo. We were informed by two visitors, the Messrs. Paris, who had visited the scene of action and traced the stream, that it baffles description. They saw in one spot the stream pouring over a precipice fifty feet high. Whenever the weather would permit the volcano might be seen from Hilo, and in the night the spectacle was truly sublime. The new crater is upon an elevation from 8000 to 10,000 feet above the old crater of Kilauea.

Mrs. Hamm's Juvenile Singing School.

This lady having closed her first term, has now commenced the 2nd term. The class meets every Saturday morning, 10 o'clock A. M., at the Bethel Vestry Room. The success which has attended Mrs. Hamm's instruction, is a guarantee for the future. All parents in Honolulu desirous that their children should be taught the elements of music, will do well to patronize this school.

Terms, $3,00 each pupil, per quarter, 12 Lessons.

Foreign Subscribers.—We rejoice that our list of foreign subscribers is upon the increase. The mail arrangements are so complete that there is no difficulty in sending papers to any part of the United States or Europe. $2,00 will send the Friend for one year. $4,00 one year's subscription, and a bound volume for current year; and $5,00 one year's subscription and two years bound.

"His Mother is almost Crazy."

Whose Mother? The mother of a certain sailor, supposed to be afloat in the Pacific. Why? Because he will not inform her of his wanderings. We have copied the above line from a letter received by the last mail, requesting information. We entertain no manner of doubt, that a thousand other mothers in the United States, and England could sympathize with that "almost crazy" mother. Why will not seamen write home, from every port they enter?

TRIBUTE,

To the memory of Charles Winters a Danish Sailor, who died, in Honolulu, Sept. 21, 1855.

(The following Funeral Sermon *abbreviated*, was preached at the Bethel, Sabbath morning, September 23d, by Rev. S. C. Damon.)

Hewbrews VI., 19th. "Which hope we have as an anchor of the soul, both sure and steadfast, and which entereth in to that within the vail."

Does the safety of the ship require an anchor? So does the soul of man, afloat upon the sea of life, driven about by the fierce and contrary winds of conflicting opinions, at one moment in danger of being dashed upon the quicksands of scepticism or the barren shores of atheism, at another hurried forward by the gales of passion or hurled downward by the raging tide of intemperance. The ship may be driven before the gale, but if the port with good anchorage lies ahead, and the anchor is upon the bow, the mariner feels secure. When however the port is reached, and the anchor let go, then the mariner looks calmly forth upon the raging elements.

The writer of the epistle to the Hebrews, knew the importance of the anchor to the ship. Having obtained a good hope of everlasting blessedness after the storms of life were passed, he compares this hope to an anchor. Hope in the promises of God accomplishes for the soul of man, what the anchor does for the ship. This figure of the apostle has always possessed great force and aptness, when contemplated by the Christian voyager. Its beauty is so apparent, that the anchor has become the emblem of Hope. It is a sign of confidence. Does the cross remind the Christian of Christ? So does the anchor remind the Christian of trust in that Savior. Does the cross tell us of suffering and sorrow? The anchor tells of joy and hope. While the Christian looks to the cross, and hangs the burden of his hope thereon, he feels an assurance that all is secure. He feels a confidence that his frail bark will outride all the storms of life and ere long be pilotted into the safe haven of eternal rest, around which stretch out the shores of that

"Land of pure delight
Where saints immortal reign."

This world is one of change, revolution, and uncertainty. As everything is apparently so uncertain, the sceptic and scoffer, reason that it is altogether absurd and irrational, to imagine, that man can look forward with certainty to scenes beyond the grave. If things seen and present are fleeting and transitory, much more reason the sceptic and scoffer are things unseen and future. The very reverse however, was the conclusion to which the apostle Paul arrived "We look not "he says" at things which are seen, but at things which are not seen, for the things which are seen are temporal, but the things which are not seen are eternal," 2nd Cor., 4th 18. Such was the trust which the apostle reposed in the promises which God had made to his people, he felt a firm, fixed and confident assurance that when he laid aside his earthly tabernacle, he should be admitted into a state of perfect happiness, where there would be no more pain, sorrow, suffering or death. The experience of the apostle, corresponds with that of the true Christian in all ages. There is abundant testimony to show, that a great multitude is embraced in the company referred to by the writer of the Epistle to the Hebrews, when he says, in the language of the text, "Which hope, *We* have as an anchor to the soul."

We are assembled this morning, to pay the last tribute of respect to the remains of one who possessed that hope, under circumstances peculiarly trying. Having anxiously watched for nearly three days and nights by his dying bed, and having for several months and years been intimately acquainted with him, I feel that I shall be fully justified in not merely alluding to the life, character and death of the deceased, but in dwelling for a few moments upon these topics.

Our acquaintance commenced ten years ago, in the year 1845, when he visited this port as a sailor, on board a European whaleship. He then visited this chapel, from motives of curiosity, for he could not understand the English language. Having always previously attended the Lutheran Church in Sleswick, Denmark, his native land, our forms of worship, and our plain chapel, appeared exceedingly strange. As he has since told me, he hardly knew what opinion to form respecting them. Repeatedly during the stay of his vessel in port, he visited the chapel. He also came to my study and obtained a German Bible, as the German language is spoken in the part of Denmark where he was born. That Bible he has told me that he often read, and took home with him to his friends in Denmark, and when he again left for sea, they persuaded him to leave it among them. In the course of his voyaging, he again came to Honolulu, and obtained another Bible. This one he subsequently lost by fire in California. But from the careful perusal of the sacred volume, impressions deep and lasting were made upon his mind. About three years ago, while laboring in California, and while encamped as he expressed it among the "Roughest," he felt a call from God to devote himself to His Service. Finding the society of his fellow laborers uncongenial to religious meditation, he took his blankets wandered away from his cabin, and dwelt alone for a time among the hills. There, he earnestly sought the favor of heaven, and the pardon of his sins. God listened to his earnest petitions. On returning to his companions, they laughed at his seriousness, and ridiculed his new course of life. The question arose in his mind, whither he should go for advice and counsel, Honolulu appeared the most desirable point. He returned to San Francisco, and soon shipped on board a vessel bound hither. Again calling at my study, he obtained another Bible, which was subsequently lost when the "John Wesley" was wrecked, at Koloa, Kauai, lessthan two years ago. Again returning to Honolulu, he obtained another copy of God's Word, which was the fourth obtained at my study. The last was in the English language. This Bible he left as a dying bequest to my family. I shall not soon forget the modesty, with which he received it. Having obtained so many, he felt ashamed he said, to ask for another!

It was a singular circumstance, that he should, after ten years wandering, have returned to die in my study, on the very spot from whence he had received the Word of Life, and to bear such unqualified testimony to its power to sustain the soul, in the severest moment of agony and in view of death.

I am particular to mention these items, because it was almost entirely owing to the diligent reading of God's Word, that his mind became enlightened. For whatever of firm Christian hope he subsequently obtained, the reading of the Bible was the instrument. I delight to trace the operations of the spirit of God, in thus applying the truths of his word to the hearts of sinners. It speaks a note of encouragement to all who are engaged in this good work of scattering abroad the Bible among seamen. Such examples are beautiful illustrations of the words of scripture. "For as the rain cometh down, and the snow from heaven, and returneth not thither, but watereth the earth, and maketh it bring forth and bud, that it may give seed to the sower and bread to the eater. So shall my word be that goeth forth out of my mouth: it shall not return unto me void, but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it." Isaiah, 55th chapter, 10th and 11th verses.

He became connected with our Bethel Church in January, 1854. At the time of his examination, there were doubts in the minds of the members of the church, respecting the propriety of admitting him, for he was apparently unable to express himself in language which was at all intelligible. This arose partly from his very imperfect knowledge of the English language, but more especialy from an instinctive modesty, to communicate his feelings upon religious subjects. From subsequent acquaintance I learned that he possessed a retiring modesty which exerted a controling influence over his mind. These traits of character have been more fully developed since he came to lodge upon my premises. Having for many years been buffetting the waves, and arriving at a period of life, (he was 45 years of age,) when the sailor feels that he is becoming an old man, he felt that he should be glad to reside permanently on shore, if he could gain a livelihood. Gratitude for having received the Word of Life at my hands, led him often to my study, and finally to become located upon my premises, where we became strongly attached to him, on account of his many good qualities. As I watched from day to day, his quiet, modest and consistent course of Christian conduct, I have felt reproved. He was a man of prayer, and a Bible reader, having always been a member of my Bible class. Religion was with him a living principle. It appeared not so much in what he said, and in the professions which he made, as in his uniform and daily example. I have dwelt thus minutely upon his life and character, because I deemed this course to be necessary, in order to appreciate the closing scenes of his life.

On retiring last Tuesday evening, I remarked to him that I wished he would occasionally during the night, look about the premises. In complying with my wishes, he received the fatal wound. From the moment that the ball entered his body, he did not expect to survive. Indeed, at first, he did not suppose he should live an hour. Believing that his time had come, and expecting his de-

parture every moment, still he did not for a single instant lose his presence of mind, or express the shadow of a fear of death. While suffering intense pain he gave me a few directions about the settlement of his worldly affairs. Without a tear, sigh of regret, or murmur of complaint, he expressed a perfect willingness to leave this world, if it should be God's will. "All is right," he said, repeating the remark again and again during his sickness. "Thy will be done," was the prevailing thought in his mind.—When asked upon what he founded his hope of happiness after death, he replied "upon the love which I have for the things of Christ."

At one time, as we were watching by his bedside and supposing that he was about to breathe his last, and would never more speak to us, he raised his eyes to heaven, and slowly articulated, "I cannot express the happiness I now feel." "All is right." On seeing one weeping, he smilingly said, "What kind of tears are those?" The reply was, "tears of joy for you, and sorrow for ourselves." He then remarked, "let them be all tears of joy—joy, rejoice with me, that I am going to my Savior."

On one occasion, when a few flowers were brought to him, with the remark, "these are from your garden," he replied pointing upward, "my garden is above." Upon another occasion, when told that in the opinion of his physician, a few hours alone remained to him, he looked up saying, "So close to Christ!"

I hope, I shall be pardoned for making an allusion, to one incident, which occurred a few moments after he was wounded. Expecting that every breath might be his last, he requested me to open his Bible to the book of Samuel, and I should there find a note, it was addressed to Mr. & Mrs. Damon, It reads as follows: "I was an hungered and ye gave me meat, I was thirsty and ye gave me drink, I was a stranger and ye took me in, naked and ye clothed me, sick and ye visited me, (I was not in prison, pray, O Lord, preserve me from that and all other evils.") And the King will say, ,, Verily I say unto you, inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me."

"The Lord bless you, and your little ones, both now and forever." "Instead of thanks take this."

Perhaps some will be surprized that he should have prepared for us, this parting farewell, hence I would observe, that on the day following the fatal event, he was expecting to remove from my premises and take temporary charge of the Sailor's Home, to which station he had been appointed by the Trustees. In anticipation of his departure he had prepared this note. Under all the circumstances, I know not as I ever received a more touching communication. His shrinking and retiring modesty, prevented him from speaking his thanks, and hence he adopted this method of letting us know that his generous and affectionate bosom glowed with a full flow of grateful emotions.

I feel that I owe no apology to this audience for occupying the time usually alloted to the Sabbath morning's discourse, in thus minutely dwelling upon the dying sayings, of one to whose faithfulness, I am doubtless indebted for the privilege of standing in my accustomed place, to proclaim to you once more the message of eternal life, and make known to you, that compliance with the terms of the gospel, will impart to you such a hopeas buoyed him up, in his hours of suffering and agony. I should reproach myself did I withold the tribute of a grateful heart, for the noble and disinterested sentiments to which he again and again gave utterance on his dying bed. In his moments of intense agony he would exclaim, "How glad I am it was me." Having few worldly ties, and assured that his anchor was cast within the veil, that there was no 'dragging,' but all was sure and steadfast, he calmly awaited the moment when his ransomed spirit would quit its earthly abode, and mount upward to his Father, and our Father, to his God, and our God.

In conclusion I would briefly remark, that the character and death of the deceased illustrates in a most striking manner, the worth and importance of true religion. If religion is a fiction, as the sceptic and scoffer affirm, it is a glorious fiction! It it a fiction more valuable than worlds of solid gold.—The testimony of this Danish Sailor, combined with the testimony of a multitude of other believers, proves most conclusively that the religion of Christ is not a fiction, but rather a great and glorious reality. It can boast of its power to support and sustain the soul, when its possessor is called to walk the pathway of adversity and sorrow. Faith in Jesus Christ is a sovereign balm for all earth's sorrows. Clouds may overcast the Christian's sky, but upon those clouds the believer discerns a rainbow of promise. In the beautiful language of Leigh Richmond when referring to to the Christian hope:

> "What though a cloud o'er shade my sight,
> Big with affliction's tear,
> 'Tis faith amidst the drops that fall,
> Discerns a rainbowthere!"

Another excellency of the Christian's hope, appears in times of sudden accident or calamity, when the sufferer is left not a moment, to make his preparation for another world. Then the soul if ever, needs something sure upon which to rest. With a body agonized with pain and a mind distressed, what a soothing balm spreads itself over the soul of the dying person, if there is a consciousness that the Savior is near, to pass with him through the dark valley and shadow of death. Then and under such circumstances, the Christian's hope is the pearl of great price. It was thus with our deceased friend. When the summons came, he was ready.—

Not even for one moment did his trust falter or his hope grow weak. His firm trust and assured hope, enabled him to face the King of terrors without the least misgiving. Approaching the confines of the unseen world, and while standing upon the brink of the grave he exhibited not one trembling emotion. He could say "O Grave where is thy victory, O Death where is thy sting?"

My noble, faithful and disinterested friend. Farewell.

Obituary Notice.

The death of Rev. H. R. Hitchcock.

Departed this life, Aug. 29th in the 56th year of hisage at his home at Kaluaaha, on the island of Molokai, the Rev. HARVEY REXFORD HITCHCOCK.

He was born at Great Barrington, Mass., was one of eleven children, six sons and five daughters, all of whom where pious. Three of the sons entered the ministry and the other three became deacons in the church. One of his sisters is the widow of the late E. H. Rogers, printer for the American Mission here.

The subject of this notice was a graduate of William's College; he studied theology at Auburn and entered the ministry in 1830. In 1831 he was united in marriage to Miss Rebecca Howard at Auburn N. Y. and sailed in the same year on the 26th of Nov. for these Hawaiian Islands, with a large company of missionaries under the patronage of the A. B. C. F. M.

He was stationed at Kaluaaha on the island of Molokai and he commenced his labors there on July 1832. There, for 23 years he has labored with unusual devotion, zeal and earnestness to enlighten, purify and elevate the people. He found them little removed from their original heathen condition in a state of destitution, physical, mora and intellectual. He lived to see his labors crowned with wonderful success. The people of his charge, now compared with those in other districts of the Islands, occupy the front rank in intelligence and christian enterprise.—They are a thrifty, diligent and liberal community; witness their contributions to the various objects of charity for a series of years and see the coast all around the island studded with substantial school houses and houses of worship.

His great work was indeed the preaching of the gospel: yet in the infant state of the people, he had to superintend every thing, schools were to be created and managed; the sick, the aged and the destitute to be cared for; civil officers to be advised, the whole people clad and civilized and their souls saved. He gave himself heartily to his work and made an unreserved consecration.

About three years ago, he and Mrs. Hitchcock made a visit to the U. S. hoping to repair their declining health. In this they were disappointed, they returned last spring, not so vigorous as when they left the islands. On their return, they were joyfully received by an affectionate people, who gave overwhelming demonstrations of gratitude and love. He entered again upon his labors, with increased earnestness and as he again sounded the trumpet in the various houses of worship, that line the coast, the people were again aroused from their lithargy and new life seemed to be infused among them. He evidentally labored beyond his strength and perhaps felt that his work was almost done.

In the later part of July, in the midst of his labor, he was attacked with dysentary and although he had excellent medical aid, the disease could not be controlled. His strength gradually wasted away, till on the 29th of Aug. he fell asleep in Jesus. He did desire to live longer, not however for any selfish end, but that he might preach the gospel.

The funeral took place on Friday 31st of Aug. and was attended by a very large concourse of sincere mourners, for whose benefit, he had spent the best portion of his life. They felt that they had lost a father and a friend.—He leaves a feeble widow and three sons, just entering on manhood to mourn his loss. The American Mission have lost a most untiring laborer. Zion mourns, but her King lives and would continue his work of mercy.—"Blessed are the dead, who die in the Lord, from henceforth, yea saith the Spirit, that they may rest from their labors and their works do follow them.

☞ In our last issue, we gave an account of the laying of the Corner Stone of the "Home." Not sixty days have passed and an edifice has arisen upon the foundation, exceedingly admired for its external design and finish. It certainly reflects much credit upon both Mr. Harding the Architect, and C. W. Vincent Esq., the Builder. We are confident all contributors to this enterprize will feel much gratified with the manner their donations have been appropriated.

☞ Various rumors and reports having gained currency in the community, some of which are entirely groundless and others having a partial foundation in truth, it has appeared proper that we should furnish our readers a brief and clear statement of facts, connected with the recent tragical and murderous death of Charles Winters.

Statement of Facts.

In order to make this statement plain it will be necessary, that I introduce the names of parties who would shrink from public notoriety, and this is especially true of one whose name has been unfortunately, but most innocently connected with this sad affair. It is now more than four weeks since Madame Rouquette became an inmate of my family, and during that period we have become strongly attached to her for her sweetness of disposition and other amiable qualities. Of her previous history, I know little, except that she has resided among us nearly a year, making every effort in her power to sustain a respectable standing, without the aid of others. Being necessarily left for a season, to struggle on alone, her overtaxed nervous system gave way and a temporary derangement of mind was the consequence. With a nearly empty purse, she would not ask, neither could she cheerfully receive aid, we cannot trace the workings of her mind or know perhaps, what let to this nervous derangement of the intellect, sufficient, that she deserves our sympathy and kindest expression of feeling. Her husband, Dr. Rouquette has been absent several months, in Oregon, but has already made arrangements for her to join him, and she leaves to-day Sept. 26th, on board the "Frances Palmer," for San Francisco.

When she had been, about one week, in my family, the clipper ship "Shooting Star" arrived having on board, an American seaman, who was discharged by the Consul.—Very soon after taking up his abode, on shore, he called at my study seeking employment, as he wished to reside on land. He soon found it but after a day or two returned saying that he was not pleased with his place. As I was about leaving for another island, he requested the privilege of coming to my study, to read, remarking that be preferred it, to associating with such persons as he found at his boarding house. On my return, after an absence of ten days, I learned that he was in the habit of coming every day, and would occasionally hang about the door of the sitting room, where seeing Madame Rouqutte, in company, with Mrs. Damon, he fancied that he had seen her before in Sonora. The question being asked her, in his presence, "Did you ever see this man?" She replied, "No, neither was I ever in Sonora." She also remarked that she was afraid of him, his conduct appeared so strange. Mrs. D. says, If you are afraid of him, I will tell him, to come no more to the study?" She replied, "No, lest it should make him angry." This was all that she ever knew of the man, for his repeated requests, for an interview, were not made known to her, on account of her state of mind.

On the afternoon of the fatal day he became quite angry that he should be denied a private interview, and deliberately armed himself, to carry his point. The sad result, is well known. I would here remark, that from the first his conduct appeared exceedingly strange, but supposing him harmless, I had not deemed it necessary to deny him, absolutely, to enter my premises. But on the afternoon of the fatal day, as he exhibited so much anger, that he should be denied a private interview, I represented his case to the U. S. Consul and requested that he might be confined. Report was made to the Police, but the man Francis could not be found. Between 8, and 9 oclock, in the evening, it was reported that he was in the neighborhood. I again notified the Police, and a constable was stationed, in the street, front of my house.

On retiring, I remarked to Winters, who was residing upon my premises, and lodging near the room, occupied, by Madame Rouquette, I wish you would occasionally, during the night look about the premises, to see if Francis, is lurking about and notify the police. In compliance with my request, he arose about 15 m. before 12 o'clock, left his room to look over the fence near Madame Rouquette's room. As he approached the room, the fatal shot was fired by Francis who was concealed behind a tree.—The parties were about six feet apart. The ball entered his breast, passed through is lungs, and lodged under the shoulder blade, causing death in three days.

Francis fled and was immediately arrested by Mr. Jourdan, one of the police. At the moment of the arrest, he threw down his pistol and dirk. In regard, to subsequent events I leave them for others to record, and publish. In conclusion I would merely remark, respecting certain letters, about which so much has been said, that they do not contain any thing improper, but many strange and incoherent expressions. One contained, "Bird's eye view of the life and family of A. G. Francis," another was addressed to "the ladies of Honolulu, greeting."

Said Francis represented himself, as having resided for several years, in California, and as having friends now residing in Philadelphia, New York and Brooklyn.

Honolulu, 26 Sept. 1855. S. C. DAMON.

Wreck of the "Jefferson."

The American whale ship "Jefferson," Capt. Williams, of New London, was wrecked June laast at half past 11 o,clock at night, on Cape Laurenston, Saghallan Island, in Ochotsk Sea. She bilged in about three hours. The fog was very dense. Landing was found a mile to the southward, of where the ship struck. Capt. W. landed at first his wife and family, then some provisions and sails as would enable the ship's company to live comfortably. He then dispatched two boats to Capes Elizabeth and Maria. A vessel, the "Reindeer," of N. B. was discovered off Cape Maria, about 75 miles from the wreck. On the arrival of the "Reindeer," the ship and cargo were sold at auction. The "Jefferson" had on board 350 barrels of oil, and 3000 pounds of bone. The "Reindeer" took off 300 barrels, and the bone, together with a suit of sails and some provisions and clothing. Capt. W. and crew left on board the "Reindeer," but subsequently the crew separated to go on board other vessels. No lives were lost, nor other serious damage except the loss of ship and cargo. Capt. Williams and family are now in Honolulu.

War News.

Doubtless many of our readers coming from the Ochotsk, and Japan seas, will anxiously ask, what news about the Russian war? Is Sebastopol taken? No, Sebastopol is not taken, and from all we can gather the prospect of its being taken is no more encouraging than six months ago. British troops numbering 2000, in June, penetrated into the city, and held possession of one street, 17 hours, but being unsupported were compelled to retire. The two armies are facing each other and contending hard. There has been severe fighting, but no decisive victories.

Lord Raglan the commander of the English army died June 28. His body has been sent to England. The French troops, on the occasion of the embarkation, formed an avenue six miles long from the camp to the sea. Since the commencement of the war, the Commanders-in-chief of the French and English armies, and the Emperor of Russia, have died *by disease.*

Lord Raglan has been succeeded by Major-general Sir George Simpson, a veteran of India and the Peninsula.

An Appeal

TO SHIP MASTERS, OFFICERS AND SEAMEN.

We the undersigned, have been appointed a Committee by the Trustees of the Sailor's Home, to make known to you its state and condition, and to appeal to you for aid.

The Hawaiian Government made a donation of the valuable lot of land on which the Home is located, on condition that it should forever be used as a Sailor's Home.

Amount of expenditure for building, including expense of cellar, slated roof, painting, &c., - - - -		$8,575
The amount subscribed by the people of the Islands,	$4,750	
" " Boston,	850	
Seafaring people, - -	1,000	
Rent of cellar for a term of years, - - -	1,000	7,600
Leaving a balance due of - -		$ 975
To finish the building, to erect necessary out-buildings, and for furniture, will require, at least, to make the Home useful, an additional expenditure of - -		$5,000
Amount required this fall, - -		$5,975

Since we began to solicit subscriptions, there has been but a small number of seafaring people in port, but as the fleet arrives, we feel great confidence in our appeal for aid. Our object is exclusively for the benefit of Seamen, and to make for them a happy home.

ELISHA H. ALLEN.
THOMAS SPENCER.
WM. H. JOHNSON.

P. S.—The Harbor Master, who is a Trustee of the Home, has kindly offered to present this Appeal and to receive subscriptions.

Honolulu, September 24, 1855.

New Religious Society in Honolulu.

A few weeks since a church of the Methodist Episcopal Denomination, was organized in this city. The society now hold its meetings at the Session Room of the 2d Foreign Church. The Rev. W. S. Turner is Pastor, who was invited hither from California, being under the Conference of California. We understand that the society has contracted for the erection of a Church edifice, to be situated at the corner of Nuuanu and Kukui streets, and to be completed next month. Great good may be expected from this new enterprise.

A Stone's Throw.—The Allied Army has pushed its works within a stone's throw of the Russian fortifications. Rather close work. Now comes "the tug of war."

A Definition.—What is the word "perseverance?" said one negro to another while conversing about a sermon they had just heard. "It means, take right hold; hold fast, hang on, and no let go.

Letters at Chaplain's Study.

For Wm. Melleran, ship "Florida." John Owen Davis, Samuel Rice, Thos. H. Brown, Hiram F. Richardson, Chas. W. Crehore, Chas. L. Clark, John B. Holmes, Lewis L. Bright, John A Cooley, Robert Shepperd, Thomas Banks, Wm. Mores, Frederick Mills, Thomas S. Bain, Charles Harkill, Benj. Stretch, Duncan Calver, Sylvester West Joseph, James Abrahams, Henry P. Gray, James R. Bulford, Jonathan Kelley.

☞ We would call the attention of all seamen visiting Honolulu, to the importance of writing their friends. Let not one fail to do it while in port. Post office arrangements are now complete, and you can forward letters to any part of America or Europe. If you have no writing materials, call at the Chaplain's Study, and you shall be supplied gratuitously.

☞ Some residents upon other parts of the Islands, have spoken to us about aiding the "Home." Now is the time when your donations will prove most timely. Those who have allowed their subscriptions to remain unpaid, it is hoped will forward the amount of their donation, without further delay. The Trustees desire to put the building in a habitable condition as soon as possible.

"Can't do it."

We have never seen scriptural quotations more aptly applied than in the following dialogue which took place at the table of Bishop Doane.

It is stated that Bishop Doane of New Jersey, is strongly opposed to temperance.—A short time since, Rev. Mr. Perkins, of the same denomination, and a member of the order of "Sons," dined with the Bishop, who pouring out a glass of wine, desired the reverend gentleman to drink with him, whereupon he replied:

"Can't do it, Bishop, wine is a mocker."

"Take a glass of brandy, then," said the distinguished ecclesiastic.

"Can't do it, Bishop, 'strong drink is raging.'"

By this time the Bishop, becoming somewhat restive and excited, said, to Mr. Perkins:

"Please pass the bottle to Mr. ———"

"Can't do it, Bishop, 'woe unto him that giveth his neighbor drink, that putteth thy bottle to him and maketh him drunken also."

We are not informed what followed, but, opine the good Bishop must have almost concluded that these "Sons of Temperance" surely have scripture on their side. Happy would it be if Bishops, Priests and Deacons, with their people would all adopt the principle, "Can't do it."

☞ Should Henry Gray, of ship Bowditch, visit Honolulu, let him not fail to call at the Chaplain's study.

☞ Information is desired respecting John B. Bolson, of Sag Harbor, by his brother, David A. Bolson.

Marine News.

HONOLULU, Sept 11, 1855.

Editor of the Friend.

DEAR SIR:—Two years since, when on a passage from this port to New London, I discovered a small shoal or reef not laid down on my charts, and having had several inquiries made relative to it, I have thought best to ask you, to publish an account of it, and believe that by so doing you will contribute to the safety of ships cruising in that vicinity.

I copy from my journal of Nov. 29th, 1853 the following:—

"REEF IN LAT. 6° 27' NORTH, LON. 162° 12' WEST.

At 10 A. M. made breakers ahead, kept on our course until we were within a mile of them, when we steered W. S. W., and ran on that course ten miles, when, judging that we were past all danger hauled up to the South, and soon saw bottom, cast the lead and found six fathoms of water, again kept off and shortly deepened to twenty five fathoms and no bottom.

This shoal is composed of coral and sand, and when the breakers on the North East part bear East with a moderate wind, a few small spots of sand or coral, can be seen above water. The northern part runs E. N. E. & W. S. W., for about twelve miles, and shoal water; appeared to extend several miles to the southward. With a moderate breeze there are no breakers except on the N. E. point of the reef, but a heavy swell rolls for several miles to the westward.

This shoal is near the spot assigned to "Danger rock" on some charts, and it is in my opinion, very dangerous to approach in the night, particularly with a light wind and smooth sea, as such, there would be no breakers visible until a ship was so near as to be in considerable danger."

The position I have given this danger I believe to be very nearly correct, as I took several observations to determine it, and was assisted by Capt. Sherman, late of Ship "Marcus," of New Bedford, who was a passenger with me at the time, and as all our observations agreed very nearly, I think navigators may rely upon their accuracy. W. E. KINGMAN,

Master of Ship "Shooting Star," of Boston.

Information Wanted.

PITTSFILD, Ill., June 4th, 1855.

DEAR SIR:—At the request of Mr. J. A. Adams, of this county, a friend of mine, I trouble you with this letter. Mr. Adams has a son by the name of Cornelius A. Adams, who went from California about two years since to the Sandwich Islands.—They had a letter dated at Honolulu soon after his arrival there, and have not heard from him since.—His father and mother are much distressed on his account, and I thought I would trouble you with the enquiry for his whereabouts. It may be that you could relieve their anxieties without much trouble, and I know the goodness of your heart would prompt you to do so if in your power. The young man is naturally diffident, and has some pretentions to fancy or portrait painting when here. Any information you can give will render me under obligations to you. Your friend, W. V. ROSS.

HON. D. L. GREGG.

Information Wanted.

SIR,—I take the liberty to trouble you again for any information you may know of my brother William Woodland, his father having died since receiving your kind letter in answer to the one he sent you concerning him some three years ago—my mother received a letter from the last one in the Spring of 1853, dated Dec. 31, 1852 at sea, stating that he was an officer on board of the ship Vineyard, of Edgerton, Maui, Sandwich Islands, and if all proved well in 18 months from the date of his letter, he should be home—since that we have heard nothing of him, and could you give me any information of the ship or himself, I will be truly thankful—and sir, should you see him, that by accounts heard by us at different times, there is some property on his deceased father's side pending on his life' and in duty bound, I will ever pray.

I remain your humble servant,
GEORGE WOODLAND.

Shipwright, H. M. Dockyard, Portsmouth, England.

Information Wanted.

New London, May 17, 1855.

REV. S. C. DAMON:—Dear sir, we have been informed that information in regard to a certain Thomas Forsythe, who had sailed from this port in the ship Bengal, Capt. Hempstead, some 8 years since, could be best obtained for his family by applying to you. His last letter was dated Owyhee, 1849, and his mother has had no reliable information of his whereabouts since. Acting upon the information of your character communicated to me by a friend, I have made bold to address you though a stranger.

Please forward any knowledge of the above-mentioned young man, and yon will greatly oblige, H. POTTER.

Information Wanted.

RESPECTING George Washington Whitney, 25 years of age, left Boston 1851, on board clipper "Nightengale" for Australia, and subsequently visited California. If this notice falls under his observation, he is requested to communicate with the Seaman's Chaplain, Honolulu, or his friends.

NOTICE TO SEAMEN.

SECTION 5th, of article 3d, of the "Local Regulations" of the port of "HONOLULU," reads as follows:— The Governor of Oahu shall cause a bell to be rung at the port of Honolulu, at nine and a half o'clock of each evening, as a signal to all mariners at that time on shore without his permission, to return on board their vessels; and it shall be incumbent upon them to do so, upon pain of two dollars fine, if apprehended at or after ten o'clock of the evening, when said Governor shall cause the bell to be again rung, as a signal for their apprehension.

"PENAL CODE LAWS."

Section 2d, Chapter 27th, reads as follows:—Whoever furiously, or heedlessly of the safety of others rides any horse or other animal, or drives or conducts any vehicle, though the personal safety of any person be not endangered thereby, shall be punished by fine, not less than five dollars, nor exceeding one hundred.

Section 1st, Chapter 35th, reads as follows:—Whoever is found drunk in any street, road or other place, from the use of any intoxicating liquor, shall on the first conviction for such offence, be punished by a fine not exceeding six dollars, and on any conviction of any like offence committed after the first conviction, by a fine not exceeding twelve dollars or by imprisonment not more than three months.

Chapter 41st reads as follows:—All loud noise at night is taboo. Whoever, after sun-set, shall by hallooing, singing in the streets, or in any other way, make any disturbance or disorderly noise, in any village, town or part of this kingdom, without justifiable cause for so doing, shall be liable to summary arrest and imprisonment by any constable or police officer, and upon conviction be punished by a fine not exceeding ten dollars.

SESSION LAWS. 1852.

OF AN ACT TO PREVENT THE CARRYING OF DEADLY WEAPONS.

Section 1st reads as follows:—Any person not authorized by law, who shall carry or be armed with any bowie-knife, sword-cane, pistol, air-gun, slung-shot, or other deadly weapon, shall be liable to a fine of no more than Thirty, and no less than Ten Dollars, or in default of payment of such, to imprisonment at hard labor for a term not exceeding two months, and no less than fifteen days, upon conviction of such offence before any District Magistrate, unless, good cause be shown for having such dangerous weapons; and any such person may be immediately arrested without warrant, by the Marshall or any Sheriff, Constable or other officer or person, until he can be taken before such Magistrate

HENRY S. SWINTON,

Honolulu, Sept. 1855. tf Perfect of Police

QUICK TRIP TO KILAUEA.

Reports having reached Honolulu, that the old crater of Kilauea, was unusually active, and that a new eruption had broken forth on Mauna Loa, induced a party of gentlemen to make an excursion to Hawaii.—They embraced the favorable opportunity of going and returning on board the Steamer Kalama. This vessel having been undergoing extensive repairs, was dispatched for Hilo, touching at intermediate ports, for the purpose of testing her sea-worthiness, and inspiring the public mind with confidence in regard to her capabilities. The manner she performed the trip was in the highest degree satisfactory to all on board.

We sailed from Honolulu Tuesday afternoon, Sept. 4th. The wind was high and the sea rough, in the passage between Oahu and Molokai. At one P. M. on Wednesday, we reached Lahania, having passed to the southard of Kauai. At 4 o'clock on the following morning the Steamer sailed along the southern shore of Maui, crossing the channel to Kawaihae, encountering a very rough sea, strong current, and wind little short of a gale. The Steamer however made a good course. Having taken wood we again sailed. As we left the harbor, the light of the new volcano was clearly apparent, although more than fifty miles distant. The next morning found us steaming along the windward side of Hawaii, where the beauty of the scenery is unequalled by any thing on other parts of the Island. The shores, green to the water's edge, gradually rose covered with trees and grass.—Beautiful cascades came leaping down the hillsides. For a distance of forty or fifty miles before reaching Hilo, the eye was continually refreshed with a succession of landscape views surpassingly picturesque. The huts of the natives scattered over the broad slopes, and among the groves of evergreen trees, enlivened the prospect. It is not for us to say, but that agreeable company, fine weather, good fare, and the expectation of reaching Hilo in a few hours, may have had a very important influence in adjusting our visual organs to perceive the beauties of the land and sea, for we can well imagine that if we had been becalmed for several days on board, a crowded native schooner, with poor fare and uncomfortable lodging, the scenery would have appeared altogether different. The state of a man's mind and bodily comforts have an important influence in these matters.

We reached Hilo about 1 o'clock, and having dined went on shore, to make preparations for starting to the crater of Kilauea. Here we found one of the effects of Missionary influence, meeting our pleasure-seeking party. The natives were unwilling to loan their horses or hire out themselves, unless they could be allowed to rest upon the Sabbath, as that Sabbath must be spent while we were absent from Hilo. The matter however was readily arranged, and it was concluded to spend the Sabbath, at the halfway station between Hilo and the crater. We left Hilo Saturday morning, and reached the half way house about 3 P. M., where we took up our abode until Monday morning.—Sabbath came. We held puplic worship, with the assistance of the natives in the vicinity. For one, we may say, it was a Sabbath to be remembered. The weather was remarkably fine, and surely the worshipper of God, could find amid the wild scenery of Hawaiian mountains, many incentives to devotion. It required no irksome effort to elevate the mind from the contemplation of nature, to the worship of nature's God. On Monday morning with the first dawn of light, off we started, and the ride was surpassingly refreshing. The bracing atmosphere and the singing birds combined with other elements of delight, made the distance appear short, and the moments glide rapidly away. At 10 o'clock we reached the smoking and lava flowing crater of Kilauea. As it has been so often described, we shall not make the attempt, for we should doubtless fail in the attempt as former visitors have failed in conveying a really vivid and truthful picture of the crater to those who have not visited the spot, and looked for themselves down those steep precipeces and gazed upon those broad acres of lava, destitute of all signs of life. The truth is Kilauea is unlike all other craters. It is a vast chasm, or depression some fifteen miles in circumference, and a thousand feet deep. Into this immense basin we descended and pursued a course nearly direct across to the "lake of liquid fire," rolling, jetting, and looking most fearful. We could approach its very brink, and look down its fiery depths. The lake was probably two or three miles in circumferance, and nearly circular in shape. It had recently overflowed its banks, but at the time of our visit was about one hundred feet below the brink.—Having collected a few specimens, we started off to explore certain cones, from whence we discovered smoke emitted. Into several of these we looked. There we saw streams and rivers of lava flowing at a rapid pace. One stream was not less than seventy-five or one hundred feet wide, descending at an angle of near 45° and branching off in two opposite directions. Two of these cones presented the appearance of immense furnaces, smelting ore enough to supply all the forges of the world. Having wandered about for several hours we ascended to our encampment on the brink of the crater. Hungry, wet and exhausted, we tried to make ourselves as comfortable as possible during the night in huts far less suited for habitation than those of the Digger Indians of California, or natives of New Holland. It was only for one night and hence we had no occasion to "grumble," especially when the illustrious cooks of our party served up an oyster soup that would have done credit to a first class hotel. During the night the view of the crater was wonderfully grand. There was the "great light" of the lake and some twenty "lesser lights," scattered over the bed of the crater. Suffice it to remark the morning's early dawn found us leaving for Hilo. Some of our party reached the bay that evening, and others the following morning. To the good people of Hilo, the party felt under special obligation for their many kind attentions. The Steamer left at 4 o'clock P. M., on Wednesday, reached Kahului, on Maui, the following day at 12 o'clock; left that port, the next day about noon reaching Lahaina at 4 P. M.—Sailing again at 7 o'clock for Honolulu, where we arrived safely Saturday morning Sept. 15th, having been absent a little over ten days, affording those on board a rare opportunity for seeing various parts of the Islands, touching at several ports, and viewing the wonders of the great crater of Kilauea.

The following card will exhibit the feeling of those making this excursion, towards the Captain, owners, and officers of the "Kalama."

A CARD.

THE UNDERSIGNED, passengers on board the Steamer Kalama (West Point) from Honolulu to Hilo, and back, having had an excellent opportunity for observing and testing the strength and sailing qualities of that vessel during a severe gale encountered in the Molokai channel on the night of the 4th inst., as well as during a strong blow while crossing between Maui and Hawaii, would state for the benefit of the traveling public,

That we believe the Steamer Kalama to be at present in a perfectly safe and sea-worthy condition; and

That their thanks are due to the Captain and officers of the steamer as well as to the Agent of the H. S. N. Co., for the courteous and gentlemanly attention which they received during the excursion.

INFORMATION WANTED.

EDWARD B. COE, an American citizen, formerly a resident of Rochester, New-York, left home for California, September, 1849. It is known that he remained in that country until about September 1st, 1850, when he left San Francisco. It is supposed that he shipped on board of some vessel then lying in port, bound on a foreign voyage, as he had an inclination to follow the sea, having previously made a whaling voyage in the ship 'Milo,' of New Bedford, during the years 1843, 1844, 1845.

Circumstances connected with his relatives at home render it necessary that such definite information should be obtained as will enable them to communicate with him immediately. Should this circular meet his eye, he is earnestly solicited to write home.

The undersigned adopts this method to call the attention of his fellow citizens and others, residing in foreign countries, to the wants of this circular, and as an inducement to their exertions to furnish the earliest information of Mr. Coe's present situation or locality, Edmund N. Leslie offers a reward of Two Hundred Dollars to any person who shall be the first to send such information as is required above; or in case he should NOT be living, then positive information of his death, together with all the facts connected therewith.

Mr. Coe is 33 years of age, about 5 feet 3 inches in height, with short upper lip exposing the teeth. It may be well to mention that his name "E. B. Coe" is tatooed on each arm. In 1852 he passed by the name of "Charles Haskell. All communications to be addressed to

EDMUND N. LESLIE, Skaneateles,
May 1st, 1855. Onondaga Co., New York.

INFORMATION WANTED—Respecting THOMAS H. CORNELIUS, who served in the Mexican War and is supposed to be somewhere, afloat or ashore, in the Pacific ocean. Should this notice attract his attention, or any person acquainted with his residence or roamings, he is requested to communicate with the Seamen's Chaplain at Honolulu.

Honolulu, April 16, 1855.

ALSO—Respecting ADDISON POWELL, supposed to be on board the whale ship "Pantheon," Capt. Hazard.—If the vessel touches at Honolulu, the young man is earnestly requested to call upon the Chaplain.

Honolulu, April 16, 1855.

INFORMATION WANTED—Respecting WILLIAM MICHEAUX WATERBURY, a seaman, supposed to be on board whale ship "Garland." Should he visit Honolulu, he is requested to report himself to Seaman's Chaplain, who will furnish him interesting news from friends.

INFORMATION WANTED—Respecting ALBERT S. DRAKE, on board "Canton Packet" Should he visit Honolulu, he is desired to call, at Chaplain's Study.

INFORMATION WANTED—Respecting JUSTUS VON BOYNEBURGH, most probably called, JUSTUS BERGEK. He was at Lahaina, Nov. 1853, and intended to sail for New Bedford, in the ship "America," Fisher, Master. Did he sail or not? If he sailed did he arrive at New Bedford?

Information Wanted,

Respecting REUBEN G. ROGERS, belonging to New Bedford. He sailed from that port in ship "Canada," Oct. 1, 1851. Intelligence may be communicated to the editor, or the young man's father, Mr. James W. Rogers, of New Bedford. tf

INFORMATION WANTED, Respecting John Curley alias John E. Smith belonging to Roxbury Mass. He left the United States on board the "Desdemonia," Capt. Nye. He was a blacksmith by trade, and is reported to have worked in Honolulu

SEAMEN TAKE NOTICE!

AFTER THE 1st day of September, 1855, every Foreign Seaman not being attached to any Vessel in Port is liable to be

ARRESTED AND CONFINED

in the Fort, unless he can show the Harbor Master's permit, or a Consul's, or licensed Shipping Master's certificate. And after the first of September as above,

EVERY SEAMAN

who shall be found on shore AFTER THE SIXTY DAYS LIMITED by his Permit have expired will be arrested as a

DESERTER!

and confined in the Fort until he shall leave the kingdom.

HENRY S. SWINTON,
Deputy M

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

HONOLULU MARINE HOSPITAL.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz.: a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this what a Hospital should be.

Patients will also be received by Drs. ROOKE, HARDY, NEWCOMB and GUILLOU.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

GEO. A. LATHROP, M. D.

A CARD.

DR. M'KIBBEN, SURGEON, &C.,

INFORMS the inhabitants and visitors of Honolulu and neighborhood, that he intends practicing in the different branches of his profession, and hopes he may rest his claims to their confidence on an experience of nearly forty years as a practitioner in a large seaport and manufacturing town, to the principal hospital of which he was for many years attached as operating Surgeon.

In private practice, the diseases of women and children have received much of his study and attention.

Residence,—the house lately occupied by J. C Spalding, Esq., Union street.

B. PITMAN,

BYRON'S BAY, HILO, HAWAII.

MARRIED.

August 27th on board Ship "John Gilpin," by the Rev. S. C. Damon, C. H. Butler of Honolulu, to Miss Rebecca S. Howland ofFairhaven Mass.

DIED.

On the 17th September, on board ship Marcus, N. L. 23' W. L. 140' John Betucan, a native of Western Islands, aged 18 years. Captain James speaks of him as an excellent young man, whose loss was severely felt on board.

Drowned by the upsetting of a boat, Galvin F. Collins, Aug. 12, 1855. He was a seaman on board the American whaling bark Gratitude, cruising in the Ochotsk Sea. This young nan, aged 22 years, belonged to Frederick City, Va. Captain Cornell making this report, speaks in the highest terms of young Collins, as temperate, moral and correct in his conduct.

August 8th, lost overboard from bark Arab, on her passage northward, William Alden, of North Bridgewater, Mass.

August 28th, in the U. S. Hospital, Lahaina, of consumption, Rueben Ramsdell, of Belchertown, Mass.

August 30th, in the same place, of Aneurism, Mr. Ebenezer Rousful, of Freetown, Mass., late mate of ship Marcia, Capt. Wing.

In this city, on the 16th inst., Kinoole, wife of B. Pitman, Esq., aged 30 years.

Newburyport, 9, Thos Dickason, 4, Rebecca Sims, 2, Niger, 2, took 300 bbls. between Seasons, Lewis, 9, China, 6, Thos. Nye, 5, California, 3, George, Jenney, 5, Champion, 3, Montpelier, 1, 8, Condor, 800 bbls. 10, Metacom, 5, Junior, 4, Levi Starbuck, 1, Cicero, 2, Florida, of F. H. 3, Chas. Phelps, 7, Brutus, 10, Jireh Swift, 8, Oscar, 5, George and Mary, of N. L. 8, 3 in Japan Sea, and 5 in Ochotsk, 10, Cortes, 8, Bk. Venice, 1, Meteor, 1200 bbls. Geo. Washington, of Wareham, 1, Bk. Louisa, 6, Coral, 1, John Wells, 3, Tiger, 1, Omega, of F. H. 4, Montreal, 5, 11, Electra, 8, Polar Star, 3, Wm. Wirt, 7, Corrinthian, 2, Bk. Hoogley, 1, Bk. Gentleman, unknown, 12, John T. Rowland, 3, 15, Bk. Philip 1st, 6, Bk. Martha, 7, Bk. Edward, 3, Triton, 2, 17, Bk. George of Honolulu, 500 bbls., Daniel Wood, 9, 18, Petrel, 3, 19, Eliza Adams, 4, Speedwell, 5, Tybee, 2, 20, Moctezuma, 7, taken in Japan Sea, Bk. Shepherdess, 800 bbls. 23, Vineyard, 10, 24, Adeline Gibbs, 4, taken in Japan Sea, Arctic 13, took 300, bbls. r't wh. and 400 Sp on passage out from home, Bk. Rob't Morrison, 2, Corn's Howland, 2, 27, Caroline, 7, 4 in Japan Sea and 3 in Ochotsk, 29, Tahmaroo, 1. August 1, Marcia, 700 bbls. 13, Gideon Howland, 11, 2 in Japan Sea, and 9 in Ochotsk, 16 Fabius, 13, 10 in Japan Sea, and 3 in Saghalien Sea.

By the foregoing list it will be seen that the average thus far of whales taken in the Ochotsk Sea is scarcely four to each ship; and the whales it is said, would not average over eighty barrels. Those ships which arrived early in the sea were most successful. The weather was exceedingly foggy and stormy from the middle of May to the middle of June, after which it improved somewhat; but Bowheads were scarce and by the 1st of July, several ships had gone Right Whaling. Nothing had been done, up to the middle of July, in the bays of Shantar Islands, the ice preventing access to them. All other Bow head grounds in the sea had been thoroughly cruised over.

In a heavy blow near Shantar Islands, about the 12th of July, the Pocahontas parted both anchors and came in contact with the Lewis and bark Iris. The P.'s bulwarks were carried away and she was leaking badly. The Lewis lost both her anchors by the same gale, as did also the Phœnix of Nantucket.

JAPAN SEA.

May 7, Bk. Bayard, nothing, 15, Ship, Orozimbo, 1 whale, New England, none. June 1, Wm. Badger, 2 whales, 6 Two Brothers, none, 20, Franklin, none, Eliza T. Mason, 7, Ocean, none, Rambler, of N. B. 4, 25, Seine, 5, Bk. Manuel Ortez, 4. July 1 Ship Hobomok, 9, Europa, 8, took 300 bbls. Right Whale Oil, and 200 do. Sperm on passage from home, Henry Kneeland, 4 Whales, 2, Braganza, 4, 4, St. George, 8, 8, Omega, of Nan't, 9, 20, Bk. J. E. Donnell, 10, 1050 bbls.

In May, the Caravan of Fall River, was run into by the English Steam Sloop-of-War Hornet, in Japan Sea, and considerably damaged. Her Flying Jib-boom, Jib-boom, Bowsprit and Head were carried away. The damage was partially repaired by the men sent on board the Caravan, from the steamer.

Disasters.—A vessel, bottom up, painted ports, all sail set, was seen in Ochotsk Sea in April, by Capt. Woodbridge of ship Metacom. There was a hole in the quarter, but it coming on to blow hard, the Metacom could make no farther examination.

The King Fisher, Palmer, of New Bedford, and ship Enterprise, Russell, of New Bedford, both went ashore on the North end of Company's Island, one of the Kurile Group, on the night of May 13th. The vessels were totally lost, and the crews were taken off by ship Montezuma. The King Fisher had on board 500 sperm and 1,200 whale, and the Enterprise 80 sperm.

Ship Edgar, Pierson, of Cold Spring, went on shore on Jonas Island on the night of 4th June. Was boiling the fifth whale at the time. All hands saved. 8,000 lbs. bone and 40 bbls. oil were saved by ship Roman of New Bedford, and 140 bbls. were afterwards picked up by the Alice, and 130 by the Cicero. The Edgar had 1,400 bbls. on board.

Ship Jefferson, Williams, New London, went ashore June 7, in the night, on Saghalien Island. Had 370 bbls. oil on board, of which 300, and all the bone, was saved by the Reindeer, of New Bedford, which vessel brought Capt. Williams, lady and children, to Lahaina.

Barque Ella Frances reports H. B. M.'s ship Monarch, at sea, 12th Aug., 1855. Lat. 38° 48' N, Long. 134° 32' W. The Monarch left San Francisco on the 7th of August, bound for Vancouver's Island.

Ship Erie reports July 2, Wm. Thomson, White, 1100 whale oil; Majestic, Percival, 600 do. July 7, bk. Lark, Kiblin, 1000 do.; sh. Benj. Morgan, 7 whales; sh. Julian, Cleveland, 5 do. July 15, Abm. Barker, Barker, 1 do July 20, Neva, Hand, 750 whale oil; Chas, Carroll, Tuttle, 5 whales. Aug. 18, Timor, Rogers, 450 whale oil.

Heard from previous to 15 June.—June 1, Sam. Robertson, Washburn; 4 whales; Amazon, Barber, 2 do.; Onward, Norton, clean; Scotlaud, Smith, 3 whales; Oregon, Eldridge, clean; Saratoga, Harding, do. June 2d, bk. Dartmouth, Heath. clean; Candace, Starr, do.; Rebecca Adams, do.; Montauk, French, do.

Previous to Aug. 29.—Aug. 1, Z. Coffin, Rose, 1000 whale oil; Two Brothers, 1 whale; Brooklyn, Sission, 5 do.; Jefferson, Williams, 1 whale. Aug. 15, Jefferson, Hunting, 1,100 whale oil; Uncas, James, 1,000 do.; Mogul, Clark, 7 whales; Splendid, Smith, 650 whale oil; Liverpool, Barker, 5 whales; Bk. Black Eagle, Edwards, 1 do.; James Andrews, Kelly, 4 do.; Tamerlane, 5 do.; Romulus, Baker, 1 do.

Passed by Honolulu, Sept. 6th, 1855, ship Messenger, Kennedy, 19 days from San Francisco. For the first twelve days after leaving, experienced light baffling airs and calms, making but 540 miles in the 12 days. Bound to Hong Kong.

The Gen. Morgan, 20 days from Maria Islands, reports, Aug. 2, barque Black Warrior, Pinkham, 160 sp., bound to San Diego for recruits, 10, ship Mountain Wave, Hoxie, for Hampton Roads; 17, barque Magdalena, Bowzer, and schr. Mary Ella, for Honolulu.

Arrived Aug. 12, at Maria Islands, schr. N. G. Doyle, Philips, from San Francisco; Aug. 1, schr. San Diego, Norton, from San Francisco, on a filibustering expedition.

Ships spoken by the Java, Aug. 10, Splendid, Smith, 5 wh., Columbus, Huntley, 5 wh., Romulus, Baker, 1 wh.

Heard of, bk. James Andrews, Kelly, 4 wh., sh. Mogul, Clarke, 6 wh., Ch. Mitchell, Slocum, 5 wh., bk. Arab, Copeland. 1 wh., sh. Jefferson, Hunting, 10 wh., Wm. Thompson, White, 12 wh., Erie, Jernegan, 10 wh., Navy, Hand, 8 wh., Liverpool, Barker, 4 wh., A. Barker, Parker, clean, Benj. Morgan, Parsons, 10 wh., Lark, Kibling, 1000 bbls., Onward, Norton, clean.

Brig Leander, Capt. Fettjuch, 135 days from Bremen, had light winds most of the passage, was 34 days off Cape Horn. Spoke, June 29, 46° 32' S. 53° 44' W. "Alice Frazier," Taber, bound for New Bedford; July 15, off Cape Horn, Am. ship "Edward Standley," 84 days out, from Cardiff, bound to San Francisco.

The Frances Palmer, left San Francisco Sept 2, with the Hawaiian Mails, forty-one passengers, and a full cargo of assorted merchandise. The U. S. Steamer John L. Stephens arrived at S. F. on the 1st. inst., with the U. S. Mails, and 784 passengers. The Nicaragua Steamer was due but had not arrived. The Frances Palmer had light winds during the entire passage.

The Gratitude reports the following ships: Arctic, 2,300 bbls, in Japan Sea; Europa, 2,200, in Japan Sea; Marcia, 1,200, in Ochotsk Sea; Fabius, 1,200, Japan Sea; Arab, 900, Japan Sea; Franklin, 800, Japan Sea; J. E. Donnell, 1,000, Japan Sea.

The Friend.

HONOLULU, OCTOBER 25, 1855.

Getting hold of the right end of the Rope.

We are glad to learn that shipmasters and seamen, are beginning to understand the true condition of the Sailor's Home enterprise. We now refer to such as were not in port last year, when the affair was undertaken. The enterprise was commenced by shipmasters and sailors. They were the first to pay down their money. The invitation came from them to residents in Honolulu, to aid in the matter. It was late in the shipping season, before the subject was undertaken, hence, but a comparatively small amount was raised among seamen, (only about $1,000.) When the people of Honolulu, saw that seamen were in earnest, they took hold. We desire that masters, officers and seamen will observe what has been done. ☞ The Government gave a valuable lot of land—foreign residents and some of the natives of the Sandwich Islands, have subscribed and paid over $4,000.

There has been subscribed in Boston and vicinity, another $1,000. The Trustees of the Institution have gone forward and caused to be erected as beautiful an edifice as can be found upon the Islands. To complete the enterprise remains to be accomplished by seamen. *Masters, officers and seamen*, you must now come forward, and contribute for this enterprise. As one shipmaster said, "It must not fall through." You cannot say, but "the land," has rendered the aid you asked. If the enterprise proves a failure, it will be owing to "the sea," and not to "the land." To this fact we now call your special attention.

A Good Subscriber.

Newspaper publishers know by oft occurring experience, that subscribers are not the most easily pleased. If the mail is detained, or the carrier neglects his duty, look out! Perhaps, after having forwarded a subscriber's paper for a twelve-month, *lacking one number*, he will refuse flatly to pay. It is not always thus, and the publisher of the Friend has perhaps as little complaint to make as any publisher. An old subscriber called at our office the other day and desired to know how his account stood. We really had no account to make out, because many years ago he had shown himself so friendly to our enterprise, that we continued to send a copy to his wife gratuitously for two years. This however was not satisfactory! So he *thus* pays over, "This he says," is payment for the past ($4,00,) this for the future ($5,00,) this is a donation to support the Friend ($10,00,) this is for the Bethel ($5,00,) this is for the Stranger's Friend Society ($5,00,) and this for the "Home" ($20,00,). The "Home" must not "fall through." Total amount $19,00. He desired that his name should not appear, and we shall comply with his request, but would assure his good wife residing in "Adamsville, Rhode Island," that her good husband called at our office, Oct. 22nd, and paid up all arrearage and provided for the future so long as we continue to publish our little monthly sheet. If a few more of our seafaring friends would follow the example of Capt. ———, we should not be compelled to *beg* for money to support the Friend. "Ah, when shall we look upon his like again!"

☞ Poets, poetesses and prose-writers are invited to prepare epistolary communications, for the post office department of the Sailor's Fair. Communications may be forwarded through the Post Office addressed "*The Sailor's Fair.*"

☞ Merchants of Honolulu are respectfully invited to hold themselves in readiness, to receive a committee of ladies soliciting contributions for the Fair. *The smallest favors thankfully received, and the largest will not be refused.*

Sailor's Home Fair, Friday Nov. 16th.

Nearly one year ago it was decided to hold a Fair during the present shipping season, for the benefit of the Home. The Trustees have decided to hold this Fair, on the evening of Nov. 16th, at the Home. Committees of ladies and gentlemen have been appointed to make all the necessary preparations.

Articles and Curiosities for the Fair.

Seamen are particularly requested to forward contributions, for the Fair. They may be left at the Harbor Master's office, or the Chaplain's Study.

Sailor's Home Reading Room.

We are most happy to annouuce to seamen and residents, that the Reading Room is now complete and open to visitors. This branch of the enterprise would be amply sufficient to compensate for the outlay. The Trustees offer this as a pledge that they will proceed just so fast as the funds at their disposal will allow.

☞ The following articles are respectfully solicited for the Reading Room at the "Home,"—one or more spy glasses—several good maps—a good map of the world—late papers from any part of the world—newspapers in foreign languages, French, Spanish, German—some lamps, hanging and side lamps—A BARREL OF GOOD OIL.

☞ The new Reading Room of the Sailor's Home was opened with appropriate exercises last evening, Wednesday, 24th. Mr. Allen, President of H. S. H. S., made the opening address. Exceedingly apt and appropriate remarks were offered by Captains Cox, Spencer, Kingman, Neil, and several of the Trustees.

All seamen and strangers visiting the establishment are respectfully requested to record their names. Should such a register be carefully preserved from year to year, it may lead to very important results, especially in tracing out seamen about whom inquiries will be made.

Seamen will always find writing materials at the desk, so that they can have no possible excuse for not writing their friends.

Correspondence.

PAPEETE, Tahiti, July 31st, 1855.

The Rev. S. C. Damon:

DEAR SIR:—A solemnly interesting event has occurred here since I last wrote, in the death of Queen Pomare's eldest son Ariiane. From his infancy he was delicate, and few who observed the changes which were continually occurring in his health, ever expected that he would arrive at maturity. His disposition was naturally mild and easy, and he was thereby found to be a ready prey to those temptations which so plentifully surround the principal families of these seas. Indulgence in these rapidly broke up a naturally weak constitution. Every thing that medical skill could devise was resorted to, if possible to save his life, but without success. When the Queen saw the little success which accompanied these efforts, she called together those members of her family and dependents in whose piety she had confidence and made arrangements to hold two special prayer meetings daily on his behalf, to seek from Heaven those blessings which would best fit him for either life or death. During this period, altheugh no improvement took place in his state of health, he was mercifully preserved from much pain, and that which he had was borne with exemplary patience. His attention to these meetings was unbroken, and his interest in them from the commencement was such as to lead to the hope that his mind was gradually opening to receive the truth as it is in Jesus—that hope was not disappointed. About a fortnight before his death, he spoke freely and strongly on his abhorrence of the practices in which he had indulged, and of the course he intended to pursue were his life spared. His confidence in the Savior appeared simple and childlike; it was truly gratifying to see the pleasure which beamed in his countenance while he Spoke of Him. I attended the meeting on saturday evening and found him as usual except that he complained of cold hands and feet. On Sunday morning the 13th of May, I was sent for about 3 o'clock, he had asked for me, on my arrival I found him perfectly sensible but near his end. I had just time to call his attention once more to the fullness and freeness of salvation by Jesus Christ, when he opened his eyes, gave a sign of recognition, and immediately expired. Thus terminated his brief career in earth, he was within 3 months of his 17th year.

In a notice given in the native journal of the following Thursday, signed by the Queen's husband, and Ariifaaite, Maheanu, one of the Native Ministers, are the following words in reference to the meetings held in behalf of the young King.

"A work of superior excellence was performed, namely, in the prayer meetings. At 12 noon two persons engaged in prayer, and 7 in the evening three. The Protestant Minister was called to attend those meetings by the Queen. Life for our young King was asked from God, and that the hearts of his parents and family might be comforted. The request was granted, the life of the young King was lengthened out a little and his mind was enlightened, so that the evil customs of youth were strongly condemned by him with repentance, and Jesus was received by him as the foundation of the salvation of his soul."

The following description of the funeral is extracted from the Native Journal.

The 22nd of May was appointed by Queen Pomare and the Commandant, the Representative of the Imperial Commissioner, to convey the remains of Ariiane Pomare to their last resting place, the burial place of his Royal ancestors at Papeoa. The procession was led by some *Gens d'Arms*, under the command of their officer. Then followed the Ministers, Messrs. Orsmond and Darling, and Mr. Howe the Protestant Minister, followed by the Native Protestant Ministers, after them the pupils of the Sisters of Charity. Then the boys of the Catholic School of which the diseased was a pupil.

After them the corpse, enclosed in 3 coffins, carried by the Native Governors and members of their families, a canopy was carried over the corpse covered with black and ornamented with fringe and feathers, the pall was borne by M. de Cools, the chief of the Commisariat Department, M. Perraud Captain of the Artillery, Ariipaea, Native Governor of the district, and Ariipeu, the Queen's brother-in-law. The Governor and their families followed. Next followed the Qneen Pomare and her nearest relations, after her the Governor Particular, followed by the Catholic Bishop, and the British and American Consuls. Then a considerable number of Government officers, followed by the merchants and residents of Tahiti.

Then followed the Queen's domestics, and after them in order the people of all the districts of Tahiti and Moorea, and the people of the Poumutu islands residing at Tahiti.

French soldiers, sailors, and Native soldiers, under their respective commanders, lined the procession on each side all the way along.

The place of interment is on a considerably high point of land at Papaoa, formerly sacred to the God of Tahiti, and where funeral rites of a very different character to those performed on the present occasion have been celebrated.

The paper then states, that a pulpit had been placed near the sepulcre, which is near a small house belonging to the Queen and her family. When the corpse had arrived and the Queen had entered the little house near, her voice was heard for sometime weeping and lamenting her great loss. When the vast multitude about the tomb had been arranged, Maahanuu a Native Minister ascended the pulpit and gave out a prayer. Mr. Orsmond read the scriptures and prayed. A salute was then fired. Mr. Darling preached from REV. XIV. 13., and Mr. Howe offered up the prayer of the interment, and made a few remarks on the latter part of the XV. chapter of the 15th COR. After the corpse had been placed in tne sepulcre, the soldiers fired another volley near the door.

Thus closed one of the most solemn and imposing services that had ever occured in Tahiti.

On the following Lord's day Mr. Darling preached a funeral sermon at Papaoa, and permission was granted to the Rev. Mr. Howe to preach one in the Native Chapel at Papeete, which was crowded to excess.

FATUHIVA, Marquesas, July 14th, 1855.

Mr. Damon:

DEAR BROTHER:—Your letter by Captain Tabor, together with the package of books, has come to hand. Quite a change has taken place in the state of affairs here since I wrote to you last. From dancing and feasting, the natives have turned to war and murder.

I send a few short notices of events in the order in which they happened, you will perhaps be better informed by them, than by a long epistle.

March 13. Shortly after daylight a cry was raised that a party of fishermen were cut off by the people of Hanavave. After considerable inquiry, I ascertained that the fishing party consisted of five persons; two were killed, the rest escaped.

March 15. I have been told the bodies of the two men who were cut off the other day, have been eaten by the people of Hanavave. The people here are greatly enraged, they started off this morning to challenge the Hanavaeans. War is again declared, and there is no knowing when it will cease, but it is pleasant to know that God sits upon the Throne and directs all things for His glory.

June 28. This morning the Natives had an engagement with the people of Hanavave, and killed two men. The bodies of the slain were cut up on the battle-field, and portioned out among the victors. I was told that some were so eager to glut their vengeance, that they cut their slices from the bodies and ate them raw. As soon as the report of the victory was brought to the valley, the women dressed themselves in their best attire, and ran about the village crying out with savage exultation—a human victim—a human victim.

June 29. The Natives feasted upon the bodies of the two men that were killed yesterday. The relatives of the fishermen who were cut off in March last, devoured their portions raw, the rest of the people preferred having their's roasted.

This is the prospect with us at present, it is truly a dark one, but there is nothing discouraging in it to those who walk by faith. It has strengthened me somewhat by leaving the impression upon my mind, that Satan is in his "flurry." He sees that his kingdom is about to fall, and he is making a last grand struggle to keep it up. I should like very much to see the end of these things should it be agreeable to the will of God. But I dare not form any plans for the future, as my duty is to live for to-day, and let the morrow take thought for itself. Your brother in Christ,

S. BICKNELL.

P. S. Last February a Marquesan professed to have met with a change of heart. He has maintained a consistent profession ever since, being attentive to all the means of Grace. I believe this to be a thorough conversion. This conclusion is based upon the consistency of his walk, and also upon the rapidity with which he has acquired the language of prayer. In this heavenly exercise, it has seemed to me that the Holy Spirit has taken him under His immediate guidance. No human instrument could have taught him so rapidly, and so well. This man can read a little, and is just able to write single words, but not advanced enough to write a continuous discourse from memory.

S. BICKNELL.

☞ The following letter has been placed in our hands for publication. There is only one portion of it to which we deem it of importance to call the reader's attention. We refer to those paragraphs describing the Maine-Law policy of the French at Marquesas. If there be a curious chapter in the history of French policy in the Pacific, it is that relating to brandy:

HARBOR OF TOANOA, TAHITI,
September 4, 1855.

MY DEAR FRIENDS—I am flattered by the thought that you are expecting a letter from me dated at this place. Of course, I intend my letter for "all hands;" and many parts of it may be given to the public according to your judgment.

You remember that we left Honolulu July 30th. In the course of the following 10 days we had reached enough easting to make the Marquesas, and on the morning of August 22nd we entered the harbor of Taiohoe, Island of Nukuheva. We had a warm reception from Lt. Jonan, the French Commandant, who proved to be one of my Honolulu acquaintances. He was attached to L'Artemise, when she was in your port last winter. We left the Marquesas Aug. 25th.

Although our stay at Taiohoe was short, yet I gained much valuable information. I visited the famous valley of the Typees, where the natives are in the same primitive state as when the French took possession in 1842. This visit afforded me a fine opportunity to to make observations, and I assure you the opportunity was not neglected. You know enough, however, of native life and customs, and for this reason, I shall be pardoned for not making elaborate pen and ink sketches of all I saw. I am sure, however, that the following items will prove interesting to you.

I saw at Taiohoe, the little schooner Kamehameha—I gazed full an hour upon her, while my memory overran with the stirring events that are connected with her history. She is used as a government tender, and Lt. Jonan calls her his "flag-ship." He makes frequent visits in her to all portions of the group; and must be a great pet of his, judging from the good order in which he keeps her.

There is more verdure upon Nukuheva than upon Oahu. But the foliage upon the hill-sides is composed of a species of arenaceous grass, which grows on almost no soil at all, like the Peruvian cactus. But the effect produced, at a distance especially, is that of prolific vegetation.

I will sum up the impressions produced upon my mind by the appearance of the natives by saying, that so far as my short observation extended, I prefer the natives of Nukuheva to those of Oahu. They are a better formed people, and the expression of the countenance is one of a higher order of intellect. I know that the evidence of their resistance to christianity may be brought as proof against tnis opinion; but a high order of intellectuality has not been found essential to missionary success. The only remnant of the Protestant mission now exists upon the island of Fatuheva, and we were assured that the desponding members were anxious to leave. Some credit is due to the Catholic mission for having protected them during some recent danger. I am sorry that the St. Marys did not visit Fatuhiva. It is surprising that the only good we could possibly have done at the Marquesas has not been thought of, much less attempted! Mr. Armstrong will be sadly disappointed, when he learns that we did not take the latest Honolulu news to his friends of Fatuhiva!

Connected with the political position of this group is the occupancy of the French, and you will easily comprehend that position by following a short sketch of history as I shall now give it.

The history of the French acquisition is involved in some obscurity, but you may rely upon my facts and speculations. It was hoped to establish a sort of Sandwich Island depot, and to add to the list of those few earth-spots that are illuminated by civilization and christianity. In 1842 Admiral Dupetet Thouars, having plenary powers and a large squadron, touched at Taioboa, and obtained the informal cession of the property belonging to the principal chief under the following conditions:—

Each Chief professing fealty was to receive an annuity in value according to his importance. Thus the principal chief of Nukuheva receives 2000 francs a-year, and an army ration a day. This is the largest amount paid to any one chief.

In return for this the chiefs were to remain at peace with each other, cultivate the arts and agriculture, embrace the religion and customs of the French. They were permitted the petty government of their individual tribes but were to acknowledge the sovereignty, and conform to the religious and military jurisdiction of France. They were to come and report the monthly events of their districts, and to receive their stipends, payable monthly.

This was a constructive purchase of the soil. In the mean time the French took possession of the heights, fortified the harbor of Nukuheva, and commenced the founding of a colony. From 600 to 800 soldiers were garrisoned on the islands, and a governor appointed having civil and military authority. Agriculture was commenced, and the natives put to work. Roads and bridges were constructed. Priests were introduced, and begun their labors. A code of civil laws, with the priestly code of morals, were rigidly enforced. As I said before, it was expected to regenerate the nation, and to add the Marquesas to the list of wonders where belong the Hawaiian Islands. It is a singular fact that temperance was enforced, and though contrary to what we know of French character, sincerely so. You will marvel perhaps, when I tell you that the same nation, almost the same men, who enforced upon the Hawaiian nation the exceptionable inundation of its brandies, still mercifully spared the Marquesas from that evil. Temperance, to this day, is strictly enforced at Nukuheva. There are no taverns or grog-shops—I doubt if an ounce of brandy or other liquor exists, except what may be found in the private closets of the officers. I write thus with some boldness, from the fact that I have a high estimate of the official and private character of Lt. Jonan the present Governor. He is rigid, though merciful in administering law, mild and amiable in his private relations, and I have reason to believe that he is a conscientious christian.

There is the *appearance*, at last of some change for the better among the inhabitants around the French fortifications. They (the natives) have no written language, and many of them speak "tolerable French." Among the benefits conferred by the French is the military restraint imposed upon the old practise of intestine warfare: and consequently, upon cannibalism. The chief of the Typees Orekiae, (the most brutish and ferocious savage formerly) has proved himself a brave supporter of the French policy. He loves his annuity better than fighting, especially since he comprehends that if he break his promises and engage in war, the French will turn against him. He has recently been refusing to wage war upon his enemies, though strongly urged to do so by the united wishes of his oldest and best warriors. But I am inclined to regard these evidences of improvement deceptions. Lift these military restrictions, and the natives would become as savage as they were originally found. Indeed, I am assured by the French themselves that when the time comes for them to abandon the group, the natives will return to their pristine customs; and that at the first signal of war, will make public demonstration of their savage and latent traits.

This abandonment by the French is actually in contemplation. The Marquesas has disappointed them, and the elements contributing to it are easily appreciated. For instance, the whole policy of an armed occupation is a faulty one: and the system of carrying barbarism by storm is worse than faulty. So far, also, as Nukuheva was a military post, containing once a large garrison, it has been abandoned already; so far as its beautiful valley has failed to return the rewards for all the labor and money expended upon it, so far has agriculture been abandoned. It is a singular fact that a large class of esculents though yielding profitably for one season, yet fail for ever after. The seed blights. This is the case with the onion, a no small favorite with the French. The culture of the melon has signally failed. And I may add, that so far as the sowing of that other seed, whose fruit is the repayment of other culture and other tears; so far as the missionary labor, in short, Protestant as well as Catholic, has proved to be a failure—we may say that the Marquesas have been abandoned virtually already.

The French garrison, her civilization, (such as it is) her religious, and her island glory, have immigrated to Tahiti. The latter was a more genial soil. The island was more productive. There had been more rapid advancements in the arts through the labors of the Protestant mission. And better than all, the opportune pretext was ready to be seized, to impose themselves upon the fertile island and to launch, pell-mell, into a novel and attractive bloodshed I need not tell you that the pretext was the internal feud against Pomare, and the open blow was given in the cause of two Catholic priests who had formerly been expelled from the island. (You are acquainted with such a French pretext in the history of your own islands.)

The French colonial system is, at best, a farce. We have but to read Bancroft, and

we are led into the mysteries of the French failures in Madagascar, and Canada, the mouth of the Mississippi, and the Lakes of North America.

In looking around upon the present condition of the French in the Pacific, one would imagine that they would eventually abandon Tahiti for New Caledonia. There already exists there a sort of armed Algerine occupation.

I have written enough about the condition and the prospects of the Marquesas. The right elements have not been at work to make them useful to the world. And it is doubtful if they ever take rank with the Hawaiian Islands, to which, beautiful as they are, they are far inferior in resources, geographical position and native characteristics.

A good national lesson is taught by contemplating the policy of the French, during their Polynesian migrations. The American, resolute in his conduct, sincere in his religion, foresighted in his experience, and stable in his purposes, fastens upon the choice spots of earth, and wheresoever he erects a temple of worship or builds a storehouse, there he is sure to remain! Had the Marquesas islands been worth a dime to him, or to the human race, they would not have remained thus long untenanted by Massachusetts' pioneers—they would not have been left for abortive experiments of France!

(*To be concluded in our next.*)

BARK GRATITUDE AT SEA.

Mr. Damon:

DEAR SIR:—If you still publish the Friend, I hope you will give these lines a place. On the 1st of April 1855, I took my ship into the South Harbor on Strong's Island, and anchored her, where the Pilot considered the best anchorage, with my best anchor, but at 8 o'clock that evening there was a heavy squall from the seaboard. The ship commenced to drag. We immediately let go the other anchor, but before she had fairly brought up, and swung her head to the wind she struck her rudder against the reef, and broke off all the pintles, and continued to strike quite heavy occasionally under the larboard counter, but the anchors held her from going any farther on. We carried out a small anchor, and at 10 o'clock it moderated, we hove her off clear from the reef. The ship did not leak but very little. We repaired our rudder through the assistance of Mr. Covert and his partner the blacksmith, and then left for the Japan Sea. The second day out found the ship leaked badly, and not knowing how bad the bottom was damaged we thought best to put back, we then went into the weather Harbor and discharged the ship—hove her down—we found the plank broke in two different places. We repaired it and got into the Japan Sea in time to save most of the season. The European residents were very kind in rendering their assistance, and helped in every way they could. Mr. Covert is a likely man and I consider him every way competent as a Pilot. The King was very kind, and with his chiefs and natives rendered us a great deal of assistance. I found him strictly honest and the natives generally so. Mr. Snow the Missionary, I think highly of, for he was always ready to advise and assist me. He and his family did all in their power to make our stay as agreeable and comfortable as possible. The weather Harbor on Strong's Island is a very fine harbor, and a very good place to heave down, for the bank is about perpendicular and three and a half fathoms of water alongside of it. The King has two large cookhouses about one hundred yards from where we hove the ship down.

Yours with respect,
J B. CORNELL.

New Eruption!—Hilo threatened—Imminent danger—Pele huhu loa!

The following extract from a letter from Rev. Mr. Coan, which we are permitted to use, will be read with interest. It is dated Oct. 14th, 1855.

"I have just returned from Mauna Loa. Visited the great summit crater, which is in full blast—absent ten days. The fusion is immense. It flows in a covered duct; stream some 60 miles in all its windings. It is now eating through the woods, and is near the old saw mill place, (about 10 miles from Hilo.) All Hilo is anxious—preparations are making for leaving, should the flowing appear on this side of the woods, which must be in a few days, and should the fountain continue to play as at present.

"The course is now down Piihonua and near the banks of the Wailuku. Progress slow but sure. We think this end of the stream is one or two miles broad.

"15th. A native visited the lava stream yesterday. It is cutting through the forest and making resistless progress towards us. All Hilo is solemn. Many are planning—some are packing. There is little hope for our beauteous Hilo. Probably you will see our houses and emerald bower no more. Parties will go up to watch the stream daily. We now think it may sweep from the Wailuku to the Waiakea streams."

Reciprocity Treaty.

The intelligence recently received from the Hon. Judge Lee, H. H. M.'s Minister Plenipotentiary at Washington, respecting a new Treaty with the United States, affords the greatest satisfaction. If we have been correctly informed, this treaty only remained to be approved of by the Senate of the United States, and it is confidently hoped that it will secure the approval of that body at an early part of its forthcoming Session.

The principal feature of the new treaty is as follows:—On condition that the United States will allow certain Hawaiian products to be admitted free of duty, the Hawaiian Government will do the same.

The treaty admits the following articles, from this Kingdom into the United States:—

Sugar, brown and all others not refined, syrups of sugar, molasses, coffee, arrowroot, cotton, unmanufactured, live stock of all kinds, seeds and vegetables not preserved, fruits undried and not preserved, poultry, eggs, plants, shrubs and trees, peltries, wool unmanufactured, rugs, hides, furs and skins undressed, butter and tallow.

In return, the Hawaiian Government agrees to allow the following articles, duty free, from the United States:—

Flour of wheat, fish of all kinds, coal, timber and lumber of all kinds, round hewed, and sawed, whole or in part, staves and heading, cotton unmanufactured, seeds and vegetables not preserved, fruits undried not preserved, poultry, (remainder same as above).

We rejoice in the prospect of securing to the islands the advantage of this treaty. The special benefit will be derived by the sugar-planters, when it goes into operation, the 30 per cent will be saved. Others will be also benefitted

We would remark that such Treaty stipulations, have long been desired by both natives and foreigners, but it has been supposed that the United States could not enter into such a treaty in consequence of its treaties with Spain and Brazil. The King's Foreign Minister, Mr. Wyllie, has not ceased to press the subject upon the American Commissioners, having commenced correspondence upon the subject with Mr Ten Eyck, and carried it forward with Mr. Servance, and Mr. Gregg. All honor to those who have successfully prosecuted the scheme.

It is highly gratifying that the proposition of Young Hawaii, should have been so favorably received by Brother Jonathan at Washington. It might have been supposed that his mind would have been a little irritated just now, consequent upon certain "coquetting" movements touching the annexation question. Miss Hawaii had shown herself rather that way inclined, and Brother Jonathan had felt his pockets and coyishly made proposals of marriage. He had offered to settle a generous amount upon his future bride! Some thought it was a sure match! While Brother Jonathan was musing over the matter, "he gets the mitten." It was to be supposed that he would have felt rather *somehow*, as would be natural under such circumstances. If so, he does not show it, but when Young Hawaii proposed to barter a little, about fish, sugar, lumber etc., Brother Jonathan in a prompt and business-like manner says, "I'm ready for a bargain, what do you wish for?" "Well, Brother, will you allow my sugar to enter your ports free of duty," "yes, if you will allow my lumber to enjoy the same privilege." "Maikai," (good) says Young Hawaii, and so the bargain is made and the business settled.

Persons having books or papers for gratuitous distribution among seamen, will please forward the same to the Chaplain's study.

Look and Live.

By Rev. Richard Knill.

"When God's own Son is lifted up,
A dying world revives;
The Jew beholds the glorious hope,
Th' expiring Gentile lives."

Moses lifted up the brazen serpent *to meet a desperate case.* The serpents had stung great numbers, and some of the people had died. Lamentation and mourning and woe were running through the camp. No one could say who would be the next victim. Every remedy of man failed to stop the progress of death. The poison was fatal. Destruction was going on. O, what could they do? Alas, now they saw their sin in their punishment. But God had mercy. The people cried to Moses. Moses cried to God, and God sent a *cure.* Make a serpent of brass, said the Father of mercies, and set it up, and command the people to look on it, and the work of death shall cease. Moses did so. The people believed the promise, they obeyed the command, and they obtained a cure. O wondrous power of faith; though only as a grain of mustard-seed, it removed the mountain far away. Numbers 21: 6–9.

This was a wonderful proof of divine power and goodness, but it was only the shadow of good things to come. "As Moses lifted up the serpent in the wilderness, even so must the Son of man be lifted up, that whosoever believeth in him should not perish, but have eternal life." John 3: 14, 15.

"Look upward, in the dying hour,
And live, the prophet cries;
But Christ performs a nobler cure,
When faith lifts up her eyes."

The Lord Jesus Christ was lifted up on the cross *to meet a desperate case.* Here was a sin-smitten world. Every one was stung. Sin had poisoned all. It was a rebel race. No mortal could cure it. No angel could save it. But God had mercy; for God so loved the world, that he gave his only begotten Son to be lifted up on the cross, to make an atonement for sin, that whosoever believeth in him might not perish, but have eternal life. This remedy has *four* remarkable properties.

1. *It is offered to all.* If you feel your wound, here is the Physician. If you wish to be saved, here is the Savior. The Lamb of God taketh away the sin of world. It furnishes a message of mercy to the ends of the earth.

2. *The cure is without charge.* It will cost you just as much to be saved as it cost the bitten Israelite to be cured. Neither less nor more. He could not cure himself of the serpent's bite, neither could any creature cure him. You cannot save yourself, neither can any creature save you. He looked to the srpent, and was healed. You must believe on the Lord Jesus Christ, and you shall be saved. This is God's plan. Sin is sometimes compared to a heavy burden, and Christ says, "Come unto me, all ye that labor and are heavy laden, and I will give you rest" Sometimes a desire to be saved is compared to thirst, and Christ says, "Ho, every one that thirsteth, come ye to the waters, without money and without price." Will not this do? Sometimes salvation is represented as a great boon to be given away, and Christ says, "Ask, and ye shall receive." Is not this compassion like a God? Sometimes the poor sinner is supposed to be unable to walk, or to drink or to speak; but he can just lift up his dying eye, and then Christ says, "*Look unto me and be saved.*" O sinner, is not this a free salvation? Will not this encourage you to seek the Lord while he may be found?

3. *The benefit is limited.* Do not imagine that every Pharisee or every publican will go to heaven; that every prodigal and every harlot will go to heaven; that every poor man or rich man will go to heaven; that every Sabbath-breaker or every church-going man will go to heaven; that every beggar in rags or every prince clothed in purple will go to heaven. O no. The remedy is free; the cure is without charge, but the benfit is limited. It was only the Israelite who *looked,* that was healed. It is only the sinner who believes, that is saved. This is a solemn view of the subject. This is the turning-point of every man's history. He will be saved or lost. He that believeth on the Son of God hath everlasting life, and he that believeth not on the Son of God shall not see life, but the wrath of God abideth on him. This is the doctrine of the Bible. Do you then believe on the Son of God? Are you trusting for salvation on the merits of Him who hung on the cross? Remember, there is but one Savior; only one is needed. He is able to save the greatest sinners. He is able to save *thee.*

4. *The blessings which Christ confers on the saved are eternal.* Here is the superiority of the gospel over the law. The brazen serpent referred but to the body, the blessings of the gospel refer especially to the soul. The healing power of the serpent referred only to a few days, for men soon die; but Jesus gives eternal life to all that trust in him. The efficacy of a look at the brazen serpent was confined to one people, but Jesus giveth life to the world.

When any desperate bite of a serpent had been cured, think what an encouragement this would be to others whose case was very bad. It happened once in the course of my ministry, that a stranger arose and left the congregation, exclaiming, "There is no hope for me, my sins are too great to be pardoned." Another woman, who knew her, arose and followed her, and said, "What, no mercy for you? But I tell you there is. Your sins are not too great to be pardoned. I hope God has forgiven me, and you know I was as bad as yourself. God delighteth in mercy. Jesus is mighty to save." The case was remarkable. The change was very striking. The woman became a penitent, and, I believe, enjoyed great peace. Years after this, I saw her on her dying bed, and heard her whisper with her dying breath. "*Jesus cast me not away.*" They were her last words. O Sinner, bad as thy case may be, Jesus has saved other quite as bad as thyself O look to Jesus, now for ever. He will not cast thee away.

Again, we may suppose that some zealous and compassionate people were very busy among their relatives and friends who had been stung, to bring them within sight of the serpent. No time was to be lost. They could not make the sick man look, but they could bring him near the remedy. This was precisely the case with the sick man mentioned in the gospel. His friends believed that Christ could cure him, and their love to the poor creature made them use every effort to bring him to Jesus; and they actually let him down through the roof o the house, bed and all, because they could not come in by the door. This was a mighty act of faith, and Christ honored it by curing the man. O, were Christians in general equally anxious about their sinful relatives, we should soon have all our churches full, and the gospel preached to every creature.

Permit me to ask you, Have you been cured? I do not ask, Have you been bitten by sin? Alas, all have. I ask, Have you looked to Jesus and obtained a cure? If not, do it. Do it now. And then, having been saved yourself, try to bring every sinner to the Savior, that they may be saved. You cannot make them believe; that is their own act and deed; but you can tell them of their danger, and say, "Behold the Lamb of God."

Lastly, if any bitten Israelite put off looking to the brazen serpent till to-morrow, he perished through *neglect.* And how will you escape, if you *neglect* the Savior? To-day; the Holy Ghost saith, to-day if ye will hear his voice, harden not your heart. It is on your peril that you neglect the present moment. O slight not the present offer of a precious Savior —*American Tract Society.*

☞ Seven hundred and forty-six Russians are prisoners in the hands of the English, while the Russians have but 108 private men and 10 officers belonging to the British.

The Trial of A. G. Francis.

This important trial commenced Monday morning the 8th inst., and was continued for three days, the Court sitting eight hours each day. The Hon. G. M Robertson presided. Mr. A. B. Bates the district Attorney conducted the prosecution, and Messrs. Griswold and Harris were upon the defence. Monday and Tuesday were fully occupied in listening to the testimony furnished by a large number of witnesses. The career of Francis was clearly traced from his shipping on board the "Shooting Star," on the last of July down to the present time. Such was the minuteness and distinctness of the testimony, that not a shadow of doubt remained in regard to certain facts, viz., that the murder was committed by Francis—that he obtained the arms about six hours before the murder —that he fled hoping to conceal the deed—that he was fully identified by Mr. Winters before dying—that he was not intoxicated—but that he did deliberately and premeditately take the life of Winters. And on the other hand it appeared that he could not have had any particular malice towards said Winters, any more than any other individual whom he supposed would frustrate some unknown design, which he had in visiting the window of Mad. Rouquet's room at the dead hour of midnight. It did not appear for what purpose Francis was there under the tree, or

how long he had been there. It did however appear that the said Francis was laboring under a certain species of mental derangement, but whether the aberration was sufficient to destroy responsibility and take away guilt, was the point at which Judge, Jury and Lawyers labored. The prosecuting Attorney took the ground that admitting Francis was a monomaniac, still he was guilty. Mr. Bates argued this and other points for more than two hours, commanding the fixed attention of the Court, Jury and a large audience. On the part of the defence, Messrs. Harris and Griswold took the ground that Francis was an insane man, and of course ought not to be held responsible. The prisoner could not have asked for abler or more disinterested advocates. They cited English and American precedents, contending most conscientiously for the accused.

His Hon. Judge Robertson charged the Jury at great length, rehearsing the chief points of the evidence, pro and con, and citing numerous authorities.

After having heard witnesses, lawyers and Judge, the Jury retired. The Jury I would remark was composed of twelve of the most respectable persons in Honolulu. No accused person could ask for a Jury of better men, and every one who knows their character might safely entrust his life and character in their hands. After retiring and discussing the matter for six hours, they were discharged at midnight, not being able to agree upon a verdict. Seven being for condemnation, and five for acquittal, on the ground of insanity. Here the matter must rest for the present, the prisoner the mean while being detained in close confinement.

In conclusion, we would remark that no trial at the Islands has ever excited more interest, or called forth more talent. It is the first instance wherein a white man or foreigner has ever been arraigned for the crime of murder in the first degree. Neither murderer or his victim had any family friends at the Islands, from this and other circumstances which might be mentioned, it was a case to be decided strictly according to its merits. The advocates on both sides were unpaid, but none the less anxious that Justice should be done. Before the trial shall be resumed, or the case finally disposed of, it is to be hoped that evidence may be procured which will throw more light upon the subject.

Since the foregoing was written, the following accurately prepared summary of the proceedings of the Court has appeared in the Polynesian:—

The King vs. *Andrew G. Francis.*

The prisoner was charged with the murder of Charles E. Winters, committed on the night of the 18th September. It appeared in evidence that the prisoner had been discharged from the clipper ship "Shooting Star," at this port, in the latter part of August last, after which he worked for a few days as a gardener in the employment of Mr. Fairbanks. After leaving the service of Mr. Fairbanks he called frequently at the study of the Rev. S. C. Damon, Seamen's Chaplain, who kindly allowed him the privilege of going to his study whenever he felt inclined, for the purpose of reading such books as he wished. The prisoner continued to avail himself of this privilege during the absence of the Chaplain on an excursion to the Island of Hawaii. It was during the time that he happened to see Madame Rouquette in Mrs. Damon's company, and from that moment he appears to have been under the impression, true or false, that Madame R. was a lady whom he had known in Sonora, California, and to whom he said on one occasion that he felt under deep obligation for the kindness she had extended to his blind sister at Sonora. He wrote several letters addressed to the "ladies of Honolulu," one addressed to "the Mission," and another addressed to the "lady from California," all betraying a mind deranged in some degree. On Mr. Damon's return from Hawaii, on the morning of the 15th Sept,. the accused called and requested to be allowed a private interview with Madame Rouquette. This was refused him on the ground of the lady's illness, and on account of her mental derangement, which was at times excessive, and rendered it altogether imprudent in Mr. Damon's opinion to permit the interview. From this time up to the time of the homicide the prisoner continued to obstinately press his request upon the Chaplain, but without success. Early on the afternoon of the 18th he returned to the charge, having induced Mr. Andrew Johnstone to accompany him to Mr. Damon's house, but Madame Rouquette being at that time much more indisposed than usual and being in bed, the interview so pertinaciously sought by the accused was again denied him, upon which he turned away very quickly, and apparently much excited. About half past five o'clock the same afternoon he was discovered conversing with Madame Rouquette through a door opening out of the room occupied by her into the adjoining premises, belonging to Mr. Whitney, through which Francis had entered. On this occasion Mr. Damon ordered Francis to leave the premises, giving him to understand that if he did not keep away he would be taken care of. At this Francis appeared quite angry, saying that "he was a gentleman," and would not allow any one to lay hands on him. He then went off apparently under strong excitement. Immediately afterwards he went on board the schooner "S. S." lying at the wharf, and borrowed a single barrelled pistol from Capt. Lucas, to whom he was previously known, and who loaded the pistol for him and gave it to him without asking for what purpose he wanted it, observing no appearance of anger or unusual excitement in his manner or conversation. At about 8 o'clock in the evening he was again met by Capt. Lucas near the water-house, having as appeared by the testimony of a seaman belonging to the "Shooting Star," just come on shore from that vessel, where he had borrowed a revolver. He asked Capt. Lucas if he could supply him with buck shot to load the revolver, and on being answered in the negative, he handed the revolver to Lucas saying that if he should not return the single barrelled pistol he (Lucas) might keep the revolver. At about a quarter past nine o'clock, Francis suddenly entered the house of Capt. Holdsworth (near Mr. Damon's residence) apparently quite excited, saying he wished to speak with Mrs. H. Having seated himself he asked her how many ladies they were next door. Mrs. H. replied that there was but one. Francis said there ought to be two,—that one was a companion or servant to the other. Said he would like to know what Mr. Damon had done with her, adding "there is a screw loose somewhere, and I can't understand it." He said he had known the lady in question in Sonora. He was in a state of great excitement and was dressed in dark clothes with a monkey jacket wrapped round his body. At about half past 11 o'clock Winters, who occupied a small house on Mr. Damon's premises, went out to reconnoitre, and while approaching the fence which separates Mr. Damon's premises from those of Mr. Whitney, he was shot by a man who came from behind a tree growing near the window of Madame Rouquette's room. The report of the pistol and the cry of poor Winters were heard by several persons living in the vicinity, and at the Police Station. The prisoner was seen by Messrs. Williams and Robins coming down the lane towards Hotel Street, from the direction of Mr. Damon's premises at a half trot. As he passed Mr. Williams, supposing him to be a native, he called to him in Hawaiian *owai kela?* (who's that?) He made a short pause and said "what is it?" He was asked if he had heard the shot, and replied "yes, it was down there," pointing towards the sea, passing on at the same time towards Hotel Street, on entering which he was stopped by Mr. Bartlett of the Canton Hotel, who placed his hand on Francis' shoulder saying to him, "who are you?" Francis replied, "I don't know who I am." Policeman Jordan coming up put his hand on the accused, who trembled and appeared agitated. Jordan asked him what he was running for, he answered "nothing." On being asked if he had heard the pistol report, he said he had and that he left his house to see where it was, and seeing every body running he thought he would run too. He was arrested and just at that moment he dropped something on the ground, which on a search being made on the spot turned out to be the pistol he borrowed from Capt. Lucas and a dirk also belonging to Lucas of which he had probably possessed himself while on board the "S. S." in the afternoon, Shortly after this Francis was taken to Winters' presence, who at once said Francis was the man who had shot him. Next morning the District Attorney, A. B. Bates Esqr., had Francis again taken to the presence of the dying man who again said he identified Francis as the person who had shot him. Francis replied, "before God, I did not shoot you."

The counsel for the prisoner made no effort to controvert the evidence introduced on the part of the prosecution, but relied entirely upon the plea of insanity.

It appeared, by the testimony of the witnesses for the defense, that Francis shipped on board the "Shooting Star," at San Francisco, on the 31st of July last. On that night he was discovered on his knees in the forecastle, and on being asked what he was about, he replied that he was praying that Atherton (one of his shipmates then lying asleep) might not be allowed to kill him, saying he had seen Atherton before, and that he wanted to kill him (Francis). During the time he was on board of the "Shooting star" he wrote several singular letters to Capt. Kingman, and his conduct was remarked by those on board as being strange. He talked at times of a large property having been left to him and his brothers and sisters, saying they had been unjustly done out of it. He said he was going to Philadelphia to get a lawyer to reclaim the property. During the few days preceding the homicide, Francis called on Mr. Everett, the Chilean Consul, saying there was a lady from Valparaiso residing at Mr. Damon's in whom he felt a great interest and whom he wished to see, but that he was prevented from this by Mr. and Mrs. Damon. Said the Americans were all against him, mentioning in particular the Consul, Mr. Ogden. Said this affair was "tearing his heart strings out &c." On Sunday the 16th Sept., he called on Mr. Aldrich and told him there was a lady confined at Mr. Damon's in whom he felt a great interest. Said she was rich and had been kind to his blind sister, at Sonora, and that he felt himself under a deep debt of gratitude to her, and felt determined to release her. He had been in the habit of calling frequently at the store of Mr. Cohn, to whom he remarked on one occasion that there was a lady at Mr. Damon's kept a close prisoner, that she was worth $50,000, and that Mr. Damon pretended she was crazy, while in fact she was no more crazy than he (Francis). On the 18th, the day of the homicide, Mr. Cohn remarked that Francis was greatly excited, and towards evening he passed very frequently by the store of Mr. Michel, saying each time, "good night" "good night."

The evidence on the part of the accused closed on Tuesday evening. Drs. Judd, Ford, Hillebrand and Lathrop, who had listened to the testimony throughout, were severally asked to give their opinions as to the prisoner's insanity. Dr. Judd believed him to be partially insane; Drs. Lathrop and Ford thought him slightly deranged, and Dr. Hillebrand considered him to have been a *monomaniac* since the time he joined the "Shooting Star" at San Francisco. On Wednesday morning Messrs. Harris and Griswold, counsel for the prisoner, made an able argument, the first at great length, upon the facts in the case and upon the amelioration of the law as applied to the plea of insanity in modern times. Mr. Bates summed up on the part of the prosecution in an eloquent speech of about three hours in length, but, we regret to say, it is impossible for us to afford space for even an abridgement of his arguments.

After the charge of the court the jury retired at about half past 5 o'clock. In a few hours they returned into court to be re-advised and again withdrew to the jury room where they remained till nearly 12 o'clock, when, as there appeared no probability of their being able to agree upon a verdict, they returned into court and were discharged.

This interesting trial created a deep and universal excitement throughout the community, and a large number of ladies were present during the greater part of the proceedings.

New Book.

The Old Brewery, and the New Mission House at the Five Points. By ladies of the Mission.

"All speech and rumor is short lived, foolish, untrue. Genuine work alone, what thou workest faithfully is eternal. Stand thou by that, and let Fame and the rest of it go prating." CARLYLE.

New York: Stringer & Townsend, 222 Broadway (under the Museum. 1854.

The above title is prefixed to a volume which was recently handed us for perusal. It is well worthy of being read. It is a simple record of the achievment of christian activity and benevolence, showing what right-minded and noble hearted ladies can accomplish, when urged forward by a desire to do good. After this let no one despair of elevating the most degraded, reforming the most abandoned, and purifying the most polluted. The pages of this book exhibit the happy results of the efforts to improve and bless the dwellers in a portion of New York City, known as "The Five Points." When Dickens the English Novelist visited America, it appears from his "American Notes" that he did not fail to visit or explore "The Five Points" of New York. In describing this locality, he remarks,

"From every corner, as you glance about you in these dark streets, some figure crawls half-awakened, as if the judgment hour were near at hand, and every obscure grave were giving up its dead. Where dogs would howl to lie, women, men and boys slink off to sleep, forcing the dislodged rats to move away in quest of better lodgings.

Here too are lanes and alleys paved with mud knee-deep; under-ground chambers where they dance and game; the walls bedecked with rough designs, of ships, and forts, and flags, and American Eagles out of number; ruined houses, open to the street, whence through wide gaps in the walls, other ruins loom upon the eye, as though the world of vice and misery had nothing else to show; hideous tenements which take their name from robbery and murder: all that is loathsome, drooping and decayed is here!"

The situation of affairs and the immoral aspect of the place remained unaltered, until about the year 1850, the "New York Ladies Home Missionary Society of the Methodist Episcopal Church," sent a Missionary to labor there. Schools were opened on the Sabbath, and during the week, he gospel was faithfully preached, the hungry fed, the naked clothed, the intemperate persuaded to sign the Pledge, and in fine all the usual appliances of christian benevolence were brought to bear upon this spot, resembling pandemonium. Perhaps some of our readers may ask, in what part of the enlightened city of New York was such a locality to be found? The answer is, within "one minute's walk," of the most crowded, elegant, and sumptuous portions of Broadway. Only "one minute's walk" would have brought the visitor into a spot, where "miserable looking individuals, liquor stores innumerable, neglected scores playing in rags and dirt, squalid-looking women, brutal men with black eyes and disfigured faces, proclaiming drunken brawls and fearful violence complete the general picture."

All is now changed, so this book informs us. The church, the school house, and other visible indications of prosperity greet the eye. Honor to the noble-hearted ladies and gentlemen, who have brought about this change, laboring under the blessing of God. May their success encourage others to go and do likewise. Such triumphs will find a record in the annals of eternity.

If any of our readers desire more ample details upon this subject, we would refer them to the volume, which may be purchased at the Newspaper Depot, in Hotel street.

The Grumbler.—How much this specimen of humanity is to be pitied. Nothing goes right with him. The weather is either too hot or too cold. He is neither pleased with his neighbor's conduct or dress. No matter what subject is under discussion, he is sure to view it from that point of observation which will call forth a scowl or a growl, a grunt or a grumble. This unhappy specimen of humanity, we meet in almost every grade of society. It is said to be Jack's privilege to grumble. It may be so, but Jack is not the only member of "this privileged order." To be sure sailors grumble, and some of them have occasion for it, but then it is rather *pardonable* in them. We do not really think that they intend thereby any harm. We have got so much accustomed to a little grumbling on their part, that it neither surprises us or puts us out of temper. We could get along much better with a sailor's grumbling, if he would not swear. It is the horrid oath that grates upon our feelings. Come Jack, knock that off altogether. If you must growl and grumble, don't swear, don't break God's command. Sailors are not all grumblers. We meet with scores of good natured and honest hearted seamen, that it is a pleasure to welcome year after year. Look out for a landsman, who growls and grumbles. We always intend to give him a wide berth. If the street is wide enough, he may be sure that we shall walk on the side opposite to him. Jack never shows much anger when he growls, but not so with the land's man, who snarls and growls. His temper is easily excited, and woe betide the unlucky biped or quadruped that crosses his path. Reader, don't suspect or reproach your neighbors, but ask yourself if you are not somewhat guilty.

Profane Swearing.—If there be a vice, sin, misdemeanor, offence, or a crime, that is deserving of severe and rigid punishment, it is that of taking God's name in vain. All other kinds of offenders may plead more excuse, or palliation, but the profane swearer can offer no excuse. His oaths are the spontaneous outpouring of a wicked heart. They are as Robert Hall remarks, the "superfluity of naughtiness." When we hear a sailor, a captain, a mechanic, a merchant, or any one else swear, we are reminded of the old Quaker's remark, when he heard a profane swearer vomiting forth his terrible oaths, "*spew it up, spew it up*, you can never go to heaven with all that vileness." We think if the profane swearer would stop and reflect a single moment, he would not thus pollute the pure air of Heaven with his *sulphurous* breath.

"It chills my blood to hear the blest Supreme
Rudely appealed to on each trifling theme!
Maintain your rank, vulgarity despise;
To SWEAR is neither brave, polite nor wise,
You would not swear upon a BED OF DEATH!
Reflect, your Maker now may stop your breath."

BOOKS,

WHICH EVERY SAILOR ought to own.
Webster's small Dictionary. Price 75 cents and $1,00.
Morse's Geography and Atlas, Price $1,25,
Brown's and Well's English Grammar. Price 75 cts.

Physician and Surgeon,
Office in the New Drug Store, corner of Kaahumanu and Queen sts., Makee & Anthon's Block. Open day and night

A Step Backward!—We regret to observe a notice in the last "Polynesian," that the new mail arrangements are to be suspended. We are confident this is a short-sighted measure, which will prove a just and fruitful source of irritation and complaint. If we have been correctly informed, the total expense would not have exceeded $1,000. We hope soon to learn that the Postmaster General is authorised to resume his arrangements.

Improved Bomb Lance and Whaling Gun.—Capt. Babcock, of ship Dover, of New London, attributes the success of his recent whaling voyage in a considerable measure to the use of Messrs. Tracy and Brand's Improved Bomb Lance and Whaling Gun, which has recently been so extensively adopted in the whaling fleet. We also hear our own whaling captains and officers speak of this apparatus in the highest terms of commendation. They say it is invaluable in the Northern Seas. C. B. Merchant is the agent for Dukes County,—*Vineyard Gazette.*

The Sailor's Home.

A Card.

The Trustees of the H. S. H. S; would respectfully acknowledge for the use of the New Reading Room in the Sailor's Home, 1 dozen of settees from Mr. C. Brewer 2nd. A most timely and acceptable donation, valued at $75,00.

GILMAN & CO.,

Ship Chandlers and General Agents,

Lahaina, Maui, S. I.

Ships supplied with Recruits, Storage and Money.

Honolulu Marine Hospital.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz.: a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this what a Hospital should be.

Patients will also be received by Drs. Hoffman, Ford, Hillebrand, Bullions, Hardy and Guillou.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

GEO. A. LATHROP, M. D.

A CARD.

DR. M'KIBBEN, SURGEON, &C.,

INFORMS the inhabitants and visitors of Honolulu and neighborhood, that he intends practicing in the different branches of his profession, and hopes he may rest his claims to their confidence on an experience of nearly forty years as a practitioner in a large seaport and manufacturing town, to the principal hospital of which he was for many years attached as operating Surgeon.

In private practice, the diseases of women and children have received much of his study and attention.

Residence,—the house lately occupied by J. C Spalding, Esq., Union street.

Memoranda.

Ship Magnolia reports, Sept 17, off St. Paul's Island, ship Majestic, Percival, of New Bedford, 700 wh the season, Charles Carroll, Tuttle, 1000 wh season, Saratoga, Harding, 2 whales season, heard of Montauk, French, Sag Harbor, 2 whales season, General Williams, Miller, New London, 2 whales season, barque George Washington, La Blache, nothing. Sept 7, H. C. Nye, Soule, 450 brls whale, heard from same date, Albion, Hinds, Fair Haven, 900 wh season. Sept 26, South of Amelia Passage, Fox Islands, sh Tamerlane, Winslow, New Bedford, for Hilo, 1200 brls wh season.

The Danish barque Emma, Capt. Lund, consigned to Krull & Moll, after having tried to come round Cape Horn on her passage from Hamburg, experienced very heavy and contrary winds in 28° South Lat. and 43° West Long., which induced Capt Lund, on the 11th of July, to take the eastern passage. He passed round Cape of Good Hope the 1st of August, south of Van Dieman's Land the 1st of Sept., New Zealand the 6th of Sept. Tahiti 24th Sept., crossed the Line 1st of October, and arrived here the 13th day of this month in the short passage of 138 days from Hamburg.

Capt. Tabor, of sch. Keoni Ana, reports the loss of ship St. Lawrence, Capt. Rand, 523 tons, of San Francisco. She sailed from New Castle, N. S. Wales, on the 17th May, bound for San Francisco, with a cargo of 600 tons coal, and in three days sprung a leak. Put in to Auckland, N. Z. Sold 270 tons coal, but made no repairs. Sailed again 9th July, but in a few days leak increased. Run her on shore on Roratonga, July 30, saving only the three boats, ship floated off same day and sunk in deep water.

At Nukahiva, Aug. 24, ship Isaac Howland, Hobbs, New Bedford, with 80 bbls. oil, was to cruise to the Westward, and then to New Zealand, Capt. Hobbs reports that he was obliged to put three men and the third officer on shore on Roa Poa, one of the Marquesas Is., for mutinous conduct and intent to destroy the ship by setting fire to a barrel of camphene, or any other way, when they made some of the leeward Islands. The affair came prematurely to light, before they had time to execute it, and by his prompt action, with the assistance of his officers, the intention was frustrated and every thing has gone on quietly since.

PORT OF LAHAINA.

Arrived.

Oct. 5.—ship Albion, Hincks, Fair Haven, 326 tons; 300 sperm 900 wh, 8000 lbs bone.

Rambler, Nantucket, Winchell, 318 tons: 1,400 sperm, (Had lost Captain.)

11.—ship Marcia, Wing, 314 tons; 250 sp, 1,500 wh, 13,000 bone.

12.—barque Canton Packet, 274 tons; 870 wh, 11,000 lbs bone

ship Oregon, E. Elldridge, 331 tons, Fair Haven, 7 whales.

13.—Joseph Meigs, Coffin, New Bedford, 12 months, 600 wh, 6000 bone, season, 600 wh, 6000 bone, voyage, from Ochotsk Sea.

REMARKABLE EVENTS FOR NOVEMBER 1855.

1. Stamp Act in America, 1765.
4. Erie canal celebration, 1825.
5. Gunpowder plot, 1652.
7. Christianity suppressed in France 1794.
8. Milton died, 1674.
9. Cape Cod discovered, 1620.
10. Luther born, 1483, Mahomet born, 570.
12. Baxtar born, 1612.
13. Curran died, 1817.
14. Charles Carrol died, 1832.
15. First English Parliament, 1213; Cowper born, 1731.
16. Tea destroyed in Boston, 1773.
17. Queen Mary died, 1558.
19. Jay's treaty, 1794.
20. Cape of Good Hope doubled, 1497.
24. Peace with Great Britain, 1814; John Knox, died, 1572.
25. New York evacuated, 1783.
26. Dr. Watts died, 1748.
28. Washington crossed the Delaware, 1776.
29. Revolution in Poland, 1831; First steam-press, 1814.

The Friend.

HONOLULU, OCTOBER 25, 1855.

DEDICATION.—The first Methodist Episcopal Church of Honolulu was dedicated last Sabbath afternoon, the services commencing at 3 o'clock. The exercises were opened by singing and prayer by the Rev. J. D. Strong. An excellent sermon was preached by the Rev. W. S. Turner, Pastor of the Church, who selected as the foundation of his discourse, Ps. 48: 12, 13 verses—"Walk about Zion, &c." A collection was taken up amounting to $187. The exercises were concluded with prayer by the Rev. S. C. Damon, and singing. In the evening, as we have been informed, a still larger collection was taken up, leaving a debt of only about $600 upon the church-building. The land upon which the edifice stands was donated by Mr. J. T. Waterhouse, who has also contributed largely towards the building. We do most sincerely congratulate our Methodist friends upon having so speedily erected a neat and commodious edifice, and also upon having it so nearly paid for. We trust that the usefulness which has characterised the Methodist denomination in other parts of the world, may crown their labors at the Sandwich Islands.

MELANCHOLY DISASTER.—We regret to chronicle the sad intelligence lately received of the death of Capt. Lamphier and a boat's crew, with a single exception. Capt. Gibbs of the "Speedwell," reports to us as follows: That on the 7th of Oct., while the "Lagoda" was lying in Shanta Bay, Capt. Lamphier went on board the "Phœnix" of Nantucket; while there it commenced blowing, and being anxious to return, he obtained a boat's crew of the "Phœnix," as his own crew had gone ashore. On returning, and when near his own vessel, the boat swamped and all were drowned save one man. Capt. Lamphier left his own son on board the "Phœnix." In making this announcement we would tender the expression of our kindest sympathies to Mrs. Lamphier, who has spent the summer in Honolulu, and who left for Lahaina that she might there join her husband. The sad intelligence will fall with crushing weight upon her anxious and troubled spirit. The mate of the "Ontario" is expected to navigate the "Lagoda" into port.

HOME GATHERING.—On Tuesday evening of last week the Hon. D. L. Gregg, U. S. Commissioner, and D. A. Ogden, U. S. Consul, addressed a meeting of seamen and residents, at the Bethel, upon the subject of the Sailors' Home. They spoke eloquently and appropriately, setting forth advantages to be derived from the establishment of a "Home" in Honolulu, and asserting the claims which such an institution had upon the sailor, the shipmaster, the shipowner, and the foreign resident. We could wish a much larger number might have been present. A Similar meeting will be held *This Evening*. We would call the attention of seamen and residents to the notice in another column.

☞ The Chaplain would call the attention of seamen to the notice respecting the "*Bible, Book, and Tract Depository.*" The Chaplain will be found at the Depository from 12 to 3 o'clock during the shipping season.

The Ladies' Fair,

For the benefit of the Sailors' Home, will take place on Friday evening next. Rooms opened at 6, and sales commence at 7 o'clock. For additional information respecting the Fair we refer our readers to some remarks in another column.

Table of exports from Ascension Islands.

Dr. Gulick has forwarded a table of exports, but we take the liberty of publishing the summary, instead of writing the exports from each tribe.

Yams, 726 barrels; Wood, 410 cords; Pigs, 83; Tortoise Shell, quantity unknown; Fowls, 2,000; Pigeons, 4,500; Bananas, 1,740 bunches; Pumpkins, 390; Pawpaws, 30 barrels; Cocoanuts, 4,500; Bread Fruit, 1,860; Citron, quantity unknown; Melons, Sasafras, quantity unknown; Mats, quantity unknown

☞ It is gratifying to hear sailors enquiring if the "Home" is open for boarders, but we regret that the only reply which can be given is that "it cannot be opened until next year." The Trustees have done all that they felt authorized to do, with the funds in hand. It is hoped that "The Fair," will place funds in their hands to finish off the building, and pay the debt incurred.

☞ The unknown correspondent, who forwarded $2,50, from Maui, will have the paper sent as directed, from Oct. '55, to end of year '56.

☞ Vessels bound to Strong's Island, Ascension, or Marquesas, will confer a favor by notifying the chaplain.

☞ Contributors to "The Fair," are respectfully requested to forward all articles. immediately, either to the Chaplain's house, or the Sailor's Home, except contributions intended for the refreshment table, those are desired early Friday morning at the, Home.'

☞ Mr. Antrim, has our thanks for a beautiful daguerreotype view of the Sailor's Home. It gives a fine representation of the building, and of the mountains in the rear. The plate will be preserved at the Reading Room of the Home. Mr. Antrim's office is opposite the Bethel.

☞ Now is the time for our foreign subscribers among whalemen, to renew their subscriptions. The Friend, sent to the U. S. $2,00 per annum.

☞ 5,00 will purchase a bound volume of the Friend for 1854 and 5, and forward the paper for one year to the United States.

Correspondence.

Harbor of Toanoa, Tahiti, Sept. 4th, 1855.

(Concluded from page 74, Oct.

And now having accompanied the warlike immigrants to Tahiti, let us stop a while and review them as "protectors." I have a singular sensation in writing that word "protectorate." It is a sad contemplation, that at the moment when the Island of Tahiti might have ranked with the Island of Hawaii; that when she *least needed* "*protectors*," the generous French should have come to cast over her the cloud of a "protectorate!" And such a cloud! from which no fertalizing rain has ever descended, and through which no sun-ray seems to brighten the future!

I will first glance at the state of the English Protestant mission. The missionaries are permitted to preach and exercise their professional functions, but under very extraordinary restrictions. For instance, those protestants who still preach, and perform duties, do so as the *employees* of the French Government. The appointment ranks as any other civil or military appointment, and while the signature of Pomare is necessary to the force of the commission, yet the officials are paid by the island agent, out of the French treasury. The appointment of a minister of the gospel, and that of a common police constable, are tantamount, so far as *the form* goes. Fair as this may seem to be, so far as it may be considered an impartial scheme of policy, still a small reflection will develope the evils that grow out of it. Consider for one moment, that the *real authority* under such a compact, *is that which pays!* How dead must be the Sovereignty of Pomare, if indeed she can be regarded as having any Sovereignty at all! And how humiliating must be the position of the Protestant clergymen, earning Catholic stipends, under Catholic whims; compelled either to abandon their holy work, or to perform it under the same municipal guarantees of being paid, that are given to a common policeman. It amounts to this: Keep your watches faithfully and you shall be paid—preach as I would have you preach or you shall not be paid at all. Many of the Christians rather than struggle on through the dark prospects before them have abandoned the field of labor and gone to the more savage but more hospitable leeward Islands. Some have thought it better to *work on*, even thus restricted, and we cannot but admire their perseverance.

Another restriction of major importance is that no pastor can preach in any other district than his own, without the special invitation or permission of the highest chief of that district. It is unnecessary for me to comment upon the effects of such a regulation But it has proved to be a death-blow to the *circuit system* of labor, which, if I understand it correctly, is one that is attended with the most profitable rewards. It is an attack upon the habits of the Protestants; it appears as if an attempt were made to *imprison* the spread of the gospel. It is an ambitious restriction upon the rights of Christianity. I mean, the free interchange of pulpit courtesies, and the liberal influences of social religion.

Still another restriction may be mentioned. Two or more members of the Protestant mission are not permitted to reside, nor exercise their duties, in *one district*. The cause of this regulation is a curious one, and may be given as a specimen of French Catholic logic It is to prevent the Protestant clergymen from quareling! Imagine such a regulation as applied to-day to Honolulu (which I think you regard as *one* mission or district.) Mr. Lowell Smith, Mr. Strong and a host of other good ones, shall not live as neighbors, for fear they may get at loggerheads with each other, and engage in a battle of ministerial fisticuff! Yet such would be the practical operation of the system of logic which prevails to-day at Tahiti.

In one of my visits to Mrs. Howe (one of the 14 years old missionaries, who with her husband, were forced to abandon a flourishing infant school.) I described *a Sunday in Honolulu*. Bad as it may be made to appear, still she contrasted it with *a Sunday in Papeete*, when the clink of the billiard ball, and the fuming odors of the grogshops, greet her hasty passage from her quiet home to the church door!

This illiberality extends to all the departments of life, its business as well as its religion. The Society is a martial force, and the government a military tyranny. Every obstacle is thrown in the way of improvement. An English merchant not long since, applied for permission to build a ware-house upon the brink of the coral reef that faces the town: The permission was granted but with a reservation on the part of the Governor, that should the spot be required at any future time for public purposes, no security could be given that the property would be protected. Of course the ware-house was not built! Even a puddle of water standing before your door, cannot be filled up, without the Governor's permission. The natives have abandoned agriculture. The few arts that commenced to thrive in 1840 are now neglected. The *guavo* has completely supplanted *grass*. Cattle therefore cannot thrive, and have become almost extinct.

In return for all these glorious benefits that are conferred by the merciful hand of the "Protectorate," the natives get nothing. The French garrison (300 in number) are clothed and stationed by stores sent from France. These soldiers therefore have no necessity to spend money, and a Frenchman is scarcely ever pocket-generous. So that the French are a burden, without being a benefit, they are *an incubus* upon the natives; they receive no benefit in return, for thus occupying the island, and why France should continue to waste her treasury in paying the expenses of a large and profitless garrison, is the greatest mystery that I can offer to a political economist for solution!

To show you the high figures that are taken by the United States whalers, before all others, in the list of those which came here in the season of 1854, I have collected the following summary:—

English Whalers,	1;	Tunnage 408.
French,	" 4;	" 1,596.
American,	" 25:	" 8,728.

In looking over these figures, we could suppose that an American interest might be cultivated equal to that of Honolulu.

New Church on Hawaii.

Kohala, Oct. 17th, 1855.

Brother Damon:

On the 11th inst., our new house of worship was dedicated to the service of the triune God. The sermon was preached by Brother Lyons of Waimea from Haggai, II, 9:—

The occasion was one of much interest to our people. The gathering was large and we were favored with delightful weather.

Our new house is of stone 85×48 feet, well roofed and surmounted with a neat turret. It is also floored and filled with 111 comfortable slips. The doors and windows are finished with pointed arches, which latter are properly glassed and furnished with fan blinds. The aisles are covered with chinese matting. The pulpit is of handsome koa, varnished. The *tout ensemble* of the house, somewhat tasteful and becoming a house for the worship of God.

This structure has cost us a vast amount of care and toil. Five years have elapsed since we began to gather materials for its erection, and three years since the first stone was laid.

Our receipts and disbursements have been as follows:

Collected among our own people,	$3,911,78.
Collected and sent by churches or individuals on other parts of the Islands.	901,87.
Sent by friends in United States,	1,460,75
Making a total of cash -	$6,274,40.

All the work not strictly mechanical has been performed by members of our Society. They have done all the mason-tending, collected and brought on their shoulders the sand, lime stone (coral,) wood for burning it, stones for walls, etc. etc., whilst the painting—outside and inside—glazing and a large amount of miscellaneous labor has fallen to my lot.

Sand and lime from Pololu and Kwaihae the two extremes of this district are held in the walls of the house—though the most of the lime stone has been procured nearer at hand by diving—from a depth of 3 or 4 fathoms, piece by piece. The sand has been scraped up by pints and quarts from beneath the rocks on the shore.

In regard to the generous aid which we have received from "Zion friends and ours" in other parts of the Islands and from the United States, I ought in justice to say that in making these most timely and most gratefully accepted offerings the donors self-moved thereto—since nothing of the kind was ever suggested by us neither could any thing of the kind have been more unexpected.

The Lord reward them according to their works. We can never forget this large-hearted kindness, and with help from above, I hope we shall be able to signify as much in our future deeds. Yours truly,

E. BOND.

Marine Disaster.

Mr. Damon, Sir:—Please (if you think best) insert in your journal the following:—

Ship "Metacom," April 19, 1855, lat. 53° 00' N. long. 150° 00' E., Ochotsk Sea, saw the wreck of a whale-ship, apparently quite recent, painted ports, composition bottom—about 400 tons—bottom up. It being very rough, could ascertain nothing more about her. Your's respectfully,

E. H. WOODBRIDGE.

"I have hope for the World."

Thus exclaimed the President of our Honolulu Sailor's Home Society, when we informed him that one hundred dollars in money, and valuable contributions for the Fair had been received from the natives of "Aitutake;" one of the South Sea Islands. We would add that, "the President and others may have hope too for the Sailor's Home when 'Isles of the South' awake." Aid from that quarter could not have been more opportune. Such contributions are calculated to scatter groundless fears respecting the ultimate success of the enterprise. Who would have imagined that the appeal of the Trustees would have been responded to so promptly and generously by the English Missionaries and the natives of Aitutake? We would assure those people that their donations are appreciated, and we sincerely hope that others far more able will be thereby provoked to do as much. The boxes and bales were accompanied by the following modest, but touching epistle from the Rev. Mr. Royle. It has never been our privilege to become personally acquainted with this missionary, but of his worth and usefulness as a laborer among the natives of Aitutake, and of his kindness to the mariner, we have heard frequent and honoroble mention. May both Missionary and people experience the full meaning of that saying of our Lord, "It is more blessed to give than to receive."

AITUTAKE, March 10, 1855.

REV. AND DEAR SIR:—On looking over your December number of the *Friend* I met with the announcement of your projected Bazaar for November next, the proceeds to be devoted to aid erection of a Sailors' Home on the Sandwich Islands.

You also invited co-operation from the groups in the South Pacific of contributions of native productions for the Bazaar. Having always felt a deep interest in the temporal and spiritual welfare of that class for whom the "home" is intended, and feeling anxious to give expression to any sympathy in the objects that has stimulated yours into activity, I brought the matter at once under the notice of our dear people at Aitutake. They promptly responded to the call made upon them in the following manner:

The young men having associated in christian fellowship proposed to the elders to devote whatever might be realized from the sale of firewood and the hires of their boats from the first two ships that should touch here, as a money contribution to the "home" be it more or be it less. While the maternal association at the suggestion of Mrs. Royle, made native cloth and bonnet plait for the Bazaar.

The following we now forward:—240 fathoms of light native cloth made from the paper mulberry, Chinese. We should have sent more, but its preparation requires sunny days, and at this season of year we have few of them. 57 fathoms of stained cloth from the same as above. 21 gentlemen's hats made from the leaves of the banana. Also, plait sufficient for 19 bonnets, made from the leaf of sugar-cane.

In conclusion, we would most greatfully acknowledge the kindness of Capt. Brown of the "Electra," who took the articles from Aitutake, and when he found that he was not coming to Honolulu transferred them to the "Eliza Adams," Cap.. Hawes. By the latter they were safely delivered. May both these captains always find good men at the Honolulu Sailors' Home if they should ever be called to ship seamen at this port.

Guam.

Historical sketch—Government—Stipulation—Products—Resources — Foreigners — Religion—&c., &c.

The Ladrone or Marian Islands are twelve in number, situated between 13° and 19° North Latitude and 145° and 146° East Longitute. They were discovered by Magellan in the year 1520, and were named by him Ladrone (the Spanish word for thief) Islands, from the circumstance of the natives having stolen the rudder of one of his boats.

In 1640 or thereabouts, the group was taken possession of by Spain, whence Catholic Priests were sent out as Missionaries, accompanied by other individuals empowered to establish a local government.

About the year 1672, the Spanish Ministry decided that the sum appropriated for the support of the Government and Mission at those Islands was a useless expenditure and withe'd it accordingly, resolving to recall the officials and priests and suffer the natives to relapse into their former condition of heathenism.

Their resolution would have been carried into effect but for the magnanimous interposition of Mariana of Austria, then Queen of Spain, who offered to bequeath the whole of her jewels to create a fund for the further maintenance of the Government and Mission.

Her offer was accepted, the fund created, and out of it a sufficient sum yearly appropriated to the object for which it was designed, for upwards of one hundred and fifty years, when the Spanish Government resumed the expenditure.

Since the performance of this generous act by the Spanish Queen the group has been known throughout Spain's dominions by no other name than the Marianas.

The only Islands in the group, inhabited permanently are Guam and Rota. The other ten are visited periodically by residents of Guam who procure from them cocoanut oil, beef, pork, arrow-root, yams &c., in abundance.

Saypan is temporarily settled by about 300 natives of the Caroline Islands, who, by permission of the Governor of the Marianas, were allowed to locate there eight or ten years since, under the jurisdiction of an Alcade sent from Guam. This Island is beautifully fertile.

Rota is a small but very productive Island and contains about 400 inhabitants.

Nearly all the Islands in the group are noted for their exceeding fertility; but Guam, or Guahan (as the inhabitants call it) having the advantages of position, harbor, population &c., is most frequented

It is the southermost of the group, being in Lat. 13° North—contains 8,500 inhabitants; is in length from N. E. to S. W. about 35 miles; and has a circumferance of about eighty.

It is richly fertile and presents a most attractive appearance on being approached, on account of the luxuriant foliage which clothes it to the water's edge. Back from the seashore the land rises gradually to the height of some two or three thousand feet, and is beautifully diversified throughout with hills and valleys. It has forests dense enough to afford such protection to the numberless herds of deer which frequent them, that though for several years there have been no restrictions upon the free pursuit of them as game, their number seems to remain undiminished, notwithstanding that many a table is weekly, and perhaps oftner, graced with a haunch of delicious venison. For sixty years after they were first introduced from China upon the Islands, they were protected from molestation by law, during which time they increased to such an extent that the prohibition was considered no longer necessary.

Other game, as snipe, wild pigeons &c., is abundant. There are a few horses and mules upon the Islands, but of too inferior a description to be of much service. Cattle of which there are plenty of a good quality, are used as beasts of burden and as riding animals.

The Agricultural products are various. Indian corn, which is the staple article of food, is raised in abundance. Rice also, is raised to a considerable extent. Sugar-cane thrives well. Yams and sweet potatoes, famous for their superior quality, are abundant.

No pains have been taken to introduce any great variety of fruits, but such as there are—oranges, chirmoyas, mangoes, limes, guavas &c., are in their respective seasons very fine. Of the first named there are two crops a year.

The native inhabitants are peaceful, frugal, and hospitable, but rather prone to indolence, Good land is so abundant and free that each man is allowed to possess as much as he chooses to cultivate, and their habits being simple and their wants few, a very little labor produces enough for their necessities and beyond that they have no anxiety. They are a trifle lighter in color than the Hawaiians, and but for the traces of their Malay origin which their countenances still more or less retain, would be considered much better looking. Their dwellings are of wood with thached roofs and are elevated on posts to the heighth of three or four feet from the ground, and being of uniform size and built in regular rows and all thoroughly whitewashed give the towns and villages a very neat appearance.

The Government officials and priests, who are all from Spain, and the better classes of residents generally live in houses of coral with tile roofs. These dwellings are remarkably well constructed, spacious, comfortable and adapted to the climate, which is very similar to that of the Hawaiian group the Trades being as constant there as here.

The religion is Roman Catholic exclusively, established and supported by Government

and all its requirements, rites, and ceremonies are strictly observed. Its catechism is the principal lesson taught in the schools, and images of the Virgin are daily knelt to in every dwelling. An air of morality, order and peace that is truly commendable pervades the Islands. The principal town on Guam is called Agana. It contains 5,000 inhabitants, is well laid out and pleasantly located, and is the place of residence of the Government officials and of the American Consul. The latter has been residing there about a year. He and his Secretary, and the hospital physician are the only Americans who ever located there; besides whom there are four other foreigners, Englishmen.

No foreigner is allowed to reside at Guam without having personally obtained permismission from the Governor General of the Phillipine Islands at Manilla, under whose direct jurisdiction the Marianas are placed. The delay and trouble attending the procuring of such permission at Manilla, and then the difficulty of getting from there to Guam, an opportunity scarcely occurring once a year, will account for the fact that, notwithstanding its attractiveness; so few foreigners reside at the latter Island.

A vessel with money and household supplies for the officials and Priests is yearly expected at Guam from Manilla, delays in sailing, and head winds often cause intervals of eighteen months to elapse between two arrivals.

As will be seen in the advertising columns of this paper, Messrs. Thomas Spencer & Co. have established a Ship Chandlery at Guam. This will undoubtedly be an important addition to the many attractions which have so long rendered Guam a favorite place of resort for the whaling fleet.

We are pleased to learn that the United States Consul located at Guam, Capt. Samuel J. Masters, formerly Police Magistrate of Lahaina, is as well appreciated in his official and social capacity, as the following Card, which we copy from a number of the New Bedford Mercury lately received, intimates.

AGANA, GUAM, LADRONE ISLANDS, March 1855.

A CARD.—We the undersigned, Masters of American Whaleships anchored in the adjacent commodious harbor of Apra, desire to make a public expression of the gratification we have derived from our present visit here and to recommend this port to other Masters, as affording as many advantages in point of economy, convenience, and facilities for obtaining recruits, as any other in the Pacific.

We are especially pleased with the municipal regulations of the Islands, so surpassingly efficient with regard to seamen, that escape on shore by those disposed to desert is imposible.

We would also remark that we consider the attractiveness of the place not a little enhanced by the residence here of Captain S. J. Masters of New York, United States Consul for this group of Islands; who, by his urbanity and uniform kindness secures the regard of all who have intercourse with him, and whose prompt, efficient and judicious discharge of the duties of his office renders him valuable to the interests of Masters.

We are gratified to learn that, under his auspices, a Ship Chandlery is about to be established here, which, with other improvements now in progress under his supervision, will render this port a still more popular resort for both Whalers and Merchantmen.

Ascension.

Small pox—Shipping—Products—Seeds wanted—Missionary work—Murder of a sailor &c., &c.

ASCENSION ISLAND, }
Matalenim Tribe, May 11th, 1855. }

Rev. S. C. Damon.

DEAR SIR:—Our shipping season must be nearly closed. The first whaler in was the Miantonomi, Capt Clement, in the last part of September. The small pox, which had been raging here and taken off about half the natives, broke out among her crew after she sailed. She in consequence returned, and on the 20th of November was wrecked on the outer reef, between the Bonatik and Paniau harbors; but of this you must have long since heard. The last vessel in was the Sea Shell, Warren, Capt. Martin; who entered Rono Kiti harbor May 5th.

On the 30th of December the steamship Unicorn, Capt. Gooch, arrived from Sidney via Strongs Island, bound to Shanghae. She is the first steamer that ever visited this island. Capt. Clement shipped in her the most he had saved from the Miantonomi, and himself and officers with many of his crew took passage in her.

We have up to this date this shipping season been visited by forty two vessels. Forty were whalers, one a merchantman bound to Hong Kong, and one the steamer Unicorn; which is a greater number than ever before touched here in one season. In 1852-3, twenty nine vessels touched here; twenty five whalers, three traders, one missionary vessel; in 1853-4, thirty four vessels touched; thirty two whalers, one trader, one merchantman.

Twenty of these vessels this season entered the Rono Kiti or Lee harbor; in 1853-4, seventeen vessels entered the same harbor, and eighteen vessels in 1852-3. One this season entered the *Paniau* harbor of the Lee or Kiti tribe: where two entered the last season, and one the season before. Twenty this season entered the *Bonatik* or middle harbor, of the Matalanim tribe; where thirteen entered the last season, six the season before. One has entered the *Matalanim* or weather harbor, where one entered last year, and two the year before.

Our island furnishes *wood* and *water* in great abundance of the best qualities. *Yams* are taken away in considerable numbers, tho' not of the finest kinds. *Bananas*, when in the season, are offered in abundance. An indifferent variety of *fowls* are also to be had in limited numbers. *Hogs* are scarce, and must not be depended on by ships. Those wishing them should touch at Pleasant or Wellington Islands. *Mamee apples* or *Pawpaws*, may be had in any desired quantities. *Pumpkins, Melons, Citron, Lemons, and Pine Apples*, are beginning to be offerred in very small numbers, we may hope these will hereafter be more raised.

Allow me to make a remark which will I trust meet the eye of public-minded captains bound to Ascension Island. This island will be found very productive of almost every tropic fruit, but it is difficult to import them. We, as missionaries, have been doing our best, and only this spring succeeded in procuring from Honolulu any quantity of reliable seeds, of these we cannot yet speak for they have only recently been received. If every ship master would bring down one or more kinds of fruit, agriculture here would take a new start. And how easy for every one to do so, how much more easily and rapidly and effectually might introductions be so made than by leaving us to accomplish it alone. The missionaries here will be glad to take charge of, and to do what they can to propagate such importations, and other foreigners will no doubt be also interested. As missionaries we came to make religion and not agriculture or commerce our main business, but it is both our pleasure and duty to do all the incidental good we can without impeding our proper work of renovating man's moral nature. The rose, geranium, nutmeg, cinamon, allspice, coaco, fig, custard apple, orange, lime, and lemon, with many other such plants, will I think thrive here in perfection. The orange may now be said to be fairly introduced, yet we much desire them in larger quantities, that we may spread them rapidly among the people. Many kinds of plants may be brought us by the slip; and those in seed should be carefully dried and then soldered up air tight in tin, or sealed up in vials. Let no one fear of bringing what others may bring, for the more we have the more rapidly can we spread them.

Your readers will ask about our missionary work. I reply, that those who touch here think we may wait twenty thousand years before we shall accomplish any good. And we ourselves are of that opinion if the power of Him "who turns the hearts of men as the river of waters are turned" does not interpose, for we are conscious of being unable to make a sinful man holy. But with God "all things are possible" and therefore we have not the least tinge of despair or discouragement. We are willing to wait, and you must be so too. It grieves us to say that the moral influence of ships here is almost all on the wrong side. Those who would boil with indignation that their sisters should be debased, join even in debasing some even of our own pupils. I will not say more, I could not say less.

Few commend, but many blame and dislike us for what we are attempting. Some think we attend to much to the secular, while others say we do not enough. Some think we are too quiet, while others think we interfere too much in what does not belong to us. Some blame us for having failed in bringing vaccine matter with which to meet the small pox of last summer; some blame us for not inoculating earlier with the small pox matter; while others blame us for inoculating at all. "To our own master we stand or fall." ROM. XIV. 4.

Probably most who live here and visit here think we have accomplished, and are in the way of accomplishing but little. But it is as true with ours as with most missions, that our work is in considerable part a silent one, deep in men's hearts, and many do not take the feeling, or are morally unable to see the most important of our doings. It is true we have not yet accomplished much of this silent work, we are conscious of an increasing influence and power for good, which we trust, with God's blessing, will result in the saving of souls.

We met a great and depressing calamity in the burning of Mr. Sturges' house on the 9th of October, by which he lost nearly every

thing, and by which we were for several months very much straitened.

In February, just passed, the steward of the Miantonomi, who was left here after her being wrecked, was murdered at the Lee harbor, by the instigation of one of the foreign residents, as is generally reported and believed. There had been previous quarrelling, and threats of killing had been publicly made.

I send you the will of a sailor who was left here in most pitiable circumstances, which will I trust be found available and prove of value to The Sailor's Home.

I also send you a table of the exports from Bonabe for 1854. I will endeavor every year to send you such a table. Yours, in hopes of great and good things for Micronesia. L. H. GULICK.

Extract of a Letter from Mr. Coan to Mr. Clark.

HILO, Nov. 7th, 1855.

I have made a second trip to the eruption, the last to the terminus of the stream in the woods. This I accomplished in one day with all the windings, beating through dense jungle, wading one half of the way in a stream from one to three feet deep.

There is no abatement of the fire. The stream pushes slowly on through the woods, in a straight line. It is some 10 or 12 miles from us. On a good road with a good horse, it might be reached in 2 hours.

You will marvel then, why it was not long since upon us. We all thus marvelled, but my personal visit has explained it to my satisfaction. 1st the fusion goes winding 65 miles from its source. Immense quantities thus spent in deposits along the track. 2nd over the plains at the base of the mountain through the forest, the angle of decent is small, say 30' to 1°. Of course it moves slowly. 3rd its lateral expansion is great. It spreads 3, 4 and even 6 miles in some places, and there it leaves immense deposits. 4th the soil, mud, streams, ravines, ridges, hills, pits, basins, pools, with the dense jungle and mighty forest, interpose obstructions almost insurmountable, deadening the incandescent stream, checking its momentum and making its course tortuous. Its present progress, therefore, cannot exceed one mile a week.

I spent one stormy night within five feet of its glowing fusion, in a strait line betwixt burning and chilling with a cold soaking rain. The stream before us was some 3 miles wide, and far as the eye could see above and before us, 10,000 fires mineral and vegetable were glowing amidst the midnight gloom. The jungle was burning—the water was boiling and the trees were falling and consuming all around. We dipped up many specimens of the igneous fusion, cooled it and brought it home with us. We also boiled our teakettle and fried our ham over the fusion.

Mr. Ritson of Honolulu was my companion. Yours, &c., T. COAN.

Sailor'S Snug Harbor.

We are glad that private charity has furnished a home for some of the many disabled sailors, who have become incapacitated to follow the seas and earn a livelihood. The following letter was recently received from a sailor who, a few months since might have been seen hobbling upon crutches, along the streets of Honolulu. He was a worthy man, and we rejoice that he has been enabled to cast anchor in a "snug harbor." While writing upon business, he makes the following statements respecting the institution, where he is residing:

SAILOR'S SNUG HARBOR,
Staten Island N. Y., June 6th, 1855.

Rev. and Dear Sir:

I take the liberty of addressing a few lines to you from this institution, into which I have obtained an admission. It is sustained by an income derived from the rent of property once left by a seafaring man, for the benefit of aged—worn out and disabled sailors belonging to the United States. Every thing that is necessary is provided for our comfort—not only food and clothing, but also a minister and physician. My health is much improved since I have been here, my sight is better—and I am stronger than I was—can walk alone with a cane (with ease) to the chapel, where we have family worship twice a day, and preaching three times a week. Please to accept my sincere thanks for all your kindness to me when sick and a stranger, when poor and needed aid, and your congregation also who so kindly aided me in a pecuniary point of view. Do please to remember me to them, and assure them I can never think of either of them, without emotions of gratitude.

Abbott Lawrence a donor for the Sailor's Home.

From a recent communication received from Mr. Hunnewell, of Boston, we copy the following paragraph. After referring to various discouraging replies, which had been returned to certain appeals which he had made for the Honolulu Sailor's Home, he remarks as follows:—"Not so, the reply from our late and lamented Abbott Lawrence, which served to cheer and encourage me to persevere. He says, "I have had so many calls for money that I had almost made up my mind to decline your proposal, but the object is so good that I beg to bear testimony to it, and have therefore subscribed a small sum without giving my name." "You will find" continues Mr. Hunnewell, "on the paper, A Friend $20,00."

SUBSCRIPTION FOR THE SEAMEN'S CHAPEL (seats free) supported by gratuitous contributions; and THE FRIEND, one thousand copies of which are distributed among seamen in the Pacific Ocean.

WHICH EVERY SAILOR ought to own.
Webster's small Dictionary. Price 75 cents and $1,00.
Morse's Geography and Atlas, Price $1,25.
Brown's and Well's English Grammar. Price 75 cts.
The American Arithmetic. Price 75 cts.
The Lamplighter, a thrilling tale. Price $1,50.
Webster's Spelling Book. Price 25 cts.
Clarke's Lectures to young men. Price $1,50.
Beecher's do. do. do. Price $,125.
Chevoir's Travels in Sandwich Islands. Price $1,50.
Bates do. do. do. Price $1,75.
Pitcarn's Island and its inhabitants. Price $1,00
Hawaiian Phrase Books of questions and answers. Price 50 cts.

All the above, together with a large variety of Books (see Catelogue) can be had at the Post Office Bookstore. Also letter paper, Ink, Pens, Journals, Memorandum Books &c. &c.

Oct. 3-mos. H. M. WHITNEY.

SHIP CHANDLERY
AT GUAM.

THE UNDERSIGNED, having entered into a Co-partnership for the purpose of carrying on the SHIP CHANDLERY BUSINESS, under the name and firm of

THOMAS SPENCER & CO,.

at the Island of Guam, Ladrone Islands, respectfully announce to masters of whaleships and others, that a full assortment of Naval Stores and recruits will be kept constantly on hand and furnished by them on the most reasonable terms, and money advanced on whaler's bills on the United States.

THOMAS SPENCER, Honolulu, S. I.
J. S. VAN INGEN, Guam, Ladrone Islands.
26-6m

B. PITMAN,
BYRON'S BAY, HILO, HAWAII.

DEALER in General Merchandise and Hawaiian Produce. All Stores required by Whale Ships and others, supplied on reasonable terms and at the shortest notice.

WANTED—Exchange on the U. States and Europe. Oct. 2, 1854.—3m

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for Cash, Goods or Bills on the United States.

GEO. A. LATHROP,
Physician and Surgeon,
HONOLULU, OAHU, S. I.

Office at the Honolulu Drug Store, Queen st., near the Market. Residence corner of Fort and Beretania sts., next above the Catholic Church.

G. P. JUDD, M. D.,
Physician and Surgeon,
HONOLULU, OAHU, S. I.

Office corner of Fort and Merchant sst. Office open from 9 A. M. to 4 P. M.

E. HOFFMANN,
Physician and Surgeon,

Office in the New Drug Store, corner of Kaahumanu and Queen sts., Makee & Anthon's Block. Open day and night

GILMAN & CO.,
Ship Chandlers and General Agents,
Lahaina, Maui, S. I.
Ships supplied with Recruits, Storage and Money.

☞ The following summary of ship news we copy rom the Shipping List just published by Mr. Whitney:

HONOLULU, H. I., Nov. 5, 1855.

In this our first issue of the Shipping List for the fall season of 1855, we are enabled to give full and correct returns from 127 whaleships, which have cruised in the Pacific during the past year. The arrivals in our ports this season have been much earlier than for three years past, as a portion of the fleet cruised in the Kodiac Sea and in the Gulf of California. We shall report full particulars of the remainder of the fleet as fast as they arrive.

In the List which we now give, 107 right whalers hail 86,907 bbls. polar oil, and 2,369 bbls. sperm oil; and allowing one barrel sperm equal to two and a half bbls. whale oil, in order to obtain a fair average, we find our report gives an average of 868 bbls., and 9,120 lbs. bone to each vessel. This average will be increased by th ereports of the vessels yet to arrive, as in every season past the later arrivals have improved the average. It is the opinion of the best informed of our ship-masters and merchants, that the average catch this season will be at least 1,000 bbls. to each vessel, showing the season to have been a good one.

The number of whaleships expected to visit the Islands this fall is about 275, though letters are remaining in the Post Office here for about 310 vessels, a portion of which vessels may not come in this fall. A smaller portion of the fleet than usual will return to the States,—perhaps 40 to 50 vessels may return this fall.

FREIGHTS.—The only merchant vessels which have loaded with oil and bone, are the clipper ship "Shooting Star," Kingman, and Bremen brig "Leander," both full, and will probably sail to-day for New Bedford. The clipper ship "B. F. Hoxie," recently arrived from San Francisco, has engaged a full cargo of about 7,000 barrels at 8 cents per gallon. One or two first class ships would find ready freight at fair rates.

VESSELS LOST.—In Jan. last, the ship "Logan," Capt. Wells, of N. B., was lost on a reef among the Feejee group, with 50 bbls. sperm. Four of the crew were also lost. Capt. Wells is now in this port.

May 13, on the Kurile Islands, in going into the Ochotsk Sea, the ship "Kingfisher," Palmer, of N. B., and ship "Enterprise," Russell, of N. B., were both lost.

June 4, on Jonas Island, ship "Edgar," Pierson, of Cold Spring. Crew and part of cargo saved.

June 7, on Saghalien Island, ship "Jefferson," Williams, of New London. Cargo saved by the "Reindeer," of N. B.

In July, ship "Washington," Halleck, was lost on the Shantar Islands.

☞ The ship seen bottom up by the Metacom and by one or two other vessels, is supposed to have been the ship "City" of New Bedford, lost in the season of 1854, and which had been preserved in the ice. This vessel was painted a light color.

DISASTERS.—Brq. "Belle," Bordon, of Warren, was dismasted in a severe gale off Cape St. Lucas, and her repairs in this port have required about $6000. She is ready for sea again and will return to Warren with a cargo of oil.

Ship "Gratitude," Cornell, N. B., while at anchor at Strong's Island, received severe damages in a squall, losing her keel, and otherwise injuring her bottom on the reef. Her repairs in this port have required some $3000. She is again ready for sea.

Ship "Pocahontas," Butler, of Homes' Hole, on the 12th July, parted both cables, while at anchor near Shantar Island, and came in contact with the ship 'Lewis' and barque 'Iris,' receiving considerable damage and springing a leak. Her repairs here will require about $5000.

Ship "Waverly," of N. B., got on the rocks in the Ochotsk, and sprung a leak. She lost a part of her keel, but her damages otherwise are light.

Several ships have received light damages from contact with the ice, and with other vessels; among them the "Caravan," of F. R., "Magnolia" of N. B., "Syren Queen" of F. H. The ship "Lewis" of N. B., and also "Phœnix," of Nantucket, lost all their anchors.

CONSULAR RATES.—The price fixed by the Consuls for payment of discharged seamen, is 40cents per gallon for polar oil, and $1.20 for sperm, and 33 cts. for bone

EXCHANGE.—Whalers' drafts on New Bedford are quoted at 12 to 15 per cent. discount for 10 to 30 days sight.

In our next issue, about the 30th inst., we shall publish a freight list of oil and bone sent to the U. S. from this port.

For the Friend.

Dialogue between two Sailors.

(Scene commences in a narrow lane in Honolulu.)

Jack. Hallo—there shipmate—where are you bound?

Dick (confused.) O I'm awful dry, and I'm going to get something to wet my whistle with.

J. Well, I'm bound on the same errand, and I propose that we go together.

D. Agreed, but I thought you never took any thing stronger than water.

J. So I Don't. And its to get some of it right from the fountain head, that I'm bound on a cruise up that beautiful valley yonder.

D. O I can't go there! Its too hot, and I'm tired.

J. But don't you see the fresh trades are blowing square in our faces, and as to your being tired, a good bath in that pretty little river will rest you I'll be bound.

D. Well—I suppose I must try. When you get foul of me, my craft has to knock under.

J. Well—now we are fairly under way, tell me what's the matter? you look as if you'd seen rough weather since we shook hands the first day we were in port.

D. O nothing, only the old round of dissipation.

J. And do you call that *nothing*?

D. Well Jack, I should like to know what a feller can do. I think when I'm out at sea, I'll save my money so hardly earned, and keep clear of land traps; but when I get ashore, I meet one in some shape at every corner. If I get safely through one street, I'm sure to be drawn in before I'm half down another; my money slips away, my head gets all of a whirl, and by the time the ship's ready for sea again, I'm sick in body and haven', a cent in my locker.

J. But you need'nt run into these land traps, you're a free man, scores of seamen come here every season who never see the inside of those dens. All the better part of the community here are opposed to them. If we could all be *agreed*, we'd soon starve them out, or oblige them to seek more honorable employment.

D. I know its my own fault.

J. What do you think Lucy would say, if she could see you this morning.

D. Don't name her Jack—it takes the man out of me to think of her, and what I once hoped. But its no use.

J. Don't give up so, you're not past hope. Did you ever sign a temperance pledge?

D. No, Lucy begged me to when I was home last, but I never dared to, I could'nt keep it.

J. I've no fears about your keeping it if you'd only make the promise. Don't you remember when you promised to give me half of the first dollar you ever earned? More than two years passed before you earned the dollar, but you remembered your promise tho' I had forgotten it, and came straight and gave me the half of it. And that half dollar years afterwards, formed part of my first deposit in the savings bank, I've a snug little sum there now. No, no, Dick—you won't break your promise if you will but earnestly make

D. But the grog shops Jack!

J. Hold on a bit They'll have our "Home" under full sail before we come in again, and then we may retire to its safe quarters, and snap our fingers at the land sharks forever.

D. I've a great mind to try. Will you help me Jack if you see me like to fall?

J. Yes, but I've no fears. Come, here's a copy of the pledge Our captain gave it to me as I was leaving the ship. He get's them of the Chaplain, I got two signers before I met you, you shall be the third. Here's a pencil, we can ink it over afterwards.

Dick. (writes his name.) May God help me keep this pledge!

J. Amen! Come—here we are on the bank of this clear stream. Let us give three cheers for Temperance and the Sailor's Home, and then take a plunge!

And the old hills that skirt the quiet vale, through which flows the bright little Hapana river, echoed back the hearty "three times three" which came up from the depths of those honest sailor hearts.

JAPAN.—A friend has passed into our hands, a letter recently received from the 1st officer of the brig "Leveret." It has been suggested a portion of the letter should be published, for the purpose of furnishing the seafaring community correct information respecting the capabilities of the Japan ports, for furnishing vessels with supplies.

HAKODADE, June 12th, 1855.

Dear Sir:

As an opportunity offers, I take the opportunity to let you know that we have arrived. We have had considerable difficulty since we have been here. The people will not allow any one to land, not even the passengers. The town is a mere fishing village. You cannot obtain any fresh supplies, and to get your water, you have a deal of trouble. You have to get it of the authorities, and they have been eight days furnishing us with 30 barrels and 200 sticks of wood. The Spanish dollar is the only coin current, and it goes for only 25 cents. There is nothing manufactured here excepting lacquered ware, which is shipped to Jeddo, in exchange for clothing and other necessaries. Their houses are inferior to the native huts, at Honolulu. Their dress is of an inferior quality, silk is rare and seldom seen. Lacquered ware is dearer here than at Honolulu, and very scarce.

The harbor is large and commodious, and that is all the inducement that their port offers for ships. Their principal food is seagrass preserved and fish—no bread and vegetables. No hogs, no fowls, and it is altogether the most contemptable place that I have visited during my twelve years cruise in the Pacific. This place will never become the resort for whalers, but may be visited by men-of-war during the European war, and no longer. They do not allow any people to reside or remain on shore after sunset. The people are not what they are represented to be, they are even inferior to the Kanakas. The English squadron sailed from this place June 8th, the American squadron is here under Commodore Rodgers, and the French fleet is expected here shortly."

N. E. B.

The Boston subscription for the Home.

Through the unwearied efforts of Mr Hunnewell, the sum of $1,028 has been placed at the disposal of the Trustees of the Honolulu Sailor's Home. This gentleman deserves the thanks of all the friends of the institution for his zeal in collecting funds. His zeal should provoke others to do much for the Home. That our readers may learn what he has done, we copy the following extract from a private letter reccently received:—

"I have derived some instruction as well as amusement, in obtaining the names to this object. It may be amusing to you, to hear about my operations. From the first I intended to do something - I appealed to quite a number personally to take hold and aid the work. "O, yes! it is a noble object and must go, but I am so much engaged that I cannot attend to it," so said quite a number. After the printed appeal came out in the Boston papers, I adopted the plan of writing a letter telling the story and accompanying it with the subscription paper and printed appeal, requesting an answer by mail. I have already written nearly *four score* of letters on the subject. Some answers were cold and chilly, others cheering and encouraging, and from others not a word of answer."

The reply from Deacon Grant the great temperance advocate, was characteristic of the man "I regret" says the Deacon, "that the subsrcription $10,00 is so small, would that I had the means of the lamented Lawrence, I would give more," but he adds slyly, "if I had it, it is not certain that the disposition would remain!"

The Sailor's Home Fair.

The Trustees have made arrangements for holding The Fair on next Friday evening, at the Home. The arrangements for the most part, will be under the direction of certain committees of ladies of Honolulu. The Trustees feel the utmost confidence, that every thing necessary to secure the success of the enterprise has been, or will be done by the ladies.

We have heard allusions made to various schemes which will be adopted for the amusement of the visitors. The Post Office department, will not prove a source of disappointment to those calling for letters or papers. Sailors and residents may confidently expect letters. Shipmasters will doubtless find letters from their wives, and perhaps from their owners! Jack may be sure of a letter from his mother and sisters. A *new* newspaper will make its appearance. Its name, its politics or its principles, are not as yet made known. It may not be Royal, but it is certain to be Loyal, for it will be printed at the Government Press!

Not only will fancy articles be exhibited, but the useful will be offerred for sale, at moderate prices. Sacks of flour, and preserved fruits for the house keeper, tarpaulins and monkey jackets for the sailor; vests and dress coats for the clerk; dresses and toys for the children; whips and fans, pipes and pencils, vases and work boxes, silks and satins, shoes and slippers, dressing gowns and dressing cases, writing materials and other things too numerous to mention. We need not of course intimate that the ladies will furnish the tables with excellent fare.

In alluding to the variety of articles which will be exhibited for sale, we know not which most to admire the zeal and efficie ncy of lady solicitors, or the generosity and liberality of our Honolulu merchants. We have not heard as the Committee omitted calling upon a single store or shop from the stately wholesale dealer, to the humblest vender of nick-nacks; but what is more surprising almost every one gave liberally.

But we do not wish to excite expectations which will not be realized. The public to be fully satisfied, must come and see, come and hear, come and taste, come and read, come and *buy*.

Robert Mills.

An American sailor, by this name, has recently attracted considerable notice in the United States. His history is briefly this. Sixteen years ago, with a boat's crew, he was separated from his ship, cruising off the Marquesas Islands. Being unable to find their vessel, they landed. The natives forbid their leaving. Subsequently all but this man escaped to another whale ship. He soon became settled in the family of the principal chief, and married his daughter. He then undertook the work of elevating and civilizing the people. Feeling the need of assistance, he reports that he wrote to the Sandwich Islands, but obtained no reply. He then started with his native wife for the United States, and after a long wandering of two years, he arrived, having touched at New Zealand, Australia, Valparaiso, and Rio. In the United States he found friends. Various whaling captains testified to his good character. Having made arrangements with the American Missionary Society to send out Missionaries to Marquesas, he left the Atlantic States by a steamer via Panama for San Francisco. In company with the Rev. Mr. Seymour, he reached San Francisco by the "J. L. Stevens." At that place the wife of Mills died, Sept. 3rd, and her funeral was attended in the Congregational Church. "The Pacific" of the 7th thus refers to Mrs. Mills :—

The many friends of the new mission at the East, whose interest has been excited towards this lady, will be saddened to learn of her death. She exhibited many interesting traits of character; and these, as well as the position which she occupied, and her adventures as connected with the establishment of a new mission, imparted great interest to her person. Although an uneducated Islander, until lately wholly unacquainted with civilization, we are assured that she everywhere at the East, attracted attention by her simple grace and correctness of deportment, in no instance drawing attention to herself by reason of any inappropriate act. She was possessed of a good mind, bestowing interest upon things really worthy. Her attention to the proclamation of the Gospel ever since she came within its sound was sincere and earnest. The missionary party who have accompanied her thus far, became much attached to her and feel keenly their loss. In person she was interesting. Her features were regular and intelligent: her complexion an olive, somewhat lighter than the natives of the Sandwich Islands. Upon her arm was a beautiful specimen of Island tattooing. The funeral services were held at the First Congregational Church on Tuesday afternoon at 4 o'clock. The services were interesting. An address was given by Rev. Mr. Seymour, dwelling upon the character of the deceased, upon her interesting adventures and the loss which the mission sustains in her death.

At the last accounts, the party were seek an opportunity to start for the Marquesas. We could wish they might visit Honolulu, for the purpose of conferring with the Directors of the Hawaiian Mission Society.

Things by their Right Names.—A clergyman in England whose appetite for brandy was increasing with his age, was in the habit, of calling upon Robert Hall. Seeing that his ruin was inevitable, unless the habit was broken, Hall resolved to make a strong effort for his rescue. The next time he called, when he had as usual asked for a glass of brandy and water, Hall said, "Call things by their right names, and you shall have as much as you please." "Why, don't I employ the right name," was the reply; "I ask for a glass of brandy and water." "That is the current, but not the appropriate name," said Hall; "ask for a liquid fire and distilled damnation, and you shall have a gallon." He turned pale with anger, but knowing that Mr. Hall, did not mean to insult him, he stretched out his hand and thanked him, and from that time ceased to take brandy and water.

An unfounded Impression Corrected.—From careful tidal observations made at Panama and Aspinwall, the general belief that there was a difference of mean level between the Atlantic and Pacific Oceans, the Pacific at Panama being supposed to be 3.52 feet higher than the Atlantic at Chagres, has proven to be incorrect, their mean level, or their height at half tide, being exactly the same; owing to the difference of the rise of tide at both places, there are of course, times when one of the oceans is higher or lower than the other.

A Frail Ocean Craft.—A small sloop of only 26 tons, and drawing but four feet of water, has arrived at New Orleans from Leghorn in the Mediterranean with a cargo of fruit, after a voyage of 80 days with contrary winds.

DIED.

On board ship Rambler of Nantucket, May 25th, Capt. John Parker, of Nantucket. with an inflamation of the Brain, after an illness of four days.

He was very much beloved and respected by all who knew him. He leaves a young wife and infant daughter to mourn his loss.

Oh! Death, whose awful influence
Is felt o'er land and sea,
It seems thou will not be content
'Till all have bowed to thee.

We stood beside him when he died,
Oh! solemn was the scene,
To see him, who by all beloved,
Passed from us like a dream.
No wife was there to sooth his brow,
No infant daughter near;
To Heaven he's gone, his final home,
Oh! may they meet him there.

Without a mound or monument
To mark where he was laid—
'Tis there he sleeps, from care released,
'Till the sea gives up its dead. E. P. T.

Lost overboard in the Ochotsk Sea. on the 17th Sept. 1855, Samuel Freeland, of Sag Harbor, 3d officer of ship 'Onward.

At sea, on board ship "Onward," Antone Rose, (Portugee) of consumption

At Koloa, Kauai, Oct. 23, of consumption, John Hunter, a native of Georgia, and late from California—aged 46 years.

At the United States Hospital, Aug. 15, Joachin Joseph; Oct. 16, Alfred B. Smith; Oct. 27, Christian Gronbeck, Dane; Nov. 4, Elias Fieroja S. Tahmarre, of Tulcahano; Nov. J, Jose Moran, S. Brookly, of Fombos.

In the month of June on board Wm, Thompson, Joseph Cota a native of the Western Isles, was killed by a whale. Sept. 10th, 1st. officer of Wm. Thomson, J. Shute of Troy N. Y., was killed by a whale.

NOTICE.—A Meeting in behalf of the "Home" will be held at the Bethel on THIS evening at half-past 7 o'clock.

The seafaring and resident communities are invited to attend. It is hoped the ladies will honor the meeting by their attendance.

☞ Those shipmasters and seamen recently arrived are particularly invited.

A statement will be made respecting the progress of the "Home," and Addresses delivered calculated to excite an interest in the advancement of the enterprize.

BIBLE, BOOK AND TRACT *DEPOSITORY* at the Sailors' Home.

Bibles, Books and Tracts, in the English, French, Portuguese, German, Danish and Spanish languages. *For Sale at cost prices, but*

Gratuitous to Seamen.

Also, Office of "The Friend;" bound volumes for sale; Subscriptions received.

N.B.—Seamen belonging to vessels lying "off and on," will be supplied with books and papers at the Depository.

Passengers.

Per barque Yankee, A. G. Jones, C. J. Lovett, N. L. Ingols, W. Scott, T. T. Doughterty, J. Feary and wife, Mrs. Force, Master Benedict, W. C. Parke, W. F. Dow, A. Potter, Mrs. Bradshaw, and daughter, Mr. and Mrs. Lamb, Mr. and Mrs Sullivan, Mrs. Campboll and 3 children, C. J. Wellington, Mr. Lee anb 4 children, W. Armstrong, Messrs. Peoples, Codona, Deane, Wyatt, Hinckley, Hornhousen. Sinegan, Lemau, Warner, Rospett, Carter, Mr. and Mrs. Austin, Miss Virginia, Miss Annereau, Mr. and Mrs. Snyder, and two children. Messrs. Bell, Barrett, Hogan, Mackie, Francis, Roundtree, Alexander, and eight Hawaiians.

Per sch, Forward, J. Brown, J. Gardner, W. Markman, and one in the steerage.

Per sch. Pfiel, S. Linsey.

Per "Yankee," for San Francisco:—M. Wheat, B. F. Dennison and son, J. Nutter, J. D. Willard, L. B. King, Dr. O'Brien, Mr. Steffans, Mr. Herlick, H. Morgan, J. A. Nichols, J. S. Payne, E. Gibson, T. S. Nye, Mrs. Force, Master Benedict, Capt. Cook, G. W. Parris, F. Armas, R. Smith, A. Foigd, M. Ruth, Capt. Greene, Capt. Sisson, H. Woodall, Mr. Hinton, A. Ewing, Miss Alleyne, and eight in the steerage.

Per "Gen. Pierce," from San Francisco, S. Franklin, J. Mayler, W. Dodd, T. Peterson, W. Smith, Mr. Olivier, and 3 Chinamen.

Per "Eliza Adams," Capt. S. G. Russell.

16.—Sh, Eagle, Cannon, 1850 bbls. season.

Memoranda.

Two Ships Lost.—Capt. Palmer of the ship "King Fisher" has furnished us with a long report of the loss of that vessel on the 14th of May last, on the North East end of Company's Island, one of the Kurile group. Her cargo at the time consisted of 1242 bbls. of whale Oil and 489 bbls. Sperm. The "King-Fisher" was at the same time in company with the "Enterprise," Capt. Hassell, and no sooner had Capt. Palmer's vessel struck than he dispatched a boat and fired muskets, in the hope of warning off his companion. He did not succeed, however, and the "Enterprise" went on shore also. The two Captains and crews were eventually taken on board the "Montezuma," Capt. Forsyth, of New London. Capt. Palmer says:

"For the benefit of my friends, whose business calls them to visit these dreary regions, I would state that the N. E. end of Company's Island is at least 30 miles E. N. E. of the place indicated on Blunt's Charts of 1853—to which error in the chart and a change of the current from South Easterly to South Westerly, I attribute our disaster. And further, as near as I could observe, the Southern side of the N. E. end of Company's Island tends nearly E. N. E. and W. S. W., instead of as delineated on the above named charts."—[*Polynesian.*

The Friend.

HONOLULU, DECEMBER, 1. 1855.

End of Volume XII.

The Friend has now been published twelve years. The closing up of a volume, is an occasion when Editors usually indulge in a moralizing strain, upon the *ups* and *downs* of life, and profess to impart some very good counsel and advice to their readers. As we have but a narrow space to occupy and only a few moments to write, our remarks will be brief, and exceedingly practical. We earnestly recommend our readers in the style of Dr. Franklin, to settle up their accounts. See how you stand with your neighbors, whether debtors or creditors. Some you may not owe money, but you may owe them an apology or thanks, oftimes more valuable than money. Some you may owe a deed of charity, neglect not to settle up these matters otherwise the joints of life will rub and grate! Do you not owe some mechanic or *newspaper publisher*, or some one else whose bills are small, but not trifling? You may think them trifling, he does not. He may have journeymen to pay off; and they their boarding house keeper; and the boarding house keeper the grocer; and the grocer the importer; and the importer some merchant in a foreign land; and so on. Look out for if you neglect paying your little bills, you may starve a Hindoo laborer, beggar an English mechanic, or make a Yankee farmer fail. The truth is all the nations of the earth are but the scattered members of one great family, while sailors are the links binding the family circle together. Let us join hands, and be sure and not allow sailors to slip out of the ring! If they will roam and wander let us make for them "Homes" in every sea port; they are our brothers Did sailors not think they had some kind hearted sisters the other night, at the Fair for the Sailor's Home! Never did the Ladies of Honolulu (in our opinion,) appear to greater advantage than on that occasions! Our word for it, their praises will be sung in every ship throughout the Pacific! They have our thanks for what they did on that occasion! Ah, but we are moralizing and this is what we promised not to do. So here's an end of our editorial palaver, with our readers, for 1855.

Support of the Friend for 1855.

Many months ago we resolved our paper should not live by begging. Up to this period we have kept our resolution, and do not intend to break it. When the public (and especially the seafaring) clearly intimates by withholding donations, that $500 annually is too great a tax for 1,000 copies scattered broad cast among seamen in the Pacific, then we shall cease to publish upon the *gratuitous* plan and adopt the *cash* system, when perhaps the editor might get a small salary! During the past year, we have made the "Home" enterprize so prominent in our columns, that a portion of the contributions which would have aided "The Friend" and "Bethel," has been turned aside in that direction. We do not complain of this, although for the time being, it has compelled us to incur a debt. We know that our expenses for "The Friend," must exceed our receipts unless *every subscriber* pays, and donors make good the sum of $500, which as yet amounts to only $249,50. While it is always gratifying to receive donations for general distribution, still when a sailor subscribes to forward the paper to his mother, or a shipmaster to his wife, we feel that we are conferring a more direct benefit; thereby we are confident a certain amount of real pleasure is conferred upon the sailor's friends. Often times the report in our columns, of a ship cruising in the Pacific, when read, by friends in the United States, is as good as a letter! Although our columns may sometimes contain sad intelligence respecting wrecks, deaths, or disasters, still even such news affords a melancholly satisfaction. We do urge upon seamen of all classes to subscribe and forward The Friend to their homes. This is an easy and satisfactory way of supporting the paper. Buy also bound volumes, and we are confident the purchaser gets his money's worth.

First Anniversary of H. S. H. S.

The Sailors' Home Society held its first Anniversary at the Bethel, Monday evening, the 26th ult. Below will be found a list of the officers chosen for the year ensuing. The Report of the Treasurer, found in another column, shows what has been collected and expended. From this document it appears that the total amount of receipts from various sources, has been $8,518 50, while $7,423 04 has been expended, leaving $1,095 46 surplus. Thus it appears, that for the time being, the institution is free from debt, and has a balance in the treasury. We think the Trustees and patrons of the 'Home' ought to feel more than satisfied with what has been accomplished, for much more has been done than it was supposed could have been performed in the space of twelve months. When the Government generously donated the land, on condition that $5,000 should be raised within the space of one year, it was thought that the condition could not more than be complied with; but the sum of more than $3,000 in addition has been realized. If persons will look at the facts just as they exist, we think it will clearly appear, that the institution has progressed much beyond the expectations of its most sanguine friends.

One year ago, the trustees, estimated that it would require the sum of $15,000 to complete the building and furnish the same. That estimate is near the truth. The trustees in entering upon the second year of the society's existence, are resolved to urge forward the enterprise, finishing off the building and otherwise preparing the establishment for occupancy. It is not their design however, to incur an onerous debt. What has been done they offer as a pledge to the public of what they design to accomplish when funds shall be placed at their disposal.

According to the Charter, six new Trustees are to be annually chosen. The following is a list of the Trustees and Officers of the H. S. H, S.

Trustees.

First Class.

W. L. Lee, H. J. H. Holdsworth, Thos. Spencer, J. T. Waterhouse, H. M. Whitney, G. M. Robertson.

Second Class.

E. H. Allen, C. H. Butler, R. Armstrong, J. Bartlett, S. N. Castle, H. Dickinson.

Third Class.

S. C. Damon, G. B. C. Ingraham, G. P. Judd, John Ii, W. Johnson, J. E. Chamberlain.

Officers for 1855-6.

HON. E. H. ALLEN, *President.*
Hon. W. L. Lee, *Vice President.*
G. M. Robertson, *Treasurer.*
J. E. Chamberlain, *Secretary.*
G. P. Judd, S. C. Damon, and H. J. H. Holdsworth, *Ex. Committee.*

Loss of the "King Fisher" and "Enterprise."

LAHAINA, Oct. 24, 1855.

To Rev. S. C. Damon:

DEAR SIR:—I send to you, for publication in your valuable paper, the following particulars in relation to the loss of the "King Fisher" and her valuable cargo, consisting of 1,242 barrels of whale oil, and 489 barrels of sperm, which took place on the morning of the 14th of May last, at a quarter before 2 A. M., on the N. E. corner of Company's Island.

On approaching the Kurile Islands we experienced a South Easterly current, that increased in strength as we neared the straits. We first discovered land on the 9th, in company with ship Nassau and bark Favorite—had light southerly winds, steered North. On the 10th, spoke ship Enterprise, Capt. Russell, bound into the Ochotsk Sea. Our Lat. this day, 45° 26' N., Long. 151° 11' E. Land in sight bearing N. W., 50 M. distant, light airs and calms until 7 P. M., when we experienced fresh breezes from E. N. E.—steered N. in company with the Enterqrise until half past 12 at night, when a gale commenced from N. E. to N. W., attended with sleet and snow, which lasted until midnight of the 12th. Laid to, heading to Eastward and Northward through the gale. At 1 A. M. of 13th, wore ship to the N. N. W. and made sail as the gale abated, and at 8 A. M. was under full sail, with a fresh breeze from the Northward. At half past nine A. M., saw land on the weather bow—at noon wore ship to the Eastward. The nearest part of Company's Island bore N. W., 30 or 35 miles distant. Our Lat., by good observation, was 45° 32', and Long., by equal altitudes, was 150° 28' 30" E. Stood to the Eastward 7 or 8 miles and spoke the Enterprise. It now became nearly calm—we both obtained good observations—his placed us in 150° 44' E., and mine was 150° 35' E., which appeared correct according to Blunt's Charts. It remained calm or light airs until 9 P. M., when a breeze sprung up from S. E. by S., and steering N. by E. ½ E. by compass, (variation 6 degrees easterly,) in company with the Enterprise, each having lights set, having determined to run 35 or 40 miles, which would bring us abreast of the Straits of Bonsole, and there heave to and await day-light before attempting to enter the Ochotsk Sea.

At 10 I went below, leaving strict orders that the ship should not be steered to the Northward of her course, that a strict lookout should be kept, and that the least change in the weather, which was then tolerably clear, should be observed and immediately reported to me, and the log to be hove every hour. At 20 minutes before 2, A. M., of 14th, the officer of the deck reported to me that the weather was thick and rainy, and the wind rapidly increasing—that the ship was then under topsails and jib, and the yards braced up, although the wind was on the quarter, so as to enable the Enterprise to keep in company with us. We were sailing at the rate of about 8 knots. While the officer was communicating these facts, I had discovered that we had nearly run out the distance, and I was about giving the order to haul more to the Eastward and shorten sail, when the cry of "Land!" and "Breakers!" on the port bow, and close to, reached me. I instantly sprang for the deck, the helm was put hard to port, but before the ship luffed more than a point or two, she struck on a reef of rocks. After thumping two or three times, she brought up. The topsail and jib halliards were let go, but every sea hove her still further on, and pieces from her bottom appeared alongside. Perceiving that my ship was inevitably lost, I directed my attention to endeavor to warn our consort of her danger. A boat was lowered, in command of the mate, to proceed if possible to her. Muskets were fired, but were not heard by those on board. The mate also was compelled to return without accomplishing his object; while I, with feelings that may be imagined but which cannot be described, was compelled to be a passive spectator of the destruction of another ship amongst frightful rocks and breakers, that were rapidly breaking up our own stout vessel. She struck about the same time that we did, and about one fourth of a mile from us. Shortly after we struck our hold was full of water. In the interval between the rollers, I caused the three larboard boats to be lowered and 25 men placed inside of them, to pull outside of the rollers and remain until morning if possible. Immediately afterwards I cut away the masts, which eased the ship. The starboard boat was then lowered, and 4 men placed in her to prevent her destruction by the wreck. A few nautical instruments and 4 hams were also put into her.

Day-light now dawned upon us, and displayed to us our true position. Land was about one-third of a mile distant, and appeared an almost perpendicular bluff, about 200 feet high, with a very small beach at its base, while around the ship and towards the shore were very heavy breakers. The ship at this time was further on, and the sea had so increased as to preclude the possibility of being able to get over the reef and following the other boats to the leeward. In fact, the sea was breaking entirely over the wreck, and she was striking so violently as to render it impossible to maintain a foot hold on the deck. At about 4 A. M. took to the boat—each man in his shirt sleeves—and by almost a miracle safely reached the shore. About two hours afterwards we were joined by the third mate, who informed me that the danger of swamping the boats, soon after leaving the ship, compelled him to bear away to the leeward, and that he and the second mate had discovered a landing. He could not give me any information concerning the mate; but in two hours afterwards I was relieved of my intense anxiety for him by his appearance amongst us, with the grateful news that he had found a safe landing about 10 miles from the wreck. The Enterprise had struck in a more favorable place, and being lightened was driven up further, although she was surrounded by heavy breakers; but by great coolness and care all were safely landed from her. At 9 A. M. Capt. Russell landed, being the last man that left the ship.

Sad and disheartened we extended our hands to each other as we met on the beach. The sight before us was one never to be forgotten. A heavy gale was blowing, attended with sleet and rain, causing high breakers, and in the midst of them lay our late noble ships, (the King Fisher being but two years old,) now shapeless wrecks, fast breaking up and strewing the beach for miles with their timbers and cargoes. Thus in a few short hours we found ourselves removed from our comfortable ships, a most successful voyage destroyed, and bright prospects for the future cut off, and we cast upon a desolate, inhospitable coast. The first day and night were spent in endeavoring to save provisions as they drifted upon the beach. A fire was kindled which, in a measure, mitigated our suffering from the wet and cold.

On the morning of the 14th, the gale having much abated, a boatsteerer, at the risk of his life, swam on board the wreck and obtained the clothes from the slop-chest, which were distributed among us and afforded us much relief, as we had not saved any clothing from the wreck except the suit we had on—the water also being exceedingly cold. About noon of the 15th, two ships were seen standing along the land to the N. E. A boat was sent to solicit assistance, which was most readily granted. Two boats were sent from each ship to take us off, and by night there were but 15 men left. Capt. Russell and myself went on board the Montezuma, Capt. Forsythe, of New London. The other ship which relieved us was the Joseph Haden, Capt. Goosman, of Bremen. On the morning of the 16th we returned to the wrecks, and being very low tide, were enabled to get on board. Both deck frames of the King Fisher still held together, but the greater part of her bottom was destroyed. But little remained that could have been saved had she been situated in a favorable place. As it was, our nearest landing was about 4 miles distant, and a part of that over a beach of cragged rocks, and this landing was only practicable in smooth weather or westerly winds. Owing to a strong current, which was now found to be setting to the land westward, the rugged nature of the place, and the liability to S. E. gales at this season of the year, all hopes of being able to save any thing was abandoned, and at 3 P. M. we bore away for the Ochotsk.

For the benefit of my friends, whose business calls them to visit these dreary regions, I would state that the N. E. end of Company's Island is at least 30 miles E. N. E. of the place indicated on Blunt's Charts of 1853—to which error in the chart and a change of the current from South Easterly to South Westerly, I attribute our disaster. And further, as near as I could observe, the Southern side of the N. E. end of Company's Island tends nearly E. N. E. and W. S. W., instead of as delineated on the above named charts.

To Captains Goosman and Forsythe, my gratitude will be ever due for the readiness with which they came to our relief, and that at the risk perhaps of the loss of their ships. To both these gentlemen I am particularly indebted for their kindness and sympathy, and the attention paid to every want of ours while on board their vessels. In fact, it is but a poor tribute of gratitude towards them to say that the kindness and devoted attention on their part towards us, was of the most delicate nature, and must have been dictated by hearts full to overflowing with the milk of human kindness. To Capt. Bryant of ship Gideon Howland, I likewise would extend my acknowledgements for favors bestowed upon me and for taking part of my crew. A part

of the season I passed on board of the Syren Queen, and I feel particularly grateful to Capt. Lakey for his kind and generous treatment, and for his care and attention during my illness. Also to Capt. Lamphier of the Lagoda I wish to express my heartfelt thanks for his rotherly treatment to me while on board of his vessel. Capt. Earl also, of ship Jerih Swift, who kindly gave me a passage to this port. In fact, all amongst whom I have been sincc I have met with this sad disaster, will please accept my most grateful acknowledgments for the many favors they have bestowed upon me. May God bless and protect them from a misfortune like that which has befallen me.

Yours truly and respectfully,
MARTIN PALMER,
Late Master of "King Fisher."

THE CURSE OF RUM.—The illness of Florence Nightingale, which compelled her to leave the hospitals, where her devotion to the sufferers of the Crimean campaign attracted the admiration of the world, was caused by the additional labors resulting from intemperance, which, she says, has worked more havoc than the ball of the Russian or the stroke of disease. Before grog-shops were started in the Crimea, her labor, though toilsome, was one of love and hope. But after that, her nurses, who had been vigilant, became abandoned drunkards, causing her night after night to sit up to attend to their duties; and her patients, who before were heroes, became sots. Having to move with disgust through lines of beastly victims of intemperance, her brave heart, which had enabled her to overcome all other obstacles, gave way. From her sick couch she has sent an imploring appeal to her country to sweep away the wretches who fatten and feed on the misery and ruin of their fellow-men, who, as she says, "know not what they do."

☞ Hon. W. L. Lee, Minister Plenipotentiary and Envoy Extraordinary from the Sandwich Islands to our Government, took a final leave of the President of the United States on last Monday week. Before leaving, he expressed great gratification at the successful termination of his mission, and predicated highly beneficial results to the two countries, from the negotiation of the treaty of commercial reciprocity. The President, in reply, concurred with Mr. Lee as to the results likely to be secured by the treaty, and spoke in highly complimentary terms of the manner in which he had conducted his negotiations.—[*Boston Journal* Oct. 5.

DIPLOMATIC—Hon. W. L. Lee, Minister resident to our government from the Sandwich Islands, took a final leave of the President on Monday last. Brief speeches were made by both gentlemen. Mr. Lee predicated highly beneficial results to the two countries from the new treaty of commercial reciprocity, and the President spoke in highly complimentary terms of the manner in which Mr. Lee had conducted his negotiations. Mr. Lee's return to the Sandwich Islands is rendered imperative on account of his delicate health.—[*Ibid.*

Dangerous Rock.

Capt. Howes of Ship China, informs us of the existence of a very dangerous rock, in the vicinity of Jonas Island. At the time, Capt. H. saw it, there was but 6 inches water over it; state of the tide unknown. Its situation is about 1 1-2 miles N. W. by N. from the Island. This rock is very dangerous, as the soundings elsewhere around the Island are deep. As this rock is not laid down on any chart, we cheerfully publish Capt. Howes' discovery, for the information of masters of ships, who may hereafter cruise in that vicinity.

AN UNFORTUNATE MISPRINT.—It is stated, on high authority, that the words in the New Testament, "which strain *at* a gnat, and swallow a camel," contain a misprint which was passed over in the edition of 1611, and has since been retained. The early translations say, "which strain *out* a gnat," etc., which is the proper rendering.

POWER OF KIND WORDS.—Some little readers may ask, What are we to do when our companions provoke or injure us? Let me tell you about an old colored woman, who was walking along the streets of New York on an errand, with her tobacco-pipe in her mouth, quietly smoking. A jovial sailor came along, and when opposite good old Phillis, he crowded her off the pavement, and with his hand knocked her pipe out of her mouth. He then stopped to hear her fret and complain of his trick. But what was his astonishment when she meekly picked up the pieces of her broken pipe, and giving him a look of mingled sorrow, kindness, and pity, said "God forgive you my son, as I do." It touched a tender chord in the sailor's heart, and brought tears to his eyes, and giving her a handful of money, he exclamed. "God bless you, kind mother, I'll never do it again."

LIGHTNING AT SEA.—During a period of 21 months, ending in August, according to a record kept in New York, 121 vessels have been struck by lightning, ten of which were set on fire and five destroyed; only one was a steamboat, which was but little injured. Notwithstanding the immense travel of steamers, not a single loss of life has been known to have occurred by lightning on board a steamboat or ocean steamer, or on iron ships, or vessels furnished with metallic lightning conductors which continued uninterruptedly to the water. No insurance company has ever been called to pay for loss or damage by lightning to a vessel thus protected, while they have paid millions for loss on vessels that neglected this protection.

THE FOLIO.—Some of our readers may be surprised to find four pages of our paper filled up with "The Folio." A word of explanation will be sufficient. At the late Sailor's Fair, this paper was issued by the Ladies, and sold by the news-boys and girls, and furnished to such persons as called for papers through the Post Office. Believing that this paper deserves something more than an ephemeral existence, we have transferred its entire contents to our columns. It formed an interesting feature of a "Fair," which will be long remembered by those who were instrumental in getting it up, and by the dense throng of visitors. Its result, in a pecuniary way, fully answered our expectations, considering the universal cry of "hard times." Had we the space, we should gladly add sundry comments upon the Fair, not failing to express our thanks to the Ladies of Honolulu. In the name of all the Sailors in the Pacific we thank you Ladies, for your exertions in behalf of the Sailor's Home.

☞ In the last column of the Folio, appears a Charade, and two Enigmas. We do not wish our readers to imagine, that we succeeded in solving these puzzling enigmas by our own unaided wisdom, but at our elbow there is one who reports, that "Punch Bowl," the name of an old crater in the vicinity of Honolulu explains the Charade, while "The Sailor's Home" and "Kilauea" will solve the Enigmas.

ANTI TOBACCO PUBLICATIONS.—Of these we have received several from the Rev. D. Baldwin of Lahaina. Among them we find "A Prize Essay, on the evils of Tobacco, as they effect body, mind and morals, *by Rev. Dwight Baldwin.*" We shall notice these publications, at a future time.

☞ Capt. Paty, of the "Frances Palmer" has our thanks for promptly furnishing files of papers and ship news. If shipmasters on going into port would follow his example, they would aid newspaper publishers, and render important service to the public.

☞ Any persons having funds in hand, on account of The Friend, are requested to forward the same as early as convenient.

SHIP CHANDLERY
AT GUAM.

THE UNDERSIGNED, having entered into a Co-partnership for the purpose of carrying on the SHIP CHANDLERY BUSINESS, under the name and firm of

THOMAS SPENCER & CO,.

at the Island of Guam, Ladrone Islands, respectfully announce to masters of whaleships and others, that a full assortment of Naval Stores and recruits will be kept constantly on hand and furnished by them on the most reasonable terms, and money advanced on whaler's bills on the United States.

THOMAS SPENCER, J. S. VAN INGEN,
Honolulu, S. I. Guam, Ladrone Islands.
26-6m

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

HONOLULU MEDICAL HALL,
DR. McKIBBIN, SURGEON, &c.

BEGS to inform the inhabitants of Honolulu and vicinity that he has taken the old established Drug Store, corner of Merchant and Kaahumanu Streets, which he has remodelled and means to keep constantly supplied with the best medicines he can procure from the United States and England. The concern will be constantly under his own or his son's superintendence, so that families requiring medicine may depend on getting the best, carefully prepared.

He has just received a case of London perfumery Soaps. Brushes, &c., and daily expects a further supply, which, with the ordinary patent and other medicines, will be sold on reasonable terms.

Physicians' and Surgeons' prescriptions carefully prepared.

Captains or owners of vessels will find every attention paid to themselves or families if requiring medical assistance.

Medicine Chests carefully examined and refitted

Attendance for consultation at office from 9 A. M. till noon, and from 4 to 6 P. M. on week days. On Sunday from 9 A. M. till 11 at other times, at his residence Union Street. 27 tf

B. PITMAN,
BYRON'S BAY, HILO, HAWAII.

DEALER in General Merchandise and Hawaiian Produce. All Stores required by Whale Ships and others, supplied on reasonable terms and at the shortest notice.

WANTED—Exchange on the U. States and Europe. Oct. 2, 1854.—3m

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for Cash, Goods or Bills on the United States.

GEO. A. LATHROP,
Physician and Surgeon,
HONOLULU, OAHU, S. I.

Office at the Honolulu Drug Store, Queen st., near the Market. Residence corner of Fort and Beretania sts., next above the Catholic Church.

G. P. JUDD, M. D.,
Physician and Surgeon,
HONOLULU, OAHU, S. I.

Office corner of Fort and Merchant sst. Office open from 9 A. M. to 4 P. M.

E. HOFFMANN,
Physician and Surgeon,

Office in the New Drug Store, corner of Kaahumanu and Queen sts., Makee & Anthon's Block. Open day and night

GILMAN & CO.,
Ship Chandlers and General Agents,
Lahaina, Maui, S. I.

Ships supplied with Recruits, Storage and Money.

MARRIED.

In Honolulu Nov. 25th, by Rev. S. C. Damon, Mr. John Bartlett, keeper of Oanton Hotel, to Mrs. Eliza Funk.

DIED.

On board ship John Howland January 11th 1855, Solomon E. Kolfock, aged 50 years, and belonging to Newark N. J.

Lost overboard and drowned from John Howland, May 9th 1855, John Frances of Boston, aged 20 years.

On board John Howland, Nov. 9th 1855, Henry Anderson, a native of Prussia, aged 27 years. [Com. by Capt. Taylor.

On board ship Uncas Sept 17th, John Betucau, aged 18 years, a native of Western Islands. [Com. by Capt. James.

On board Siren Queen Oct. 2nd, Wm. Prendergast, aged 26 years. He belonged to West Troy N. Y. A shipmate of his desires us to assure this young man's friends, that all was done that could be for his comfort on shipboard by his shipmates.

John Smith, Boat-steerer on board ship Young Phœnix, of New Bedford, was drowned Sept. 28, by capsizing of the boat by a whale.

THE FOLIO.

"TRUE TO THE KINDRED POINTS OF HEAVEN AND HOME."

HONOLULU, NOVEMBER 16, 1855.

The Folio.

PUBLISHED AT THE

SAILORS' HOME,

NOVEMBER 16, 1855.

PROSPECTUS.

When, in the course of human events, it becomes necessary for a person or class of persons to sever the ties with which nature or society has bound them to a certain position or line of conduct, and assume duties which place them among the more public actors on life's broad stage, a decent respect for the opinions of *man*kind requires that they set forth the reasons which impel to such a step.

We hold it to be a self-evident fact, that *man* is possessed of certain inalienable rights, and in the beginning, we declare ourselves free and independent of any disposition to invade those rights. We are bound by no shackles of sect or party. As friends of humanity we enter the arena, where so many stronger, wiser, and better have preceded us—not to measure weapons with them—but to contribute, if need be, our mite of strength to stay the hands of those who have long been earnest in the conflict We bear no shield or banner with strange device to indicate our purpose or limit *our sphere* of action. We ask no herald to announce to the crowd our coming. To our friends we will ourselves speak our name and purpose.

Not with tongue or sword, but pen, we hope to serve; and though to present our rights might awaken hostility, we hope our writings will be received in the spirit of amity and good-will.

"What's in a name?" has been asked by one of world-wide celebrity. We are not prepared to answer in the words of another, "there's magic in it," yet we believe there is something. Our *nom de plume* is our *nom de geurre*. To select it from the many thought appropriate by others is not easy. Our flowers of wit and gems of thought, we fear, will be too few and far between to be twined in *The Wreath*, or gathered in *The Casket*.—Should we adopt "The Home Journal," it may be expected of us that we devote too large a space in our columns to domestic news. The "Cabinet" suggests an idea of the wonders of both sea and land, while we expect only to gather a few articles from our friends, exclusively of home manufacture, with such waifs and estrays as may be chance-directed to our hands. We adopted THE FOLIO because it seems liable to no similar objection; for whatever may be the character of its contents, it is what none can gainsay or contradict, a folio of four pages. To our friends we say, what you'll have it, make it. And we entreat let none condemn or speak slightingly of what it contains who have contributed nothing to enhance its value or increase its efficiency. Story, sketch, poem—each and all will be acceptable—each and all will be found on our pages, if our friends are true to themselves and the cause we advocate. If they are not, none can experience deeper regret and disappointment than ourselves.

Though we have screwed our courage to the sticking place and entered the lists, we confess to some misgivings. We fear there may be for us such a word as—Fail. The good we would do, we may not accomplish. The pleasure we would gladly offer may elude our grasp, as the fruit of the fabled bough of old did that of him whose doom it was ever to strive and never reach. But what we can not claim from your justice we will, in this case, gladly receive from your generosity. To that we confidently commend ourselves and our cause.

HONOLULU, Nov. 16, 1855.

CONSTITUTION OF HONOLULU SAILORS' HOME ADOPTED, AND TRUSTEES CHOSEN, Nov. 20, 1854.—"The Trustees chosen to manage the affairs of the institution, are a pledge to the public that integrity and fidelity will characterize the financial operations of the concern." *The Friend.*

INVOCATION.

Bear me on thy heaving bosom,
Ever bright and changing sea,
Bear me with thy gentlest motion,
O'er thy billows fearless, free.
Where thy glad waves flashing leap,
Where the loud voiced winds do blow,
And answering echoes long and deep,
Tell of haunted halls below;
Where the morning's rosy ray
Turns thy foam-wreaths into gold;
Where the silver wavelets play
Nightly with the moonbeams cold;
Where the clouds that never weep
Roll through their vast cerulean home;
Where sunny isles in beauty sleep,
And Beauty's dark-eyed maidens roam;
Where the wild bird sweetly sings
On the golden orange bough;
Where the breeze at evening brings
Fairy whispers soft and low;
Where the Sun with gorgeous dyes
Paints the shores, and waves, and sky;
Where the flashing fountains rise,
Breathing Nature's minstrelsy,—
There, oh take me on thy bosom,
Ever wild and heaving sea;
There, oh take me restless ocean,
Where summer reigns eternally!

HONOLULU.

CENTO VERSES,

To form cento verses, each line must be taken from a different author, or different poems of the same author, as,

Tell me not in mournful numbers,—*Longfellow.*
All our life is mixed with death;—*Barrett.*
Wake the better soul that slumbers,—*Anon.*
There is higher life than breath. "

It is not necessary at all times to preserve consistency in the picture, as the following:

Turn, gentle hermit of the vale,—*Goldsmith.*
Equipped from top to toe,—*Cowper.*
To walk yon studious cloisters pale,—*Milton.*
Where knelt the vanquished foe.—*Holmes.*

Those who think it easy to form cento verses, may find a fourth line for the following:

When Music, heavenly maid! was young,
And little to be trusted,
Ere yet the creature found a tongue—

Those for whom Time does not unroll the web of fate with sufficient rapidity, may have it done to order by our

FATE-LADY.

Nov. 16, 1855.

WELCOME.

Welcome, Mariner! Welcome from the care, the toil and the danger of ocean to the festivities of the evening, prepared for you in this thy island *Home.* If, in the far off land from which you came, you have left a wife, a mother, or a sister, whose affection has gladdened your life, and whose image is blended with all your holiest recollections of it, in their name, and for their sakes, we bid you a cordial welcome, and offer our earnest wishes that the hours spent in this festal scene, may form but the beginning of a long series of bright and happy ones within these walls.

Home! How many dear forms of absent ones are made to rise before us by the magic of that little word. You will miss, on your coming here, their glad smiles and affectionate greetings; and as the thought of the unmeasured distance which separates you rushes upon your mind, loneliness may weigh upon your heart, prompting you to turn away with a feeling that The Home is not your home. But enter we entreat you; for we hope you will find here, at all times, many of the comforts to which, through their kind care, you have been accustomed. Enter, and by your patronage and your influence aid us to make this place what its name indicates, and what we ardently desire it should prove—a haven of rest, of security and of peace.

Mariner, once more we bid you welcome! Once more offer our wishes that you may here find refuge from the perils of sea and of land. But whether you seek the rest and security it promises, or go down in ships upon the mighty deep, may the protection of Him who holds the sea in the hollow of His hand be yours; and against thy name, in the volume of His will, may Happiness be written.

Two Scenes in a Picture.

Far away amid the vast waters of the Pacific Ocean, a group of coral-girt islands rises to view. The perpetual green of their wild forest scenery proclaims their tropical birth. Birds of brilliant plumage inhabit their shady groves; and the lover of Nature's varied handiwork may find his tastes gratified in the beautiful, the picturesque and the sublime scenery which vary their rich landscape.

But the beings who inhabit these fair isles form a sad contrast to their beautiful birthplace. A slight covering made from the bark of trees, with feathery ornaments, conceal but a portion of their dark forms; while the war-cry, the horrid call to human sacrifice and the most brutal indulgences, form a large portion of their employment and their recreation. Not one trace of civilization appears

Now a group of savages are assembled on the strand near one of their beautiful bays. A large ship lies in the offing, and the strangers who have ventured on shore, excite the wildest curiosity of the untutored natives. At first they are ready to offer to their strange visitors the blind homage paid to their rude idols. Anon, in a moment of misunderstanding, a savage chieftain gives liberty to his uncurbed passions, and the noble captain of the foreign ship lies dead at his feet, and indignities of the most revolting character are subsequently practised on his lifeless remains.

Night—moral night, settles down over the scene, with a darkness that may be felt!

The scene changes. The same group of islands rises again to view. But how different! The same dark native forms appear, but the coarse garb of bark and feathers has given place to the varied costume of civilized lands. The savage war-cry is hushed. Instead of the idolatrous *Heiau*, temples dedicated to the worship of the true God have been erected in every village. School houses stand by their side, while christian ministers, and books and teachers, in active service among the people, all proclaim that a great moral and intellectual change is in progress in the land. Its natural features even seem to be somewhat modified, for the unmistakable marks of civilization are here. Large tracts of soil have been brought under cultivation; and the products with which the markets are filled, are transferred to the civilized homes on shore, and to the numerous ships which crowd the harbors. Agriculture, commerce, and the various arts of life, are rapidly progressing, both among natives and the residents from other lands, who dwell in peace among them.

Again a numerous concourse of people are assembled on a spot near one of their principal harbors. Not ONE, but many ships lie in quiet security along the wharves. Mariners mingle freely in this assembly. By and by the youthful Sovereign of these Isles appears. No one could recognize him as a descendant of the savage horde, who murdered the great navigator mentioned in the first scene of this picture. He has justly taken his place among the monarchs of the nations, and is respected as King. He advances, and with His own royal hand *lays the corner stone* of a "Sailors' Home" in the metropolis of his realm, where the mariner when far from his father's house may find a safe retreat and a quiet resting place from the fatigues and perils of his ocean labors. A volume of the sacred Scriptures, a copy of the laws of the land, both printed in the language of the Islanders, with other mementoes are placed within the stone. Prayer is offered; and speeches fraught with good will to the mariner are made, and the vast assembly disperse to their homes and various occupations.

Day—a moral day—has broken over the landscape, and its cheering influence is felt by all!

Pause, skeptic! repress that sneer! Look candidly at the two scenes presented in this picture, and confess that christianity, aided by her handmaid civilization, is omnipotent in power to reclaim the savage tribes of man, and elevate them to the *full* enjoyment of present comforts, and to hopes of future blessedness. A.

HONOLULU.

THE FAIRIES' GIFTS.

When the first sailor was about to leave his home to pursue his dangerous calling, the Fairies assembled to bestow on him a parting gift.

Said the first, "His lot will be to undergo toil, privation and hardship. The fierce winter wind will whistle around him, its chilling blast will pierce him to the bone; his limbs will be benumbed with cold. I will give him a sound constitution to enable him to endure these without injury."

The second said: "The waves may run mountain-high, the monsters of the deep may threaten, the lightnings may flash, the shrieking tempest may sweep around his frail bark, but I will endow him with courage indomitable and unblenching, which shall laugh at their power, and defy the wrath of the Storm-King."

"And I," continued the third, "will crown his efforts with success. His strength and courage, joined with a steady perseverance in his calling, shall procure him a competency. Old age shall come upon him as a gentle rest-giver, and peace and enjoyment shall be the attendants of his declining life."

But the last, still kinder, said: "You have bestowed on him but physical blessings. You have vied with each other in planning for his bodily comfort, but I will give him higher good than you have bestowed: friends to shield from temptation, to watch over him in sickness, and give him a HOME in a foreign land."

And it was so. Wherever the sailor went, there he found friends ready to minister to his wants, to offer him a HOME. Sailor! will you accept and prize the service of those friends? W.

HONOLULU.

The Ocean Burial.

Silently—tearfully,
Cover that brow!
Gone is the might
Of his manliness now;
Cold is the bosom,
Glassy the eye,
Far on the blue wave
He wandered to die!

Silently—tearfully,
Fold the dark pall,
Sternly old Ocean
Shall close o'er its fall;
No dirge but the wild wind,
No tomb but the sea,
Deep 'mid its treasures,
His lone sleep shall be.

Afar o'er the billow
There's gladness to-day,
In the green sunny vale
Where his young children play
And the thought of their sire
Is coupled in glee,
With the joy of a greeting
That never shall be.

And long shall those dear ones
Await—but in vain—
The step that will gladden,
Oh! never again.
They'll list for the loved tone,
So gentle—so gay—
Alas! the Death-Angel
Hath stilled it for aye.

Oh! wave of the ocean!
What tale canst thou tell
Of all o'er whose slumbers
Thou soundest the knell;
Oh! wave of Life's ocean,
Thy merciless surge,
O'er all we have treasured
Is sounding the dirge.

Silently—tearfully—
Leave him to sleep,
Where coral is gleaming,
And dark sea weeds weep;
Yet know that the spirit—
The deathless, the free!
Bows not to the spoiler,
Rests not in the sea! S.

FOR SALE.

A great variety of valuable articles—useful and ornamental—modern and antique, suited to every climate and every taste.

The above may be obtained by application at the—Grab-Box!

Honolulu, Nov. 16, 1855.

We chanced to hear two gentlemen conversing on the probable character of our paper. One thought it would contain all the daily news. The other confidently asserted it would be news of the *weak!*

Honolulu, Nov. 12, 1855.

Dear Editress:

I desire to bespeak one little corner of your paper for the purpose of advocating the great cause of poor oppressed woman-hood, a cause which only the genius of this progressive age could have originated. For years it has been my hope that some dear, sweet reformer like Lucy Stone, would illumine this benighted portion of the earth, and by her vast mental strength burst the narrow bounds of our sphere, and open to us the glorious liberty of free and independent citizenship—a blessing now denied us by the inexorable tyranny of man. This hope, however, had well-nigh spent its last glimmer, when I heard of your intention to devote yourself to the cause of humanity by publishing a paper. Now then, the hour has come when your name can be made immortal by becoming the defender, supporter, aye, creator of Womans' Rights in Hawaii!—When I think of the wrongs heaped upon us, I really wonder that volcanic fires are restricted to the lonely heights of *Mauna Loa*, for surely it is not unreasonable to expect that Nature will avenge the indignities inflicted on—Woman.

Even to mention all the merits of our cause would at once fill a volume *folio*, instead of the aforesaid small corner. But I will take time to point to an example or two of woman's power and influence, when by force of circumstances she has been allowed the privilege of free action.

Take the two best reigns of English sovereigns, and do we not find them embodied in the fair forms of good Queen Elizabeth and the present ruler, Her Majesty Victoria?—What page of history presents more brilliant victories than those won in battle by Joan d'Arc? Had *she* headed the Crimean legions, may we not venture to assert that the taking of Sebastopol would not have been at this day an unsolved problem? The Maid of Saragossa is another whose bravery saved her king and country, by leading troops to victory, under the most adverse circumstances and against fearful odds. Who can forget that the star of Napoleon I. began to decline when he banished his gentle adviser Josephine from his councils?

It would be pleasant both to your readers of the "stronger sex" and myself, to dwell on such examples—of which there are many—but I must turn to the darker side of the picture—our wrongs, which are many and grievous. First. Can the wisest man in this community give a reason *why* one human being has the right to deprive another of a *legal* existence? Why! we are compelled to support and obey laws which we had no voice in making. Expected to honor men in authority and high places, who are there—certainly not by our advice and consent, much less our authority, to say nothing of their merit.

We are deprived of fortunes acquired, if not by our direct efforts, yet by our economy, advice and general direction. Then we are so belittled by every sort of small epithet—"weaker sex," "gentle spirits," and the like—as though *our* part in the great battle of life is not beset with the same trials, sorrows and labors as that of the *soi disant* Lords of creation, and did not require an equal amount of nerve, strength and endurance!

Where would be the power of a bird to soar into the blue ether above us, were it forever to be prisoned within a cage, even though the bars of that cage were of gold, and starred with diamonds? No! strength is the gift of action every where in the mental, moral and physical worlds.

Other absurd and unjust principles might be shown to your readers in all their hideous deformity, but I must reflect that your space is valuable, and rest in the hope of being able, in some future number, to rouse every just and discriminating mind to the importance of this great work, success in which will, I trust, stamp the nineteenth century with immortality, as the era of Woman's Emancipation.

Your's hopefully,
CATHERINE CLATTERTON, L.L.D.

If Russia should repulse the army of the Allies, and invade France, what will prevent Paris from being taken?

The French Consul is respectfully requested to relieve the public mind by replying to the above question.

NOTICE.

The Minister of Finance and Minister of Foreign Relations are respectfully informed that important documents have been received by the Bearer of Despatches, which await their order at the Post-office.

To Contributors.

Contributors will please accept our earnest thanks. Each contribution helped to encourage us onward. We omit many with regret—especially those by "D. N. H," and "Flowers," by "R. J. T."

Old Brooms for New.—It's all very well to talk about new brooms sweeping clean, but there's an old Brough'm in the House of Lords which sweeps away rubbish like a new 'un.—*Punch.*

The Mariner's Request.

"Oh, bury me not in the churchyard old,"
Said a mariner grey as his form waxed cold,
While Death's strong grasp chilled his heart so bold,
And his dark eye glazed as it upward rolled—
"Oh! bury me not in the churchyard old,
Oh! dig not for me in the crumbling mould,
Where the earth worm coils his slimy fold,
A grave so narrow, so dark and so cold.
And bury me not 'neath the flowery sod,
Where the wild bees hum and the daisies nod;
Where the heedless feet of rude rustics plod,
Or the old woods utter glad thanks to God.
And bury me not where the throstle sings,
Where the nestlings young first try their wings,
Where the flower to the breeze its sweet breath flings,
Where the rushes wave near the rivulet's springs,
And the grass grows green and the cowslips blow,
And the lillies fair, and the blue-bells grow,
And the sunlight laughs on the streamlets flow—
There all is beauty and joy I know,
But lay me not down in an earth-grave low."

"Oh! bury me far 'neath the deep blue wave,
It has been my home; I would make my grave
On the crystal floor of a pearl-built cave,
Where the sea nymphs come and their fair forms lave,
Or dance at eve o'er its glittering pave;
Far, far adown 'neath the white waves crest,
There's many a mariner found a rest,
From the storm that wrecked and the howling blast,
A welcome rest they have found at last.
Then bury me far 'neath the deep blue sea,
On its bosom the tall ships bound so free,
There the wind and the wave will wail for me,
And quiet and sweet shall my death-sleep be."

But they heeded not his last behest,
They took no thought of his dying request;
In a cold earth-grave they laid the world's guest,
In a coffin of unplaned boards to rest!

HONOLULU.

HONOLULU, WAHOO, Oct. 30, 1555.

DEAR MOTHER:

We arrived here from the Nor' West about a fortnight ago. Our success this cruise has been about middlin'. But we've all had good health and spirits. The Chaplain gave me your letter. I was right glad to hear such good accounts of matters and things at home. Thank you always for your good advice; I've tried to follow it, and I think it will be easier than heretofore.

When our ship got in we found quite a stir in the community about the new "Sailors' Home." As you get *The Friend*, it is not necessary to go back to the beginning of its history. The good folks here had got the building up, but they had stuck as to funds—and they were waiting for the whaling fleet to come in to help them out. Now, mother, don't think I'm proud when I say that no one ever appealed to a sailor in vain. The fact is, the house was ours from the beginning. The very first donation made for it was a half-dollar, given by a sailor. After the hundreds and thousands of dollars we have worse than thrown away, it would be a pity if we could not build *one* "Sailors' Home." We *can* build it—we have built it. The house is up, but it is not all finished and paid for. The captains and crews take hold of the work with as good will as they ever harpooned a whale, or pulled a rope when homeward bound. The ladies too have joined hands with the gentlemen, and are getting up a "Fair," the proceeds of which are to be used towards completing the house. Things are going on swimmingly just now.

So mother, you need not have so many fears about sending Jerry round Cape Horn, as you had about me. There is a safe retreat preparing, where he may, if he chooses, keep himself from the snares and temptations of a seaport. Our Chaplain is always on hand to help a poor fellow who is trying to steer clear of the breakers.

But I must close. Give my love to Jerry and the Girls.

Your loving son,

RICHARD.

IN THE year 1784 John Adams, afterwards President of the United States, was residing with his family in France. It was the custom of the country for strangers to pay the first visit. Mrs. Adams, whose character every American lady knows, or ought to know, took the earliest opportunity of calling on the Marquise de la Fayette. In a few days the call was returned, and a card of invitation to dinner followed. Mrs. Adams says "She came—we had a large company. There is not a lady in our country who would have gone abroad to dine so little dressed; and one of our fine American ladies who sat by me, glittering in diamonds, watch-chains, girdle, buckles, &c., whispered, Good Heavens! how awfullly she is dressed. I could not forbear returning the whisper, which I most heartily despised by replying, The lady's rank sets her above the little formalities of dress. We wish it was the case now that all who occupy high places would feel themselves above such small matters, and that everyone, of whatever station, would consider that a cultivated and well regulated mind, agreeable manners, and right conduct elevate those that possess them, almost infinitely higher than costly array or sparkling diamonds.

A *select few* of the residents of Honolulu, with the *elite* of their seafaring brethren in port, assembled at the Chapel on Wednesday evening when they enjoyed "the feast of reason, and the flow of soul" until the evening was far spent. They regret the loss those sustained who were not there, and cordially invite all to come up and join them on all similar occasions in the future.

Auction! Auction!

WILL BE SOLD at Public Auction at The Sailor's Home, Friday evening Nov. 16th,

A pair, of fat Live Turkeys.

CHARADE.

My first a laughter-loving wight,
Carking care doth banish quite,
With joy each passing hour to bless,
Eye, ear and taste, its power confess.

Formed now for use, not deeds of fame,
My second seems an humble name,
Yet once, in ages gone, 'tis said,
Sage, bard and warrior sought its aid.

My whole, firm, bold and undismayed
O'er Honolulu casts a shade,
Yet ne'er shall I pronounce the name
Where laws of Maine obedience claim.

ENIGMA.

My whole is composed of 14 letters.
My 1st, 5th, 6th, 7th, 8th and 9th, is a useful artisan.
My 11th, 8th, 13th and 3rd, is the best place in the world.
My 2nd, 3rd, 5th and 1st, is indispensable in cookery.
My 1st, 14th and 5th, is a great favorite with elder-ly ladies and Chinamen.
My 12th, 6th and 7th, is the object of long and perilous voyages.
My 2nd, 8th, 9th, 4th and 3rd, is the most useful of quadrupeds.
My 9th, 12th, 10th and 3rd, is the name of a beautiful flower.
My 2nd, 14th, 9th and 12th, is a rare fellow.
Without my 2nd, 14th, 5th, 7th, 1st and 11th man is miserable.
My 5th, 6th and 9th, is indispensable to animal life.
My whole is the object of the Ladies' Fair.

HAWAIIAN ENIGMA.

I am composed of seven letters.
My 1st, 7th and 5th, is a district on Hawaii.
My 1st, 4th, 3rd and 2nd, is the name of a chief who died in 1852.
My 3rd, 6th and 2nd, is an ornament worn by Hawaiians.
My 4th, 1st and 5th, is an adverb.
My 1st, 5th, 3rd and 4th, is necessary to the prosperity of these islands.
My 4th, 1st, 5th and 7th, is the appellation of deity.
My 1st, 6th and 4th, is the name of a mountain.
My *whole* is the abode of one of the ancient deities of the Hawaiians.

"Bless us" said Mrs. Partington, "what *monsters* those sugar-planters must be. Why some of them have as many as a *hundred* hands."

The Friend.

HONOLULU, JANUARY 1, 1856.

NEW YEAR'S DAY.

"The year is born! the year is born!
The past is numbered with the dead!
What thoughts arise on New Year's morn!
What days—what friends—what hopes are fled!
New time arrives—new works to do—
New cares—new dangers are in view."

The world's history commences a new chapter to-day. Individuals commence anew the journey of life. It is a fit season to break off old and vicious habits, and make good resolutions for the future. Try it reader. Try it seamen. Profit by past experience. Shun whatever is evil. Imitate whatever is good. As we cannot foresee what shall take place in the future, how timely the exhortation of the Psalmist, "Trust in the Lord, and do good, so shalt thou dwell in the land, and verily thou shalt be fed." We should aim to prepare our minds for scenes of sorrow as well as joy, for as it has been aptly and beautifully said by another, "What the years to come will be, no man can say. To some they will come leaping like bride's maids to a wedding; to others they will arrive weeping, like mourners clad in sackcloth to a funeral. It is well that we do not know which it will be!" Hence, let us labor, look up, and trust!

PLENTY OF WHALES.—The universal remark during the past season among whalemen has been, that they saw a plenty of whales. Some have said that they never saw so many in all their going to sea. They were wild, and difficult to take, but still no lack as to numbers. This report does not correspond with that old story, that the whaling business was about done, as all the whales were killed off.

PROCLAMATION BY THE KING.

WE hereby proclaim Our pleasure that Tuesday, the first of January next, be kept as a day of solemn Thanksgiving to Almighty God for His numberless blessings to Our kingdom and people.

(Signed,) KAMEHAMEHA.

PALACE, 10th, Dec. 1855.

HAWAIIAN THANKSGIVING.—By Royal appointment, this day, January 1st, is observed as a day of Thanksgiving. Public religious services will be held at the Court House, at 11 A.M., where a sermon will be preached by the Rev. J. D. Strong.

"And who is my Neighbor?"

About one year ago, a shipmaster by the name of Elliot, commanding a merchant vessel lying in this port preached an excellent sermon from the text, "And who is my neighbor?" It is seldom that we enjoy the privilege of listening to a sermon, but whenever the opportunity occurs we never fail to improve it. The sermon to which we now refer was a most timely effort. Capt. Elliot being a shipmaster, and having been connected with the N. Y. Sailor's Home, his remarks fell with peculiar weight upon the mind. We would add by the way, that he was a local preacher of the Methodist Church. He spoke as one practically acquainted with the subject of Sailor's Homes, and showed their importance so clearly that we have ever since felt that the experiment should be fairly tried in Honolulu. He showed too most clearly that all shipmasters were clearly bound to promote in every possible way the establishment and support of these institutions. His final appeal to his brother shipmasters was so truthful and touching, that we have always regretted it was not committed to writing and published. In his address to landsmen, he showed too, most conclusively, that the sailor in a scriptural sense, *is the neighbor of every christian man*, and furthermore that the landsman should not act the part of the Priest and the Levite, but that of the Good Samaritan. Should these lines ever fall under Capt. Elliot's notice, we desire to express our sincere thanks to him for that sermon. Its influence has been operating, for good upon the mind one, at least, during the past twelve months.

[Written for "The Folio."]

"TIME IS FLEETING."

What though time is short and fleeting
Here below!
Few our friends and cold their greeting,
In our woe!
What though strongest ties are broken,
And farewells are hourly spoken,
Here below!

Time is long enough for duty;
Act to-day,
Ere the bloom of youth and beauty
Pass away;
While our friends around are falling,
And a warning voice is calling
Us away.

Act to-day, and trust the morrow
For its part;
It may bring surcease of sorrow
To the heart;
Like a vision o'er thee stealing,
It may soothe each sadden'd feeling
Of the heart.

D. N. H.

☞ It is a source of great encouragement to the Trustees of the "Home," that Mr. Hunnewell, of Boston, has met with such success as is indicated by the list of donors published in another portion of our columns. We hope others will thereby be provoked to manifest a similar zeal to advance the cause. May it not reasonably be expected that the whaling ports of the U. S. do something? Will they allow Boston the sole honor and privilege of contributing to this enterprize? Contributions may be forwarded to James Hunnewell, Esq., Boston, or to the Rooms of the American S. F. Society, New York. When the enterprize first started, the Trustees estimated that it would require $15,000 for its completion. About $8,000 has already been contributed.

A STEP FORWARD.—In our October number it was our painful duty to report that the Hawaiian Government had taken a step backward, in stopping the mails; but we now rejoice to report that the Government has taken a step in the other direction. A good begging on New Year's. We hope our subscribers will not have occasion to complain that "The Friend" does not reach them regularly.

Foreign Correspondence.

LETTER FROM PITCAIRN'S ISLAND.

The following deeply interesting letter from the Rev. Mr. Nobbs, we received some months since, but its length, and the pressure of other articles prepared for our columns, prevented us from presenting it to our readers. We think our readers will be much interested in the varied contents of this communication.

Death of the author's son—Honorable conduct of the notorious Meiggs—Remarks upon the religious education of the children of the islands—Death of David McCoy—Future prospects of the inhabitants—Reasons for removing to Norfolk Island—Generous conduct of the British Government—Observance of the Sabbath—Day School — Grateful acknowledgements, &c., &c.

PITCAIRN, May 7, 1855.

MY RESPECTED FRIEND—I sent you a few hurried lines some two months since, accompanied by a book recently published relative to our "Rock of the West." The ship by which I forwarded them making so short a stay that I could not answer your kind letter handed me by Capt. Connelly, so fully as I desired. Three days previous to the date of my last letter it pleased God, in His inscrutable wisdom, to call from time to eternity my eldest son Reuben: he had been, for some years past, living in Valparaiso, and by his correct and exemplary conduct obtained the love and respect of all his acquaintance. About twelve months since, during a fit of coughing, he burst a blood-vessel, which reduced him so much that he was obliged to leave his situation and put himself under the directions of his invaluable friend, Dr. Ancrum. After a few weeks the doctor found his case hopeless, and advised him, as a last resource, to return home. There was much difficulty in procuring a passage hitherward, but he succeeded at length in securing for himself and a younger brother (who also betrayed premonitory symptoms of consumption) a cabin on board a French brig bound to Tahiti. There he remained three months in a gradual state of decline, but most kindly and efficiently cared for by Consul Miller, Dr. Johnson and other good Samaritans.

It began to be doubtful at last whether he would be spared to return to his home. In the midst of these doubts an American vessel from San Francisco (ostensibly bound on a pleasure cruise) touched at Tahiti, and the owner of the barque ("American," of Astoria) on learning the anxiety of the lads to return to Pitcairn's, most humanely consented to bring them hither. Accordingly they embarked, and after a lengthened passage of twenty-two days, arrived in safety. To preserve the thread of my desultory epistle as untangled as conveniently possible, I may as well say now what I subsequently learned concerning these humane and apparently honorable parties, the owner and the charterer of the barque who had his family and several others of his relatives on board. On the passage from Tahiti Reuben and his brother could not have been more kindly cared for had they been dearly beloved relatives, neither would these gentlemen accept of any remuneration in the shape of passage money—and Mr. Seamen, the owner of the barque, sent on shore a large supply of such articles as were likely to be needed by my invalid child. Moreover whatever they received from the shore they insisted on paying the established prices, although the community were most solicitous they should receive gratuitously the supplies they needed, in consideration of their sympathy for my children. The conduct of the whole party while here on shore was gentlemanly and consistent with the requirements of christianity, and when they took their departure after two days sojourn, they carried with them the esteem of the whole community. Judge then of our astonishment and regret when a month afterwards we were informed, by a ship from California, that Mr. Meiggs was a defaulter to a very large amount, and that the other parties on board were accessory to and implicated in the fraud! It came upon us somewhat like a domestic affliction, and we still cherish the hope that the accusations are greatly exaggerated: at all events they obtained our respect and heartfelt gratitude, and that gratitude they still possess; and whatever may be the result of Mr. Meiggs conduct at San Francisco, (unfortunate, unjust or exaggerated, as the case may elicit) my daily prayer shall be, that the kindness shewn by Mr. Meiggs to my dying child, and his brother, and his anxiety that any thing on board the ship which could be of service, might be left for my son's use, may be rendered him a thousandfold; and that the commiseration he has expressed for others may be mercifully extended to himself. My poor boy sunk rapidly, after his return; I saw, from the first there was no probability of recovery; but this stroke of domestic affliction was mercifully divested of much of its severity on finding that he was perfectly aware of his situation, and not only resigned to it, but anxiously desirous to depart and enter into the joy of his Lord. Sometimes his dear mother and myself, flattered by the specious appearance of his anxious disease, would hint at the possibility of his being spared to us; but with a gentle shake of the head, he would reply "No dear parents—I feel I am rapidly approaching the grave—humanly speaking, my recovery is impossible, and that my dear father knows as well as I do; and if it is not improper to entertain such a wish, I would rather not return to health again; my earnest desire and prayer is to depart and to be with Christ, which is far better." Such was the tenor of his discourse during the short time he was spared us, and he died "strong in faith, giving glory to God" An hour before his death he was seized with a violent spasm which we thought would have carried him off, but he rallied again. Seeing his mother weeping he said "Do not weep mother, one more such stroke and I shall be in the arms of my Saviour." Shortly after he had another attack, and nothing remained but his attenuated form—the happy spirit returned to join the glorified throng. He died on Friday afternoon, March 2nd, at 6 o'clock.

The Sunday before his death I administered to him the Holy Eucharist—there were eight of us present—and it was indeed a time of refreshing; so awfully sublime did it appear to us all that we felt as if we were indeed where Jacob felt himself to be on his awaking at Luz. I feel very much your debtor for the solicitude you so kindly express for the welfare of this community generally, and myself in particular. As respects my ordination, although I did not seek it, still I am bound to say I have ever considered a scriptural and apostolic induction into the ministry of paramount and vital importance; and I humbly trust that He who mercifully directed me on my voluntary, but arduous, engagements previous to my ordination will still vouchsafe me His support and guidance now that I am more solemnly pledged to Him by the imposition of hands and by prayer. The administration of the holy communion is attended with most beneficial results; otherwise we seem to pursue the even tenor of our way much as we used to do before my visit to England. With us there are neither remarkable declensions nor conversions. The requirements of morality being strictly observed, the children have no bad examples to lead them astray; consequently when the monitions of the Holy Spirit act upon the awakened and willing mind, when the hitherto correct and decent subject of parental anxiety and pastoral care yields the heart and affections to the influences of Divine grace; the vital change is not nearly so remarkable as it would be in those who have lived for years in the neglect of, or in opposition to the immutable precepts promulgated from Sinai. Mistake me not, my worthy friend. Do not for a moment suppose I would assume so unscriptural a dogma as to assert that our children are born with a less corrupt nature than others, or that the seeds of evil are not inherent in their dispositions, in common with all the fallen offspring of fallen Adam. I am sure you will give me credit for a better knowledge of humanity in the abstract, and of the institutes of the Christian religion as taught by Him who spake as never man spake. What I intend to observe is simply this: immorality or profligacy not being countenanced among us; we are, comparatively speaking, ignorant of the ten thousand forms in which vice in England, or America, allures immortals to destruction: so that here when a sinner turns from the error of his ways, it is not with that *eclat* which is too often the attendant of conversion in more civilized, but less favored parts of the christian world. True, the mighty change is not altogether unnoted, although the happy recipient is often the last to believe it. A more frequent and earnest perusal of "God's Book," and increased desire of religious conversation, a more subdued demeanor, and a love for seclusion and retirement speak volumes to the observant and happy father, mother, husband or wife, as the case may be—and the future conversation of the "sinner saved by grace" is "such as becometh the Gospel of Christ."

Such, my dear sir, is the simple history of "conversion" among this community, and I humbly trust that the fruits may continue to proclaim aloud the genuineness of their faith, hope, and charity. I am not attempting metaphysical accuracy in this relation, though I should be sorry to violate it; neither am I disposed to carp at the elaborate and flowing accounts, which occasionally appear of remarkable conversions; all I would say is,

that the only test on the part of the convert, whether the subject of excitement or depression, is that proposed by the Redeemer himself, "By their fruits ye shall know them," and this with us *is* the rule of descrimination. But there is another phase of the consistent professor's life to which I can revert with unmingled satisfaction. "The chamber where the good man meets his fate." It has been my privilege to attend the bed of sickness among this community for 27 years, and I have frequently had the unspeakable happiness to listen to the testimony of the dying believer,—to see death so robbed of its sting that the soul before quitting its frail tenement seemed invested with an antepast of heaven. Such manifestations can by no means be construed into mental hallucinations or transient feelings of excited gratitude—for not to recur to the happy state of mind in which many of our immortals have entered the "dark valley," here, (I refer to my deceased child) he was a young man prostrated in the prime of his days, and for many weeks standing on the brink of eternity ; with a full and solemn view of his state clearly impressed on his mind, both from his own feelings and the conversations of his sorrowing, yet happy friends, he could still amid the ravages and exhaustion of pulmonary consumption, so entirely resign himself to the providential dispensations of his heavenly Father, as to make the exemplary words of his suffering and adorable Saviour the frequent and ardent theme of his aspirations. "Not my will but Thine be done." Were not these sweet words for an earthly parent to listen to ? I found them unspeakably so. Such unwavering confidence with eternity in view strengthens me amid this temporal bereavment. "Bless the Lord O my soul ; and all that is within me bless His holy name."

Three weeks after the demise of my son, death made another inroad among us: A little boy of ten years of age pierced his foot with a barbed arrow, (used for taking fish from the holes of the rocks,) which induced tetanus, and in forty-eight hours after the terrible disease commenced, his happy spirit fled to the realms of bliss. During the intervals of the spasmodic constrictions of the suffering body, the dear child would speak of his blessed Savior, and ask him to take him to be with those whom he blessed when on earth. The patient sufferer was aware that he could not recover, still he never expressed the least dread of death. At the time of his departure I was praying with him ; his parents and several others kneeling around his bed; he gave one slight shudder and exclaimed in a clear, audible voice, "Lord Jes s receive my spirit," and then went to see Him as He is. But one fortnight had elapsed from this period, when another sad and awful bereavement fell upon the community. Daniel Mc Coy and his wife went to the northwest side of the Island in quest of fish. After descending to the rocks, Daniel left his wife and ascended again, with the intention of passing the head of a small inlet of the sea and then going down to the rocks on the other side. While doing so he fell ; and his poor wife saw him roll down the face of the crag and lay motionless on the rugged lava washed by the sea. She had the presence of mind to call a lad, at some distance fishing, and despatch him to the village with the sad tidings that Daniel had fallen, but she did not know the extent of his hurt. She then swam thro' a heavy surf, all alone, and landed close to her husband, whom she found a corpse. Less than half an hour previous he had left her with a smile on his countenance, for Daniel was always in a cheerful mood. What must have been the poor girl's agony as she sat by her deaf husband with his head resting on her lap for more than an hour ere any one could get to her assistance. Her feelings I will not attempt to describe, but I will tell you what she did ; on finding life extinct she knelt down and prayed that God would give her grace so to live that she might rejoin her dear Daniel in heaven ; for I am sure, said she, when speaking to me on the subject, that he was prepared for death, and that takes away the pain of my great loss. I was on the bed at the time of the accident; suffering from Bronchitis, or something very like it, when a long low wail reached my ear accompanied by the exclamation, O dear, dear ! Jumping from my bed I ran out of doors forgetting that I was, or had been sick, and on enquiring what was the matter learned that Daniel McCoy was badly hurt, if not killed by falling from the precipice. Most of the men were out in their canoes fishing; (it being Saturday) the two or three men that were at hand hastened to the spot; and several of the women followed, among whom was my wife; now as they would have to go the same route by which the decease fell I was in great fear lest a similar accident might befall Mrs. Nobbs. I did not say any thing to prevent her going with the other women, because I felt it was as much her duty as theirs to render what assistance she could, for we had been now more than once in a somewhat similar situation and had received much attention from our neighbors, (that is the whole community,) yet I am free to say a heavy load was removed when I saw her return in safety. She had not got so far as the dangerous part of the road when she met one of the men returning, who informed her that poor Daniel was dead. A canoe was sent to summon home the fisherman, and the whaleboat manned and taken to the spot where the corpse lay, when it was put into the boat and brought round to "Bounty Bay," then transferred to a canoe, for a bier, and borne on men's shoulders to the village. I had been busy preparing bandages and such other things as might be necessary, and placed them in the house to which I supposed he would be brought, but the sad news of his death rendered all my intentions useless : however, busying myself about these things kept me in a great measure from the painful impressions induced by suspense, and fretting myself about the safety of my dear wife ; but a chapter from the Bible and a few words of prayer I found to be the panacea. At length the women returned, and my wife and eldest daughter (whom I did know had gone) with them—and I was truly thankful. A messenger now came from "Bounty Bay," summoning me thither, as the sister and brother of the deceased were both attacked with spasmodic fits : taking some remedies, I started, but met them on their way home—poor Lydia McCoy came home in the whaleboat with the corpse. On examining the injuries I found the spine was broken at the bend of the shoulders, and the acciput badly fractured, from which the brain protruded. There was also a deep cut on one of the legs but no other bones were broken that I could ascertain. Such and sudden was the death of Daniel McCoy, a young man beloved by the whole community, and most deservedly so. He is the third of the family which have met an untimely end within a very few years. William McCoy died from lock-jaw, occasioned by a splinter of wood running into his foot. Matthew McCoy, from wounds received by the accidental explosion of a cannon belonging to the "Bounty,"—and now the third brother Daniel, by falling from a precipice on the north-western side of the island. May the God of the widow support poor Lydia under the awful calamity. She has no children to rest her affections upon—but she has a mother, and brothers and sisters, and she has the sympathies of the whole community. On Him who, above all others, well deserves the name of Friend may she place her affections : to Him let her flee as a very present help in time of trouble and all will be well both for time and eternity. Daniel McCoy was in his twenty-third year. I have been more prolix than I intended, but being sure of your christian sympathy in our bereavements, I shall forbear making any apology.

Ere you receive this, the number of inhabitants will exceed two hundred, all, with the exception of three, born on the island. How many will go to Norfolk Islond is, at present a problem which I cannot undertake to solve —there are a few, chiefly the elder people, who wish to remain, but the idea of separation is favored by none—and I am inclined to think that whenever a ship comes to remove them, and they find *that* a reality, which they at present view as merely a probability, all will embark rather than part to meet no more in this world. For myself, if any do remain, I shall stay with them, and request the Bishop of London to send a younger man to assume the clerical duties of Norfolk Island. You ask the question "Why do they go." The reason is very simple, but very cogent, viz. : Want of the adequate means of subsistence. Our rocky island is barely four-and-a-half miles in circumference and most of it is uncultivable—we cannot afford to rear animal food, except in very small quantities—and when ships come for vegetables, we can rarely supply them, so that we have no means of procuring many things which are indispensable to domestic comfort. Several competent and influential persons who have visited us of late years, are of opinion that an emigration should take place—and have reported the same to the British Government, who graciously proposed to remove us to Norfolk Island, on the withdrawing of the penal settlement now in course of operation. Our friends in England are anxious we should avail ourselves of this most eligible opportunity at once, for in case we hesitate, emigrants from the mother country, or the colonies would soon profit by our indecision.

Norfolk Island is, of all places, the best suited to our peculiar circumstances ; and as we must necessarily go some where in a few years at farthest, the best thing, humanly speaking, is to go whenever the authorities at home send out a vessel for the purpose of removing us. I apprehend it would have been ere this but for the war in Europe, and

it is, I think, not probable it will now take place until peace is restored. I do not suppose, go where we may, our sympathies can amalgamate with the soil, as is the case here; every bush and crag on the isolated rock are familiar and old acquaintance. Then the romantic origin of the community affects us similarly, though on a less degree, with our benefactors in the great world; and Pitcairn Island will ever be to us what Zion was to Jews of old, "The city of our solemnities."

Another unpleasant thought will sometimes cross our minds—if we should embark in a body and bid adieu to an island which antagonistic circumstances have succeeded in rendering unique and interesting, and should be placed in juxta-position with families from England or the colonies, as will probably be the case if removed to Norfolk Island, our social identity from circumstances, which we cannot control, will speedily cease to exist and be numbered among the things that were. However the necessity is imperative, and our future is in the hands of Him who doeth all things well.

Our people have collected several articles of their homely manufacture for the benefit of the "Sailor's Home." A few were sent by the same vessel by which I wrote: the remainder will be forwarded by the first opportunity—whenever that may occur—but I fear it will not be previous to November. Ships rarely visit us, although we frequently see them passing on their way to Australia. Whale-ships are the visitors best suited to our requirements; but we have so little to spare that they do not like to come so far off to the westward, and then be disappointed of a supply. Between August and November, 5 or 6 ships might obtain a tolerable supply of yams—but the remainder of the year sweet potatoes (not in large quantities) can only be obtained. Water may generally be had if the weather and surf is favorable; and firewood, though that also is becoming a scarce article. Our present comfortable condition is very much owing to the representations of our inestimable friend, Admiral Moresby. An account of our peculiar situation, our actual wants and prospects, after a careful investigation personally, was transmitted by him to the British Government, and influential private friends, and was farther corroborated by himself as the bearer of despatches. The authorities immediately made a most liberal grant of clothing, tools, &c., and numerous friends set on foot a subscription-list, the proceeds to be consolidated into a fund called "the Pitcairn Island fund." After applying to our immediate use a portion of the money so collected, there is yet £500 invested in the public stocks for our future benefit. In addition to all this, the naval officers on the station, and through their representation many residents in Valpariso have afforded us great assistance. Thus my respected friend I have given you a cursory sketch of the why and the wherefore of our present state and condition: the domestic haunts of the community are more in accordance with the prevalent customs of civilized society than they were thirty years ago, otherwise there is little alteration. The day school is regularly kept and well-attended The Sabbath day strictly observed. The Sunday school numbers sixty persons, under the care of five teachers; and the singing school is frequented three times a-week by the greater part of the community. As to myself, what with my clerical duties, superintendence of the schools, and the medical care of the sick, I am constantly employed, and sometimes laboriously so, but my avocations suit me, and I believe I am suited to them, and thankful I am for health and strength to fulfil them—still I feel old age creeping on, and our meagre living does not agree with me so well as formerly. The Society for the propagation of the gospel unsolicitedly placed me on their list of Missionaries, with an allowance of £50 per annum. But this, being all the income I possess, does not go far in purchasing necessaries for a family of 12, besides grandchildren. Since my return I have given the proceeds of the day-school (one shilling per month) to a young man who is not able to obtain a livelihood by manual labor—and he assists me in teaching. I dare say I might have obtained a larger stipend from various sources in England, but I did not go thither for gain, and I returned quite satisfied with my reception. In the name of the community I am desired to return thanks to yourself and the many friends who contributed to the valuable collection of articles brought hither by H. M. S "Amphitrite." I have written to Mr. Waterhouse and Mr. Whitney, and did I know the names of other donors I would write to them also. I enclose five dollars for any purpose you may choose to appropriate it, and shall feel much obliged if you will, when an opportunity offer, send me a few numbers of the *Friend*, for it is the 'Annalist of the Pacific.'

My spouse and daughters send their love to Mrs. Damon as a sister in Christ, and believe me, my respected friend, that I feel myself very much your debtor for your christian courtesy, which closely resembles that of your countryman and fellow-laborer, the Rev. David Trumbull, who conferred many favors on myself and three of my children while they resided in Valparaiso. Should you call in at General Miller's at any time please offer him my best respects; and the Rev. Mr. Taylor also, of whom I heard my deceased son frequently speak with respect.

Yours in verity and truth,

GEORGE H. NOBBS.

Rev. S. C. Damon.

A Full-Blooded American.—Tim Mullowney, a jolly-looking tar, with the richest of brogues, applied at the Custom House the other day for "purtection" as an American citizen. He was asked for his naturalization papers.—"Me naternal papers, is it, your honor wants," said Tim, with an insinuating grin, "an' me a full-blooded American?"

'You don't mean to say that you were not born in Ireland?"

"Born in Ireland," replied Tim. "Sure I was. But thin, your honor, I kem from Cork to New Orleans last summer, an' there the bloody muskeeteers run their bills into every inch of me, an' sucked out every drop of my Irish blood, good look to 'em an' now I'm a full-blooded American"

These was some philosiphy as well as fun in this reasoning, but it had no effect; and the last that was seen of Tim, he was on his way to the City Hall, to look for "the man who sells the naternal papers."—[N. Orleans paper.]

The following notice of Mr. Lawrence's death, we copy from the "American Messenger" for October.

Death of Abbott Lawrence.—This distinguished Bostonian died August 18th, in his 63d year. From a farmer's boy, coming to Boston at the age of 16 with a bundle under his arm and three dollars in his pocket, he became one of the merchant princes of that city, distinguished for his energy, his enterprise, his liberality, his intelligence, his wealth, and his public and private example. His name was never given to a bad cause. Hon. Edward Everett in speaking of his integrity said, that he was persuaded that if the dome of the State House had been one solid diamond, and laid at his feet as a bribe for a dishonest transaction, he would have spurned it like the dust he trod on. His promise was a sacrament. He also stated that when Mr. Lawrence was offered the post of ambassador to England, he consulted him in regard to accepting it, and inquired if there was any truth in the jest, that an ambassador was one sent to a foreign government to tell lies for his own; adding, that if that was the case, his mind was made up, for he had never yet told a lie, and he was not going to begin at the age of 56 years. He was one of the leaders of the manufacturing and railroad interests of the country in the days of their infancy. A Boston editor says, "It is hardly too much to say, that Lowell, Nashua, Manchester, and Lawrence, owe their existence and prosperity in a great measure to his single individual force of character, in connection with wider forces which it brought into the field." He was the constant and warm friend of education. His beneficence was great: though of large means, the use he made of them was larger, and like his brother Amos, every day of his life was a blessing to somebody. As was said of another Boston merchant, "He had the fortune of a prince, and a heart as much larger than his fortune, as that was greater than a beggar's." By his will he bequeathed $50,000 to the Lawrence Scientific school at Cambridge, in addition to $50,000 given in 1847 for the purpose of founding the school; $50,000 for the building model lodging-houses for the poor of Boston, one-half of the net rents of which are to be distributed annually to various charitable institutions in that city, and the other half to accumulate for a fund to keep the houses in order; $10,000 to the public library in Boston; $5,000 to the Franklin library at Lawrence; and $5,000 each to the American Bible, Tract, and Home Missionary Societies.

☞ Hon. W. L. Lee, Minister Plenipotentiary and Envoy Extraordinary from the Sandwich Islands to our Government, took a final leave of the President of the United States on last Monday week. Before leaving he expressed great gratification at the successful termination of his mission and predicated highly beneficial results to the two countries from the negotiation of the treaty of commercial reciprocity. The President, in reply, concurred with Mr. Lee as to the results likely to be secured by the treaty, and spoke in highly complimentary terms of the manner in which he had conducted his negotiations.—[Am. paper.]

ST JOHN THE EVANGELIST'S DAY.—The Masonic Lodge, in Honolulu, observed the 27th of December, in honor of the memory of St, John the Evangelist. D. A. Ogden, Esq., U. S. Consul, delivered an address on the occasion, at the Court House. The address was highly appropriate, setting forth the principles of the Masonic order, touching upon its antiquity, and combatting some of those objections commonly urged against it. Some passages in the address were quite eloquent. The orator of the day read at the opening of the exercises, from a printed document, some statements of an historical nature, which were rather startling. Such, for example, as that the Evangelist John, after he was ninety years of age, and while Bishop of Ephesus, become the Patron, or Grand Master of the Masonic Lodge at Jerusalem! Dr. Gilliou officiated as Chaplain upon the occasion, and the Circus Band entertained the audience with excellent music. This Masonic Lodge appears, to the uninitiated, in a very prosperous condition

THE FRIEND BOUND.

Bound volumes of the Friend, may be obtained, at the Chaplain's study or at Dr. Hoffman's Drug store.

☞ Although our present list of exchanges is quite respectable, yet we are desirous of enlarging it, and for this purpose, that we may furnish the Reading Room at the Home. We would call the attention of all Newspaper Publishers to this notice, to whom this and the following numbers of our paper may be sent. We are especially desirous of obtaining newspapers published in the Eastern Atlantic States, because large numbers of seamen visiting Honolulu are from that region. All our old exchanges will please continue their favors.

COLLISION.—On the morning of Dec. 2d, while the E. F. Mason Capt. Jernegan, and the Vernon, Capt. Gardner, were lying off and on, they came together, producing sad injury to both vessels. The Mason, struck the Vernon abreast of the main chains. They were together about two hours. The Mason lost her cut-water and carried away about 30 feet of her main rail, besides other serious injuries. She has been undergoing repairs and will be ready for sea, about the 15th of this month. The Vernen lost all her spars, except bow spirit and fore mast. Her main mast fell across the Masons deck. She was much more seriously injured than her companion It was quite surprising and providential that no lives were lost or limbs broken. Report says that both vessels had lights, but the night was dark and the wind blowing quite fresh. The Vernon was afterwards towed into the harbor by the steamer Akamai.

The Whaleman's Friend.

A WHALING VESSEL IN THE ICE.

(From the New Bedford Mercury, Sept. 25.)

Ship Congress, Capt. Bartlett, which sailed from this port July 25th, on a whaling voyage to Northumberland Inlet, Davis Strait, expecting to pursue the fishery there during a season of about 2 months, and then either to be frozen in or to go south after sperm whales and return north in the spring, arrived at this port this morning, having met with an untoward accident. We learn the following particulars of the voyage from Capt. Bartlett and his officers.

The first ice was seen on the 20th of August in latitude 61 North, longitude 56 West. On the 25th they made the south end of Cumberland Island; on the 27th, lat. 64, lon. 62.50. they saw land bearing from west to north by east. There was a thick fog prevailing during the day and ice in all directions; light sails were taken in and the ship was hove back to avoid the ice. On the 28th, it lighted up a little at daylight and a boat-steerer was stationed upon the try works as a lookout. The ship was under whole topsails and going at about 3½ knots per hour, when the lookout gave the signal to keep clear of a cake of ice that was drifting towards them, but the ship was so near that it was impossible to avoid it, and she struck the ice on the larboard bow, staving in three planks and four timbers, together with the ceiling, leaving an aperture about four feet in length by three in width, causing the ship nearly to sink. Both pumps were started as soon as possible, and after ten minutes, thirty inches of water were found in the hold. Not finding it possible to free the ship by the pumps, threw overboard shooks, coal, wood, and everything forward of the fore hatch. In twenty minutes after the ship struck, forty inches of water in the hold. After lightening the ship for three hours and tipping her by the stern, they succeeded in getting the broken planks partly out of water, and in four hours the vessel was free from water. In the morning, when the Congress struck, there was a heavy swell from the southwest, which continued through the day. At night she drew 18 feet of water aft and 10 feet forward.

On the 29th, the timbers were cut away inside, and they succeeded in getting some canvas and boards over the hole, and stanchions to keep them in place, and prevent the sea from coming in. The next day a canvas mat was drawn over the aperture on the outside, and the ship was kept before the wind, it being East, with the hope of finding land as soon as possible. The ensuing two days, August 31 and Sept. 1, they experienced a very heavy gale from the N. N. E., during which the ship labored hard, and leaked from 400 to 500 strokes per hour On the 3d of September, the Congress made land and came to anchor at Hopedale, on the coast of Labrador, lat. 55 30, lon. 60. They remained there two days, during which the ship was heeled, and repairs made. On the 7th they started for home, the ship leaking about 50 strokes per hour on the passage.

Mr. Smith, the 2d officer, was the only man aboard who had ever been on the grounds before. He was there last season in a New London vessel, which made a very successful voyage. He thinks that if this accident had not occurred, the Congress would have found plenty of whales. He informs us that he never saw so much ice there before; the shores were lined for fifteen or twenty miles out to sea, with solid packed ice, which had been driven in by the southerly winds that had been prevailing for a few days previous. The ship, at the time she struck, was laying off and on, waiting for the wind to shift and clear the ice away, they being but about 30 miles from the entrance to Northumberland Inlet.

The Congress is the first ship that has been sent to these regions from this port. Several New London vessels have been sent there within the past few years, and have made good voyages. The Congress saw no whales, not having passed through the Inlet to the whaling grounds.

Piracy and Murder on Board a New Bedford Whaler.—The following account of the seizure of the ship John, of New Bedford, and the murder of the captain, first and second mates, and a number of the crew, is from the Empire, of Sydney, N. S. W. of July 11th:—

We are indebted to Capt. Bowles of the schooner Black Dog, which arrived from the Islands July 8th, for the following report of a daring and murderous piracy committed on board the ship John of New Bedford, by two South Sea Islanders. The particulars were supplied to Capt. Bowles by one Francis John, a white man stationed on Roche's Island, in lat. 2 degrees 32 minutes South, lon. 176 degrees 9 minutes East. It appears that on April 17, a vessel was seen standing towards the Island from the southeast, and the Black Dog being expected there, several canoes put off to meet her. No sooner were they alongside. however, than two natives presented fire-arms and drove them away. Francis John, seeing the vessel in distress, then pulled to her, when he was hailed by the natives, who inquired to what country he belonged, and if not to London. On answering in the affirmative, he was warned off, and told that "no white man was wanted alongside." Believing the vessel to have been forcibly taken by the two natives, he communicated a suspicion to two other natives who were in his canoe, and made an attempt to board her, but was repelled with loaded muskets. Finding it impossible to get on board, he returned to the shore. Subsequently another canoe, manned by natives, went alongside, and entered into conversation with the pirates, who divulged their horrid deed of which they were guilty, and the motives that led to its commission. The captain of the John having ill used them, they took advantage of the absence of two boats and the greater part of the crew, to indulge an insatiate desire for revenge. Besides the two natives, the captain, cook and cooper were left on board; these they killed.

After the capture of a whale, the mate's boat went alongside with it; he was killed with spades, and all his crew but one man, who pushed off from their reach and was left astern, the vessel having some way upon her. Soon after the second mate's boat was alongside, he and three men were killed, the remaining two pushed off from her, and joined the other boat In this predicament they were left on the wide sea without compass or food. This statement was voluntary on the part of the pirates, and from information gained from the natives of Roche's Island, is believed by Capt. Bowles to be correct. On being asked where the ship was bound, the pirates replied, "to Ocean Island," but if unable to make it, they would run her ashore where no white man lived. Francis John, the white man, read the ship's name — "John, New Bedford," she had a jib, foresail, foretopsail, main and mizzen-topsail set. The main top-gallant sail, and spanker, were also set. She was on the starboard tack, and seemed to have been so from the time of her seizure, as both fore and main tacks were well down, which could hardly be accomplished by two blacks. When last seen she was steering wild from north to west. Prior to leaving, the pirates offered tobacco and other inducements to the natives of Roche's Island to join them, but to no purpose. The Black Dog arrived at Roache's Island, April 29th, twelve days after the John's visit, Had the interval been shorter Capt. Bowles would have made an attempt to discover her whereabouts.

There seems to be no room for doubt that the officers and a portion of the crew were murdered, and that the remainder of the crew were left ty the mercy of the waves. The captain of the John was Otis Tilton of Edgartown, the first mate, Henry C Allen, son of Joseph Allen, Jr. of New Bedford, and the second mate Isaac W. Gallop, of New London. The ship was owned by Frederick Parker, Esq. of New Bedford and was last reported at Paita, Jan. 24, bound to the Sandwich Islands with 350 sperm, and 350 whale oil.

Return of the Arctic Expedition.—The news of the arrival of Dr. Kane and the members of the Arctic expedition which left this port on the 31st of May, 1853, will be received throughout the country with feelings of pleasure and delight. It was feared by many that our brave and gallant countryman, who had perilled his own life in search of Sir John Franklin, had shared the fate of the lost navigator; and had it not been for the most unwearying perseverance and undaunted courage in the midst of the perils by which he was surrounded, he would probably never have returned to his native land. The account of his adventures and explorations in the Arctic regions will be read with deepest interest, and the additions which he has made to the geography of the Polar regions will be received by the scientific world with that consideration to which their importance entitles them. The party composing the expedition travelled a distance of thirteen hundred miles over the ice, and although subjected to much suffering and hardship arrived at the Danish settlement of Leavely with a loss of only three out of nineteen. They were obliged to abandon their vessel, the Advance as she was completely frozen in, and as Dr. Kane considered it unsafe to pass another winter in her.—[Am. paper.

MAN.—Every physician knows, though metaphysicians know little about it, that the laws which govern the animal machine are as certain and invariable as those which guide the planetary system; and are as little within the control of the human being who is subject to them.—*Priestley.*

A YANKEE CHARACTER.—About twenty-five years since, J. R., a young man of Charleston, Mass., impelled by that love of adventure that characterises so many of the boys in the Atlantic cities, started off as a common sailor, to see the world. By his correct deportment, he was soon appointed mate of a ship, and spent a long time in the East Indies, cruising and trading amongst the Spice Islands, to Canton, &c. Business called him to the Feejee Islands, where he took a liking to the King's daughter, and the matter being "agreeable all round," the Princess and the American sailor boy were duly married. In a short time he was appointed Governor of one of the Islands, where he has reared a family, and exercises great influence.

These Islands lie between the 15th and 18th degrees of south latitude; the climate is so warm but little clothing is required, and many dispense with it altogether, as a superfluous luxury, tropical fruits grow spontaneously, and most of the useful vegetables of the temperate zone have been introduced by trading ships. Some useful arts are practised; but the people generally are of a savage and barbarous character; of dark complexion, tall, with large mouths, and many disgusting habits; their morals are not much attractive; covetiousness abounds, and they generally lie in preference of speaking the truth. Some Missionaries, and a good many runaway sailors, are settling among them, and it is to be hoped the character of the people, in many respects, will be gradually elevated.

The American Sailor Boy has already introduced many "improvements" on his island; has induced the natives to abolish cannibalism and human sacrifices; to erect better dwellings, and pay more regard to the decencies of life.

Should this number of the Cincinnatti Gazette reach Mr. R., he is informed that a legacy of a few thousand dollars has been left him which he can receive should his excellency ever revisit the United States.--[Cincinnati Gazette.

WHAT CAUSES THE DECAY OF TIMBER.—Some years ago a philosopher, being acquainted with the fact that every species of fungus, which is the real source of the rot in timber, can vegetate only on substances whch are soluble in water, made the following experiment with sawdust. He took a portion of sawdust from a heap and divided it into two equal parts One heap was washed over and over again in water, till every soluble part was removed; the other heap was undisturbed. Both, having been dried, were placed side by side, in a damp, close vault, and allowed to remain there several weeks. They were at length taken out, and the following was the result; that portion which was washed until nothing more could be washed off by water, remained clean and bright as when it was carried into the vault; the unwashed portion had become a prey of foul parasites, and was completely imbedded in an offensive mass of mould. This experiment proved the theory of the philosopher, and convinced him, that, if by any means, our timber of any sort could be deprived of all those matters contained in it which are soluble in water, it could be kept any number of years entirely free from rot.

REMARKS UPON THE HOME ENTERPRISE.

By D. A. Ogden, U. S. Consul, at the Bethel, Friday evening Nov. 7th, 1855.

We are to build a Sailor's Home to meet a want, and like all benevolent and meretorious enterprises, we are not to pause or cease our labors because obstacles meet us, nor because we may not see clearly the whole good to be accomplished. The enquiry we are to make is, Will this enterprise, the Sailor's Home do good? Is it demanded? Do the best interests of the sailor—does his moral intellectual and physical good call for it? Will it tend to elevate him, to excite his ambition and make him a better man? These answered in the affirmative and we have nothing to do but to go ahead, to persevere and struggle on. We do not, and have no right to expect, we should mistake the teaching of our own experience and the well settled principles of human action, did we look to the Sailor's Home for the reformation of all the sailors who resort to our port. The question is not whether all or a major part, even, will be made better and more comfortable, but the appeal that comes to the heart of benevolence is, will any? Can one sailor—can a few, of the wanderers on the deep, be better provided for, stimulated to more noble action, elevated to be better and happier men? Satisfied of this, we move on, without stopping to quarrel with the fault-finder, or to combat the sophistry of the cold-hearted. The aim is to do good; there is need and room for it, the prospect for its accomplishment is reasonable, and we do our duty, and only do it, when we make the effort, and use to the utmost the means we have at command. The Sailor's Home is designed to do the Sailors who come to Honolulu, good, to provide for them more comfortable quarters, to throw about them stronger moral influences, *something of the purity and sacredness of Home*, to elevate their thoughts, invigorate their manhood, inspire hope, and awaken a spirit of emulation. That all sailors are to be thus acted on and influenced is not claimed; that all the vicious are to be reformed, all the wayward subdued, and all the bad made good no one pretends; but we do claim, we do expect, that some will be lifted up, reformed made better and happier, and if that number be but ten or even one for every year, the end sought will be attained, and we shall all feel that our labor has not been in vain. It is not the spirit of genuine and warm benevolence, of honest and heart-felt charity to stop and coldly calculate the cost, and canvass the chances with a view of striking balances. But looking upon wretchedness and suffering, upon woe and want, the true man says, "I will make an effort, I will do what I can, trusting that the Wise Disposer of events will bless the work, Be the good done great or small, be the number benefitted few or many, I at least will have a conscience void of offence towards God and man, I at least can say—I have done what I could."

OF ABUSES.—There is a time when men will not suffer bad things because their ancestors have suffered worse. There is a time when the hoary head of inveterate abuse will neither draw reverence nor obtain protection.—*Burke.*

A CARD.

DR. M'KIBBEN, SURGEON, &C.,

INFORMS the inhabitants and visitors of Honolulu and neighborhood, that he intends practicing in the different branches of his profession, and hopes he may rest his claims to their confidence on an experience of nearly forty years as a practitioner in a large seaport and manufacturing town, to the principal hospital of which he was for many years attached as operating Surgeon.

In private practice, the diseases of women and children have received much of his study and attention.

Residence,—the house lately occupied by J. C. Spalding, Esq., Union street.

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

SAM'L N. CASTLE, AMOS S. COOKE.

CASTLE & COOKE,

Importers and Wholesale and Retail Dealers in General Merchandise,

At the old stand, corner of King and School streets, near the large Stone Church.—Also, at the Store formerly occupied by C. H. Nicholson, in King St., opposite the Seamen's Chapel. 35-tf

G. H. BURGESS,

Artist and Wood Engraver. 32-tf

MARRIED.

In Honolulu, by the Rev. S. C. Damon, Nov. 30th, Mr. J. F. Tibbetts to Milliama, both of Honolulu.

Dec 2nd, Mr. W. E. Cutroll, of the Merchant's Exchange Hotel, to Miss Lydia Brooks, both of Honolulu.

Dec. 20th, Mr. W. Fehlbehr, of Lahaina, to M. Kaina, of Honolulu.

DIED.

At Lahaina, December 5th, at his residence, GEORGE M. CHASE, Esq., U. S. Consul. The deceased has for a long period suffered from debility, but his final sickness was short and his death quite unexpected. He was able to attend at his office until a very few days before his death. Mr. Chase was universally beloved and respected for his many estimable and noble traits of character. In the discharge of his official duties he was very popular, while in the social and domestic relations of life but few were more beloved.

In Honolulu, 24th Dec., Mr. Matthews, an engineer. Being a member of the Masonic Order, his funeral was attended by the Lodge of this city.

April 7th, 1855, on board ship Nassau, James Weeks, belonging to Henderson, New York. His disease, the typhoid fever. At the time of his death, the vessel was three day's sail from Guam. [Communicated by Capt. Murdock.]

Lost overboard and drowned, S. L. 37° and E. L. 1° Dec. 27, 1854, William Burns, cook of ship Robin Hood. On board the same vessel, July 22, 1855, John H. Launise fell into the cooler or deck-pot, and was badly scalded, living only 30 hours. He belonged to the city of New York. His body was buried upon the Shasta Island. [Communicated by captain of Robin Hood.]

On board French whal-ship Ville de Reine, Nov. 25th, William Cound, an American sailor, belonging to Boston. His disease was the scurvy.

At U. S. Hospital, Honolulu, Dec., 1855, Mr. William Bradley Lewis, a native of Western New York, where he has friends now residing, and also in Wisconsin, for many years an officer on board different whale-ships. [Western papers requested to copy.]

On board of the Ontario, in the Ochotsk Sea, Aug. 10, 1855, James Garnet, of East Hampton, Long Island, He was buried in Dinmore Bay, and the funeral service was read over his remains by Capt. B. Lamphiere, of the Lagoda. [Communicated.]

P.S. Only a few days subsequent (Oct 7th), Capt. Lamphier, was drowned, and his body never recovered See *Friend*, Nov. 14th.

In Honolulu, Dec. 7th, Charlie Williams, infant son of D. M. and M. J. Weston, aged 1 year and 3 weeks.

The Friend.

HONOLULU, FEBRUARY 1, 1856.

The Sandwich Islands' MONTHLY MAGAZINE. January, 1856. *Honolulu: Printed and pulished by A. Fornander, at the "New Era and Argus" Office. Price fifty cents.*

At a time when our dull season is about commencing, and "hard times" is the too common remark, a monthly Magazine makes its appearance. Really its projectors and publisher deserve the thanks of the foreign residents on the Sandwich Islands. The effort redeems our community from the stigma of being destitute of literary talent. The idea of such a publication is excellent, and we sincerely hope it may succeed. Let no one complain of the price, for its publisher can say in the language of Dr. Smollett, "Gentlemen, the price of our paper is as low as it can be afforded or obtained at any shop in London."

From the "Prefatory" we learn that its conductors intend that "no pent up Utica" shall contract their powers. We are glad to see that "a large space" will be given to the development of Hawaiian history. "The Foreign Missionary enterprize" will find a place. Science too—and last, but not least, Theology, will not not be forgotten. Commerce, agriculture, new works, etc., are not to escape the notice of its conductors and publisher. Really its readers will have no occasion to complain if a tythe of this programme is brought out from month to month in this tropical country, where man's mental as well as physical energies feel the enervating effects of the climate.

The first article on "The Polynesian race, and lost islands of the Pacific" is richly worth the price of the number, and in our next issue we intend copying it entire, as we do not see the work is copy-righted!

We do not intend noticing all the articles; we would merely add that "a thought" upon civilization is worth thinking about. To the brief remark from Sherlock, we direct the special attention of all our readers, teetotal, as well as those holding opposite opinions.

INTEMPERANCE.—Those men who destroy a healthful constitution of body by intemperance and an irregular life, do as manifestly kill themselves, as those who hang, or poi-on or drown themselves.—[Sherlock.

So much of the editor's "Chit-Chat" as relates to preachers, we would especially commend to the perusal of the clergy.

☞ One of the largest distilleries in Scotland, the Leith Distillery, where 1,200,000 gallons of whisky used annually to be made, has just been converted into a flour mill.

Some months or years ago, we read a remark going the round of the papers, that such was the amount of intemperance in Scotland that it deserved the name of "drunken Scotland." This remark, if we recollect aright, was made by some member of Parliament. We are glad to see the tide flowing in another direction. Turning *distilleries* into *flour mills* will dry a fountain of tears, gladden many starving families, make prisons tenantless, and cause angels to rejoice. We shall be glad to report further progress.

BRITISH AND AMERICAN TONNAGE.—The shipping of the world is estimated at 145,500 vessels, and the aggregate tonnage at 15,500,000. Hunt's Magazine estimates that at $50 a ton the shipping of the world is worth the enormous amount of $775,000,000. Of this fifteen and a half millions of tonnage, more than ten and a half millions belong to the Anglo-Saxon race; United States 40,500 vessels, and 5,661,416 tonnage; Great Britain, 35,960 vessels, and 5,043,270 tonnage.

We heard a member of the British Parliament say in his place less than two years ago that the tonnage of America would in a few years exceed that of Great Britain. At that moment, as we ascertained the next morning by consulting the proper authorities in the banking house of Baring Brothers, it was *greater*, and now we have the evidence that both the number of vessels and the amount of tonnage of the United States exceed that of Great Britain!—[New York Observer.

VOLCANO STILL IN ACTION.

Under date of Dec 28th, the Rev Mr. Coan writes as follows:

"Every day darkens the prospects of Hilo. The stream comes in great force, some two miles a-week. Three or four miles will bring it through the woods. It follows water channels, dries up aqueous matter, and forms fiery cascades of terrible sublimity. It heads straight down upon us, and nothing but the hand of Omnipotence can save our town and bay. Our expulsion seems every day more and more a solemn reality. Molten fires are gleaming, trees are falling, the jungle is consuming, rivers are boiling and ascending in steam clouds. Onward, onward, rolls the burning deluge; slowly, sullenly, relentlessly and with resistless force. I hope to be able to give you a full account in time.

"P. S. A man died this morning from falling into the boiling water near the fused lava stream. The molten flood is still making fearful progress towards Hilo."

WHAT IS GAINED BY TOTAL ABSTINANCE?

Those who abstain from the use of intoxicating drinks, do certainly avoid being made the dupes of the liquor-dealer! It is not to be supposed those who drink intoxicating liquors at the islands, are duped. Oh no! The shippers of liquor in New York, Boston and London, send out to the Pacific, the pure article! They retain for the home consumption the base and adulterated article!

The New York Times, in the course of an article on liquors, says, "The fact is, nineteen-twentieths of all the wines and brandies drank in this country—and nine hundred and ninety nine thousandths of all the rare and costly wines over which our high livers smack their lips and roll their eyes, and astonish their epicurean friends, are manufactured for the market—made up by a skillful compound of drugs, with infusions of flavoring matter and a basis of alcoholic or vinous material, so as to resemble any brandy or any sort of liquid that may be desired."

☞ Thinking it might be interesting to our seafaring readers belonging to Martha's Vinyard, a *Bank Note* of One Dollar's value has been exhibited to us, issued by the New Bank on Martha's Vinyard. It is the first bank there established. As might be expected, a member of the *Pease* family is Cashier, and a *Fisher* is the President. We think those two families must embrace nearly all the population of the Island.

The Whaleman's Friend.

SIMODA AND HAKODADI AS RENDEZVOUS FOR THE WHALING FLEET.

San Francisco, Nov. 2, 1855.

Editor of the San Francisco Herald:—Previous to embarking for Japan, I was requested by Messrs. Elias Perkins, D. Waterman, R. Coady & Co., and others who are known to be largely interested in the whaling fleet, to furnish them with such information as I might gain of the ports of Simoda and Hakodadi—as to their adaptation and fitness, etc., for whale ships to rendezvous or quarter at. In answering their interrogations, there are facts that may interest the general shipping public, and, with your consent, I select the *Herald* as a proper medium through which to reply. First: Simoda furnishes not much encouragement for whale ships, from the fact that the harbor is not well protected, and the holding ground not reliable. The prevailing winds are from the southeast, and at such times the harbor of Simoda is like an open roadstead, quite as much sea as outside. In addition there is no good or safe place to haul down a ship. The climate of this place is well adapted to whalemen's wants; and in this respect I am sure none is to be found more agreeable. Protection to the Captains for their crews is also abundant, for they could not by any means have men desert them; on the contrary, they might find the Japanese too zealous watchmen over them. The charges are of no amount scarcely—only a fee of five dollars for pilotage is recognized or asked by them—no port charges, export or import duty. Wood and water, if furnished, are at low rates, say fifty cents for large casks of water, and three dollars per cord for good wood. Vegetables are plenty, and not expensive; I saw no Irish potatoes, but abundance of sweet potatoes, and cheap as well as fine. Salt and fresh fish are also abundant, as well as eggs, chickens, and ducks. Eggs are cheap, but chickens nine dollars per dozen. Beef is plenty, but they will not sell it. But for this restriction, I see nothing to prevent whaleships from finding it a good harbor to supply themselves with fresh provisions, as well as vegetables. Simoda, then, will never become a popular whaling depot, on account of its bad harbor. The The other objections can and may soon be overruled. There is, however, a beautiful harbor thirty miles from Simoda, which is peculiarly adapted to the whalemen's wants, I refer to the harbor of Heda; in this harbor is abundant room for a large fleet, and perfectly land-locked or protected; good facilities for hauling down a ship, and the harbor is easy of escape. The United States surveying steamer John Hancock visited and surveyed this harbor, and confirms the favorable report of one Captain Worth, and also that of the Russians; in short the harbor of Heda has all the facilities that any natural harbor could have for the accommodation of ships; I know no reason why the Japanese could not be prevailed upon to exchange the harbor of Heda for that of Simoda, or in other words allow American ships to run into Heda instead of Simoda.

It is supposed that Commodore Perry was anxious in selecting two harbors, to locate one of them as near Jeddo as possible, and being ignorant of the geography of the country or coast, selected Simoda, not from its good qualities, but from its being a tolerable harbor near Jeddo, when, undoubtedly, if he had known of Heda he would have chosen it. Hakodadi is located on the Straits of Sangar, about forty-five miles from its mouth or from the ocean. This narbor (to use the expression of Lieut. Maury) is realy the finest harbor in the world, with unlimited capacity for ships, well protected or land-locked, good holding grounds, and facilities for hauling down and repairing. The Straits are narrow with a strong current one way or the other, according to tide; and Hakodadi being equidistant from each mouth, and the entrance to Hakodadi Bay being quite narrow, affords no chance for seas or swells, hence at no time can there be sufficient swell to prevent the most indifferent boat from crossing the Bay. In relation to Hakodadi I can conceive of but one objection to this port becoming a popular resort for whaling ships, and that is, it might be rather too cold in January and February. I was told that in these two months there was more or less snow fell, yet it never stays upon the ground for any length ot time. I was told that the ground never became frozen and seldom ice ever made to the thickness of window-glass. I may be mistaken, yet I think that it is never colder there than it was here in the winter of '53 and '54, that winter, ice froze, in small standing bodies, to the thickness of window-glass. Wood, water, vegetables, and other things mentioned at Simoda, are as plenty, or more so, at Hakodadi, and beef-cattle, appear more abundant. I also saw at this place, Irish potatoes growing, and fruit and nuts are abundant. The location of this place, its proximity to the whaling-ground being only about four days' sail therefrom, and laying directly in the road of whale-ships from the line-cruise to the northwest cruising grounds; also, laying as it does on the direct line, marked by Lieut. Maury, of clippers from Canton or China to San Francisco, thus rendering the transhipment of oil sure and direct: all combined make this the natural resort of whale ships. I observed also any amount of whales during the two days we were becalmed off the east entrance of Sangar Straits. I see no reason why, as soon as the Japanese become reconciled to the treaty, our whale ships will not, from policy, frequent this last mentioned place, and as soon as they do become reconciled, Americans will be there to furnish them with all things requisite. Merchantmen will readily resort there to repair damages, and clippers will universally call there for freight and passengers. And from this day forward it is bound to be a favorite resort for ships of war of all nations cruising in those waters. I was informed that the "Allies" would winter there this coming winter. And the impression was that Com. Abbot would rendezvous there instead of China, on account of its being so much more healthy. All things considered, I look forward, and to no very remote time either, and see Hakodadi a large commercial place, with natural facilities not equalled by any other place within my knowledge, and a location such as will early force commerce upon her.

Hoping, gentlemen, that I have answered all your interrogations, and knowing as I do the deep interest you feel in gaining correct information of these ports, I will only add, I am conscious of having made fair representations, and beg to remain as ever,

Yours, faithfully

W. C. REED.

☞ The following letter we copy from a late number of the *New York Observer*. It was addressed to the Rev. Mr. Jones, one of the Seamen's Chaplains in New York city. Having met with not a few young men whose career, in many respects, corresponds to that deliniated in this letter, we feel authorized to endorse its truthfulness. It is gratifying and encouraging to contemplate examples of this description, for they are such apt and forcible illustrations of the language of scripture, "Cast thy bread upon the waters, for thou shalt find it after many days. "Blessed are ye that sow beside all waters."

A SAILOR'S AUTO-BIOGRAPHY.

"Sailor's Home," N. Y., June 1, 1855.

Dear Sir:—In accordance with your kind request, and the promise given, the following lines are written in the hope that they may prove of some interest to yourself, and that they may be considered as one more encouragement to the efforts being exerted in behalf of seamen.

I feel assured that my letter will prove a source of joy to you, for it will be perceived that one more immortal spirit has turned unto God through your instrumentality; that the simple and casual remarks, so quietly made, were followed by the influence of the Holy Spirit, causing a deep conviction of sin, then repentance, and finally faith and hope in Christ.

A few of the circumstances attending the change which has occurred, through the mercy of God, have already been stated; but to show how great has been the mercy extended, I will give an outline of my career until the present time.

In early life, the advantages of an education were offered me by a pious father, whose intention was to educate a son for the ministry. Providence had blessed my father in his business, so that a want of means to defray collegiate expenses, was not a difficulty to contend with. A kind, loving mother and affection brothers and sisters were ready to assist me to the utmost of their power, but, unfortunately, as it afterwards proved, at my own solicitation, I was sent from home at the age of fourteen, and entered an academical institution, located in a village situated in the northern part of this state. Previous to my departure, resolutions had been formed, promises given, and my parents had prepared a series of written rules for my guidance while absent from the parental roof.

Although residing with relatives in the village, scarcely two months passed by ere I had entered upon a downward course. By degrees, objectional associations and intimacies were formed, my promises were forgotten, and I disregarded the rules given by my parents. In the short period of seven months, I had acquired the habits of smoking, chewing, and drinking intoxicating liquors. Upon

learning my evil course, I was instantly recalled by my parents, who wept over my early fall, but who forgave the deep transgressions.

I was then placed at school at the Columbia College Grammar Institute, and for a short time made rapid progress, but I soon formed improper friendships, became weary of the restraints of the school room, and longed to become a merchant. My wishes were gratified, and I was allowed to leave home to enter a country store as junior clerk. Soon becoming dissatisfied, and having yielded to temptation, I was recalled. It is almost unnecessary to say that my course was still downward. My parents forgave me again and again, and procured excellent situations for me, but all promises were broken as soon as I was not under a watchful father's eye, and my career was marked by dissipation.

By the disobedience and ingratitude rendered my parents, at length, all confidence was lost, my father's hair had grown white in sorrow, my mother's heart was bowed down with grief, and the affection of brothers and sisters began to lose its brightness.

In the month of September, 1849, I was placed on board a whaling ship bound for a cruise in the Arctic Ocean, in the hope that such a voyage might be the means of correcting my evil habits. We had a prosperous voyage, and arrived home again after an absence of nineteen months.

As my "out fit" had been given me, there were $245 in my locker when we were "paid off," but this was soon disposed of, sailor fashion, and once more I embarked in a whaler.

The second voyage was an unlucky one; we were unsuccessful in capturing whales, passed through many dangers and much hardship, and long before the trip was concluded, I had been discharged into hospital at Tahiti, Society Islands. There, in sickness, thousands of miles from home, amid strangers, I thought of those I loved, although I had wronged them, and a resolution was made to lead an upright life, should I ever be enabled to reach New York. Through the mercy of God, I was allowed once more to clasp the hands of relations and friends, and receive a welcome of which I was undeserving. All this time I was living in violation of God's law; the name of God was never uttered but to curse. Religion was scoffed at, ridiculed, and made a means of sport.

As soon as my health was restored, I once again became a clerk, and received a fair salary. All went smoothly for a few months, but temptation came, and I had not strength to resist. I did not give way entirely to dissipation, but would be steady at times, and as a new influence was brought to bear upon my life, it was hoped an entire and permanent change would take place. Suddenly, an accident occurred, which prostrated me on a bed of pain for weary months, and it was believed to be one of the consequences attending a life of dissipation. My life had been spared, as it were by a miracle, yet my heart gave no thanks to God, whose mercy permitted me to live. This dispensation, instead of awakening me to a sense of my lost condition, but seemed to make me more careless and indifferent. Again I disgraced my relations and friends, and as my conduct had estranged me from all, I left home last winter in anger, with the determination never again to cross the threshold of my father's house. None ever desired to see me again, until I had become a better man. All affection had died. I had outraged all propriety; trampled upon every holy feeling; caused my parents days and nights of sleepless agony; defied God and man; I was not fit to live, and I cannot conceive how my life could have been spared by that Infinite Being whom I had reviled, blasphemed and hated. The next day after my arrival at the "Sailor's Home," by the persuasions of a friend, I was induced to sign the pledge, and resolved to keep it. One evening while seated at the table in the reading room, conversing with some seamen lately returned from various voyages, an invitation was extended to visit the house of prayer. I accepted the invitation, through motives of curiosity. While listening carelessly and indifferently to the words of divine truth, the expression, "Quench not the spirit," attracted my attention. The words, and remarks following them, became deeply engraven upon my mind, and I could not forget them. The next day I sailed for Baltimore, and during my absence, often thought about a future existenre, although endeavoring to shake off the feeling. Upon my retnrn to New York, after an absence of one month, I avoided the house of God, for I wished to rid my mind of all thought upon the subject of religion. Still these words, "Quench not the Spirit," were ringing in my ears. I could not drive them away.

About one week previous to my departure for the West Indies, while conversing with one of my brothers at the "Home," I was invited to attend church, but replied, "Not to night—by and by—to-morrow." You then remarked, "Now is the time—to-morrow may never be yours, my friend"

Those words fell upon my heart with so much force that I began to think deeply, "to-morrow" may not be mine! then if the voyage of life should end this night, where, where would it commence again? During the period of one week after this, my mind was greatly depressed in view of the judgment certain to overtake my soul, but I could not pray; I did not dare to pray. Our voyage commenced—I had left the "Home" without informing any one of my state of mind, for I hoped the feeling would prove transitory. The first day passed by, and "cleaning up decks," my mind was diverted from its serious thought; but when all became quiet, and the shades of night began to steal over us, the impressions came back with ten-fold force. My mental distress was so great, that I fell upon my knees and prayed for mercy, until called to take my turn at the helm. As soon as our "watch" was relieved, I hastened below to read my Bible—a Bible that had been my companion for eleven years, but always remained at the bottom of my chest, bag, or trunk. As I opened the sacred pages my eyes fell upon the verse, "For God so loved the world, that he gave his only begotten Son, that whosoever believeth on him should not perish, but have everlasting life." While pondering over the infinite love of the Creator and Redeemer, a sense of my guilt filled my heart. The fear of the judgment was lost in the thought of ingratitude to Him who had experienced the agonies of the cross, and died for my sake. As I continued to read, my heart sank lower and lower; it could not be that so much love had been manifested for me—no, no. I had so long slighted the advantages and blessings which had clustered around my pathway in life from my infancy—so long disregarded the precepts, entreaties, and promises revealed in God's word—so long denied my Saviour, and defied my Creator, that it could not be possible he died for me. No, no. I had broken all laws and sinned beyond forgiveness; never could I receive pardon. Day after day passed in this manner. My agony of mind was too great to admit of sleep. My Bible was my constant companion, but every verse seemed to condemn me; I felt myself lost forever. The Saviour could not forgive. Two weeks had passed by in this manner since the commencement of the voyage, and my mind was still bowed down under a conviction of my dark sin. While pacing the deck, one night, the dark heavy clouds obscured the sky like a gloomy pall—it was like my heart—darkness overspread all, and there was no ray of light to shine through the gloom—no hope, no hope—I was in despair. Suddenly, I recollected that the blessed Saviour forgave even those who slew Him, and my heart leaped for joy, for there was a hope that even my sins could be forgiven. I fell upon my knees by the windlass and implored forgiveness for the Redeemer's sake. I felt that I was a lost guilty wretch, unfit to live, but Christ the Redeemer had given himself a ransom for me, and I had faith in the efficacy of his blood to cleanse my soul of sin. I gave myself wholly to God. My supplications for mercy and forgiveness were changed to a song of praise and joy, and I arose from my knees with peace in my heart.

Oh how my soul praised God for all his mercies and kindness, and above all, for the inestimable gift of His dear Son, whose blood had obtained pardon for even me. How changed were all my feelings! How differently every thing appeared! The sun, the sky, the sea, the ship, and even my shipmates were presented in a different light. Which ever way I turned, new beauties seemed unfolded. My Bible possessed a dearer interest; where before it had condemned me, or appeared dull, was now a source of consolation and delight.

God be praised, it was His work. The unfruitful tree, which for twenty-five years has cumbered the ground, has at last brought forth fruit.

Dear brother, pray for me that strength may be given me from above to continue firm in the good cause—that temptations may be withstood with God's help and blessing. Pray that I may be enabled to live in the glory of God, and the advancement of the Redeemer's kingdom on earth. There is no strength of my own. I am but a polluted worm in the sight of God. May I ever love and trust my Saviour, and do his will. Oh, may my white-haired father's heart be gladdened when he hears of the change of heart experienced by his son. May he feel it answer to his prayers. God bless all your efforts, dear brother, and may you behold the little seed quietly dropped by the wayside springing up into a goodly tree bearing fruit unto eternal life, and may the hearts of Christians be cheered by receiving daily answers to their prayers for seamen.

Truly yours, N. T.

FORMATION OF CORAL ISLANDS.

The islands of the Pacific are either volcanic or coral formation. The latter are all low islands, not rising but a few feet, at most, above the surface of the ocean, while the former send up their towering summits, dwelling among the clouds.

The following observations respecting the formation of coral islands, we doubt not, will be perused with interest by some of our readers. We copy these paragraphs from "The Wonders of Geology," by S. G. Goodrich, *alias* "Peter Parley."

The coral banks are every where seen in different stages of progress. Some are become Islands, but not yet habitable; others are above high-water mark, but destitute of vegetation; while many are overflowed with every returning tide. When the polypi of the corals at the bottom of the ocean cease to live, their skeletons still adhere to each other, and the interstices being gradually filled up with sand and broken pieces of corals and shells,, washed in by the sea, a mass of rock is at length formed. Future races of these animalcules spread out upon the rising bank, and in their turn die, increase, and elevate this wonderful monument of their existence.

The reefs which raise themselves above the level of the sea are usually of a circular or oval form, and surrounded by a deep and oftentimes unfathomable ocean. In the centre of each there is generally a shallow lagoon, with still water, where the smaller and more delicate kinds of zoöphytes find a tranquil abode; while the stronger species live on the outer margin of the ilse, where the surf dashes over them.

When the reef is dry at low water, the coral animals cease to increase. A continuous mass of solid stone is then seen, which is composed of shells and echini, with fragments of corals, united by calcareous sand, produced by the pulverization of the shells of friable polyparia. Fragments of coral limestone are thrown up by the waves: these are cracked by the heat of the sun, washed to pieces by the surge, and drifted on the reef. After this, the calcareous mass is undisturbed, and offers to the seeds of the cocoa, pandanus, and other trees and plants, floated thither by the waves, a soil on which they rapidly grow, and overshadown the white, dazzling surface. Trunks of trees, drifted by currents from other countries, find here at length a resting-place, and bring with them some small animals, as lizards and insects. Even before the trees form groves or forests, sea-birds nestle there; strayed land-birds find refuge in the bushes; and at a still later period, man takes possession of the newly created country. It is in this manner that the Polynesian Archipelago has been formed. The immediate foundations of the islands are ancient coral reefs, and these, in all probability, are based on the cones or craters of submarine volcanoes, long since extinct. There is another circumstance worthy of remark; most of these islands have an inlet through the reef opposite to the large valleys of the neighboring land, whence numerous streams issue and flow into the sea; an easy ingress is thus afforded to vessels, as well as the means of obtaining a supply of water.

Of the grand scale on which the operations here contemplated are going on, we may form some idea from the facts stated by competent observers, that in the Indian Ocean, to the southwest of Malabar, there is a chain of coral reefs and islets four hundred and eighty geographical miles in length; on the east coast of New Holland, an unbroken reef of three hundred and fifty miles long; between that and New Guinea, a coral formation, which extends npwards of seven hundred miles; and that Disappointment Islands and Duff's Group are connected by six hundred miles of coral reefs, over which the natives can travel from one island to another.

There is so much of the marvellous and sublime in the idea of the creation of islands and continents by the ceaseless labors of numberless myriads of living instruments, that we cannot be surprised that this interesting subject has attracted the attention of one of the most elegant of our modern poets. The following extract, which is alike poetic and descriptive, we take from "The Pelican Island" of James Montgomery.

"I saw the living pile ascend,
The mausoleum of its architects,
Still dying upwards as their labors closed.
Slime the material, but the slime was turned
To adamant by their petrific touch,
Frail were their frames, ephemeral their lives,—
Their masonry imperishable. All
Life's needful function, food, exertion, rest,
By nice economy of Providence,
Were overruled to carry on the process
Which out of water brought forth solid rock.
Atom by atom, thus the mountain grew
A coral island, stretching east and west;
Steep with the flanks, with precipices sharp,
Descending to their base in ocean gloom.
Chasms, few, and narrow, and irregular,
Formed harbors, safe at once and perilous,—
Safe for defense, but perilous to enter.
A sea-lake shone amidst the fossil isle,
Reflecting in a ring its cliffs and caverns,
With heaven itself seen like a lake below.
Compared with this amazing edifice,
Raised by the weakest creatures in existence,
What are the works of intellectual man,
His temples, palaces, and sepulchres?
Dust in the balance, atoms in the gale,
Compared with these achievements in the deep:
Were all the monuments of olden time;
Egypt's gray piles of hieroglyphic grandeur,
That have survived the language which they speak,
Preserving its dead emblems to the eye,
Yet hiding from the mind what these reveal;
Her pyramids would be mere pinnacles,
Her giant statues, wrought from rocks of granite,
But puny ornaments for such a pile
As this stupendous mound of catacombs,
Filled with dry mummies of the builder-worms."

KANSAS CORRESPONDENCE.

The following extract we copy from a letter received, by the last mail, from a friend in Kansas. It is dated Lawrence, K. S., Oct. 6, 1855. We would merely remark that the writer formerly resided in the town of Groton, Mass. :—

Last Fall I took a start to view the western country. I passed through many states and territories, and among the rest Kansas. I was pleased with the country—liked it better than any other place I saw—and thinking we might do something towards making it a free state, and forming its rising institutions on a right basis, we concluded to come here. For you know when you once get started, the distance of a thousand miles, in these days of steam, makes but little difference. We came to the borders of Kansas, all the way, by railroad and steamboat, where we purchased a team and came to Lawrence, 45 miles, in our own conveyance. I have taken a farm claim of 160 acres, about 6½ miles out of town, which Howard and I have cultivated this season. We have raised about 16 acres of corn, and a good supply of potatoes, beans, squashes, pumpkins, and other vegetables, sufficient for a year. We have also sown four acres of winter wheat, which, we hope, will supply us with flour after next May or June, when wheat is said to ripen here. Our crops are all good, and we have made a better start, in six months, than we could in Mass. with the same capital and 10 years of hard work and fair success. The family has remained in Lawrence through the summer, and probably will through the winter, as it will be pleasanter for them to be near meetings, school, post-office, and stores, than to be out on the claim. We shall have a good comfortable frame-house for our winter quarters. You, no doubt, have fancied us as living in a far-off wilderness, deprived of all the comforts, and almost necessaries of life, with scarce a neighbor within ten miles—no schools, meetings, or any other privilege we left behind. This was true, when I came here, one year ago. Then Lawrence contained one building, covered with grass, one log cabin, and a few tents. Now, we have preaching every Sabbath of all sorts, a Congregational Church and Society formed while I was here last Fall, and which has seen fit to choose me Deacon, since we came back; we have weekly prayer meetings, Sabbath-schools and day-schools: also, fine well filled stores, where all necessary store-goods can be obtained at reasonable prices, a large hotel, built of stone and containing 40 rooms, and several smaller hotels and eating-houses, druggist store building, confectionary, provision store, butcher's shop, doctor's and lawyer's offices, I don't know how many—two blacksmith's two wheelwright's and one cabinet-maker's shop, three steam saw-mills, and a gristmill nearly done, post-office, a brick yard, and lime-kiln, and some two hundred houses, many of them built of stone, and many well-finished frame-houses. The city is *now* growing faster than ever before. Our Society hope soon to build a good church. The Unitarians are about doing the same. Occasionally a steamboat comes up the Kansas river and lands at our wharf. Around Lawrence for a distance of six to ten miles, except the north, (which is Indian country) you will find nearly every half-mile a good farm-house and cultivated fields. Nor have we anything to fear from proximity to the Indians, they being quite civilized and friendly to the whites—especially the Yankees—whom they prefer to the Missourians—and they are particularly hostile to the wild Indians back on the mountains, and would go out and fight them if Government would allow them. Such are "the wilds of Kansas," where we have made our home, and *hope* to spend our days. We all feel contented, and have no desire to return to the "flesh-pots of Egypt." In fact I know of nothing that would induce me to go back to my circumstances there. Besides, we feel that a large field of usefulness is open before us here. As one man can do more for good or evil, in shaping the beginning of society, than half a score after the bias is formed. But you probably feel that there is danger of Kansas becoming a slave-state, and what shall we do in that case. Well, if that is the will of

Providence we will submit, and labor on to make it a free state. We have no idea of giving all up for lost, even then. But let me tell you, that will never be. I have lately been a tour over nearly all the whole territory where there are settlements, and from actual investigation, I am satisfied that four-fifths of the settlers are free-states-men, and women too. We may be overborne by armed invaders at first, but Missouri cannot *always* play that game. Nay, her time is already past. Although they threatened this Fall to do, what they accomplished las spring to take possession of our polls, the time passed, and they did not even attempt it. Our men are now organized and armed with Sharp's rifles, and would fight to the death for our families and homes, as did our fathers of old—and our enemies know it—and considering "discretion the better part of valor" will wisely let us alone. I never was treated with more respect than by the Missourians, both here and in Missouri, where I frequently go, having passed through the state three times. Nor do I have the least fear of personal violence to myself or my family, notwithstanding all that has been said on the subject. We pay no attention whatever to the laws they made for us, but trample them under foot. Nor have they, as yet, attempted to enforce them. I feel perfect confidence that the Lord will over-rule all this violence for the furtherance of the cause of freedom. The Slave-Holders have already so overdone the business that they have done more to make Kansas a free state than the anti-slavery folks themselves.

Yours, &c. C. D.

A TEXT OFTEN MISAPPLIED.

Drink no longer water, but use a little wine for thy stomach's sake and thine often infirmaties. 1 Tim. 5:23.

There has been much difficulty felt in regard to the *connection* which this advice has with what precedes and what follows. Many have considered the difficulty to be so great that they have supposed that this verse has been displaced, and that it should be introduced in some other connection. The true connection, and the reason for the introduction, and the reason for the introduction of the counsel here, seems to me to be this: Paul appears to have been suddenly impressed with the thought—a thought which is very likely to come over a man who is writing on the duties of the ministry—of the arduous nature of the ministerial office. He was giving counsels in regard to an office which required a great amount of labor, care, and anxiety. The labors enjoined were such as to demand all the time; the care and anxiety incident to such a charge would be very likely to prostrate the frame, and to injure the health. Then he remembered that Timothy was yet but a youth; he recalled his feebleness of constitution and his frequent attacks of illness; he recollected the very abstemious habits which he had prescribed for himself, and, in this connection, he urges him to a careful regard for his health, and prescribes the use of a small quantity of wine, mingled with his water, as a suitable medicine in his case. Thus considered, this direction is as worthy to be given by an inspired teacher as it is to counsel a man to pay a proper regard to his health, and not needlessly throw away his life. Comp. Matt. x. 23. The phrase, 'drink no longer water,' is equivolent to, 'drink not water *only*.' See numerous instances in Wetstein. The Greek word here used does not elsewhere occur in the New Testament. ¶*But use a little wine.* Mingled with the water—the common method of drinking wine in the East. ¶*For thy stomach's sake.* It was not for the pleasure to be derived from the use of wine, or because it would produce hilarity or excitement, but solely because it was regarded as necessary for the promotion of health; that is, as a medicine. ¶*And thine often infirmities.* Weaknesses or sicknesses. The word would include all infirmities of body, but seems to refer here to some attacks of sickness to which Timothy was liable, or to some feebleness of constitution; but beyond this we have no information in regard to the *nature* of his maladies. In view of this passage, and as a further explanation of it, we may make the following remarks: (1.) The use of wine, and of all intoxicating drinks, was solemnly forbidden to the priests under the Mosaic law, when engaged in the performance of their sacred duties. Lev. x. 9, 10. The same was the case among the Egyptian priests. *Clarke.* Comp. Notes on ch. iii. 3. It is not improbable that the same thing would be regarded as proper among those who ministered in holy things under the christian dispensation. The natural feeling would be, and not improperly, that a christian minister should not be less holy than a Jewish priest, and especially when it is remembered that the *reason* of the Jewish law remained the same—"that ye may put difference between holy and unholy, and clean and unclean." (2.) It is evident from this passage that *Timothy* usually drank water *only*, or that, in modern language, he was a '*tee-totaller*.' He was, evidently, not in the *habit* of drinking wine, or he could not have been exhorted to do it. (3.) He must have been a remarkably temperate youth to have required the authority of an apostle to induce him to drink even a *little* wine. There are few young men so temperate as to require *such* an authority to induce them to do it. (4.) The exhortation extended only to a *very moderate* use of wine. It was not to drink it *freely;* it was not to drink it at the tables of the rich and the great, or in the social circle; it was not even to drink it by itself; it was to use "a *little*," mingled with water—for this was the usual method. (5.) It was not as a common drink, but the exhortation or command extends *only* to its use as a medicine. All the use which can be legitimately made of this injunction—whatever conclusion may be drawn from other precepts—is, that it is proper to use a small quantity of wine for medicinal purposes. (6.) There are many ministers of the gospel, now, alas! to whom under no circumstances could an apostle apply this exhortation—"Drink no longer water only." They would ask, with surprise, what he meant? whether he intended it in irony, and for banter—for they need no apostolic command to drink wine. Or if he should address to them the exhortation, "use a *little* wine," they could regard it only as a reproof for their usual habit of drinking much. To many, the exhortation would be appropriate, if they ought to use wine at all only because they are in the habit of using so *much* that it would be proper to restrain them to a much smaller quantity. (7.) This whole passage is one of great value to the cause of temperance. Timothy was undoubtedly in the habit of abstaining wholly from the use of wine. Paul knew this, and he did not reprove him for it. He manifestly favored the general habit, and only asked him to depart in some small degree from it, in order that he might restore and preserve his health. So far, and no farther, is it right to apply this language in regard to the use of wine; and the minister who should follow this injunction would be in no danger of disgracing his sacred profession by the debasing and demoralizing sin of intemperance.—*Rev. A. Barnes.*

FAITH AND WORKS—TWO PLANKS.

From the pocket of a dead Russian soldier in the fortress of Bomarsund a British sailor took a tract, which was sent to England as a curiosity, and was there translated and published by the London Religious Tract Society. The following extract illustrates a great truth:

"A preacher wishing to explain to his congregation what a dangerous delusion those persons are in who seek salvation partly from their own works and partly from the righteousness of Christ, said to them, Supposing it is needful for you to cross a river, over which two planks are thrown. One is perfectly new, the other is completely rotten. How will you go? If you walk upon the rotten one, you are sure to fall into the river. If you put one foot on the rotten plank and the other on the new plank, it will be the same; you will certainly fall through and perish. So there is only one safe method left: *Set both your feet on the new plank.*

"The rotten plank is your own unclean self-righteousness. He who trusts in it must perish without remedy. The new plank is the eternal saving righteousness of Christ, which came from heaven, and is given to every one that believeth in him. Trust in his righteousness, or rather in his everlasting truth, and you shall be saved; for the Scripture saith, 'Whosoever believeth on him shall not be ashamed.'"

A Deserved Rebuke.—The celebrated Abdel Kader has sent to the Asiatic Society of Paris an original manuscript, consisting of religious and moral disquisitions, written by himself. In his first chapter, which treats of the advantages of science, he complains that the learned men of Europe, particularly of France, who have carried human knowledge to a vast height, and are constantly carrying it higher, never think of raising their hearts and minds towards God, who governs the world with supreme wisdom. "Never," says he, "do they mention Him in their conversation, and never is there any mention of Him in their writings."

Victims of a Battle.—The correspondent of the London Times who gives a frightfully graphic sketch of the most "heart rending and revolting pictures of the horrors of war," which were witnessed in the hospital of Sebastopol, says, "How the poor human body can be so mutilated and yet hold its soul within, when every limb is shattered, and every vein and artery is pouring out the life-stream, one might study here at every step, and at the same time wonder *how little* will kill!"

METEOROLOGICAL ANNEXATION, OR MAUNA LOA AND BROOKLYN HEIGHTS UNITED!

The political annexation scheme of the Sandwich Islands and the United States, seems to be at rest, but a certain Mr. Meriam, carrying on his scientific and meteorological observations on Brooklyn Heights, is advocating the theory that the Aurora Borealis beautifying the heavens encircling Long Island, is connected with the eruptions on Hawaii. Some remarks of this gentleman upon this subject are to be found in the *Albany Argus* of Nov. 12, suggested by the published account of the recent eruptions, communicated by the U. S. Consul, Mr. Ogden. Our narrow limits will not allow us to copy all of Mr. Meriam's remarks, and we shall merely insert his observations upon the eruption in 1852. The communication above referred to contains similar remarks upon the recent eruption.

"I have for many years been engaged in extensive and minute observations upon the Aurora Borealis and meteors, as connected with other wonderful phenomena of nature, and the facts I have collected during my long-continued researches, placed in chronological and geographical order, fully, clearly, and most convincingly illustrate the connection.

On the 16th of February, 1852. the volcano of Mauna Loa moved in a fearful convulsion, at 3h. 20m. A. M.; at 11 P. M. of that day, the Aurora was seen from my place of observation on Brooklyn Heights; and at the Highfield House Observatory, London, Eng., a faint auroral arch was seen. On the morning of that day, the ship Tybee was struck by lightning. The day previous an earthquake was experienced at Palermo, Sicily, and also in Cecil county, Md.

On the morning of the 18th the aurora continued visible from my place of observation, till the light of day obscured it. When the sun rose and shown upon the clouds, they became intensely luminous. At the Highfield House Observatory the aurora continued, and lightning was seen in the west. The Aurora was also seen from Newbury, Vt.

Evening of the 19th, the aurora increased in its glow and brilliancy as daylight was retiring, and in a little time became splendidly magnificent. I never before saw, nor have I since seen, such a wonderful and profuse display of boreal corruscations. It was seen from Albany, N. Y.; Springfield and Boston, Mass.; Providence, R. I.; Portland, Maine; Havre, France; Frankfort, Germany, and at the Highfield House Observatory, England. At Charbro, France, a most violent thunder storm, accompanied with vivid lightning, snow and hail—such, it was said, was never before seen in France—prevailed. The aurora continued throughout the night, and until the sunlight of the 20th rendered it invisible."

An Aerial Echo.—The passengers in a recent balloon excursion state that at the height of 14,000 feet above the earth, every thing spoken distinctly by them was returned in about a minute in an echo so clear and distinct as the words spoken.

Fame.—Milton and his widow only received $115 for the copyright of Paradise Lost, while the piece of paper signed by him, containing his contract with the bookseller, was recently bought for $525, or more than four times the author's receipts.

The Sunken Fleet.—The naval armament destroyed by the Russians at Sebastopol, to prevent its falling into the hands of their enemy, it is said, exceeded the whole naval force of the United States. The Russian fleet at Sebastopol, in September, 1854, numbered 108 vessels, carrying 2,200 guns; while the United States navy, according to the American Almanac, consists of 73 vessels, carrying 2,120 guns.

Steamer "Kalama" Totally Wrecked.

It is with great regret we have learned from Capt. Jones, who returned to this port on Thursday morning, the particulars of the wreck of the above named steamer, which took place at Koloa, Kauai, on the 5th inst. The Kalama arrived at Koloa and came to anchor about 7 1-2 o'clock A. M., and immediately commenced taking in freight for Honolulu. Between 10 and 11 o'clock, the wind shifted from the Northward and Eastward to the Southward and Westward with squalls, and gradually increased till 1 P. M., at which time Capt. Jones deemed it necessary to get under-weigh. leaving some freight still on shore. The boats were immediately recalled and secured, and the capstan manned for heaving in the chain. The boat was propelled slowly to assist in this operation. As soon as the anchor was tripped, the usual signal was made to go ahead, and the order given verbally by Capt. Jones to "hook on," which order was responded to by the Engineer, the boat being at that time heading off shore. In a few moments Capt. Jones discovered that the steamer's bow was falling off into the trough of the sea, and that she was making little or no headway. At the same time Capt. Prendergast, who was on board, noticed this circumstance, and called Capt. Jones' attention to the fact that the engine was not working properly. Capt. J. being at the helm, requested Capt. P. to step into the engine room and ascertain what was the matter with the engine. In a few moments Capt. P. returned on deck and reported to Capt. J. that the engineer was working the engine by hand over her centres, and that she had caught once on her lower centre. By this time the boat had fallen broad off into the trough of the sea, and was drifting bodily on to the point. The boat having little or no headway up to this moment, an effort was made to back her into the cove, but without effect, and there being no prospect of clearing the point with steam, the anchor was let go as a last resource, but with no avail. In a few moments she struck heavily fore and aft on the point, and immediately bilged, and in a few hours was a total wreck.—[*Polynesian*.

Loss of Ship Iris.—A letter from Capt Devoll. of Ship Iris, of this port, reports the loss of that ship at Port Gregory, New Holland, as follows:—"June 29th, went into Port Gregory, New Holland, with a pilot on board with the intention of humpbacking in the Bay; anchored the ship on good holding ground, with two anchors ahead, a kedge and a moving buoy astern, and made arrangements with a party on shore to take humpback oil in the Bay. On the night of the 10th of July, a severe gale from the north west sprung up, and accompanied with a severe current, were driven ashore. The ship lies deeply imbedded in the sand, and will undoubtedly prove a total loss, with the exception of what we can save by our efforts. Had at the time of the loss, 150 bbls sp. oil and 1 humpback whale. Officers and crew saved" The Iris was owned by Edward C. Jones Esq., and is fully insured in this city.

Capt Devoll writes that he cruised off the N. W. Cape of New Holland from April 1st to June 1st, in company with 20 to 30 ships. —[N. B. Mercury.

Expensive.—The Dublin University Magazine states that the war with Russia costs England and her allies *a quarter of a million sterlin*, or 1,250,000 per day!

The Barometer and the Bombardment.—A scientific Frenchman announced the cannonade and the assault of Sebastopol from the changes effected in the mercury of his barometer. He says that it takes an hour and forty minutes for barometers in France to receive the impression of the guns at Sebastopol.

[From the New York Observer.]

SAILORS' CHILDREN.

Another of those noiseless but beneficent institutions which adorn our city, and which have been originated and sustained by little bands of excellent, self-denying women, presented its eighth annual notice to the public on the 31st October.

We refer to the Society for the Relief of Destitute Children of Seamen, located on a beautiful rise of ground in the rear of the Sailor's Snug Harbor on Staten Island. We found Mrs. Tomlinson, Mrs. LeRoy, Mrs. Griswold, Mrs. Bement, and many other originators and firm friends of the institution from our city and the island, assembled to witness the condition and proficiency of the 112 children of seamen there gathered together, of which the most of them are between the ages of from 3 to 12 years. Everything passed off in a highly satisfactory manner; the children looked clean and healthy; well clothed, well fed, and happy.

As far as we could judge, the management and government of the "house" seems to be very kind and paternal. The house is abundantly large, and the accommodations are on the most liberal scale. It is well warmed and ventilated, and the children have five acres of handsome wood lawn for their play-ground.

The ladies have erected the spacious building at a cost of about $30,000, and sustain it at an annual expense of a little more than $7,000.

For all of which we are indebted to the personal exertions and influence of a very small band of Christian mothers and daughters, who, in the service, we trust may find that it is more blessed to give than receive.

R. G. P.

THE WONDERS OF PRAYER.

BY REV. J. RYLAND, OF NORTEAMPTON, ENG.

Abraham's servant prays—Rebekah appears. Jacob wrestles, and prays, and prevails with Christ—Esau's mind is wonderfully turned from the revengeful purpose he had harbored for 20 years. Moses cries to God—the sea divides. Moses prays—Amalek is discomfitted. Joshua prays—Achan is discovered. Hannah prays—Samuel is born. David prays—Ahithophel hangs himself. Asa prays—a victory is gained. Jehoshaphat cries to God—God turns away his foes. Isaiah and Hezekiah pray—185,000 Assyrians are dead in twelve hours. Daniel prays—the dream is revealed. Daniel prays—the lions are muzzled. Daniel prays—the seventy weeks are revealed. Mordecai and Esther fast—Haman is hanged on his own gallows in three days. Ezra prays at Ahava—God answers. Nehemiah darts a prayer—the King's heart is softened in a minute. Elijah prays—a drought of three years succeeds. Elijah prays—rain descends apace. Elisha prays—Jordan is divided. Elisha prays—a child's soul comes back; for prayer reaches eternity. The church prays ardently—Peter is delivered by an angel.

Since the commencement of the war, England has sent to the Crimea 80,000 men; and besides guaranteeing the $20,000,000 loan of Turkey, and advancing $10,000,000 to Sardinia, has expended $80,000,000 in the prosecution of war.

ADVANTAGE OF USING TOBACCO.—The following was communicated to Com. Wilkes, of the Exploring Expedition, by a savage of the Feejee Islands.—He stated that a vessel, the hulk of which was still lying on the beach, had come ashore in a storm, and that all the crew had fallen into tho hands of the Islanders.

"What did you do with them?" inquired Wilkes.

"Killed 'em all," answered the savage.

"What did you do with them after you had killed them?"

"Eat 'em, good," returned the cannibal.

"Did you eat them all?" asked the half-sick commodore.

"Yes, we eat all but one."

"And why did you spare one?"

"Because he taste too much like tobacco. Could'nt eat him no how!"

If the tobacco chewer should happen to fall into the hands of New Zealand savages, or get shipwrecked somewhere in the Feejeean group, he will have the consolation of knowing that he will not be cut into steaks, and buried without liturgy in the unconsecrated stomach of a cannibal.—*National Magazine.*

MINIATURE PAINTING BY SUNLIGHT.—A microscopic photograph was recently exhibited at Manchester, England, of the size of a pin's head, which, when magnified several hundred times, was seen to contain a group of seven portraits, the likenesses being admirably distinct. Another of less size represented a tablet erected to the memory of a citizen of Manchester; it covered only one nine-hundreth part of a superficial inch, and contained 680 letters, every one of which could be distinctly seen by the aid of the microscope.

ANOTHER SHORT CUT.—The viceroy of Egypt has given permission to constitute a company composed of capitalists of all nations, for the purpose of making a canal across the Isthmus of Suez.

ANOTHER EXPLORER.—Dr. Barth, who has spent five years in the interior of Africa, of which hitherto unknown land he has gained much knowlege, has returned in safety to Europe. Among other valuable discoveries, is that of two large empires, Gando and Hamd-Allaki, the names of which were not even previously known, and an inland sea twice as large as the Black sea.

A STRANGE IDEA.—A captain of the British Navy has published a book advocating the conversion of the Arabian desert, which he believes was once the bed of an ocean, into an ocean again, by canals from the Mediterranean, which is 1,300 feet above the level of the desert. One of the advantages would be, making the navigation to India through the valley of the Jordan and the basin of the Dead sea, as short as the overland route.

AN EXPENSIVE HORSE.—A Bedouin Arab horse has arrived in Philadelphia, of gray color and four years old, for which his owner has refused $10,000, requiring $12,500.

RIGHT NAMES.—A New England physician, becoming convinced of the evil of giving and receiving wine and spirits in the social circle, having several friends at his house, said, "Gentlemen, here are wine, and brandy, and arsenic; all are poison—some slower than others but equally sure. Take your choice."

THE PILGRIMS' FIRST SABBATH IN NEW ENGLAND.

Among the many striking peculiarities of the Pilgrim Fathers' their strict and conscientious observance of the sabbath should never be forgotten. It had an important influence upon their descendants, and would that their descendants, at home and abroad, observed the Holy Sabbath as becomingly and sacredly. It was religion which made those men what they were, and it was a part of their religion to "remember the Sabbath day and keep it holy." The following allusion to the first Sabbath spent by the Pilgrims in New England, we copy from a late *American Messenger:*

"The May-Flower had borne its one hundred and one souls across the ocean. It hove in sight of the bleak shores of New England at the opening of a dreary winter. A spot was to be selected for the children's dwelling-place, and for the parents' grave. The shallop was unshipped, but needed repairs, and sixteen weary days were spent in fitting her for service. Six men were then sent in her, amidst ice and snow, to find a spot on which to land. The spray of the ocean dashed over them and froze on their clothes like coats of mail. Five days more they wandered, searching in vain for a place to land. A storm arose; snow and rain fell in torrents; the sea rolled its mighty waves; the mast and sails went overboard, and the rudder itself gave way. In the midst of the tempest and without a shelter, and while they were tossing upon the mighty deep, approached the day of the Lord, the pilgrim's friend, in which they had been taught "not to do any work." The evening before the day of rest drew on; they pushed their way from surf to surf, till they entered an inlet, sheltered under the lea of a rising hillock; and there they kindled a fire, and on a little island spent the day in solemn adoration of the Lord of the Sabbath. The next day they stood on Plymouth Rock."

A QUEER LIBRARY.—Col. Rawlingson has discovered among the ruins of ancient Babylon an extensive library, containing many large treatises on astronomy, mathematics, and other branches of knowledge, which will throw great light on biblical branches of history and criticism, and the history of our race. This library was not printed on paper, but impressed on baked bricks.

AMERICAN INVENTIONS APPRECIATED ABROAD.—The American agricultural machines, both reaping and threshing, took the premium at the recent trial before the Commissioners of the French Universal Exposition, as they did at the World's Fair in London. Every American machine entered proved greatly superior to every European machine. ☞ *The first prize for pianos was given to a Boston maker*, greatly to the surprise of the Parisians, who supposed that their instruments were the best in the world. Such national triumphs are more glorious than the victories of war. May Europe and America never contend except in such peaceful strifes.

[For The Friend.]

HYMN.

THE ROCK OF AGES A SECURE REFUGE.

I was treasuring stores of wrath,
Thickening gloom was on my path;
Looking for the dreadful day.
All was terror, guilt, dismay;
I no ray of hope could see.
Black despair was shrouding me.

Then a still, small voice I heard,
Which my inmost spirit stirred,
"Flee from wrath, O sinner, flee,
Come, thy refuge find in me—
In the Rock of Ages hide,
Let tormenting fear subside."

Now in joyful trust secure,
With my heart and conscience pure,
Though terrific thunders crash,
Tempests roar and lightnings flash,
I will praise my glorious Rock,
That sustains the fiercest shock.

In this refuge, what can harm?
'Tis without that fears alarm.
Here remorse and terrors cease,
And is felt a perfect peace.
"Rock of Ages, cleft for me,"
I'm forever safe in Thee! L. E.

Jan. 5, 1856.

For the "Friend."

WHAT I'D RATHER DO.

Brave whalers leaving native home,
Seek treasure far and near,
Now o'er Pacific's billows roam,
Now steer for Arctic drear.

They meet the keen and northern blast
With firm but anxious mind
While cruising by the icy mass
Their oily prey to find.

But ah! the life a whaler leads
Is not the life for me,
I'd rather dig among the weeds
Than hunt upon the sea.

Or even on some quiet isle
Dwell far from haunts of men,
There I might use my books awhile,
Or maybe try the pen.

I'd seek with words of life to tell
God's sympathy and love,
And as I strove each grief to quell,
Confide in him above.

W. D. TABER.

Ship "Cortes."

[Written for "The Folio."]

Life!
What is it?
'Tis a scene of strife
For honor; 'tis a visit
To the world's wide field of battle where
None is crowned but he who conquers; 'tis a gift
Of heaven to fallen man; 'tis a fair
Inheritance; tis a swift
Vision; 'tis death;
A veil which, lift,
Then enters
Death.

D. N. M.

BOSTON SUBSCRIPTION for the Sailors' Home at Honolulu.

John W. Sullivan	$10
John Tappan	30
William W. Goddard	25
Icabod Washburn, Worcestor	10
William T. Eustice	10
John Gove	5
"D. S." supposed David Sears	10
Robert F. Hooper	10
Thos. B. Wales & Co.	25
Gage, Sawyer & Co., Charlestown	20
Magoun & Son	20
Charles B. Fessenden	25
Nath. Goddard	20
Addition subscription to "A Lady" on the sub. paper sent Oct. 18	5
R. S. Wade	10
S. G. Reed	10
Benj. T. Reed	10
F. C. Manning	10
W. R. Lawrence	10
H. H. Crocker	10
Charles Wills, N.P.	25

Amount of names *this date*	335
Names sent 18*th Oct.*, 1855	1473
Whole amount subscribed	$1808

SUBSCRIPTIONS for the Seamen's Capel, (seats free,) supported by gratuitous contributions; and The Friend, one thousand copies of which are distributed gratuitously among seamen in the Pacific Ocean.

	For Chapel.	For Friend.
Capt. Pease, "Champion"	$5 00	
Charles Sylvester, 1st officer	2 50	
Capt. Cross, "Oscar"	5 00	$5 00
Mr. Bartow, Lahaina		3 00
Rev. T. Coan		5 00
Mr. Thrum		3 00
Mr. Waterhouse		10 00
Capt. Layton	5 00	
Found on Bethel Pulpit	2 50	
Cost of the Friend for 1855.		
Printer's bill, paper, &c.		$962 52
Receipts.		
Island subscriptions	316 00	
Foreign do.	211 00	
Donations	284 50	811 50
Debt, Jan. 1st, 1856		$151 02

☞ It is highly satisfactory that we have been enabled to meet the current expenses of the Friend without incurring a debt of only $151 02. The Home has diverted many "donations" which would have fallen to the benefit of the Chapel and Friend. While the Friend has been supported less by donations, it has derived more from island and foreign subscribers than during any previous year of its existence.

☞ More than 1200 copies of each number of the Friend have been distributed gratuitously.

CARD.—The following timely donations have been made to the Home:—A looking glass and 2 lanterns, from Mr. Everett; a set of the lithographic views of Honolulu, by Mr. Emmert; a quantity of lumber (valued at $10.15) by Mr. Ware; a barrel of oil, by Capt. Tobey, of ship Young Phœnix, (valued at $21.00). All donations in money will, in due time, be reported by the Treasurer.

DIED.

At Lihue, on the 13th ult. Mr. E. H. Rice, aged 37 years. It is less than a year since he left his home and family in Wisconsin, hoping that a voyage to these Islands and a short residence here would restore his health; but he had deferred this voyage too long; consumption had fastened upon him, and its hold could not be relaxed by the clime of our sunny Islands. He came for health—he found a grave.

In Marine Hospital, Nov. 19th, of Dropsy of Brain, Jno. Walker, discharged from Bark Fanny.

Novt 22nd, of Consumption, Wm. Farmlee, carpenter of Ship Wm. Tell.

Dec. 5th, of Effusion of the Brain, Louis Santos, a native of Cape Verd Islands, discharged from Ship Mogul.

Dec. 15th, of Consumption, Isaac Murdock, aged about 27, a native of Portland, Maine, late 3rd off Bark James Andrews.

Dec. 18th, of Liver Complaint and Dropsy, Manuel Lewis, belonging to San Carlos.

Same day of Consumption Bartolomeo Correra, belonging to Gracios, Western Islands.

Dec. 22rd of Consumption, James Bogue, belonging to Cambridge Mass., discharged in April from Ship Ontario.

Jan. 11th, 1856, of Dropsy, John Gommez, (col'd) a Portuguese, discharged from Ship Alex. Barclay.

Jan. 21st, of Consumption Jose Delgado, a Portuguese discharged from Bark Delaware."

MARRIED.

On the 15th instant, at Washington Place, in this city, by the Rev. S. C. Damon, W. C. Parke, Esquire, Marshal of the Hawaiian Kingdom, to Miss Annie, daughter of the late Hon. Luther Severance, U. S. Commissioner to the Hawaiian Islands.

On Monday, Jan. 21, by the Rev. J. D. Strong, S. L. Austin, Esq., of Buffalo, New York, to Miss Caroline H., daughter of the Rev. E. W. Clark, of Honolulu.

Information Wanted.

SHOULD John W. Marston, a seaman on board the whale ship Drafer, Capt. Sanford, visit Honolulu, he is requested to call upon the Chaplain.

HONOLULU MEDICAL HALL.
DR. McKIBBIN, SURGEON, &c.

BEGS to inform the inhabitants of Honolulu and vicinity that he has taken the old established Drug Store, corner of Merchant and Kaahumanu Streets, which he has remodelled and means to keep constantly supplied with the best medicines he can procure from the United States and England. The concern will be constantly under his own or his son's superintendence, so that families requiring medicine may depend on getting the best, carefully prepared.

He has just received a case of London perfumery Soaps, Brushes, &c., and daily expects a further supply, which, with the ordinary patent and other medicines, will be sold on reasonable terms.

Physicians' and Surgeons' prescriptions carefully prepared.

Captains or owners of vessels will find every attention paid to themselves or families if requiring medical assistance.

Medicine Chests carefully examined and refitted

Attendance for consultation at office from 9 A. M. till noon, and from 4 to 6 P. M. on week days. On Sunday from 9 A. M till 11 at other times, at his residence Union Street. 27-tf

C. H. WETMORE,
Physician and Surgeon,

HILO, HAWAII, SANDWICH ISLANDS.

N. B.—Medicine Chests carefully replenished, and on reasonable terms.

G. P. JUDD, M. D.,
Physician and Surgeon,

HONOLULU, OAHU, S. I.

Office corner of Fort and Merchant sst. Office open from 9 A. M. to 4 P. M.

E. HOFFMANN,
Physician and Surgeon,

Office in the New Drug Store, corner of Kaahumanu and Queen sts., Makee & Anthon's Block. Open day and night

GEO. A. LATHROP,
Physician and Surgeon,

HONOLULU, OAHU, S. I.

Office at the Honolulu Drug Store, Queen st., near the Market. Residence corner of Fort and Beretania sts., next above the Catholic Church.

GILMAN & CO.,
Ship Chandlers and General Agents,
Lahaina, Maui, S. I.

Ships supplied with Recruits, Storage and Money.

B. PITMAN,

BYRON'S BAY, HILO, HAWAII.

DEALER in General Merchandise and Hawaiian Produce. All Stores required by Whale Ships and others, supplied on reasonable terms and at the shortest notice.

WANTED—Exchange on the U. States and Europe. Oct. 2, 1854.—3m

THE ADVERTISER,

WHO is a good and expeditious writer, wishes for a situation. Apply by letter to A. B. Office of this paper.

J. WORTH

HAVING established himself in business at Hilo, Hawaii, is prepared to furnish ships with recruits on favorable terms, for Cash, Goods or Bills on the United States.

BIBLE, BOOK AND TRACT *DEPOSITORY* at the Sailors' Home.

Bibles, Books and Tracts, in the English, French, Portuguese, German, Danish and Spanish languages: *For Sale at cost prices, but*

Gratuitous to Seamen.

Also, Office of "The Friend;" bound volumes for sale; Subscriptions received.

N.B.—Seamen belonging to vessels lying "off and on," will be supplied with books and papers at the Depository.

Honolulu Marine Hospital.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz.: a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this what a Hospital should be.

Patients will also be received by Drs. Hoffman, Ford, Hillebrand, Bullions, Hardy and Guillou.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

GEO. A. LATHROP, M. D.

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

BOOKS,

WHICH EVERY SAILOR ought to own

Webster's small Dictionary. Price 75 cents and $1,00.

Morse's Geography and Atlas. Price $1,25.

Brown's and Well's English Grammar. Price 75 cts.

The American Arithmetic. Price 75 cts.

The Lamplighter, a thrilling tale. Price $1,50.

Webster's Spelling Book. Price 25 cts.

Clarke's Lectures to young men. Price $1,50.

Beecher's do. do. do. Price $,125.

Chevoir's Travels in Sandwich Islands. Price $1,50.

Bates do. do. do. Price $1,75.

Pitcarn's Island and its inhabitants. Price $1.00

Hawaiian Phrase Books of questions and answers. Price 50 cts.

All the above, together with a large variety of Books (see Catalogue) can be had at the Post Office Bookstore. Also letter paper, Ink, Pens, Journals, Memorandum Books &c. &c.

Oct. 3-mos. H. M. WHITNEY.

The Friend.

HONOLULU, MARCH 1, 1856.

ISLAND LIFE.

It is a mystery to some, how it is possible for any one to be contented with life, at the Sandwich Islands, where there are no railroads, telegraphic wires, and a lack of the thousand-and-one other elements of life and activity, which make other countries such desirable localities for residence. We have sometimes tried to solve this mystery ourselves, but yet never could form any definite theory upon the subject The fact is undeniable, that those who have once resided here, and gone elsewhere, do look back with a longing desire to their former homes. Those who have gone abroad and returned, speak of their delight *to get home.* The Islands may not offer great inducements, to the man of business and wealth, life here may be devoid of the excitement of England and America, hurry and bustle may not characterize our streets, still Honolulu and other parts of the group inspire many hearts with those peculiarly gratifying and homelike feelings which are more valuable than gold. One who has just left for a trip to father-land, remarked, a few hours before going, "but I am coming back to lie in that lot I purchased in the N. V. C.;" and another just returned from an extensive tour abroad, remarked "I wish to purchase a lot in N. V. C.; and here I am going to rest!" These are not uncommon remarks. To us they breathe a rich and deep meaning. Men would not speak so, unless they felt it. It is desirable to foster such feelings. The influence upon society will be good. The more we identify ourselves with the Islands, their institutions, their prosperity, their progress, and their people, foreign and native, the happier we shall be and the happier life will pass. To do this, does not require of us, that we should be blind to the evils and sorrows which abound, but seeing the evils and experiencing the sorrows, we shall be made happy, in proportion, as we strive to do away with the former and relieve the latter. Perhaps, in solving the query why residents here are attached to the Islands as their home, His Majesty hit upon the true idea, in his speech, before the Native Hawaiian Agricultural Society, on the 5th of February.

"Who ever heard of winter upon our shores? When was it so cold that the laborer could not go to his field. Where amongst us shall we find the numberless draw backs which in less favored countries the working classes have to contend with? They have no place in our beautiful group, which rests on the swelling bosom of the Pacific like a water lily. With a tranquil heaven above our heads, and a sun that keeps his jealous eye upon us every day; whilst his rays are so tempered that they never wither permaturely what they have warmed into life. we ought to be agriculturists in heart as well as practice."

Whether there be truth or not in the above extract, the ideas are beautifully expressed.

READING MATTER FOR SEAMEN.

Persons unacquainted with the circumstances of sailors, cannot fully estimate the importance, of furnishing them with a liberal supply of books, pamphlets and papers. It is peculiarly gratifying to be able to meet the demand. Two families in Honolulu, Dr. Judd's and Capt. Snow's, have recently forwarded a good quantity of reading matter for seamen; including school and other books of general interest. As there is a great variety of tastes among seamen, it is important that all should be suited. We doubt not that there are many other families in Honolulu, and and other parts of the islands, which would be glad to be relieved of a superabundance of books and papers which have been read. We would earnestly invite them to send us *any quantity!* Second hand school books are especially solicited. Files of newspapers always acceptable. Jack is fond of history. He would not be displeased with a volume of Travels. As for novels, he must purchase such as suit him! We must not fail to specify two classes of books that are always desirable to have on hand, "Commentaries upon the scriptures," and "singing books." These are frequently called for.

☞ We speak the language of many, in extending to Chief Justice Lee, and lady, a cordial welcome, on their return to the Islands. That he should have endured the the fatigue of long journeys by land and sea, inspires the hope that years of health and usefulness open before him; and that the community will long enjoy the benefit of his matured wisdom and varied experience. The "Raduga's" list of passengers exhibits many other names well known at the Islands, whose return is also hailed with rejoicing. We cannot give any very satisfactory ground for the feeling, but somehow, towards all "old residents" who have sought, but not found a home in other lands, we entertain a sort of family sympathy. We are glad to welcome them back. We hope they may find homes, a thousand times more desirable, than other lands can afford.

BULL TEASING.

In the Panama "Star and Herald," for Jan. 16, 1856, there are some very appropriate remarks upon the Sunday afternoon's amusement of *bull teasing*, following the installation of the new Bishop in the former part of the day. The idea of installing a new Bishop, and then leaving the Cathedral for the Plaza, to tease "a poor lean bull or ox, that has been starved for several days previous, attaching a rope of some thirty yards to his horns, and then goring him with a sharp stick, or fire darts, and shake colored blankets at him until he becomes perfectly infuriated," seems too absurd and brutal to find a place, even among the mummeries and rites of the dark ages!

☞ The late mails bring no special news of the war, since the Russians were compelled to retreat to the North of Sebastopol. Both armies had gone into winter quarters. The Russians are reported to keep up a vigorous fire upon the allied army; but upon the whole the allies appear to be making advances upon Russia, which is essentially weakening her power in the Black Sea. The loss of Russian fleet cannot be replaced for a long time to come, even if the war were to stop where it is. Sweden is reported to have joined the allies.

THE POLYNESIAN RACE, AND THE LOST ISLANDS OF THE PACIFIC.

"Nor can I quite pass over the probability of the former existence of large Archipelagoes of lofty Islands, where now only rings of coral rock scarcely break the open expanse of the sea, throwing some light on the distribution of the inhabitants of the other high Islands now left standing so immensely remote from each other in the midst of the great ocean."—[Darwin's Voyages.

Who has not felt that there is something mysterious, something apparently inscrutable, connected with the first peopleing of these little isles of the Pacific? We read the accounts of the great navigators of the last century—they sail over this ocean for days and weeks and months,—they arrive at length by chance at some small island—they find it peopled—sailing again for thousands of miles, another speck of land appears—it also is peopled. The inhabitants of these islands new nothing of each other, or of any other portion of the globe, they knew not how or when they came there. In many not even a tradition exist of anything beyond their own little cluster of rocks. They have been there for ages. The more we reflect on the facts, the more mysterious do they appear, the more we strain our eyes, the greater the darkness becomes. It is true that every work written on the subject of the Pacific groups, usually commences with some Hypothesis professing to account for the origin of the inhabitants in a very off hand matter course way But who is satisfied? Do we not feel that their explanations are like the answers we often have to give children when they ask natural but puzzling questions? They will do in the absence of better.

The remark of the celebrated naturulist Darwin, as above quoted, is casually introduced in his account of his rovings in the Pacific, but the other numerous and highly interesting subjects of which he treats so fully and so well, seem to have prevented his pursuing the present one further—yet—like a single lightning flash in the darkness of night, does it not for a moment illuminate the whole landscape?

In reviewing the facts connected with this subject, it is unnecessary here in the Sandwich Islands, to enter into any proofs that a large portion of the island of the Pacific, stretching from New Zealand to Hawaii and from the Navigator's Islands to Gambier's Islands, are inhabited by one race, that is to say by a people who are intimately all in color, form and features, in language, and in manners and customs; by a race in fine that must not only have had one common orgin, but must have always been kept separate from and out of the influences of any other race. More than this, the particular group from which the Polynesian race was first distributed, and the general course they must have taken, has been pretty clearly demonstrated by Mr. Hale, in his work on the Ethnography and philology of the U. S. Exploring Expedition. He shews, principal by an examination of the dialects, and finding which is the original and which the derived or corrupted one, that the Samoan or Navigator's islands, was the group first inhabited by this race, and that from these they spread themselves as far as New Zealand on one side, and through the Society Islands and the Marquesas group to Hawaii on the other.

But the demonstration of the direction in which the Polynesian race has spread, leaves us just where we were with regard to the mode of its accomplishment. When we are told (and there seems little reason to doubt it) that the Hawaiians came from or through Nukuhiva, we have then to ask, how they got here, over such a vast expanse of ocean, and the picture of the first canoe load of Marquesians landing on the desolate lavas of Hawaii, excites in our minds more curiosity than it allays.

The supposition most commonly brought forward to account for the spreading of the Polynesian race, is, that each separate island or group was peopled by the natives of one of the inhabited islands being accidentally blown to sea in their canoes, and after being tossed about the ocean at the sport of winds and waves, to have been finally thrown on an uninhabited one.

An examination of this theory, however, will show that if the islands of the Pacific ocean have been since the human epoch just as they are now, the probabilities against it would be so great, as almost to amount to a certainty that this has *not* been the mode in which they have been peopled.

The islands or rather groups which may be classed together as inhabited by one race, and which have received the designation of Polynesia, are the Sandwich, Marquesas, Society, Paumotu, Gambier, Austral, New Zealand, Friendly and Navigators. Besides these there are some smaller and unimportant groups, and single islands, which however came within or near to the boundary of the area occupied by those specified. The inhabitants of the Feejee islands, and of some of the groups and islands of Micronesia (all outside the above boundary) are supposed to hold an intermediate place between the Polynesian and Melanesian races.

Now if we take a map of this ocean, and observe the relative distance and position of the Polynesian groups above enumerated, both to each other and to the neighboring continents and islands, we are astonished at being told—first, that specks of land so isolated and remote as many of them are, should be inhabited at all,—second, that the whole have been people from one source—and third, that they have been peopled from each other, and that the direction which the migration took is known. For we do not at all perceive why New Zealand should not rather have been peopled by the same race which peopled the neighboring Australia or Van Dieman's Land; or why the inhabitants of the Friendly or of the Navigator's islands should not be of the same stock with that of the adjacent Feejees, or of the New Hebrides; and with regard to the Hawaiian group, we might much rather expect it to have been peopled from North West America or from Japan, than from any of the other Polynesian groups, not only on account of the distance, but from the prevailing winds being favorable to the former and unfavorable to the latter supposition. Indeed taking into consideration the populousness of Japan and the fact that Japanese junks with their crews have been known to be cast away on these Islands in recent times, whilst no instance of a canoe load of Polynesians being driven this way has ever been heard of, the probabilities against these Islands having been peopled by accidental drifting from the Southward seem overwhelming.

Although in a theory of chances, such as this one is of people a certain number of islands with one race by accidental blowing to sea, nothing positive can be deduced from one chance, yet when a number of chances have to be considered, calculations may be made which within certain limits may be relied upon. In this case, taking all the groups and islands of Polynesia, we have a great number of chances presented to us, but we see at a glance that it is not necessary to work the sum, and that the answer could never result in favor of the supposition; we see in fine that it is in the highest degree improbable that whilst the Polynesian race was being accidentally blown in every direction from one little island or group to another at a great distance—the other races, far more numerous in the islands and continents contiguous, should have never peopled a single island within a certain boundary, by a similar accident, notwithstanding that from their contiguity, their relative position and the prevailing winds, there appear better chances for their having done so.

In the face of these difficulties the great fact remains, that the islands of Polynesia are inhabited by one race and have been peopled from each other. Besides, there is a pretty well authenticated tradition in this group, of the Hawaiians having formerly made voyages to Nukuhiva and to Tahiti and back, in their canoes. And in this fact, supposing it to be one, lies the great difficulty we are considering, which is, by what means did the Sandwich Islanders make these long voyages in their canoes? How was the existence of Tahiti first ascertained? Or supposing its existence to have been ascertained by accident, or by the remembrance of the first accident which brought them here, how could these natives confidently and deliberately set out on their voyage, succeed and arrive safely back, as tradition reports them to have done? Navigators in these seas are quite aware that it is not always an easy matter to make Tahiti (and still less Nukuhiva,) from this, even with a fast sailing vessel, and with all the advantages of modern knowledge. When we consider that the Phoenicians and Carthagenians who were great Navigators, and comparatively civilized, and even Europeans up to a recent period of their history and civilization, knew nothing of tho Western Islands, the Canaries, or the continent of America, and were for ages afraid of venturing boldly into the Atlantic ocean, it seems a most incredible circumstance that the ancestors of the South Sea Islanders should have found their way over thousands of miles of trackless ocean from one small group of islands to another. Taking all the circumstances into consideration, we must allow that the first Hawaiian who accomplished the voyage to Tahiti and back, in his canoe, (a distance of about 4,000 miles of open ocean,) threw the exploits of Captain Cook and even of Columbus himself, completely into the shade; whether we regard the boldness of the attempt, or the skill and sagacity which must have been displayed in its accomplishment.

In whatever way the first peopling of these remote islands by one race has been viewed, and whatever hypothesis has been advanced to account for the facts, almost insuperable difficulties have presented themselves, and our anxiety to penetrate the mystery has been

lessened by the apparent hopelessness of the task.

The investigations and discoveries of scientific men of late years however, have established a class of facts with reference to the Pacific ocean which appear to indicate that the suggestion of Darwin already alluded to contains the true solution of the difficulty The beautiful generalizations of this naturalist, (subsequently corroborated and enlarged upon by J. D. Dana, Geologist to the U. S. Exploring Expedition,) respecting the nature of coral reefs and atolls, shew that an immense area in the Pacific has for ages been gradually subsiding, and that the numerous lagoon islands point to the spots where the highest peaks of what were once mountains, have sunk beneath the waves. That in fact where there is now nothing but open ocean, or at most but a few low coral islands, there existed in a geologically recent period of the earth's history, large islands with lofty mountains.

The process of reasoning by which Darwin in the first instance arrived at this conclusion is amply detailed in his works, and when once exhibited is so clear, simple and beautiful, that the truth o the theory was acknowledged with delight and admiration by the geologists of Europe and America.

Dana in his "Geology" of the U S. Exploring Expedition, in the chapter on 'Changes of Level in the Pacific Ocean,' after reviewing the different circumstances connected with the subject, says:

"'The facts surveyed give us a long insight into the past, and exhibit to us the Pacific scattered over with lofty lands where there are now only humble monumental atolls Had there been no growing coral, the whole would have passed without a record. These permanent registers, planted ages past in various parts of the tropics, exhibit in enduring characters the oscillations which the "stable" earth has since undergone. Thus Divine wisdom creates, and makes the creations inscribe their own history; and there is a noble pleasure in deciphering even one sentence in this Book of Nature."

It is a circumstance particularly worthy of note, in connection with our subject, that Dana makes the line of *greatest depression* in this subsiding area of the Pacific "pass from Pitcairn's Island towards Japan"—*such a line would pass nearly through the centre of Polynesia.* More than this, if we take the chart of the Pacific, and draw a line round the groups inhabited by the Polynesian race, that is to say by a race closely allied in feature, language, manners and customs, we shall find the boundary to correspond in a remarkable manner with Dana's boundary of the area of depression, and that the greatest subsidence has probably occurred where there are now few or no islands, that is, *in the great blank between the Hawaiian and the Southern groups.*

Now if we allow that Asia or Malasia may have been inhabited at the time when this area of subsidence was a few hundred feet or even a few fathoms higher than it is now, at a time when in fact, *Polynesia consisted of a closely connected Archipelago,* instead of a few straggling islands, all our difficulties at finding these *now* distant and disconnected groups peopled by one race—vanish.

The only question perhaps, that can be raised to militate against this solution is, whether it be probable that man existed upon the earth at the time when islands were so much more numereus in the Pacific than they are now; whether the long period which we might suppose must have elapsed since the islands now beneath, were above the ocean, would not carry us back beyond the time that the commonly received chronology allows for man's existence upon earth.

To assist us in forming an opinion upon this point, Dana's work may be again quoted. In one place he says:

"However moderate our estimate, there must still be allowed a sinking of several thousand feet, and however much we increase it within probable bounds, we shall not arrive at a more surprising change of level, than our continents shew they have undergone."

A little further on he writes, "The period during which these changes were in progress was probably within and *since* the Tertiary epoch."

But we are not left entirely to conjecture on this point, for we have evidence that on some of the islands of this subsiding area, there has been a considerable amount of subsidence, not only within the human epoch; *but since the Pacific Islands have been inhabited.* Dana informs us, that "The islands of Bonabe in the Caroline Archipelago, affords evidence of a subsidence *in progress*, as my friend, Mr. Horatio Hale, the Philologis of the expedition, gathered from a foreigner who had been for a while a resident on this island. Mr. Hale remarks, after explaining the character of certain sacred structures of stone; "it seems evident that the structures at Ualau and Bonabe are of the same kind, and were built for the same purpose. It is also clear that when the latter were raised, the *islet* on which they stand was in a different condition from what it now is. For at present they are actually in the water; what were once paths, are now passages for canoes, and as O'Connel (his informant) says, when the walls are broken down, the water enters the enclosure. Mr. Hale hence infers that the land on the whole group of Bonabe, and perhaps all the neighboring groups, has undergone a slight depression."

Another singular fact to a considerable extent, connecting the subsidence of the islands of the Pacific, with the human epoch is, that in some cases there appear to exist ruins of ancient cities,* of a style and of dimensions incompaticle with such a population as the *now* small islands on which they stand are capable of supporting.

Now we find that the amount of subsidence necessary to submerge an Archipelago, in the principal place where we required it to have once existed, that is between Hawaii and the Southern groups, was only a few feet, for Dana informs us that in the whole area between the Hawaiian and the main southern groups, there are in all two hundred and four islands, of which *every one are low coral islands,* not more than ten or fifteen feet high, except the eight Marquesas. Ualau, Bonabe, Hogoleu and two or three coral islands, and that they decrease in size from the south towards the north, the majority of the latter being what Darwin calls "half drowned Atolls," islands in the last stage of existence.

* U. S. Exploring Expedition, vol. 7, page 85—Annual of Scientific Discovery, for 1853, Boston, page 38s.

But let us again refer to Dana's own words, he says:

"When after thus reducing the size of the Atoll, the subsidence continues its progress, or *when it is too rapid for the growing reef, it finally sinks the coral island* which therefore disappears from the ocean. Now it is a remarkable fact that, while the islands about the equator above alluded to, indicate greater subsidence than further south, north of these islands, that is, *between them and the Hawaiian group there is a wide blank of ocean without an island, which is near twenty degrees in breadth.* This area lies between the Hawaiian, the Fanning and the Marshall islands, and stretches off between the first and last of these groups, far to the northwest.

Is it not then a legitimate conclusion that the subsidence which was least to the south, beyond the boundary line, and increased northward, was still greater or more rapid over this open area; that the subsidence which reduced the size of the islands about the equator, to mere patches of reef, was further continued, *and caused the total disappearance of islands that once existed over this part of the ocean?*"

Here then we see that the submerged islands, between the Hawaiian and southern groups, must previous to their submergence have existed as few lagoon islands or Atolls, not more than ten or fifteen feet high. The rate of sinking which submerged one island, would submerge all, so that a few centuries of subsidence "too rapid for the growing reefs," the same perhaps which lowered the structures of Bonabe into the sea, may have obliterated from the ocean the very stepping stones we are in search of.

This hypothesis would at the same time, easily account for the knowledge of the existence and direction of Tahiti by the Hawaiians, and the confidence with which they undertook their voyages thither. For in former ages, when as we have seen, there was in all probability, a string of islands between the two places, perhaps no one, more than a couple of days sail from the other, there would be no difficulty in the undertaking. As centuries rolled on, one island after the other would be submerged, and the communication would gradually become less frequent. Still a few islands might remain to guide the voyage of an occasional adventurer, and keep up the remembrance of the course—at last some one relied upon as a landmark would disappear beneath the waves—and the bewildered navigators without the means of recovering the route, would be lost on the now trackless ocean. The Hawaiians not seeing their countrymen return, and the voyage having become a serions undertaking, would never attempt it again. At the present day the very existence of Tahiti, and the voyages of their ancestors are legends only just separated from the fabulous period of Hawaiian tradition.

There are certain differences between the condition of the inhabitants of the Polynesian groups, and the condition of the inhabitants of the rest of the globe, which point to something anomalous, something hitherto unexplained. As one instance of a striking contrast it may be mentioned, that in the small and compact area of the British Isles, extending over a space of only a few hundred miles each way, there exist up to the present

day, notwithstanding the assimilating operation of one government, the printing press, railroads and steamboats, no less than six distinct languages commonly spoken in different districts—whilst only one language is spoken by the inhabitants of Polynesia, although the latter contains ten or fifteen distinct groups, under distinct governments, and which have been for ages without *apparent* means of communicating with each other; some of them being at a distance of above a thousand miles from the nearest of the others, and most of them separated by very considerable distances; the whole having a range of about five thousand miles in one direction, and more than four thousand in another, of sixty-seven degrees of latitude and sixty-five degrees of longitude, or over one sixth the circumference of the earth in either direction

A phenomenon so singular and having no parallel on the earth's surface, we can hardly expect to explain on any ordinary hypothesis; and on a review of all the facts, it does not appear that any theory has ever been offered so satisfactory as the submergence of vast archipelagoes, suggested by Darwin. Its simplicity and the completeness with which it solves all our difficulties, would probably lead every mind to assent to it without hesitation, were it not that our mental eyes are unaccustomed to look so far back into the abyss of time, in connection with the history of our race, as this theory seems at first sight to require. But—independent of the proofs adduced of the connection between the subsidence and the period during which the Pacific islands have been inhabited, a rigorous examination shews that a few centuries might have easily accomplished all that was necessary; for—taking the subsidence to have been at the same rate as the coast of Sweden is *now* known to be rising, that is two feet in a century, it would in ten or twelve centuries sink and erase from the ocean, the one hundred and ninety coral islands now existing to the northward of "a line drawn from Pitcairn's by the Gambier group, the north of the Society group, Samoa and the Solomon islands to the Pelews," and would only leave *six* islands above water (exclusive of the eight Marquesas) between that line and the Hawaiian group, in "an area two thousand miles wide and six thousand long."

But whatever time may have been necessary for the submergence of the missing islands, we ought not to reject the possibility of its having been contemporaneous with the human epoch solely on chronological grounds; at least not on the authority of those chronologies which limit the existence of man upon earth to some six thousand years, and which dating back from the creation, fix the period of, and describe the different events in early times, with an appearance of precision, as likely to mislead as the dates are known to be uncertain and probably incorrect. Such systems of chronology are fast being shelved with the Astronomical and Geological systems of our forefathers; and when the progress of science succeeds in finally breaking through this artificial barrier, we shall probably find its investigations extend to periods of human existence, which can only be limited by or compared with the duration of a geological epoch. We shall then have scope for explaining on intelligible principles, the great distinction of races, and the highly artificial state of their language, religion and government, which we know to have existed at the most remote historical periods. The inhabitants of Polynesia are by no means the only race whose present state and past history may elude solution, whilst our speculations are bounded by an uncertain chronology. G.

[*Sandwich Islands Magazine.*]

The Whaleman's Friend.

ANXIETIES OF A SAILOR'S LIFE.

A few days ago a man was speaking to me of the emotions with which he bid adieu to his family on his last voyage. The ship in which he was to sail was at Edgartown, on Martha's Vineyard. The packet was at the wharf which was to convey him from Nantucket to the ship. He went down in the morning and saw all his private sea-stores packed away in the sloop and then returned home, to take leave of his wife and children. His wife was sitting at the fireside, struggling in vain to restrain her tears. She had an infant a few months old in her arms and with her foot was rocking the cradle, in which lay another daughter about three years of age, with her cheeks flushed with a burning fever. No pen can describe the anguish of such a parting. It is almost like the bitterness of death. The departing father imprinted a kiss upon the cheek of his child. Four years will pass away ere he will again take that child in his arms. Leaving his wife sobbing in anguish, he closes the door of his house behind him. Four years must elapse ere he can cross that threshold again.

A lady said to me a few evenings ago "I have been married eleven years, and counting all the days my husband has been at home since our marriage, it amounts to but three hundred and sixty days. He is now absent, having been gone fifteen months; and two years and two months must undoubtedly elapse before I can see his face again; and when he does return, it will merely be a visit to his family for a few months only, when he will again bid them adieu for another four years' absence."

I asked a lady the other day, how many letters she wrote to her husband during his last voyage. "One hundred," was the answer. "And how many did he receive?" "Six." The inevitable rule is to write by every ship that leaves this port or New Bedford, or any other port that may be heard of for the Pacific Ocean. And yet the chances are very small that any two ships will meet on this boundless expanse. It sometimes happens that a ship returns, when those on board have not heard one word from their families during the whole period of their absence. Imagine then the feelings of a husband and father who returns to the harbor of Nantucket after a separation of forty-eight months, during which time he has heard no tidings from home. He sees the boats push off from the wharves which are to bring him the tidings of weal or woe. Pale and trembling he paces the deck with emotions he in vain endeavors to conceal. A friend in the boat greets him with a smile, and says, "Captain, your family are all well." Or perhaps he says, "Captain, I have heavy news for you, your wife died two years and a-half ago.

A young man left this island last summer, leaving in his quiet home, a young and beautiful wife and young child. The wife and child are now in the grave. But the husband knows not, and probably will not know of it for some months to come. He perhaps falls asleep every night thinking of the loved ones at home left at his fireside, little thinking they are both cold in death.

On a bright summer's afternoon the telegraph announces that a Cape Horn ship has appeared in the horizon and immediately the stars and stripes of our national banner are unfurled from our flag-staff, sending a wave of emotion through the town. Many families are hoping it is the ship in which their friends are to return, and all are hoping for tidings from the absent. Soon the name of the ship is announced and then there is an eager contention with the boys to be the bearer of the joyful tidings to the wife of the captain; for which service a silver dollar is the established and invariable fee.

Who can describe the feelings which must agitate the bosom of a wife? Perhaps she has heard no tidings of the ship for more than a year. Trembling with excitement she dresses herself to meet her husband. "Is he alive?" she says to herself, "or am I a widow, and my poor children fatherless?" She walks about the room unable to control herself sufficiently to sit down; eagerly is she looking out the window and down the street. She sees a man with a hurried step turn the corner, with a little boy holding his hand. Yes it is he. And her little son has gone down to the boat and found his father. Or perhaps instead of this she sees two of her neighbors returning slowly and sadly, and directing their steps to her door. It is the knell of her husband's death, and she falls senseless to the floor as they tell her that her husband has long since been entombed in the fathomless ocean.

This is not fiction. These are not extreme cases which the imagination creates. They are facts of continual occurence; facts that awaken emotions to whi h no pen can do justice.

A few weeks ago a ship returned to this island, bringing the news of another ship that was nearly filled with oil, that all were well, and that she might be expected in a neighboring port in such a month. The wife of the captain resided in Nantucket, and early in the month, with a heart throbbing with affection and hope, she went to greet her husband on his return. At length the ship appeared, dropped her anchor in the harbor, and the friends of the lady went to escort the husband to the wife from whom he had been so long separated. Soon they sadly returned with the tidings that her husband bad been seized with the coast fever, upon the island of Madagascar, when about a week out on his return home, he died, and was committed to his ocean burial. A few days after, I called upon the weeping widow and little daughter, in their home of bereavement.—*Nantucket Paper.*

☞ A new Poem, "The Song of Hiawatha," by Longfellow, has been published. It is purely an American affair, founded entirely upon legendary tales of the North American Indians.

☞ The new historical work, Philip 2nd. by Prescott, has made its appearance in England and the United States.

MARQUESAS CORRESPONDENCE.

War in Fatuhiva ended—Departure of Catholic Missionaries.

OMOA, FATUHIVA, Nov. 3, 1856.

MR DAMON—DEAR BROTHER:—A small vessel now at anchor in the bay, affords me an opportunity of writing to you, to inform you that a brighter prospect is opening upon Fatuhiva. The unhappy war of which I gave you an account a few months ago, has been brought to a close. All the tribes are now at peace with one another; a circumstance which, perhaps, has not very often taken place in Fatuhivan history. To those who walk by faith, the finger of God is clearly manifest in the events which have lately taken place. I give you a brief account of the closing of the war, to engage you to rejoice with us that our God is at the helm of affairs in Fatuhiva.

About twelve days ago, this tribe, together with the tribes inhabiting the eastern side of the island, entered the valley of Hanavave and blockaded it. On the thirty-first of October, an engagement took place, in which one man, belonging to the Hanavave tribe was killed. The engagement gave this tribe and its allies a signal advantage, and they were preparing to make use of it. It was their intention to fall upon the Hanavaveans in the morning and exterminate the whole tribe. Matuunui, the chief who went to the Sandwich Islands, has friends in the Hanavave tribe. He was desirous of saving them, and he affected this object by going to them, and persuading them to send offering to the gods of the Omoa tribe. About midnight, on the thirty-first of October, some of the Hanavave people, accompanied by Matuunui, came to the bay of Omoa and made presents to the gods, and by so doing, put an end to the war. A messenger was immediately dispatched to the war party, to apprise them that the Hanavaveans had been to Omoa and propitiated the gods. Some of the warriors were rather vexed to see the prey taken from their very grasp, they could proceed no farther with the war; their superstitious fears restrained them.

"Even the captives of the mighty shall be taken away, and the prey of the terrible shall be delivered."

The better disposed of the warriors, went among the Hanavaveans and made friends. Yesterday the principal chief of Hanavave came here and secured the peace. To-day, presents have been exchanged between the tribes of Omoa and Hanavave.

The termination of the war has been a matter of rejoicing to those who are engaged in the Missionary work. The war was a serious obstruction to the progress of the truth. Its removal raises the hope, that the Lord may carry on His work, and that the events of the last few months, are the incipient steps to a bright, and more glorious era for Fatuhiva.

The part which the chief Matuunui has acted in these events, leads us to the belief that his doings are controlled by an overruling Providence. Measures which he has undertaken, in order to promote his own worldly interests, will be the means of bringing much glory and honor to the cause of Christ. He went to the Sandwich Islands to procure muskets, and powder, and he obtained Missionaries instead. Again, lately, self-interests induced him to try to save a few friends, and under God he was made the means of saving a whole tribe from destruction.

An event of vast importance to us, is, the abandonment of this station by the papist-mission. The departure of this mission removed a great obstruction from our pathway.

The whole length and breadth of the land now lies before us. All that we are waiting for is, to hear the command of God. "Go in and take possession." It is easy following, when He leads the way.

Yours in Christain live,
S. BICKNELL.

A NEW MEETING HOUSE IN VALPARAISO.

By a late N. Y. paper we learn that the Protestants in Valparaiso, are erecting a *Meeting House*. It is well known that the laws of Chile forbid all *heretics* from erecting houses for religious worship; still the authorities adopt a practical *Know-Nothingism*, and allow the erection of buildings where Protestants may meet for religious worship. For many years the English Episcopal Service has been read in Valparaiso, in a building, without bell or belfry, but in other respects fitted up conveniently for religious worship. The building however, if we have been correctly informed, was registered as a *stable* in the City Registry! We enjoyed the privilege of once worshipping in said stable! We rejoice that another *stable* is to be erected in that *Paradisiacal* city, for the worship of God, in accordance with the views of Protestants. We congratulate the Rev. Mr. Trumbull, in the success which has thus attended his labors in that city, among foreign residents and seamen.

☞ In another column will be found interesting communications relating to the volcano. We have still later intelligence, and are most happy to learn that there are less and less grounds for the opinion that Hilo will be destroyed. During the last four weeks the stream has not advanced over a mile. Dr. Winslow, formerly of Lahaina, and a gentleman of scientific predilections has advanced the idea, that according to *his theory*, Hilo is safe, for the stream will cease to flow, on or before the day on which our paper is now issued! As he has repaired to the scene of action, we may ere long expect some accurate data upon the subject.

☞ The Hawaiian Missionary Society, will dispatch a small vessel to Fatuhiva, Marquesas, as soon as the necessary arrangements can be made, and a vessel chartered. It is expected that the Reverend Lowell Smith will visit the Fatuhiva station. As this expedition will be attended with considerable expense, it is desired that all persons having funds in their hands belonging to the Society, will forward the same, by the earliest opportunity.

CHINESE INDIFFERENCE TO LIFE.—B. F. Angell, Esq., (late U. S. Consul at Honolulu) in a letter to the Rochester Union, writing from Canton, gives the following evidence of the stoical indifference of the Chinese to life.

Having been here a sufficient length of time to lose all respect and sympathy for the people, I concluded to accept an invitation to visit the execution ground with my friend, Lieut. W., who had been several times there, and was familar with that suburb. I was told that on every day, not sacred to some Joss, large numbers of Chinese rebels and criminals were beheaded; and that in some cases, when the culprit is a chief among the rebel forces, the Chinese penalty of being "cut into ten thousand pieces," was almost literally performed. My informant, Lieut W., saw a man flayed in the most brutal manner—his face skinned, his legs and arms broken, his bowels ripped open and his liver taken out to be prepared as a delicacy to be eaten by the Imperialists! My curiosity, however, only extended to visiting the scene of these barbarities. I had never visited an execution, and had no desire to do so; but after we got to the ground the gate closed upon us, and we were compelled to be the unwilling witnesses of a most appalling butchery. No less than one hundred and fourteen victims were decapitated in our presence, and after the first flowing of blood produced, I must admit in all frankness, that I looked upon this wholesale murder with as much indifference as I would see a flock of sheep slaughtered. The whole band received their doom with the most stoical indifference, and I saw no tears, and listened in vain for a single moan. The prisoners kneeled, leaning forward with their heads bent downwards, and their necks severed with a single blow of the short sword held in both hands by the executioner. As the head dropped, the body pitched forward to bear it company.

As an evidence of the Chinese indifference to life, I was informed by a respectable American merchant, who had been several years in Canton, Mr. H., of the house of King & Co., *that a culprit condemned by the laws of China to suffer death, may hire a substitute to die for him for the sum of twenty dollars!*

Almost every hour of the day you may see dead bodies floating among the rafts of the boat on the river, and no one turns aside to drag them out and bestow upon them the rite of sepulture. They look with equal indifference upon the struggles of a drowning man, and only in rare cases will lend a hand to save. A foreigner, who happens to fall into the river, would be beaten of if he attempted to save himself by clinging to the boats of the Chinese. But I weary you with these disgusting details, as I am myself wearied in recounting such evidences of barbarity and depravity.

THE MAINE LAW APPROVED BY THE QUEEN OF ENGLAND—A copy of an order in Council dated at the Court of Windsor Castle, November 21st, 1855, was recently received at the office of the "Prohibitionists" in Albany. In it her Majesty gives her official sanction to the Prohibitory Liquor Law of the Province of New Brunswick, and directs the Governor or Commander-in-Chief, and all other persons whom it may concern, to be governed thereby accordingly. The law takes effect on the first of January.

☞"Our government lands cost one dollar an acre on an average, and champagne two dollars a bottle. How many a man dies landless, who during his life has swallowed a township, trees and all !"

We copy the above from an American paper. If drinking champagne and brandy merely rendered men *landless*, it would not matter so much, but alas not only do they forfeit land, but they inherit misery, wretchedness and sorrow. No wonder, we have hard times in Honolulu, when it is considered how much the spirit-drinking portion of the community pay for liquors. According to the Custom House report more is expended for alchohol in various shapes, than for schools, churches, charities and all the various schemes of philanthropy.

☞A physician in Honolulu called our attention to the following paragraph, remarking that he was fully confident great injury resulted from the practice of wearing—

PANTALOONS WITHOUT SUSPENDERS.—Professor La Borde, of South Carolina College, in his recent work on physiology says :

As the women have concluded to dispense with shoulder straps, some men, especially in the city, have thought they would prove pantaloons can be worn without suspenders. The men now strut the streets, with their pantaloons tightly buttoned, side by side with the women, whose skirts or petticoats are firmly bound around their persons. Upon a fair view the evil is the same in both cases, pressure upon the vital organs, impairment of their proper action, want of development, deformity, disease and permature death. The New York Phrenological Journal says : As we walk the streets of our city, we see scores of boys from twelve to sixteen years old, with their pants buckled very tightly around their disconnected bodies, preventing growth at this rapidly growing age, and the result is a generation of dispeptic, paled-faced puny analogies for men.

AMERICANS IN AUSTRALIA.—The Paris correspondent of the New Orleans Picayune contributes the following extract from a private letter written by an Englishman in Australia. The letter reads :

"You, who have been so much in America, will not be surprised when I say that the Americans are by far the best men in this country. You know well their enterprise, but even you will be astonished with the following statistical information : at Ballarat, according to the census commission, the population is 22,000, of whom only 210 are Americans. In order to drain the water from the deep sinkings, and also to wash the stuff, there are seventeen engines and machines ; of these four belonged and were worked solely by Americans. All the great contracts are taken by them ; the lines of stages to and from diggings that are accessible to wheels, and few are not, are all Yankee; the coaches either Troy or Albany built; the harness and all from the same country. In coming into the bay you will notice that all the fine ships are Americans, the best hotels are theirs—in fact, they are improving our people out of the place altogether."—*American Paper.*

[For The Friend.]

THE NEW VOLCANO—HILO THREATENED, &c.

Hilo, January 22nd, 1856.

Mr. Editor :—Having just returned from the lava flow, I feel moved to communicate the result of my observations.

We found a considerable ascent between the shore and the present terminus of the lava, which is about 7 miles from the town, towards which it is directly advancing with unabated activity. There still intervenes about 3 miles of dense forest and jungle between it and the open ground. It has now been flowing about 23 weeks, all but the first 2 or 3 of which have been occupied in fighting or gnawing its way with sluggish but resistless force through 10 or 12 miles of forest. The whole stream is some 60 miles long. Its rate of advance has been for a long time quite steady at about one mile in two weeks. These data may enable you to calculate how long it must continue to run to complete its victory over its most formidable obstacle, the forest, which has so far been the means of preserving the harbor of Hilo from its terrific invasion. It was about dark, when having ascended for 100 rods the bed of the branch of the Wailuku river, we mounted a *pali* between two nearly dry cascades, and found ourselves in the presence of the blazing woods and jungle. Passing up a few yards, we suddenly stumbled on the flowing lava, in a narrow dull, sluggish stream, filling a side channel of the brook It being in small quantity, yet in a state of fussion, gave us an admirable opportunity of obtaining such specimens as we could conveniently take away. This lava appeared to be about a hundred yards in advance of a large body of the same, about 300 yards wide which was vigorously burning its way down towards us through the woods. We finally laid down in a place that seemed secure, on the brow of a dry cascade. But at 3 A. M., a body of the enemy came down in strong force and routed us out to watch its movement. Unobstructed in the smooth channel it rolled on about 100 feet an hour, its front a glaring red, cooling as it flowed. At 4 a bright tongue darted forward, and rolled with dull plash over the precipice. We sprung down to witness the marvellous sight. A brilliant cascade of intensely bright lava was pouring down a height of 25 feet, first in a broken, and at last in a continuous torrent, striking on a ledge and sliding off into the deep pool below, which hissed and roared in agonizing resentment at the horrible intrusion upon its placid slumber. The sheet of fire was about 6 feet wide narrowing beautifully till it struck the rock, where it gradually heaped a mound of half solidified lava, which would now and then crush down into the water, which would then splutter and fly in all directions, while a glorious column of white vapor rose far aloft We felt that we had a spectacle provided for us, and until day broke we stood devouring it with our eyes. No words can describe the exquisite and entrancing beauty of the whole scene, of which the hideous crawling monster we had seen above thus suddenly transfigured and leaping in glory, now became the centre and the gem. Imagine a scene of most dim and delicate beauty, such as you may have seen or thought of, a silver cascade with its flashing foam and dark romantic amphitheatre of cliff and forest all thrown into dim but rich relief by a full moon in a cloudless sky, then change your pale silver flood into one of intense burning gold, rolling down still and bright as the heart of a furnace, and you can imagine what a gem we gazed on and in what a setting. Nor did the grand white column of steam detract from the beauty of the sight. But day broke, the moon paled; the bright flood became again encased in its black and hideous mail, a huge mound of smoking scorial was filling the basin, and the boiling water was flowing by our feet. So we returned up the other side of the stream to observe by daylight the great river of lava above Making our way to its edge in various places, we were enabled to see that a vast river of it, now congealed in black misshapen billows of coke-like stone, had forced its way from the S. W. past the point where we stood towards the Wailuku river, but that it had paused in that direction, and had broken out on the side where we stood, pushing forward long tongues of fire into the timber as an advance and following these up in mass, burning and covering what they had spared. In one case we walked 100 yards through the woods upon a slender thread of lava cooled, say 15 feet wide across which lay trees and bushes whose roots it had burned away. But everywhere the following fusion forbade our passage on to the main stream. This we judged to be more than one mile wide. Its depth is irregular. In the centre it appeared to be heaped up 30 to 50 feet. We estimated its breadth by the appearance of the trees beyond. But for this test to correct deceptive appearances, I should have called it not above 100 rods wide. The advancing phalanx of fire was about to reach en masse the wider and deeper channel of the stream below the fall, where it was evident so much of it as the capacity of the channel would admit, would pass forward with rapidity, and might run on even miles in advance of the rest. But even should this small portion soon pass down the Wailuku and reach the sea, it could do no fatal injury. Should the main body take the same course as appearances indicate it would, the town and harbor would be totally destroyed. It is however the opinion of some who are familiar with the ground that the general direction of the lava after leaving the woods would be to the southward of the town, across the Waiakea river, and into the bay near the present projecting reef which forms the harbor. It is of little use to speculate upon the result. This great eruption is an appalling thing. The hand of God governs it. He can turn its course, or stay it altogether. But our fears are not allayed when we look at Mauna Loa and see those two vast columns of smoke which it is still pouring forth. Some here have in their fears that faith in the Hearer of Prayer which God's word justifies, and are supplicating the Divine interposition to avert the threatened calamity.

Truly Yours,

S. E. BISHOP.

P. S. Since receiving the above we have been favored with the following from the Rev. Mr. Coan, under date of January 26.

As for our volcano it comes like a relentless consumption, slow and sure. Did the molten stream possess intelligence we would call it implacable. For a time we did allow ourselves the hope that the flow was abating but that hope was illusive. The red glare of the fused minerals is as intense as ever and the flaming forest throws up a terrible radiance against the midnight sky. Day after day we watch the ascending column of steam and smoke as it rises and expands and gyrates and rolls in convolving waves, or hangs in a glorious canopy under the vaulted sky, or sweeps off horizontally like the tail of a comet, or spreads to uniform and dim drapery like the penumbra of an obscured orb.

Night after night, also, we gaze upon the lurid glare of that devouring fire which flashes through the forest and threatens us with burning ruin.

What a work this fiery serpent is doing eating every herb and tree—drinking up the rivers and licking up the dust. All is life and verdure before—all ebon blackness and desolation behind. Not a greenthing—not a rill or pool or drop of water over all its vast and smouldering track.

It is now about six miles from us, coming at the rate of a half a mile a week, probably. It is easy of access. Men run up to it and return before noon of the same day.

Splendid pyrotechnical scenes are often displayed as it comes down the bed of rivers and leaps precipices into deep basins of water. But my time is up and I can say no more.

Yours fraternally,

T. COAN.

An old sailor at the theatre said he supposed dancing girls wore their clothes at half mast as a mark of respect for departed modesty.

DONATIONS for the Seamen's Chapel. (Seats free,) supported by gratuitous contributions; and The Friend, one thousand copies of which are distributed gratuitously among seamen in the Pacific Ocean.

	For Chapel.	For Friend.
Capt. Andrews, - -	$10 00	10 00
Rev. Mr. Pogue. - -		8 00
Rev. L. Smith, - -	- 5 00	5 00
A New London ship owner for his five ships, $5 00 each for two years.		50 00

☞ Donations for "The Friend," very acceptable, as we were compelled to report in our last No., a debt of $151 on the 1st of February 1856.

☞ G. M. Robertson, Esq, Treasurer of Honolulu Sailor's Home, would acknowledge a donation of $100 from Messrs. Keith, Butler and Hill of Boston, through Messrs. Castle & Cook.

☞ Capt. Pease of the "Europa" made the donation of a barrel of oil for the "Home."

DIED;

Drowned March 5th, 1855, in the bay Omoa, Fatuhiva, T. G Cooke, a native of London, aged 19 years.

Drowned January 26, 1856, Joe Luce a Portuguese, belonging to ship "Janus" Capt. Winslow. He fell from the topgallant yard and struck on the forward davit. His friends reside in St Michaels.

At Punahou, on the 13th inst., aged 6 months, Clara, infant daughter of E. G. Beckwith, Esq., and Caroline Beckwith.

In this city on the 4th inst, Mr. James Dunn, a native of England, aged about 40 years. His remains were followed to the grave by the 1st Hawaiian Cavalry, of which body the deceased was a member.

In this city Feb. 2, Mr. John C. Bullions, of the firm of R. Coady & Co., aged 28 years. Mr. B. was formerly a resident of Albany, N. Y.—[San Francisco and New York papers please copy.

On Tuesday, the 26th ult., in Honolulu, David Kaauwai, Esq., a member of the Bar, and formerly Representative for the district of Kaanapali, in Maui.

Mary Ann, daughter of Mr George Hyatt, departed this life January 21st, 1856—aged 19 years.

Honolulu Marine Hospital.

THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz.: a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.

Single rooms are provided for such as do not wish to enter the general wards of the Hospital.

The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this what a Hospital should be.

Patients will also be received by Drs. Hoffman, Ford, Hillebrand, Bullions, Hardy and Guillou.

Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.

GEO. A. LATHROP, M. D.

To Masters of Whale-Ships Visiting the Hawaiian Islands.

YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.

You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call.

P. CUMINGS.

Kealakeakua, Hawaii.

B. PITMAN,

BYRON'S BAY, HILO, HAWAII.

HONOLULU MEDICAL HALL.

DR. McKIBBIN, SURGEON, &c.

BEGS to inform the inhabitants of Honolulu and vicinity that he has taken the old established Drug Store, corner of Merchant and Kaahumanu Streets, which he has remodelled and means to keep constantly supplied with the best medicines he can procure from the United States and England. The concern will be constantly under his own or his son's superintendence, so that families requiring medicine may depend on getting the best, carefully prepared.

He has just received a case of London perfumery Soaps, Brushes, &c., and daily expects a further supply, which, with the ordinary patent and other medicines, will be sold on reasonable terms.

Physicians' and Surgeons' prescriptions carefully prepared.

Captains or owners of vessels will find every attention paid to themselves or families if requiring medical assistance.

Medicine Chests carefully examined and refitted

Attendance for consultation at office from 9 A. M. till noon, and from 4 to 6 P. M. on week days. On Sunday from 9 A. M till 11 at other times, at his residence Union Street. 27 tf

BIBLE, BOOK AND TRACT *DEPOSITORY* at the Sailors' Home.

Bibles, Books and Tracts, in the English, French, Portuguese, German, Danish and Spanish languages. *For Sale at cost prices, but*

Gratuitous to Seamen.

Also, Office of "The Friend;" bound volumes for sale; Subscriptions received.

N.B.—Seamen belonging to vessels lying "off and on," will be supplied with books and papers at the Depository.

Passengers.

Per Kate Hill, Baldwin—M. Forbes, A. McMillar.

Per Orkney Lass, Perrington—Mrs. Jane Clark, Miss Emma Clark, Master William Clark.

Per Yankee, from San Francisco, Mr. E. Grover and lady J. A. Post, Doct. C. F. Winslow, W. T. C. Talmer, M. Modeste, M. Lipper.

Per Frances Palmer, for San Francisco. J. Ware, P. W. Graves, J. Almon, J. Strouss. A. Frick, A. Allen, J. D. Blair, — Severance. C. Perkins, Mrs. Rose. Miss. Rose, Mrs. Swan and child, J Romettre, J. Rowland, J. Enos, A Friday, M. Doiron, A. Gaske, J. Silva, A. Arfit. A. Franci-, J. Humphreys, Mrs. Humphreys and child, F. Silva, J. Josiah, H. Bird, Mrs. Bird and four children, M. Souza, J. Silva, A. F. Burney, J. Baptiste, J. Hussey, A. McMillar, J. Baylor

The Friend.

HONOLULU, APRIL 1, 1856.

SEBASTOPOL TAKEN, AND DRINKING BOOTHS ATTACKED.

The Allied Army has now came in contact with a foe worse than the Russians Sevastopol has been besieged, taken, and its foundations are now being razed. The world has intently watched the terrible struggle. It is now ascertained, that another foe has appeared in the Crimea, more deadly and cruel. We hope the British Lion may be as successful in his encounter with the Monster Rum, as with the Russian Bear. Some at least will as intently watch the progress of this war with the "spirits," as they have the progress of the attack upon Sevastopol's strong holds. If the Allied Army triumph over the fall of the "drinking booths," it will be a more glorious achievement than to plant their flags on the "Redan" and "Malakoff."

That angel of mercy, the philanthropic Miss Nightingale, could stand at the door of the Hospital and welcome the mangled victims, as they were borne upon litters by scores and hundreds, from the bloody battle field and the trenches, but her noble and heroic heart, quailed, sickened and fainted when the grog shops sent their miserable, brutalized and bloated victims. We commend the remarks copied from various London papers, upon Rum in the Crimea, to the careful perusal of our readers. "Here" says the Globe "is a great evil to be grappled with." It is an evil to be grappled with not only in the Crimea, but in England, America and all over the world. We shall anxiously wait to receive the report of the reception which Lord Panmure's instructions meet with. We fear he will find it an easier matter to drive the Russians out of the Crimea, and close up the Perekop passage, than to close up the doors of those frail looking and slender built establishment, called "drinking booths."

THE HAWAIIAN FLAG.—(*Ka Hae Hawaii,*) is th title of a new weekly paper published in the Hawaiian language. Four Nos. have made their appearance. It is issued from the office of the Minister of Public Instruction, and is under the editorial charge of the Chief Clerk of this department, J. Fuller, Esq. That such a sheet was needed has been clearly manifest for a long period, to those acquainted with the wants of the natives. In our humble opinion, if the government has money to spare, it ought to publish two paragraphs for the native population to one among the foreign. For years the natives have been left to glean all foreign and domestic news from the pages of a small paper issued from the press of the American Mission. We hope those who have now taken the matter in hand, will not spare labor or money to make "The Flag" a first rate newspaper. The Hawaiians are famishing for useful information upon various secular subjects, education, agriculture and mechanical trades. We hope to see the talent of the natives, from His Majesty, to the humblest of his subjects, who can write (who cannot?) sending forth their thoughts through the columns of "The Flag." The old missionaries have done well to sustain a native newspaper for more than twenty years, and we hope they will aid to make this sheet all that can be desired for the Hawaiian people. We have been prompted to make these few remarks, from the sincere interest we have long felt and do now feel, in this people among whom our lot is cast. We do not sympathize with that feeling entertained by some towards the Hawaiian and other Polynesian races, because they may seem to be wasting away and may not possess all the elements of national greatness, which the God of nations has bestowed upon other races, therefore they are to be *left to perish.* We are not blind to the sins of Hawaiians, but do not other and superior races commit more heinous sins? It is an easy matter for the proud Briton, or the self-conceited Yankee to see the mote in a Kanaka's eye, but stare and gaze about, as if there was no beam in his own eye! But what has this to do with the "Hawaiian Flag?" We hope it may serve to swell the breeze which shall cause its folds to wave long and prosperously over the Hawaiian people. May the sheet we now commend teach the Hawaiian to fear God, honor the King, work on the land, buy cows instead of horses, cultivate *kalo* instead of *awa,* build good houses, send his children to school, make his sons and daughters industrious at home, and respect himself.

☞ A large portion of our colnmns will be found to contain documents relating to *one Robert Mills.* Since preparing this matter, through the politeness and courtesy of Mr. Perrin, the French Consul, we have seen a letter written by the French Governor of Marquesas, respecting this same Robert Mills, who is described as "*a first rate scamp and a big rascal.*" The Governor intimates that should Mills return to the Islands, he will be taken in custody and punished as a notorious criminal.

☞ Capt. Hand commanding whale ship "Neva," has sent us the following statement for publication, but does not inform us where the vessel was cruising at the time, although we suppose it must have been off Sag Harbor. We infer this from the time mentioned.

"Alonzo L. Davis, with two others, deserted from the "Neva," Sept. 15th, 1855. They were taken by the police on the 16th. On the 17th, the ship lying "off and on," they were brought on board. That night the ship being 10 or 12 miles from land, Davis left the vessel on one of the fore-scuttle doors. I knew nothing of it until the morning. The officers of the watch missed the man about 10 o'clock; but supposed the man had stowed himself away on board. I do not suppose he could have reached the shore, unless he was picked up by some fisherman who was fishing at some distance from land. Davis hailed from Staten Island, but was born in Poughkeepsie, New York"

FAREWELL ADDRESS OF ROBERT MILLS.

Thinking our readers will be interested to know by what means Mills could have made so favorable an impression upon the minds of the friends of Missions in the U. S., we publish the following extracts from an address of his, as we find it reported in the New England Puritan (a Boston paper) of Aug. 16th. A previous speaker had remarked:

"Mr. Mills, he said, was a sailor. He was born in Ireland, came to this country when he was young, lived some time in Schoharrie County in the State, and afterwards went to sea, on board a whaler. He and his companions got separated from the ship in a boat, and were cast on one of the Marquesas Islands. There he remained sixteen years, married the daughter of the principal Chief, who is now with him, and on the death of the chief which took place some time since, her son, now five years old, has become the hereditary Chief of the Island. Feeling the need of the Gospel, Mr. Mills came to this country to obtain Missionaries. He first applied to the American Board, but as they were restricted by an agreement with the London Missionary Society not to send missionaries South of the Equator, they could not grant his request. Mr. Tappan read an extract of a letter from Rev. Mr. Eldredge, of New Bedford, confirming Mr. Mills's statements, from the reports of ship masters and owners, and a similar document from a merchant in New York."

☞ Many of the assertions of Mills we know to be false, but still we let him tell his own story;—

"Mr. Mills was then introduced to the audience. His statement, which was made somewhat after the idiom of his countrymen, was full of spontaneous wit, and showed to a man of good sense, and no small degree of shrewdness. Getting lost in a whale boat, he said, they concluded to go to the Marquesas, though they understood that they were cannibals, and therefore had no very inviting prospect. There are ten of these Islands, containing in all about 40,000 inhabitants. The one on which they landed contained about 6,000. They found the people eating human flesh, though they did not compel them to eat it. They were separated from each other, though the natives treated them as Mr. Mills said, "as well as they could." It was six or seven months before they had an opportunity to consult each other as to the means of escape. The vessels which formerly touched at the Island had been in the habit of inviting chiefs on board, and then keeping them till they would furnish sandal wood for their redemption. This so exasperated the natives that it was dangerous for them to land, and intercourse was almost entirely cut off.

At length they found a place to look out for a vessel and get off in their boat. It was his turn to look out; and when he gave the signal his companions rushed to the boat, and put off, leaving him a quarter of a mile behind. Some months after this, a man came to him from another tribe, and proposed to take him to another place where ships landed. He went, and was put under the care of the Chief. He went on board a vessel, and found the Captain to be a relative of his. Of him, he get a certificate of his good character, so as to induce vessels to stop and trade. For he said that white people who live on the Islands, are often as bad as the natives. He said the whale ships only wanted the natives civilized enough not to kill them. They don't want missionaries. The excuse made for this at New Bedford was, *that the Missionaries at the Sandwich Islands have corrupted the Natives!*

The captain, his relative, also gave him a whale boat. He then went to the people at all the Islands and told them that they must behave themselves, or else the ships would not come there to trade. He made them understand that it was against their interest to steal and commit other crimes; and this was the only appeal that could be made with any effect to the untutored natives.

After a while the people began to inquire after Missionaries. They saw natives of the Sandwich Islands, well dressed and in every way superior themselves. But they did not want such Missionaries as the French and English sent. There was one place where there was a French Catholic and an English Protestant Mission. The Catholics told them they must not believe what the Protestants said, for they lied; and the Protestant Missionaries, as they were bound to do, said they must not believe what the Catholics said for they lied. And so the natives would believe neither. The Catholics had never succeeded there. They had been there thirteen years, and made no converts. They attempted to convert them by force; but the natives would not be driven. It was like trying to drive a hog; they would turn round and fight you. When they saw the Sandwish Island's people, and how they had been benefitted, they said, "Could'nt we have such Missionaries?" When he found they were so anxious, he wrote to the Sandwich Islands, requesting an American Missionary; not native teachers alone. He did not believe in sending them out alone. He thought they would be more likely to fall back into their habits, than to improve the natives. But he never received any answer.

Some months after, a ship came that was going to New Zealand, and he paid his passage there and back, with the hope of getting a Missionary. But he did not succeed, and therefore proceeded to this country.

Mr. Mills then proceeded to give a very interesting description, in his own peculiar way, of the condition of the natives when he went among them. They were cannibals, but not from love of human flesh. They had been first lead to eat their enemies from revenge. This practice, however, was now entirely done away with, unless it might be by a few old people. The rising generation would not have this habit, nor many others which used to degrade the people; among which was their belief in the prophets. Their prophet was the greatest man in the nation. He was their Pope. Under him were others, who killed people by their superstitious practices. The people also believed in *spirit-rappings*, or ventriloquest women, who professed to call spirits out of another world, but greater and better. One of these women proposed to bring back all the people that had ever lived on the Island. There was a consultation about it, and it was concluded that there would not be room enough for them all to stand. It was then proposed that she should bring back one of the principal Chiefs. She had to fetch him three times before he would stay, and she must have her pay first. And sure enough the old Chief came, dressed up just as he used to be; but his friends caught him, determined, now they got him back, to keep him; when lo, it was the old woman dressed up in his clothes! Thus they learned it was all a humbug, and the spirit-rappers lost their hold upon the people."

These people, he said had many Jewish ideas and customs. They have a history of the flood. A prophet forewarned them of it, and told them to flee to the tops of the mountains; but they did not believe it and were drowned, and turned into porpoises! They practiced circumcision, and it was death to remove a neighbor's land mark. Thieving was punished with death. Polygamy was not practiced. Husband and wife generally live together during life.

The people on this island, when he landed, were divided into seven different tribes, but now they were all one family. They are now increasing, which he attributed to the introduction of fire arms. Formerly, when they fought with clubs, their warfare was very destructive; but the muskets were so sure to kill that they fought two miles off, and when they had discharged their muskets, both parties run! When he discovered this, he encouraged them to buy guns, and he supposed there was one to every man on the island.

These people are not idolators. They believe in one God and though they have images of the deceased prophets, they do not worship them. The people have lost confidence in the prophets, and their images are trampled on.

They have doctors, but they give very little medcine but rely upon their superstitious practices. The last medicine they give, in a desperate case is, *a coffin!* They lay it alongside of a sick person; and if he is really going to die, it helps him off. If not, it starts him up. So, sometimes, when they think he is really dying, they shoot guns in at the door, under pretence of shooting the spirit back into him, after he has left the body; and sure enough, sometimes the dying person will start and run! Most of the people on this Island wear our clothing. They have regular dress-makers; and if one brings a new article of dress, all the rest must have it. Property is pretty equally distributed; for if one has a thing that another wants, he has only to ask for it, and it is given him; but then, the giver is sure to ask as much at another time from the receiver.

He found himself, he said, in a difficult position, having all the trade of the Island in his hands. He wanted to please himself; he wanted to please the traders in the ships; and he wanted to please the natives. But he found the best way of this was to *do right*. There was no law among them, except some regulations about the land. If one man wanted to knock another down with a stone, he did it, and never was called to account. But he introduced a code of laws for the regulation of trade, and got the master of vessels to sign them. One of them was, the "Maine Liquor Law;" no man must get a

native drunk, or send a drunken man ashore, no sailor was to stay over night on shore. In either of these cases, he was kept and made to pay for his keeping before he was released.

In conclusion, he supposed it might be thought necessary for him to return thanks, not only to God, but to the people, for finding Missionaries, and to them for going. But as for himself, there was no honor due to him, because he had done nothing but his duty. When he went to the Seminary and told his story to the students, Mr. Seymour said, 'I will go.' But he supposed there was no honor due to him for that, because, according to his profession, he only did his duty. But, must he not thank the churches for sending them? He did not know as there was any honor due to them, because it was their duty to send them. With this, he bade us farewell for the last time; but he hoped it would not be long before we should hear from them again."

STATEMENT RESPECTING THE NEW MISSION TO THE MARQUESAS ISLANDS.

In the November No. of the Friend, it was stated that a new mission was about to be established upon the Marquesas Islands, under the auspices of a Missionary Society, in the United States, and that one Robert Mills, a sailor, had been instrumental in starting this enterprise. The prospects of this mission are for the present clouded, and the enterprise hindered, in consequence of the unworthy and base conduct of said Mills. That our readers may understand the subject, we would refer to documents published in other parts of our columns.

Previous to receiving the letter signed "Aloft" and communicated by a highly respectable American, shipmaster, we had received a communication from the Rev. M. Seymour, one of the missionaries destined for Marquesas, but now at San Francisco. He speaks of the detention of the Missionaries at San Francisco, "chiefly by untoward-ed developments in the character of Mills." So it appears that Mills is likely to be thoroughly understood and exposed.

Bad as Mills may prove to be, base as his character may have been before leaving the Marquesas Islands, and unworthy of confidence as he is at present, yet we do not regret that this mission should have been projected. The cause was good, although advocated by a bad man. Mills, most surely has proved himself a skillful hypocrite and adroit manager, to leave the Marquesas Islands with a native wife, friendless and penniless pushing his way to the United States, via., New Zealand, Australia, Valparaiso and Rio, there finally to be taken up by a Missionary Society, composed of shrewd Yankees, and then to be sent out with associates to establish a new mission.

The "American Missionary Society" (not the American Board of Foreign Missions supporting missionaries in the Sandwich Islands) does not appear to have hastily taken up this enterprise. The officers of this society to justfy their position, have recently published the following statement in the New York papers.

"The letters which we had just before received from our missionaries (at San Francisco,) led us to hope that we might be spared the necessity of giving publicity to the other causes referred to. It is with great reluctance that we mention publicly the faults of one in whom the Christain public has taken so much interest, and for whom so much has been done, but the duty which we owe to the friends and supporters of missions, will not allow us to keep silence. Necessity is laid upon us and we are constrained to say that since the greatest calamity which fell upon Mr. Mills (as well as our Mission) in the death of his wife, such developments have been made by him that the Missionary Company with the sanction of the Executive Committee, have been compelled to withdraw their confidence from him, and decline to proceed any further in his company.

We are aware that this intelligence will be exceedingly distressing to many of our readers, as the causes that have lead to it have been to us. The testimonials that Mr. Mills brought to our committee were of the most gratifying kind; such as constrained us to believe it to be our duty to present them to the Christian public, and ask for the means to enable us to send a missionary to the Marquesas with him

Our first knowledge of him was derived from an article in the New York *Evangelist* of Feb. 8th, 1855, entitled "Royal Visitors," which was understood to have been written by a distinguished clergyman in this city, and pastor of a Presbyterian church. Verbal and written testimony was received from two secretaries of missionary societies in this city, and from clergymen, pastors of Congregational and Presbyterian churches in New York, New Jersey, and Massachusetts. Some of these testimonials were published in the *Independent* for April 19th, 1855, in the May number of the *American Missionary*, and in many other papers. One of them from the excellent pastor of a Congregational church in Massachusetts, was as follows: "From shipmasters, owners, and others interested in our whaling fleet, I learn that his influence among the natives, which is very great, has been always on the side of order and good morals. Missionaries laboring there would have in him a prudent, experienced, reliable and influential cooperator." Another from one of the secretaries above referred to, said:

"The documents which Mr. Mills has with him leaves no doubt of the sincerity with which he is prosecuting this matter." Another from a pastor in this State said:—"His statements can be fully depended upon, as I have a man in my church, who until a short time, was a yearly visitor of these, and indeed most of the South Sea Islands, who endorses every statement made by Mr. Mills."

We afterwards received voluntary testimonials from captains of vessels and other persons who had known him at the Islands, speaking highly of the character and extent of the influence exerted by him there. In view of these facts, three insurance companies before whom they were laid, contributed liberally for his personal benefit, that he might look after their interests in that part of the world.

Under such influences the Executive Committee of the Association appointed two missionaries, and their wives to accompany him to the Marquesas and commence a Christian mission there. They sailed from this city August 5th, for California.

Mrs Mills died soon after their arrival at San Francisco. In less than three weeks from that time Mr. Mills married the nurse that had been provided for his infant child, and his whole course since his arrival in that city has been such that our missionaries assure us, they have lost all confidedce in him. As has been previously intimated, for a few days there was hope that a favorable change had taken place, but this was soon destroyed. A judicious friend, residing at San Francisco, writing to one of the secretaries says: "Certain it is, that his conduct has disappointed those who knew him at the Islands, and I doubt if he returns there."

The Committee have not yet abandoned the hope of establishing a mission on the Islands, although they do not think it prudent for our missionaries to go immediately to Ohivaoa. They have been advised to visit other parts of that ocean, from whence they can emplore the Marquesas Islands."

Not only does Mills appear to have deceived the officers of the Missionary Society, *but distinguished clergymen, captains of vessels and others.*

In another column, we publish extracts from the farewell address of Mills, delivered in the Plymouth Church in New York City, August 5th, 1855.

ROBERT MILLS AGAIN.

KAWAIHAE, HAWAIIAN ISLANDS, March 4th 1856.

REV. S. C. DAMON—DEAR SIR:—A friend and lover of truth, desires to correct a statement made in the November No. of the Friend, in reference to one *Robert Mills*, who it appears has created quite an interest in the United States by setting himself up as a teacher, or preacher at the Marquesas Islands. The account rendered is in substance as follows.

Mills got separated from his ship and married the daughter of a chief when being moved with compassion at seeing the fallen state of the natives he undertook to elevate them, and after a time wrote to Honolulu for aid in the accomplishment of so great a work. As his letter did not reach its destination and in consequence of receiving no answer he took passage himself accompanied by his native wife and after a protracted and circuitous route, reached the Atlantic States, and in course of time San Francisco, on his return to the field of his former labors. Here his amiable wife died, and had they both been buried in one grave, a mantle would cover all, and Mills in one portion of the globe at least might pass for a saint.

But truth being stronger than fiction and

the deceiver still living, it is meet that his true character be made to appear.

Mills has acquired a reputation at the Marquesas no ways enviable, it is that of having had *many wives*, and led a dissolute life even to the procuring of human sacrifices for the *idolatrous* worshipers of Dominica. After deserting from a whale ship (for his *separation* is accounted for in this way,) he lived at Hanamanu and for sometime acted as linguist for the masters who touched for supplies. No complaint that I am aware of was made against him while acting in this capacity, and it is supposed that the written recommendations given as a trader, has been used to give himself the character of a teacher of righteousness.

It was here that the high chief sickened, and declared that nothing short of a human sacrifice could restore him to health again. Mills to raise himself in the estimation of the sick king, offered to procure a subject and with this view entered another bay where his own immediate tribe were at war, but where he (Mills) had a friend in the chief highest in power. Being challenged as he approached in his whale boat armed cap-a-pie, he says, "call me friend, I have a present for him." The old man not at all suspicious (the title of friend being sacred) swam off to the boat accompanied by his little grandson. When within reach, the boat's crew seized upon the lad and murdered him. The chief seeing this attempted to save himself by diving, but as he rose to the surface Mills discharged his muskets loaded with slugs the contents of which took effect in the right shoulder without causing death. It was in consequence of this tragedy or rather the fear of revenge for the horrible deed that caused this demon in human shape to leave the islands.

The Governor of Nookaheva as well as several other respectable residents will at any time confirm the above statements, you can judge of their surprise and indignation when your little sheet informed them that this Mills was "amongst the prophets." It is not strange the devil should assume the character of an angel of light, for he has practiced this in every age of the world but that he should attempt to add the heaven born principle, *love* is altogether too glaring and the cloven foot is seen under the covering.

Yours, respt.,

ALOFT.

A Good Swimmer —A sailor belonging to a whalesbip, when off "Diamond Head," a few days since, jumped overboard, about 8 o'clock in the evening. He took a small board and upon it endeavored to reach land. The tide or current was so strong against him, that he could not make much headway. While struggling with the waves a shark paid him a visit, and nibbled off one of his fingers, and also caught away his plank, but that he recovered, After a nine hours' swim, he was picked up by another vessel, and brought to Honolulu the next morning.

☞ All persons having books loaned to them by the Seamen's Chaplain, are respectfully requested to return the same.

THE POET ROGERS.

The late papers announce the death of this distinguished English Poet, at the advanced age of ninety. From a new book fresh from Boston, entitled, "Visits to European Celebrities" by Dr. Sprague, of Albany, we notice a graphic sketch of a visit to this celebrated individual in 1836 twenty years ago. The following is a part of the sketch:

"I called at Rogers' house, and as, he was not at home, left my letter of introduction, which was almost immediately answered by a note, inviting me to breakfast with him. I went at the specified time, and was received with equal dignity and hospitality. He had the appearance of a man of seventy; he was of about the middle height, stood perfectly erect, and had a face beaming with intelligence and good nature. His manners were at once dignified and graceful, and seemed to indicate both a gentle and thoughtful spirit. I found him living in splendid style, but quite alone, his servant being the only person besides himself whom I saw; and my impression was and is, that he was a bachelor, though of this I cannot be quite certain. His health was, at that time, perfectly good; though he told me he never knew what health was till after he had passed fifty."

"He talked a good deal of Washington Irving and Cooper, both of whom he knew well, and regarded as among the stars of our common English literature. His admiration for Robert Hall's genius was unbounded, though he said it happened that he had never heard him preach but once. He observed, apparantly with a good deal of satisfaction, that in the room in which I was sitting, he had had the honor to receive three who had been presidents of the United States, besides Mr. Van Buren, who, he supposed, was destined to add one to the number. After breakfast, he asked me to go up stairs with him, that he might show me some of his literary curiosities; but then he said he must first feed birds; and immediately, on throwing down some small bits of bread, some twenty birds or more, that were domesticated on his premises, came flying down and picked them up He made some beautiful remarks upon their being so affectionate and loving towards him, and showed that he had himself strong domestic affections, though I saw nothing to indicate that he had any objects more considerable, or more knowing, than birds to fasten them upon.

On going up stairs, he brought out various literary relics of by-gone days, all of which were of very great interest, and for some of which he had paid a very large price. His greatest treasure of this kind, however, was a document, which was framed, and hung up in his hall. It was nothing less than the written engagement between Milton and his publisher, which secured to the latter the right to print the Paradise Lost, on condition of his paying six pounds for each edition. For this document he told me he gave sixty pounds."

MAJOR ANDRE'S INTENDED WIFE.

Dr. Sprague, during his visits among "European Celebrities," made the acquaintance of the Edgeworth family, residing in Ireland. From a brief sketch of the visit, we copy the following:

"While Miss Edgeworth was occupied in something designed to contribute to my gratification, Mrs. Edgeworth stepped with me into the library; and my eye casually rested upon the Life of Major Andre. As I opened the volume, I asked her if she knew what ever became of the young lady to whom Major Andre was engaged to be married. "Why," said she, "I perceive you do not know the history of this family very thoroughly. That young lady, Miss Honora Snead, was my husband's (Mr. Edgeworth's) first wife;" and she then brought me her miniature, which represented her as extremely beautiful; and, indeed, Mrs. Edgeworth said that she was reputed one of the most beautiful women in the kingdom"

☞ As intimated in our last No., a small schooner, the "Kione Ana," commanded by Capt. Tabor, sailed on Monday morning the 10th ult., for Fatuhiva, Marquesas Islands. The vessel was chartered by the Hawaiian Missionary Society, to take supplies to the Missionaries. The Rev L. Smith, and one Hawaiian, sailed as delegates of the churches. The vessel is expected to return on or before June 1st.

List of Officers on board of Her Britannic Majesty's ship Alarm, now lying in the port of Honolulu.

Captain.—Douglas Curry.

Lieuts.—Alex. Philips, Thos. Hooper, W. F. Legh.

Master.—Jos. Wallis.

Chaplain.—S. Payne.

Surgeon.—J. Andrews.

" John H. Russell.

" Beverly Kennon.

Fleet Surgeon—W. Grier.

Purser—W. Brenton Roggs.

Zoologist—Wm. Stimpson.

Artist—Edward M. Kern.

Secretary—E. R. Knorr.

Draftsman—Arthur Weitzleiben.

Assistant Astron.—Anton Schonboon.

Captain's Clerk—F. H. Beerbowers.

Purser's do.—Thos. H. Niblo.

Carpenter—James K. Owens.

Sailmaker—Richard Berry.

Master's Mate—Joseph Kent.

Poetry.

HONOLULU, March 18, 1856.

FRIEND DAMON,—I enclose you the following lines written by my particular friend Dr. Winslow, in Mrs. Bigelow's Album at her request, as a souvenir of the Doctor's recent visit to Maui. Our much respected Consul at Lahaina who extended the hospitalities of his house to our friend happened to live in the Doctor's old premises, which made his visit there peculiarly gratifying, and the following effusion will show how much he appreciated the attentions received at his old house.

If you think them worthy of insertion in the columns of "The Friend," you will confer a favor on me, as I think there are a great many in this ocean who would peruse, with pleasure, anything that comes from his pen—and if these happen to meet his eye, he will excuse us for taking the liberty to make them public

Yours' &c.,
G. L. COX, Ship 'Magnolia.'

I'm loth to leave this sunny shore
So full of fruits and flowers,
Where I've enjoyed such tender care,
And spent such blessed hours.
No hospitality more full,
No hearts were e'er more warm.
Than I have known beneath this roof,
Of yore my happy home.

But all the e golden joys must end.
And I must haste away,
Still where I go my heart will turn,
And rather fondly stray.

Kind farewell words are often stored,
Like gems at parting given,
Sweet seeds that bloom when friends are dead,
To fructify in heaven.

O, may these be—though feebly said
And not a tithe I feel—
A fragrant garland to adorn
The parlor and the meal—
When I am gone, to ne'er return
To smile beneath this roof,
A breathing shadow of my farm,
An everlasting proof,
That I have prized your cordial care.
And overflowing bowl,
With all the warmth that you could wish,
And tenderness of soul.

How soon to fade, ye balmy shores!
These lawns and limpid streams?
These cordial friends of various hues,
How soon to change for dreams!
Ye towering hills, and verdant groves,
How soon to disappear!
I'm bound away for fonder loves,
And still my heart is here.

C. F. WINSLOW.

Written at my old home, Lahaina,
Maui, March 14, 1856

[For The Friend.]

WELCOME TO JUDGE LEE.

A welcome—thrice welcome is borne on the breeze,
That sways the rich boughs of our tropical trees.
'Tis breathed anthem-like in the wild ocean's roar,
As it dashes and breaks on our coral bound shore.

Glad tidings! proclaim them—repeat them again,
To our shores has returned the champion of men;
Across the deep waters, around the old "Horn,"
In safety and speed the "Raduga" is borne.

The brilliant and mirthful, the good and the fair,
The noble and brave, the true-hearted are there.
There are some whom we greet, we have seen here before,
And how sweet to their vision these Islands once more.

But none among thee more welcome can be,
Than the judge of our nation—William L. Lee.
Who fearless is found to right every wrong,
Thus snatching the weak from the grasp of the strong.

There are dusky browed men who take a deep pride
In claiming thee firm and true on their side,
From the King on his throne, to the humble and poor,
A ready admittance all find at thy door.

God's blessing benignant be on thee! renown
Attend on thy pathway, and yield thee a crown:
Not forsorth the rich spoils of "barbaric gold,"
But the hearts of a people in thine own enrolled.

Prayerful and grateful, calm and sincere.
The voice of thanksgiving and gratitude's tear,
The cry of "ALOHA" floats sweet on the air,
And a heart-felt welcome is breathed in our prayer.

March 1 t 1856. GEM.

"DOWN EAST" GIRLS.

In one of the factories of Maine, recently, the proprietors reduced the wages, whereupon there was a general determination to strike: and, as they were obliged to give a month's notice before quitting work, they have, in the mean time, issued a circular to the world at large, in which is the following interesting paragraph:—"We are now working out our notice, and shall soon be without employment; can turn our hand to most anything; don't like to be idle—but determined not to work for nothing, where folks can afford to pay. Who wants help? We can make bonnets, dresses, puddings, pies and cakes, patch, darn, knit, stew and fry, make butter and cheese, milk cows, feed chickens, hoe corn, sweep out the kitchen, put the parlor to rights, make beds, split wood, kindle fires, wash and iron, besides being remarkably fond of babies; in fact can do any thing the most accomplished housewife is capable of, not forgetting the scoldings on Mondays and Saturdays. For specimens of spirit refer you to our overseer. Speak quick. Black eyes, fair foreheads, clustering locks, beautiful as Hebe, can sing like a seraph, and smile most be witchingly. An elderly gentleman in want of a good housekeeper, or a nice man in want of a wife—willing to sustain either character; in fact, we are in the market! Who bids? Going—gone—gone!"

☞ Although the British journals grievously complain of sympathy for Russia, in the United States, yet not a particle of aid has been extended to that country; while, on the other hand, there have been thirty to forty thousand tons of the finest vessels under the American flag in the employ of the allies, constantly conveying troops and military supplies.—*Am Paper.*

THE PAISLEY ABSTAINERS AND LORD PANMURE.—In reply to a memorial from the Committee of the Paisley Abstainers' League, Lord Panmure states that he has adopted measures to have the drinking booths in the Crimea closed. His lordship has sent off instructions to that effect before the receipt of the memorial from Paisley.—[*Late Paper.*

[From the Polynesian of March 29, 1856.]

DEPARTMENT OF FOREIGN RELATIONS.

BE IT KNOWN to all whom it may concern, that EDWARD MOLL, ESQ., having this day presented to this Department his Commission from the *Senate of the Free and Hanseatic city* of Hamburg, which is found to be in due form, he, the said EDWARD MOLL, ESQ., is hereby acknowledged by order of HIS MAJESTY, as CONSUL OF HAMBURG for the Hawaiian Islands; and all his official acts, as such, are ordered to receive full faith and credit by the authorities of this Government.

Given under my hand, and the Seal of the Foreign Office, at Honolulu, this 25th day of March, 1856.

[L.S.] R. C. WYLLIE.

DARIUS A. OGDEN, ESQUIRE, Consul of the United States, having leave of absence from his Government, with the sanction thereof has appointed DR. GEORGE A. LATHROP to act for him as Vice-Consul; and it has pleased the KING to approve of his appointment.

R. C. WYLLIE.

FOREIGN OFFICE, 28th March, 1856.

☞ A shipmaster from a cruise in a distant part of the Pacific, reports that he finds "The Friend" everywhere! We mention this fact for the encouragement of those inclined to contribute for the gratuitous circulation of our little sheet. More than 1200 copies of each number we scatter broad cast, and we rejoice to learn that when vessels speak at sea, the enquiry is for "The Friend," and that it also finds its way to all those who can read the English language, dwelling upon the remote Islands of the Pacific.

☞ The tone of the English and French journals seems to point to the dissolution of Turkey. Already it is a common joke in Constantinople, that the next sultan will be a Frenchman.

SUBSCRIPTIONS for the Seamen's Chapel, (Seats free,) supported by gratuitous contributions; and The Friend, one thousand copies of which are distributed gratuitously among seamen in the Pacific Ocean.

FATUHIVA CORRESPONDENCE.

OMOA, FATUHIVA, Jan 21, 1856.

MR. DAMON—DEAR SIR:—By the communication of November last, I believe I informed you that the war here had been brought to a close. Peace still continues. The different tribes are friendly disposed to each other. Their attention is now turned towards feasting and dancing.

A few days after concluding peace, the Hanavave people removed over to the island of Tahuata. After being subdued they did not think it prudent to remain on this island Their removal reduces the population of Fatuhiva to less than 1000.

Since our arrival here nearly two years and five months ago, the deaths in the Amoa tribe have been 21, the births 11. The tribe numbers about 300. The population, as you will perceive, is on the decrease. There is reason to believe, that in less than fifty years, the whole race will be extinct. On the other islands of the group, the decrease is more rapid than here: foreign diseases being much more prevalent. Uapou, Uahuna, and Tahuata, have but a remnant left upon them.

Mr. Thompson, as you will see, by refering to the Friend of Jan. 1845 estimated the population of Fatuhiva at 3000. That estimate was probably correct, a decrease of two thirds of the number having taking place since it was made.

The most prevalent complaint among the natives is consumption. Whole families have been swept off by it. After a member of a family is attacked, it not unfrequently happens, that, from him, the disease is communicated to the rest, either by means of the tobacco pipe, or through eating out of the same dish.

Marquesans are great smokers. A singular instance of the power of this hold, I witnessed some months ago, while standing at the bedside of a native in the last stage of consumption. His friends were assembled around him, weeping and wailing, and expecting every moment to see him go off.

Unable to move, just able to speak, and with death staring him in the face, the man asked for a smoke of the pipe.

A few days ago, we were visited by a severe gale from the westward. A small schooner built on Uahuna, and owned by a company of white men living on that island, was driven ashore in the gale. It is now lying high and dry upon the beach—a wreck.

The Hawaiian missionaries are all well The natives are still greatly opposed to the Gospel. The prospect is, that the patience of all connected with the mission, will be severely tried before anything is effected among them. Yours, truly,

J. BICKNELL.

P. S. Opportunities, at times, present themselves of giving away books, or tracts Should your supply enable you to part with a few, I should be rejoiced to receive them. J. B.

JENNY LIND.—It is stated that Mr. Mitchell gives Mme. Goldschmidt Lind the enormous sum of £500 sterling for each concert in which she sings in the series of concerts he is now giving in London. Mme. Goldschmidt is also likely to sing in the provinces under an arrangement with Mr. Mitchell.

HALF-HOLIDAY MOVEMENT.

At the present time there is a strong effort, in England, to open places of amusement upon the Sabbath, and otherwise do away with the Sabbath as a time-honored and sacred day of holy rest, among the English people. This tendency has been watched with much solicitude, by the friends of the Sabbath and the serious portion of the community. It is gratifying to witness a movement that will meet the exegencies of the case. The laborer needs recreation, but let him have it upon the week day. Why should not men give up a portion of the six days, wherein the laborer may enjoy recreation, as well as God be called upon to surrender the Sabbath? To take holy time for this purpose, is robbery. God never granted man this privilege. The movement to which we allude, is well indicated in the following extract:—

Professor Miller, of Edinburgh, delivered the fourth lecture of the course, in connection with the Young Men's Christian Association, in Exter Hall, on Tuesday evening. His subject was, "Labor Lightened not Lost." It was decidedly the best lecture of the four that have been delivered. Lord Paumure, who occupied the chair, introduced him as a countryman of his own, and certainly no Scotchman was ashamed of his countryman on Tuesday evening. His lecture was a master-piece of oratory. There ran quite a vein of humor through the whole, and his sentorian voice made the immense hall ring again. Now he would have his audience in roars of laughter, then almost on the verge of weeping. The numerous stories with which he diversified his lecture were told with such an air of *naivete*, mixed with playful humorousness, that he at once rivited the attention of his audience and maintained it without flagging for two hours. The burden of his lecture was the advocacy of the half-holiday movement, and the sacred observance of the Sabbath. He also advocated every day ablutions, and attention to personal cleanliness, and in denouncing intemperance, he paid a graceful tribute to the good effects which have resulted to Scotland from Forbes M'Kenzie's Act, and called upon Englishmen to demand such an act for England. He described the Saturday half-holiday as the key to the proper observance of the Sabbath. At the present time, when the half-holiday movement is being agitated, this lecture will do immense good.—*Northern Ensign.*

LAVA CEASED FLOWING.

From a letter written by Rev. Mr Coan, dated March 17th, we copy the following.

The lava stream has ceased to advance towards Hilo. There is still much smoke, in the top of the mountain, and fusion bursts up here and there on the hardened stream several miles above its terminus. Hilo is spared and we should be thankful.

SOCIETY ISLANDS.

We copy the following extract from a letter dated Papeete, Feb. 19th, 1856.

H. B. M's. ship "Dido," Capt. Moreshed, arrived here from the Samoas on the 31st of December, and after spending a very pleasant time to the 19th of Jan., when she left here for Raiatia. On the 21st, however, in the night, she fell in with the heaviest part of a severe gale, when she carried away her jib-boom, fore-mast, main and fore top-mast, two anchors and suffered other damage, she returned here on the 24th in a very crippled state. They are employing all the means this place can afford in repairing their damages, and may in all possibility be ready for sea again in about a fortnight.

Our Governor, Count De Bouzet, who had the misfortune to loose his vessel at New Caladonia in April last, has been re-called. The name of his successor has not, as far as I can learn, yet transpired.

ITEMS FROM LATE PAPERS.

BRITISH ARMY.—It may surprise persons to be told, what is the undoubted fact, that there are now in the Crimea 50,000 British fighting men: that there are at home or in the depot in Malta recruits enough to raise that force to 70,000—an army of British-born subjects larger than the Duke of Wellington ever had in his command Besides these there is the Turkish Contingent of 20,000, the Foreign Legion quite as strong, and the Sardinian troops of 15,000, making a total of at least 125,000 men, marching under the British flag.

THE ROYAL BARON OF BEEF.—This noble and English joint was this year cut from a five-years'-old Highland stot, fed by his Royal Highness Prince Albert at the Norfolk farm, in Windsor Great Park, and weighed 425 lbs. The process of roasting occupied fifteen hours. It was decorated with holly and ivy, and placed, cold, on a sideboard in the banqueting-room, on Christmas day, where it remained, together with the boar's head and woodcock pie, during the week.

MR. MACAULAY'S PROFITS.—On Tuesday last the Messrs Longman paid to Mr. Macaulay the sum of sixteen thousand pounds for his two new volumes. What would the philosophic Gibbon have said to this?

MORE FROM THE ARCTIC.—There have recently been two arrivals from the frozen regions, one of which was the return of an exploring party sent out by the Hudson's Bay Company in 1854 to the regions where it was supposed Sir John Franklin and his party perished. They succeeded in reaching Montreal Island, where they met Esquimaux, who informed them that the party had wandered on the opposite beach until, worn out by fatigue and starvation, they one by one died. Snow shoes, iron kettles, a boat, and other articles known to have belonged to them, were found. The other was the British ship Resolute, one of the vessels of Sir Edward Belcher's squadron sent out in search of Sir John Franklin, and which having become locked in the ice was abandoned. She was fallen in with by an American whaler, having drifted over 1,000 miles, and brought to New London.

RUM IN THE CRIMEA.

Our ears have been made to tingle with the horrid sounds which have come from the Crimea, where the cannon, and the sword, and the trampling of horses, and the hunger of vultures have done their work: but now, as the smoke and noise have passed away, a more loathsome and revolting scene is brought before us in the awful ravages of intemperance, which has swept its thousands into dishonored graves The London Times, in a lengthy article, gives a most appalling description of the evil, which has awakened the attention of the community to it to an extent that must event in some blow at the entire traffic at home and abroad.

A Correspondent says:—"Yesterday was Sunday. I rode into Balaklava at 1, P. M., through Radikoi, Major, and returned towards dusk, through Kadikoi Minor. The sights I saw both going and returning, were enough to make an Englishman despair of his countrymen. All along the road were men—not only privates, but non-commissioned officers—in every stage of drunkenness. Sobriety was really an exception, intoxication the rule Noisy groups, flushed and unsteady with drink, were interspersed with staggering sots who could not keep on their legs. Two Highlanders, one of them on the ground, the other making violent and fruitless efforts to get his comrade to stand up, were affording, at 2 in the afternoon, great amusement to a number of French road makers. Sunday is not a day of rest for the French working parties Three hours later I passed a group of three non-commissioned officers of some line regiment. The centre man was kept from falling only by the support of the two others, themselves far from sober, and, the trio made the most of the roads after the most approved fashion. The oldest officers declare that, in all their experience, they never saw anything to equal it. It will be asked, why then, do not officers having a keen sense of the evil, take measures to put a stop to it? Simply because it is not in their power. I believe they do what they can, in the ordinary routine; there are plenty of flogging parades, plenty of the men set to pick up and carry stones, and you cannot ride through the camp without seeing plenty of men drilling in heavy marching order for punishment. But cat, and stone-gathering, and drill are alike ineffectual to check the horrible vice which is degrading our army, and which must, if means be not found to stop it, ultimately impair its efficiency and fill the hospitals. Officers commanding regiments, witness this state of things with grief, and would, I am sure, gladly adopt any practical means that might be ordered or suggested to alter it." The Times exclaims—

"Cannot that common sense which has extricated England from so many political difficulties, and from still more inveterate social ills, be invoked to cure this weakness of our nation, and stigma of our race? Before the evil gets to such a head as our correspondent describes, surely it were worth while to keep the soldiers within camp, or to suppress the drinking-booths. *Anything is better than a license which ruins the health of the soldiers, the strength of the army, and the credit of this country.*"

The Morning Advertiser, boldly recommends the entire suppression of the liquor traffic—a Maine law for the Crimean army?

"There is something ghastly in the rhetorical tone which acts are these men of the Alma—are they the men who fought at Inkerman? They are the men whom our home authorities qualify for a life of hardship by breaking up their constitutions before they are shipped off to the seat of war. We do not suppose that it is intentional, on the part of the government, that our raw recruits should go through a mighty drill of intemperance as part of their military education; but it is none the less its fault if they are permitted to do so, when there is no means to prevent it.

A letter by Rear Admiral J. Ryder Benton, in the Times of the 11th Nov., recommends the entire suppression of all places of sale, as the only way of saving the army from annihilation.

The London Globe of the 15th Nov. says:

"Whatever men may think of teetotalism (and we have not, as yet, taken the pledge ourselves,) here is a great evil to be grappled with, and till it is abated, physical and moral deterioration must result from habits of drunkenness." It recommends that the existing prodigality of stimulants be somehow or other retrenched.

William Russell, the historian of the day of Balaklava, he who told the fearful tale of the disastrous winter of '54-55, has been ignominously mobbed from the Crimea. Mr. Russell in one of his recent letters to the *London Times*, had commented severely on the drunkenness that prevailed in the British camp, and suggested that the cause of this disgraceful debauchery was to be found in the double pay which the soldier was receiving. He recommended that 6d a day should be withheld from the men and put into the Savings' Bank to their account. When *The Times* containing Mr. Russell's letter arrived in the Crimea, it created a great excitement among the privates. The more moderate contented themselves with writing home to the public journals to protest against the execution of Mr. Russell's plan and to neutralize its effect upon the public mind. These more intelligent representatives of their body declared, that, in point of fact, the extra pay had not increased the number of drunkards; that the sober men, who were the vast majority; wanted all the money they earned to purchase for themselves a few extras in the way of eatables, which were to them luxuries, and that the many innocent should be made to suffer for the few guilty of excesses. The drunken party took a more summary course. They assembled in force, stormed his hut, ruined his property, and it is said personally maltreated the worthy correspondent of Printing House Square. When Mr. Russel applied to head-quarters for redress and protection, his request was met with no attention. Mr. Russell had from the first been very obnoxious to the majority of the British officers on account of his exposure of their professional short-comings, and they were only too glad that the common soldiery had treated him in a way their own position prevented them from doing. Mr. Russell has consequently been obliged to quit the Crimea, we fear, for ever. These facts have not yet been made public in the London papers, but have oozed out in the gossip of the Clubs.—[*New York Tribune*, January 26.

How England is Warmed.—An English review compares the way in which the north-western parts of Europe are warmed by the Gulf stream to the method of warming buildings by hot water, and calls the Torrid zone the furnace, the Caribbean sea and the Gulf of Mexico the boilers, the Gulf stream the conducting pipe, and the great hot-air chamber being from the bank of Newfoundland to the shores of Europe, whence the heat is taken up by the prevailing west winds. Owing to the influence of the Gulf-stream, Ireland is clothed in robes of evergreen grass; while on the American shore, in the same latitude, is the frost-bound coast of Labrador. The port of Liverpool has never been closed with ice in the severest winter. The Laplander cultivates barley in a latitude which in every other part of the world is doomed to perpetual sterility. Should the Isthmus of Panama be broken through by some convulsion of nature, and the gulf of Mexico cease to be a gulf, allowing the equatorial current of the Atlantic to pass through into the Pacific instead of being reflected back to England, the writer says, "Britain would then become a Labrador, and cease to be the seat of a numerous and powerful people."

A Church in the Camp.—A Methodist church, consisting of about three hundred non-commissioned officers, and soldiers, has been formed among the British troops quartered in and about Balaklava, and a missionary is about to be sent to them by the Wesleyan Missionary Society. They have sent for a supply of hymn-books, most of theirs having been lost at battles of the Alma and Inkerman.

Speed on the Atlantic.—During the past year the time of the Colins steamers has been less than that of the Cunarders on the eastern passages one day and four hours, and on the western passages one day seven hours and twenty minutes.

Horse Flesh.—There is being formed at Paris a society of economists, naturalists, and hardy gourmands, having for aim the introduction of horse flesh into the category of butchers' meat.

☞ On Monday last His Excellency the Minister of Foreign Relations had the honor of entertaining His Majesty at a dinner to celebrate the happy return of the Hon. W. L. Lee, the King's late Envoy to Washington, and his lady. Covers were laid for between sixty and seventy guests, and besides the lady and gentleman just mentioned were present, Prince Kamehameha, the Minister of the Interior, the Minister of Finance, the Commissioners of France and the United States, the United States Consul, the Danish Consul and lady, the Consuls of Chile and Peru, the Governor of Oahu, Capt. Marge de Marigny of H. I. M's. brig-of-war *Alcibiade*, Capt. Curry of H. B. M's. sloop-of-war *Alarm*, etc., etc., etc. The entertainment was conducted with great *savoir faire*. The toasts given were the King, Mr. Lee, Mrs. Lee, the memory of Kamehameha III, Miss Rooke, Mrs. Gregg and the ladies, and Mr. Wyllie, proposed by the U. S. Commissioner. In offering the health of Miss Rooke, Mr. Wyllie alluded to the fact that the day on which the entertainment was given, was not only the anniversary of the birthday of the late King but also of the arrival on these shores of the late Mr. John Young, a man whose many good and useful deeds have long since become matters of history; one who possessed till the day of his death the implicit confidence of, and greatest influence with His present Majesty's grand-father, Kamehameha the Great. He concluded by proposing the health of Mr. Young's grand-daughter, so soon to be united in marriage with the successor of her grandfather's patron and friend.—[*Polynesian*, March 22nd.

HONOLULU MEDICAL HALL.
DR. McKIBBIN, SURGEON, &c.
DESIRES to inform the inhabitants of Honolulu and vicinity that he has taken the old established Drug Store, corner of Merchant and Kaahumanu Streets, which he has remodelled and means to keep constantly supplied with the best medicines he can procure from the United States and England. The concern will be constantly under his own or his son's superintendence, so that families requiring medicine may depend on getting the best, carefully prepared.
He has just received a case of London perfumery Soaps, Brushes, &c., and daily expects a further supply, which, with the ordinary patent and other medicines, will be sold on reasonable terms.
Physicians' and Surgeons' prescriptions carefully prepared.
Captains or owners of vessels will find every attention paid to themselves or families if requiring medical assistance.
Medicine Chests carefully examined and refitted
Attendance for consultation at office from 9 A. M. till noon, and from 4 to 6 P. M. on week days. On Sunday from 9 A. M till at othor times, at his residence Union Street. 27 tf

SAM'L N. CASTLE, AMOS S. COOKE.
CASTLE & COOKE.
Importers and Wholesale and Retail Dealers in General Merchandise,
At the old stand, corner of King and School streets, near the large Stone Church.—Also, at the Store formerly occupied by C. H. Nicholson, in King St., opposite the Seamen's Chapel 35 tf

Honolulu Marine Hospital.
THIS INSTITUTION, near the corner of Beretania and Punch Bowl sts., in the most salubrious and quiet part of the city, offers a great desideratum for invalids in Honolulu, viz.: a pleasant and comfortable residence, where they will receive the care of competent attendants, and at a rate of charge within the means of all.
Single rooms are provided for such as do not wish to enter the general wards of the Hospital.
The rooms are large and well ventilated, and fitted up superior to any of the kind hitherto provided in Honolulu, and every effort will be made to render this what a Hospital should be.
Patients will also be received by Drs. HOFFMAN, FORD, HILLEBRAND, BULLIONS, HARDY and GUILLOU.
Office of the Marine Hospital at the Honolulu Drug Store, Queen st., near the Market.
GEO. A. LATHROP, M. D.

To Masters of Whale-Ships Visiting the Hawaiian Islands.
YOUR attention is called to the following facts which are offered as inducements to visit KEALAKEAKUA BAY the coming season for recruits.
You will find here in the greatest abundance and of the best kind, the following articles, which will be furnished at the shortest notice and at moderate prices:—Sweet Potatoes, the best the islands afford, Squashes, Melons, Oranges, Cocoanuts, Beef, Mutton, Goats, Hogs, Fowls, Turkeys, Wood in any quantity, delivered at the landing. Lastly and most important, you will run no risk of small pox, as that pestilence has not appeared here, nor within several miles of this Bay. Every attention will be paid to those who may favor us with a call
P. CUMINGS.
Kealakeakua, Hawaii.

MARRIED.
On December 4th at St. James', Paddington, by the HON. AND REV'D DOUGLAS GORDON, the REV. T. MARSLAND HOPKINS. M. A., of St. Peter's College, Cambridge, to CATHARINE HANNAH, eldest daughter of REAR ADMIRAL F. W. BEECHY.—*London Times.*
On the 13th inst., by the REV. J. D. STRONG, at the residence of Charles A. Poor, Esq., MR. HENRY F. POOR, to CAROLINE, daughter of the late WM. FRENCH, ESQ., all of Honolulu.
San Francisco and Boston papers please copy.

Passengers.
Per Ocean Telegraph, for New York, Capt. B. F. Snow, and lady and 3 children and servant. Mrs. J. C. Bullions and two children and servant, Dr. Bullions, Margaret Boyd, Mary McShea.
Per Orkney Lass, for Hong Kong, 12 Chinese.
Per Agate, from San Francisco, H. McKinnon.
Per Yankee, J. B. Rochette, J. C. Sheppard, Capt. Whiteside' Mrs Smith, E. W. Clark, Asi, J. E. Armstrong, G. Barstow, R. G. Noyes, Mrs. Noyes, D. N. Fitmer, J. McDonald, J. Downer, W. C. N. Tallman, R. R. Latimer, J. Lamb, Mrs. Lamb, J. Ritson, S. Durham, G. Reiners, H. Von Holt, Miss Pratt, Mrs. Brewer, C. Brewer 2d, Mr. and Mrs. Long, H. Rafael, J. Sullivan, R. Love and son, N. M. Hinckly, and 6 in the steerage.
Per Fanny Major, A. Ragsdale, H. Beck, L. Vandemarsh, F. Banning, Miss Plunkett.
Per Fanny Major, C. A. Whitcomb, J. Roland, Miss M Smith, H. W. Fairbanks, G. W. Coffin, C. Hathaway, G. Chase, D. Johnson, C. A. Whitman. Mrs. Monsarrat, J. I. Dowsett, J. A. Hammond, Mrs. Hammond and 3 children, W. H. Jones, J. W. Willett, J. Louzada, E. Burgess.
Per Frances Palmer, N. G. Feldheim. Mrs. J. Humphreys and child, J. williams, W. Blodgett, A. Rosa.
Per Navigator, from Tahiti, Capt. Thomas Christan, Jame Graham.
Per Forward, Mrs. Aldrich and child, Mr. Jones, Mr. Dodge, J. Sacket, Capt. Brown, S. A. Ripley, C. H. Sprague, Mr. Feil.
Per Tarquina, Mr and Mrs. Emmes, H A. Lake, A. Johnson, W. F. Allen, J. D. Lewis, D. Lunt.
Per Keoni Ana, Lowell Smith.
Per Queen, H. L. Cambridge.

Cleared.
Feb 18.—Metacom, Woodbridge, New Bedford, for Lahaina.
28.—Lagrange, Thomas, Fairhaven cruise.
Northern Light, Chapel, Fairhaven, Lahaina.
March 3.—Am. sh. Euphrates, Kilmar, New Bedford, for Honolulu.

Capt. Chapel, of Northern Light January 26, 1856, spoke Lat. 40 S., Long. 103 W., ship Mary Ann, Dalman: of Fairhaven, 600 bbls. sperm. Also, Jan. 1, barque Sea Fox, 550 sperm; 15th, ship Amethyst, 600 sp.; 24th, Sharon, 1650 sp.
Capt. Baker, of ship Romulus, reports the following ships off New Zealand, November and December: Columbus, 1 whale, Timor, Sag Harbor, clean; Europa, N. B., clean; Salamandre. (French), 1 whale; Christopher Mitchell, full, 9 whales, Java, Sag Harbor, 4 whales; Erie, 20 bbls.
The Navigator reports the loss of barque Julian, Capt. Coffin, on a small Island about 300 miles west of Tahiti, called Scylla Island. The barque was from San Francisco, bound to Sydney with a cargo of coal, and forty passengers. The vessel and cargo totally lost, and five of the passengers drowned.
Capt. Cox, Ship Magnolia, from Marquesas Islands, via Lahaina, reports off Lahaina roads noon of the 14th, ship Good Return, B. F. Wing, master, five months from New Bedford, 50 sperm. Capt. Wing reports the loss of whale ship Wm. Hamilton, West, of New Bedford, on the night of Jan. 21st, on a reef to the E. S. E. of Mocha Island, said reef is described as extending several miles from the land and not indicated on the chart. The ship was a total loss. The crew escaped in the boats and landed next day upon the island, from whence they were taken by the Good Return and left at Talcahuana 1st of February.
☞ We have been favored by Capt. Spencer, with the following memoranda furnished him by Capt. Cochran, of ship L. C. Richmond.
Left at Marguerita Bay, Feb. 25, Mogul, 19 whales, James Andrews, 11 whales, Charles Carrol, 120 sp. bq. Lark, 2 w, Arab, 9 w, Liverpool, 7 w, Leonore, of San Francisco, 6 w, bg. Prince de Joinville, 4 w, bg. Francis, Chester, 5 w, bg. Sarah McFarlen, of San Francisco, clean. A San Francisco sealing schooner wrecked 50miles south of Port St. Bartholmew; vessel total loss, name unknown: Reynolds, master, crew taken off by the brig Francis. The Favorite would sail for the Islands about Feb. 28. Season nearly closed.

THE FRIEND.

JUNE 1, 1860.

A Professorship of Natural Sciences at Oahu College.

We consider the question as definitely settled, that Oahu College will eventually be fully endowed. Its importance and necessity are fully admitted by all acquainted with the present condition and future prospects of the Hawaiian Islands. The idea is not for a moment to be entertained that an educated, well-ordered and civilized community can be formed and perpetuated on these islands without the moulding and shaping influences of a literary institution of a high order. Such an institution is gradually rising at Punahou. Its foundation has been laid; its walls are partially up; goodly influences have been there centering for twenty years. The languages and ordinary branches of a good English education have always been well taught at Punahou; but has not the time come for a step to be taken in advance? Looking at the wants of the College and the community, we do not hesitate to say that the initiatory steps should be immediately taken to endow a "Professorship of Natural Science." Not only does the College, but the Sandwich Island community, need a scientific man residing in our midst, who can analyze our soils, classify our plants, arrange our shells, explore our forests, study the geological features of the islands, observe our tides aad atmospheric changes, visit our volcanoes when in action, and gather specimens from the mineral, vegetable and animal kingdoms. Not only do our students at Punahou need the lectures and experiments of such a man, but also those at Lahainaluna. How can such a man be procured and sustained in a more satisfactory manner than in connection with a "Professorship of Natural Science" at Oahu College? Cannot the funds for endowing such a professorship be raised upon the islands? This is a question which we would now ask? Let it be carefully entertained by the friends of the College upon Hawaii, Maui, Molokai, Oahu and Kauai. Will not our merchants, our planters, our missionaries and our citizens generally, consider the subject? Read the Supplement.

Hawaiian Evangelical Association.—The following list embraces the names of those present this year at the annual gathering of the American Mission. The date of their original arrival upon these islands is attached to their names; from

Hawaii, Kailua—Rev. Asa Thurston, 1820.

Hilo—Rev. T. Coan, 1835; Rev. D. B. Lyman, 1832.

Waimea—Rev. L. Lyons, 1832.

Maui, Lahaina—Rev. D. Baldwin, 1831; Rev. S. E. Bishop, 1853.

Lahainaluna—Rev. J. F. Pogue, 1844.

Wailuku—Rev. W. P. Alexander, 1832.

Molokai—Rev. Anderson O. Forbes, 1858.

Oahu, Honolulu—Rev. L. Smith, 1842; Dr. G. P. Judd, 1828; S. N. Castle, Esq., 1837; A. S. Cooke, Esq., 1837; Rev. P. J. Gulick, 1828; Rev. L. Andrews, 1828; Rev. E. Corwin, 1858; Rev. A. Bishop, 1823.

Kaneohe—Rev. B. W. Parker, 1833.

Kauai—Rev. E. Johnson, 1837.

Honorary Members—Rev. John Maclay, and R. Lindsey, a member of the Society of Friends, England.

☞ Accompanying this number of the *Friend*, for June 1st, we shall issue a supplement of eight pages, in order to furnish our readers with a full report of the Rev. T. Coan's visit to the Marquesas, per *Morning Star*. It is well worthy the perusal of all interested in the welfare of missions in the Pacific. Portions of the report were read at Fort St. Church, Sabbath afternoon, May 20.

☞ We regret that the crowded state of our columns prevents the publication of His Majesty's speech, at the opening of Parliament, and also full and appreciatory notices of the Prince's Birth-Day, the Examination at Oahu College, and the Exhibition at Fort Street Church, the visit of the *Candinmarrah*, and many other subjects of passing interest. Our readers will find in another part of our columns the annual catalogue of Oahu College and Exhibition-programme. The performances at the Exhibition and the College were not only creditable, but in the very highest degree meritorious. At the Exhibition, we were delighted to see in the audience the Captain of the *Candinmarrah*, and two of his officers. The Occident and Orient meet on Hawaiian soil.

☞ We copy the following from a late San Francisco *Herald*:

"Capt. Hayes, of the *Ellenita*, had published a long letter in the Sydney *Herald*, repelling the charges made against him in some of the San Francisco papers, producing certificates of character."

If Capt. Hayes should apply for certificates of character to some few of his *dupes* in San Francisco, Honolulu, and elsewhere, he could, without difficulty, obtain those which would satisfy even a Botany Bay community, of his consummate villainy and barefaced mendacity.

☞ The Japanese corvette *Candinmarrah*, left our harbor on Saturday, 26th ult., bound for Japan, direct. The officers of the vessel expressed themselves highly pleased with their reception here, and regretted that circumstances prevented a longer stay. On leaving, the *Candinmarrah* fired a salute, which was answered from the battery on Punchbowl.

☞ For want of space, we are obliged to omit several articles prepared for this number of the *Friend*.

Information Wanted.

Respecting *Mr. R. P. Davol*, formerly on board of the Bremen ship "Alexander Barclay," He is requested to call upon Rev. S. C. Damon, or at our office, where he will hear something to his advantage.

H. Hackfeld & Co.

The Great Crater of Kilauea, Volcano of Mauna Loa, Hawaii.

The Crater of Kilauea.

Some months ago, we noticed an engraving (in the *Child's Paper*, published by the American Tract Society,) of the great crater of Kilauea, on Mauna Loa, Hawaii. From our own observations, having twice visited the crater, (1844 and 1855,) this appeared to give a better idea of the spot than any engraving we had seen. On this account, we ordered a stereotype plate, and would gratefully acknowledge the same as kindly furnished by an officer of the American Tract Society.

This engraved sketch is intended to represent one of the most remarkable incidents in the religious history of the Hawaiian nation. The event to which it refers, occurred in the year 1825. In order to appreciate the moral grandeur of the scene, as connected with the terrific displays of volcanic action, it is necessary to recall to mind the superstitious ideas of the Hawaiian people respecting this largest of all active craters upon our globe. The ancient Hawaiians fancied that, ages ago, the goddess Pele, migrating hither from Tahiti, took up her residence in the crater, and was here surrounded by her attendants, who sported in the flames, and played in the fiery surges of the burning lake, as the natives played in the surf breaking upon the shores of Hawaii.

In order to propitiate the favor of this heathen deity, the people were accustomed to cast into the fiery chasm, from whence flames and smoke were continually issuing, their offerings of pigs, bananas, and whatever else they supposed would delight the presiding divinity of the region. On one occasion, when a high chiefess of the islands was sick, it was supposed her malady would disappear if some special offering were made to Pele; and hence *ten kanakas* were cast into the burning lake, or offered in sacrifice. No traveler presumed to pass the crater without rendering some token of respect to Madam Pele. She was once sought in marriage by an old Centaur of Hawaii, whose shape was that of a man's body, with a swine's head, but Pele gave him to understand there was no chance for success, and that he must be off, for she dismissed him rather unceremoniously, calling him "a hog, and the son of a hog." Another tradition, however, states that His Swinish Majesty was finally successful, and that they were married and lived harmoniously together in the flames of Kilauea.

With such fancies and superstitions, the minds of Hawaiians were filled; imagine then the moral heroism of Kapiolani, a chief woman of Kaawaloa, who resolved to go with her attendants to this crater, descend into its very bosom, and there, amidst the deafening sounds and hissing reports, offer up prayer to the true God of Heaven. Kapiolani did this. An old heathen priestess of Pele met Kapiolani upon the brink of the crater, and warned her not to proceed. She endeavored to terrify her by the most fearful threats. Undaunted and unterrified, Kapiolani descends into the crater and reads certain passages from the Bible, and tells her people that Jehovah is the maker of all worlds. Her language was as follows:—"Jehovah is my God. He kindled these fires. I fear not Pele. If I perish by the anger of Pele, then you may fear the power of Pele; but if I trust in Jehovah, and He shall save me from the wrath of Pele when I break through her *tabus*, then you must fear and serve Jehovah. All the gods of Hawaii are vain. Great is the goodness of Jehovah in sending missionaries to turn us from these vanities to the living God and the way of righteousness." After Kapiolani had finished this address, a chief by the name of Alapai, led in prayer, while all bowed in reverence and adoration before Jehovah, the Creator and Governor of all worlds.

We think it quite impossible for any candid and impartial mind to reflect upon this act of moral heroism without being impressed with its sublimity and grandeur. The scene, viewed at the moment of that assembly of once heathen people, following the example of Kapiolani, and engaging in prayer to Jehovah, is worthy of the study and pencil of a Michael Angelo. Then and there was a triumph over the gods of Hawaiian superstition, which merits to be kept in everlasting remembrance. We would refer our readers for a more complete description of this event, to *Bingham's Sandwich Islands*, pages 274, 276.

We would merely add that Wilkes gives the following as the dimensions of the crater of Kilauea: "Total depth of the crater, 992 feet. The lake, 1500 feet in length, and 1000 in breadth." The circumference of the crater will vary according to the route of those who undertake the survey. It may be made 7, 10 or 12 miles.

The frequent changes which are taking place in the active parts of the crater, render it impossible to furnish descriptions which do not conflict with each other.

[Correspondence of the Friend.]

Schools of Illinois.

CHICAGO, ILLINOIS, April 6, 1860.

MR. DAMON—*Sir:*—In this the queen city or the garden city (I do not know which they call it) of the West, I take my pen to write you. I have met with several gentlemen who were your acquaintances, and who have inquired for you. Mr. Freeman, of Rockford, Illinois, I particularly remember; he has the charge of one of those gigantic schools which are a characteristic of the West, where the infant enters and sings his A B C in the basement, and going up stairs, as he grows step by step, graduates next door to the attic, a full blown man or woman, ready to be *married*, and become a useful citizen The school consists of 600 or 700 scholars, of all ages and nations, under the charge of a corps of some thirteen teachers, of whom your friend is chief.

That which has particularly interested me, more than all else here in the West, is the Sabbath Schools. There is hope for the Christianity of the West. Whatever may become of the Union, this part is safe. By the earnest efficient labors of self-denying men and women, about one-half of all the children in Chicago are scholars in the Sabbath School. I do not attempt to be accurate in numbers; I know that there are Christians here who have faith to believe that all of the 20,000 may be gathered in. You may be interested in the description of the localities where these mission schools are established.

The first settlement begins by some one Irish squatter, more daring than the rest, putting up a shanty on some vacant lot. Others seeing that he is undisturbed, come on, and by dint of fence boards, old boxes, and *hocus pocus* lumber, a suburb as densely populated as a *poi* schooner springs into existence. It has no Sabbath School, no education, and a poor, unwashed Christianity. Into that miserable spot, the love of souls sends its missionary. You ask "how?" A *census-taker*, paid by the day, enters and writes down the name of every parent, boy and girl, and then reports to head-quarters. The captain now has his work before him, lays out the ground in divisions and sub-divisions, and calls his forces to the battle. Each lady and gentleman—and they are not too proud to do this work—enter on their part of the field. Through mud, by dogs of real *kanaka maole* size, character and beauty, through lanes that sadly test the extension of fashion, they hunt their charge. Scene at Biddy Noolan's—you can see the fat old body as she stands on the rickety threshold in a kind of don't you come in here attitude.

Visitor.—Where is your son James?

Biddy (who wonders how in the universe the lady found that out) sends Biddy 2d for her brother, who comes in great wonder to see what for the lady wants of him, and is considerably more astonished when she takes his hand in her kind grasp (it never was in such a place before, and when he gets it away it seems odd for having been there) and asks him to go to the Sabbath School and learn to sing. I have not time nor space to follow out the scene, but such kindness touches the mother's heart, and she says yes. One by one, they are thus gathered in; terrible looking set they are too, but love and kindness and perseverance, and a *little candy* sometimes, do the work. The most powerful inducement of the whole appliances of Sabbath School instruction are the children's hymns from the *Sabbath School Bell*, by Horace Walters—a perfect *gem* of a collection. The little ones sing the words all the week at home, and at play on the street. I heard a great, rough boy, lugging a kind of begging basket, trudge on, whistling "*Kind words can never die*," and whistling too with a nervous-pump-energy, as if life depended on it. The parents learn, and the priest may come, and for a time separate them from their teachers and the school, but experience shows that they will come back again. One little fellow was locked up by his mother (Catholic), yet would manage to get out of the house and run away. At last, after being missed, he was asked why he did not come, and replied that now they lived up stairs, and he could not get out of the window. I have not time to multiply incidents. A similar movement is going on in other cities of the West, and has been initiated in St. Louis. Why cannot the same be done for the *kanaka boys and girls?* Draw them in by the beautiful hymns, and give them a *luau* now and then—but get also the truth, as it is in Jesus, in with all the rest. This is work for *lay* Christians, and is done here by them—done by both young and old.

Chicago is still suffering from the financial crisis. Never before have I seen times as dull as they have been here, and generally through the West, so little business done, so much pressure for money, and so much complaint, yet also so much hopefulness and trust for the future. This is to be a great city; railroads seem to be everywhere; I cannot go to a part of the city where the sound of the engine-whistle is not heard, and generally such a ringing of bells as would set the fire-department of Honolulu into a fever. Pike's Peak has its influence. But I am near the end of my sheet. I shall remain here until after the Republican Convention, and possibly may send you a word relating thereto. Respects to all inquiring friends.

Believe me ever yours truly,

J. E. CHAMBERLAIN.

P. S. I have visited Vermont, New York, Pensylvania, Ohio, Indiana and this State, and cannot yet tell where I may bring up.

"CHUCK FULL OF THE BIBLE."—Not long ago we heard a letter to the youth of a Sabbath school read, in which the writer told of a good boy who went to sea—perhaps he was the cabin boy. One of the counsels which his pious mother gave him when he left home was, "*Never drink a drop of rum.*"

The sailors used strong drink every day, and several times each day. When it stormed, they thought they must use it more freely to keep from taking cold. So they offered it to the boy, for the same reason they drank it themselves; but he refused to drink. During a severe storm, when they were all very wet, they urged the lad very hard to drink. They were afraid that he would take cold and die. But he declared that he would not. Finally, one of the sailors, who had never tried his hand at making the little temperance hero drink, said that he knew *he could make him take a dram.* So he went to the brave lad, and did his best to induce him *to take a little*, but he would not touch a drop. He told the old sailor of his mother's counsel, "*Never drink a drop of rum*," and he quoted Scripture to show that he was doing right, for he had been a good Sabbath school scholar. The sailor never heard so much Bible in his life scarcely, as the little fellow poured into his ear. All he could reply was, "Your mother never stood watch on deck." He gave it up, however, as a bad job, and went back to his post. On being asked how he succeeded, "O!" said he, "you can't do anything with him, for *he is chuck full of the Bible!*"

CHEAP PAINT.—For the outside of dwellings, fences and outhouses, where economy and durability are considerations:

Take a barrel, and put in it a bushel of quick lime; slack the latter by pouring over it boiling water—covering the lime four inches deep, and stirring it till slackened; dissolve two pounds of sulphate of zinc (white vitriol) in water, which must be added to the whitewash. This will harden the lime when it is applied to the wood, a firm, white, crystalized surface, not easily removed by the weather or friction. To make the wash a cream color, add four pounds of yellow ochre; for a fawn, four pounds umber and one pound lampblack; stone color, one pound umber and two pounds lampblack.

A CHINESE BAPTIST CHURCH.—Since the last issue of the *Circular* we have had the happiness to organize a little Baptist church in Sacramento, consisting entirely of Chinese members. This is the only Christian church of the kind on the American continent. All the officers of the church, at the organization, were duly elected by ballot. The result of the ballotings were: For Pastor, Shuck Seen Sang; Deacon, Tsuy Fook; Clerk, Yong Fo; and for Treasurer, Wong Chong. They celebrated their first communion season on the last Sunday in January. It was a season of deep and delightful interest. May the little one become a thousand.—*Baptist Circular, published in Sacramento, Feb.*, 1860.

☞ Books, like friends, should be well chosen, and then, like true friends, we shall return to them again, well knowing they will never fail us—never cease to instruct—never cloy.

THE FRIEND.

JUNE 1, 1860.

Finale of the Boat Expedition to Japan.

In order that our readers may understand some remarks which we have to make upon the visit of Capt. Mungero, *Itche-ban-funi*, attached to the Japanese steamer *Candinmarrah*, we copy the following paragraphs from an old number of the *Friend*, published January 9th, 1851:

EXPEDITION TO JAPAN.—Japan seems to be the *terra incognita* that now the busy world desires to know more about, and anything relating to that country is interesting. Shipwrecked Japanese have, from time to time, found their way to the Sandwich Islands. A few weeks since the whaleship *Copia* took several to China; but some remained at Honolulu. Three of these have since sailed in the *Sarah Boyd*, bound to Shanghai, China. Capt. Whitmore promised that, on his route to Shanghai, he would pass near the Loochoo Islands, and there leave these three Japanese, whose names are John Mung, Denzo and Goeman. According to a statement made by Mung, before the United States Consul (Judge Allen) they have been about ten years from their native land. Their statement was to this effect: We left the S.E. part of the island of Niphon, in a fishing vessel, and were wrecked. After remaining on an uninhabited island for about six months, we were taken off by Capt. Whitfield, master of the ship *John Howland*, and brought to the Sandwich Islands. Denzo and Goeman remained here. Mung went to the United States and was there taken care of and educated by Capt. Whitfield. After being absent several years, Mung returned to the Islands, and here found his former companions.

On learning that Captain Whitmore would land them at the Loochoo Islands, Mung, with the assistance of a few friends, purchased a good whaleboat, oars and sails. Having learned the science of navigation sufficient for all practical purposes, he supplied himself with a quadrant, compass, charts, &c. It is not expected that the *Sarah Boyd* will come to anchor at the Loochoo, but launch the whaleboat off the islands, and leave the three Japanese to make the best of their way to land. Although when at the Loochoo, they may be far from their native shores, yet Mung (whom we shall now call Capt. Mung) thinks that he knows enough of the relative situation of the Loochoo and Japanese Islands to find his way across. He says that annually a large Japanese Junk visits the Loochoo Islands, for the purpose of receiving tribute money, and that the junk leaves Japan in February and returns in June. He supposed they might get passage in her—at any rate they would make the trial!

We shall anxiously wait to learn the success of Capt. Mung's expedition. He is a smart and intelligent young man, and has made good use of his opportunities, being able to speak and write the English language with tolerable accuracy. Should he succeed in reaching his native land in safety, his services may be of importance in opening an intercourse between his own and other countries. He would make an excellent interpreter between the Japanese and the English or Americans.

Success to Capt. John Mung, commanding the whaleboat "Adventurer!"

During the last nine years we have made diligent inquiry of various persons, but especially of the officers of the Perry Expedition, respecting Capt. Mung, his companions, and the boat "Adventurer," but no information whatever could we obtain; judge then of our great surprise, on the arrival of the Japanese steamer *Candinmarrah*, to have one of her officers, the Acting Interpreter, with the rank of Captain in the Japanese Navy, make us a call, and introduce himself as our old friend Capt. Mung, of 1851. How changed his lot—now the Japanese official, with "two swords," but formerly the poor Japanese shipwrecked sailor, seeking to return home, although trembling lest if he should return he might be beheaded. After friendly salutations were exchanged, we said "please be seated, give us a full account of your wanderings—tell us all about your boat "Adventurer," and how you got home." Capt. Mung, formerly of the "Adventurer," but now Captain Mungero, of the Imperial Japanese Navy, replied as follows:

"In Jan., 1851, Capt. Whitmore, of the *Sarah Boyd*, launched the boat "Adventurer" from his deck, off Great Loochoo, wind blowing fresh from N.W., accompanied with hail. The ship was about five miles from land. After rowing hard for ten hours, we anchored near the land. Next morning I sent Denzo on shore, but he returned with a 'tear in his eye,' because he had forgotten his native language, and was unable to communicate with the people. We all went on shore, and I took a loaded pistol; we made signs to the people for water, and they conducted us to a pond; we now boiled our coffee and ate some beef and pork, 'American fashion.' The people gave us some sweet potatoes and rice. As we could not speak to the people, we were conducted to a government office, about one mile off, where some rice was given us, in order to see if we could eat rice with two chop-sticks! We showed them that we knew how to handle the chop-sticks, and this exploit settled the question of our nationality, for we were pronounced *Japanese!*

"A messenger was then dispatched to a city about ten miles off, and after some bantering and threats, we were taken under the care of the King of Loochoo, who treated us very kindly. We spent six months in Loochoo, when we were conveyed in a junk to the island of Kiusiu, near the southern point of the island; we were there taken under the care of the Prince of Thiztumar; we remained at this place forty-eight days. The Prince made very many inquiries respecting America and American people, and our treatment. This prince has great influence; he treated me with much kindness.

"We were then removed to Nangasaki, where we were joined by five more shipwrecked Japanese sailors, who had been forwarded from Honolulu to their own country via China. At Nangasaki we were detained thirty months, not however being confined to a close prison, but allowed large liberties. At the end of two and a half years, we were allowed to proceed to our homes, and, so far as I know, all my companions safely reached their homes, and were welcomed by their friends. I went to Xicoco: after thirteen years' absence, I was joyfully welcomed by my mother. My father died before I left home. My mother had mourned for me as dead; under that impression, she had built for me a tomb. I remained at home 'three days and three nights'; I was then removed, with my good boat 'Adventurer,' to Yeddo, where I was promoted to the rank of an Imperial officer, wearing two swords! For several years I was employed in Yeddo. I was for a long time occupied in translating *Bowditch's Navigator;* it was a long and laborious work. I have built many boats after the model of the American whaleboat 'Adventurer.'—*My old whaleboat is now in a government store-house at the city of Yeddo.* I have been very often consulted respecting questions relating to Americans and foreigners. I have had charge of some of the presents which were brought by Commodore Perry. I was in Yeddo at the period of Commodore Perry's visit, but was not introduced to any of the officers of the expedition. I am thirty-six years old. I am married, and have three children. I am captain in the navy, and, at home, have charge of a vessel."

By no means were these all the interesting statements which he made, in answer to our many inquiries about Japan, its government, its religion, its institutions, its people, &c.

Since writing the above, we have returned the call, and been very kindly welcomed on board the *Candinmarrah*, and were introduced to the Admiral and Capt. Katslintarro. Our surprise and astonishment were great when Captain Mungero presented us a translation of Bowditch's great American work upon Navigation. The translation, with the logarithmic tables, had been made by Captain Mungero. He said it tried his patience, and made him grow old by about three years faster than he should! He remarked that about twenty copies had been made into Japanese, one of which was deposited in the Royal Palace. It had not yet been printed in Japanese style. The copy before us is most beautifully executed. It is surely a most creditable performance, and evidently shows that Captain Mungero is a man of decided ability. He is the first native of the Japanese Empire who navigated a vessel, out of sight of land, according to scientific principles. We hope, when our friend, Capt. Whitfield, of Fairhaven, reads this statement, he may feel rewarded for his trouble and expense in educating this Japanese sailor-boy He speaks in the most grateful manner of those who befriended him, when a stranger in a strange land, and has left with us a letter and prssent, to be forwarded to his friend and benefactor, Capt. Whitfield. We could add much more, gathered during our pleasant interviews.

Captain Mungero returns to Japan, taking with him many curiosities and works of art, procured in San Francisco; among them a daguerreotype apparatus, for the purpose of taking the likeness of his mother; "and when that is done," he said, "it will be useless!"—a most beautiful instance of filial affection.

It is most gratifying to learn that the views we entertained and published nine years ago respecting Capt. Mungero, have been fully realized. He did return to his native land,

and there acted no unimportant part in preparing the way for the opening of Japan to intercourse with foreign nations. The end is not yet. If we live a few years, other events equally worthy of record will have occurred. We shall anxiously await the development of the future.

Nine years ago, we wrote, "Success to Captain Mung, commanding the whaleboat 'Adventurer,'" but we now add, Success to Captain Mungero, of the Imperial Navy of Japan, Acting Interpreter of the *Candinmarrah*, and Translator of *Bowditch's Navigator*. Long may he be spared to benefit his native land, to the interests, prosperity, civilization and progress of which, he is most ardently devoted. His love for Japan is great.

"Cast thy bread upon the waters, for thou shalt find it after many days."

13. Singing.
14. Compositions.

RHETORICAL EXERCISES,

Thursday Evening, May 24, at half-past 7 o'clock.

1. SINGING—Chorus, in sacred style—by Mendelssohn.
2. ORATION—The Battle of Life, - W. W. Hall.
3. DECLAMATION—A Tight Squeeze, - Wm. Andrews.
4. SINGING—Trio, "Life has no Power"—by Donizetti.
5. ORATION—The uses of Adversity, - W. H. Gulick.
6. ORATION—The Modern Drama, - N. Emerson.
7. SINGING—Duet—"I would that my love"—Mendelssohn.
8. ORATION—The Influence of War on Human Progress, - - S. T. Alexander.
9. ORATION—Hawaii Nei, - J. P. Cooke.
10. SINGING—Chorus, "Away! away! The Morning Freshly Breaking"—Auber.
11. ORATION—Who is Great? - S. C. Armstrong.
12. ORATION—Decay, - H. H. Parker.
13. SINGING—Chorus, "On, to the Field of Glory!"—Donizetti.

An Item for Moderate Drinkers.—A well-known dealer in the semi-medicinal beverage of "Schiedam Schnapps" has recently favored the public with a pamphlet furnishing the results of his own experience and observation, proving the criminal practice of the liquor trade in the general adulteration of liquors, and the extensive concoction of spurious articles. He states that while the returns of the New York Custom House show an importation of 20,000 half-casks of brandy, 35 000 quarters, and 23,000 eighths, twenty or thirty times that number are sold to retailers and country dealers as genuine French brandy. Three-fourths of all foreign brandies and gin are imported for the express purpose of adulteration. The Custom House books show that one man who has sold thousands of gallons of a certain kind of foreign liquor, has not imported more than five pipes in five years. He gives a list of the vegetable and mineral poisons and acids that are employed in this work. He also states that the greater portion of the imported brandy is whisky sent from this country, to be returned with a French brand as genuine French liquors.—*N. Y. Chronicle.*

The Ellenita Foundering at Sea.

The Notorious Capt. Hayes—The Ellenita sails from San Francisco; touches at Maui; the Sheriff of Lahaina in a "fix"; the vessel leaking; raft built; vessel abandoned; the boat; the raft; the Ellenita goes down; boat and raft separate; the boat reaches Savaii in safety; English man-of-war goes out in search of raft; a man dies on the raft; after twenty days of exposure, reaches Wallis Island.

Captain Hayes has acquired a reputation for duplicity, fraud and high-handed villainy, which entitles him to a high rank among rogues. A graphic sketch of his life and character was published a few months since in the *Commercial Advertiser*, and which has been copied into papers in other parts of the world. China, Australia, California and Sandwich Islands have witnessed his foolhardy exploits and too successful rascalities. He has recently been heard from at Sydney, and it is to be hoped that, in Botany Bay, he may find those who will deal with him after the manner that rogues were there treated in days of yore.

Captain Hayes does not hesitate to lay contribution upon any class—San Francisco lawyers and brokers were well taken in; Honolulu merchants were, more or less, fleeced; and, although we incur the risk of being laughed at, we add, that on the very last morning before leaving Honolulu, he came to our office and solicited the loan of $50, and we were so accommodating as to let him have the money! How could we refuse a shipmaster! Surely they have been kind to us! He plead for his wife's sake! He was so plausible! How could we refuse!

The following narrative of the foundering of the *Ellenita* was furnished by one of the unfortunate seamen, who were exposed for nineteen days and nights upon the raft built before she went down:

BY HENRY MILLER.

On Friday, August 25, 1859, went on board the brig *Ellenita*, Capt. Hayes, and engaged a passage to the Navigator Islands. Next day, took a portion of my things aboard and secured a berth. Seeing the boat lying on the wharf, I asked the mate whether that was the only one the brig had; he said she had another. The next night, went on board again, to sleep and look after my things. About midnight, heard the steerage steward and his brother and sister getting their things on board. Made inquiries as to what was up, and was told that the captain intended to haul off into the stream. Went on deck—saw one of the lady passengers on the wharf, crying and asking the captain to give her passage money back. She was persuaded to come on board the brig, which then cast off and stood to sea, leaking a little the whole way to the Sandwich Islands.

September 16.—Sighted Hawaii, and made the harbor of Kahului, on the Island of Maui, the same evening. Went in to stop the leak and get wood and water. On Sunday evening, the Sheriff came from Lahaina, with a warrant to arrest the captain. The Sheriff was invited to come on board, the captain and mate declining to go ashore, and on the look-out for a breeze. Early on Monday morning, got under way and beat out, with the Sheriff on board. Finding that the

captain would not go ashore with him, he left the vessel in a boat belonging to a schooner lying in the harbor. The brig went through the Molokai Channel, and then steered for Fanning's Island, which she did not make, leaking worse than before, and the passengers had to assist in keeping her free. After it was found that Fanning's Island was missed, the captain ran S.S.W. for several days. I remarked that that course would not make the Samoan Islands.

About October 10th, while the men were bending the fore-topsail, they raised land on the lee bow, which took the captain and mate all aback, for they thought, by their reckoning, they were more than a degree to the eastward. They had no chronometer on board. The land proved to be the Duke of Clarence Islands. The latitude was obtained that night by the moon, which corresponded with that found at noon. Took our departure for Tutulano. The wind headed off the brig, and she would not lay for Savaii. The leak kept the pumps going more than half the time—a great hardship for the men, who had for a long time been on short allowance of water.

On the evening of October 15, one of the crew made the remark that the brig had broken her back. It was found she could not be kept free with the pumps, and on the morning of the 16th, both were choked. Attempts were then made to bail with buckets, and one of the pumps was shifted to the main hatchway, to try to keep down the water; but all to no purpose. After much persuasion, the captain was induced to set the men at work to make a raft, and put the necessary supplies of provisions and water upon it—which was done with all haste. While at this work, one of the men had his leg fractured by a cask which we were striving to put upon the raft. With the assistance of a lady passenger, I set the bone, the lady tearing up some of her clothing to make bandages. We did the best we could, the lady paying the greatest attention to him. About six o'clock, P. M., the passengers were put upon the raft, except the women and children and two other passengers, who remained on board the brig with the captain and mate. About eight o'clock, the same evening, the starboard anchor and chain, with everything else that came to hand, were thrown overboard, for the purpose of lightening the vessel, but all in vain. The boat was called alongside, to take the women and children to the raft, and was then ordered to drop astern, in readiness to take off the captain, mate and the two remaining passengers. About 12 o'clock, the same night, the captain and mate being asleep, I awoke the former, telling him that the brig was full of water to the hatchways. He immediately jumped up and gave orders to cast loose the raft, which was done. He then called the boat alongside, supplied it with a sextant, water and some clothing, and ran it near the raft. The women, seeing the boat coming, endeavored to get in it, but the captain did not lay close enough for the purpose. We in the boat consulted together, and thought it would be best for us to go again on board the brig, wear her, and try to pick up the raft, as the brig still kept afloat and forged so far ahead of it. After a very long pull we reached the vessel. Two of us went on board, and wore the ship round. I went into the cabin, and by the clock saw that it was half-past two, on the morning of the 17th October. The brig was then going down, head first. We called the boat, got into it, and had very hard work to get clear of the vessel's side. After getting a few yards away, she was all under water, except her stern davits. The next thing we saw was the galley floating away, but the brig was seen no more. Pulled for the raft, which we did not find until daylight, and went alongside. All appeared overjoyed, as they had supposed they would never see us again. Every one in the boat showed much sympathy for the women and children on the raft, who were sitting down with the water washing over them. The captain was informed that the provisions were all spoiled by the salt water, when it was proposed by him that all should get on the raft, except the old mate and two men to pull, so that the women and children could go into the boat. After we had gone on board the raft, the captain refused to follow us, and ordered the men to throw overboard a cask of water, some blankets, and other articles, which were picked up. The water, however, was spoiled by sea-water getting to it. The captain had all the best provisions put into the boat, under pretense of keeping them dry. The men then put up a sail, and a steering-oar was rigged out from the raft, to get it into the right direction. It was now almost noon, and I asked what the sun's declination was. The mate said 9.20 S. corrected. I then got the sun, and found the latitude to be 12.14 S. By the mate's reckoning, we were within a few miles of the longitude of Savaii. The boat came alongside of the raft, and Capt. Hayes said he was about to leave us. I asked him for my Epitome, from the boat, and some of the men requested to go with him; but he took good care not to come close enough to enable them to get in. I cannot express the feelings of those on the raft when they saw the boat leaving them, with nearly all the provisions and water, and everything else, of any use, on board of it. The captain left me a sextant, but the horizon-glass was spoiled by salt water, and turned out to be entirely useless to us. It was heart-rendering now to look at our situation. Beside the dangers of the waves, we were surrounded by ravenous sharks, making fierce bites at the spars. The men, however, soon recovered themselves, and bore up with stout hearts, in the hope of making land before long. All were entirely worn out for want of sleep, but there was no such thing as sleeping, the sea continually breaking over the raft; and there was no room for all to sit or lie down. At the end of five or six days, we sighted Savaii, bearing S. E., about 40 miles off. We immediately set to work, made paddles out of pieces of boards, and tried to paddle the raft towards the island; but we could make no headway, as the wind was blowing from the eastward, with a heavy sea on, running to the westward. Suddenly our frail craft commenced rolling heavily, owing to one of the empty casks lashed to the stern having filled with water. This placed us in great danger, and we thought it probable that we should never again get to land. The raft was then permitted to drive before the wind, in the faint hope that it would reach Wallis Island. The next morning we saw the Island of Savaii. It was useless to make any further attempts to get to the land; some of the men were light-headed, which caused them to talk all kinds of nonsense, but they soon recovered, and bore up well against their hard fate. Our clothing was washing to pieces, our legs and hands swelling and full of sores from sun-burn and salt water, and we were half naked.

At the end of fourteen days, one man died, through hunger and thirst; and all must have shared the same fate, had it not been for the good fortune of the men in catching sharks with a bowline, and some small fish now and then; rain-water was also procured from occasional showers. We were now almost entirely hopeless of ever seeing land again. On the 17th night, there was lightning. I was sitting on a cask, with two other men, and thought I saw land. I told my comrades, but no one would believe me—they were in despair, for there were no provisions left, and the water failed, the weather having become clear. All at once, one of the men raised the land, dead to leeward of the raft, about 20 miles off. I knew it to be Wallis Island as soon as I saw it. We now added two blankets to the sail, and paddled with all our strength, to reach the shore. At the end of 19 days and the 20th night, got close to the reef on the north part of the island.

It would have been impossible for us to have gone further, had not two natives swam off with a line, which they made fast to the raft, and hauled it on to the reef. These natives then assisted us to get into their canoes, carrying such as could not walk. One man tried to swim to the reef, but finding himself too weak, had to return. The natives gave us plenty of water and cocoanuts, and had some other provisions ready for us, then took us in their canoes to the small island.

It is impossible to describe all that we suffered while upon the raft. The people who assisted us were a Samoan, a Tucklou native, and a native of Wallis Island. I asked one of them to take me and some others to see the priest, but he would only take me, as he wanted to see him first. I dressed myself in a jacket and blanket, and was carried up to the priest on a ladder, as I was entirely unable to walk. After a while the priest came. I informed him of our misfortune, when he said he had already heard of it by one of Her Majesty's ships, which had called and left a letter, with instructions for the people to look out for us. He also informed me that the boat with the captain, mate and the remainder with them, had landed safely on the island of Savaii. He then called a meeting of the chiefs, and arranged that they should take us amongst them, until Her Majesty's ship should arrive, which he said would be back in a short time. She had only gone to look for us. Next day the priest went to see some of the men, and returned in the evening, when he sent them tea and sugar. I was wholly unable to move out of my bed without assistance from some of the natives who were living with the priest, who had given them the strictest orders to pay great attention to me. Everything I wanted was given me, until I left. He gave the other men shirts and trousers. After a time, the *Elk* arrived, and her commander sent a letter to the priest, requesting us all to meet at one place, to be taken on board. The greater part of us went accordingly, and we were taken on board the ship, where we received every kindness.

I feel sincerely thankful for the many favors shown us, and am now fast regaining my strength, which I never expected to do after the hardships and sufferings I have gone through.

Letters to the Officers of H. B. M.'s Brig "Elk," and Rev. Mr. Mundin.

To Capt. Champion, of H. B. M.'s brig Elk:

Sir:—We are desirous of expressing to you our warmest thanks for your kind attention in assisting us in making our escape from a watery grave, when floating about the ocean on a simple raft, at the mercy of the waves. On our arrival at Wallis Island, the first information we received was that you had, in a most noble manner, left instructions with the Priest and natives on the island to afford us every assistance, in the event of the raft reaching before your return from the search for us. To us your unremitting attention has been so great that we find difficulty to express our feelings of thankfulness. On the passage from Wallis Island, the exertions of yourself, officers and crew, to do everything in their power to add to our comfort in every way, is received by us with feelings of the deepest gratitude, which will never be erased from our minds; and should any of our fellow-creatures have the misfortune to be similarly situated, we trust they may fall into the hands of as generous and noble-hearted a commander and crew as on board H. B. M.'s brig *Elk*.

We would wish, Sir, that the public of New South Wales may be made acquainted with the fact that, on our taking leave of you in this harbor, you, in the most handsome manner, handed to those requiring immediate assistance £4 8s. 6d., from a subscription made up on board your vessel, which is truly acceptable to us who have lost our all by the unfortunate occurrence of the loss of the *Ellenita*.

(Signed) Henry Miller,
Luke Conroy,
On behalf of the other passengers on the vessel.

To the Rev. Mr. Mundin,
Roman Catholic Missionary on Wallis Island:

We, the undersigned passengers saved on the raft from the wreck of the *Ellenita*, wish to express our sincere and heartfelt thanks to you for your kind and gentlemanly attention on our arrival at Wallis Island, and likewise for your kind interest with the natives on our behalf, who, under your instructions, in the most cheerful, humane and christian manner, supplied us with food and other necessaries when suffering intense pain from sores caused by exposure to the weather, dressing our wounds, and paying every attention to relieve us from suffering.

We also wish you, on our behalf, to express our sincere thanks to the Islanders for their kind and unremitting attention to us.

(Signed) Henry Miller,
Luke Conroy,
On behalf of the passengers on the vessel.

List of persons in the Boat that run away from the Raft:—Capt. Hayes, Mr. Parkson, mate, Mrs. Clark and 3 children, Mrs. Armstrong, Mr. Euterton and son, Miss Murry. Seamen—John Anderson and Mr. Clark.—13 in all.

$800 REWARD!

LOST, AT SEA, FROM BAKER'S OR New Nantucket Island, on the 30th September, an iron boat and an iron can buoy. When they went adrift were in good order, marked in white paint, "American Guano Co.," and in black paint the name of the makers, "Secor & Co., Novelty Iron Works, New York." They probably floated toward the westward, and may be fallen in with by whalers. Who ever will deliver the above in a usable condition shall be rewarded as follows: For the boat, $600, if delivered at Baker's Island, or $500 at Honolulu; for the buoy $200, at Baker's, or $100 at Honolulu.
G. P. JUDD,
180-6m Superintending Agent Am. Guano Co.

Cruise of the "Morning Star."

Capt. Brown, of the Missionary Packet, has furnished us with the following interesting account of his voyage to the Marquesas, in addition to the sailing memoranda in another column. The vessel left Hilo March 17, and arrived at Hivaoa, April 11. The narrative then goes on :

We left Resolution Bay the night of the 13th, with Rev. L. Kaiwi on board, and came to anchor the 14th at Hanatakuua Bay, Hivaoa, where we spent the Sabbath. Monday, 16th, sailed for Fatuiva, anchoring next day at Omoa Bay. The old story of war was the first we heard ; indeed the two Bays, Omoa and Hanavavi, are constantly in a broil, although only three miles apart ; we heard of two men being wounded by bullets a few days before our arrival, none killed ; most of the fighting-men of Omoa we found had gone to Resolution Bay a day or so previous to our arrival, in six whaleboats, to join a great feast of that place. This feast was much talked of while we were there, and the hogs were tabued, none could be sold or eaten until the feast-day. The Omoa ladies set up a tremendous wailing as their lords were leaving, cutting their foreheads and cheeks until the blood streamed freely, all being quite fresh on our arrival. I asked one who was badly hacked, why she did it. *Kaoha nui te Nuta* was her reply—great love for her husband. In the absence of the flower of the army of Omoa, the Hanavavians wished to attack those who remained, but prudence being the essential part of valor with all these scamps, they merely prowl among the hills between the two bays, a few from each party endeavoring to show their neighbors that they are anxious for a fight. Not one of them could muster courage to fire a musket, probably, if there existed a possibility that another was aimed at himself ; they mean to be sure of the safety of their own precious person first. The women and children, we understand, take refuge among the hills at night, while the few remaining warriors keep guard between the bay. It is an understood condition, that the missionaries, and all their adherents, are not to be molested in their wars. Taking both mission families on board, we left for Puamao at midnight 19th, reaching that place Saturday morning, April 20th. Landed our passengers and goods ; found all the natives of the bay friendly and obliging, and seeming to be living peacefully with their neighbors ; but the natives of Heteani, the station of Pohaku, attacked a village of the Typees in September last, and killed six men, one of which they brought to their home, cooked and ate, under the eyes of the missionary. They also took captive a boy, whom they burned alive. Pohaku says they made a large fire, over which the boy was suspended and roasted, after being bound hand and foot. Captives are always sure of a terrible fate ; nothing short of extermination, root and branch, of their enemies, is thought of. At church on the Sabbath, at Puamao, about thirty attended, mostly females ; while many were hanging about the house and looking in at the door ; probably with a larger and more commodious house, many more would attend. The seats are composed of rough boards laid upon stones, which raise them a few inches only, and these are placed at the sides and one end of the house only. The floor is composed of smooth black stones, all lying loose, which is the only place for sitting after the boards are occupied. The females dress quite tastefully in their fine white tapa ; nearly all wear a head-dress of some sort ; one had her head ornament surmounted by a profusion of grey hair, six inches long. This article, we are told, is very much sought after; grey or white hair or beard, the latter the most valuable, is in their estimation, very beautiful. A few wore very tastefully arranged rolls, composed of porpoise teeth, using large numbers for ornament ; these are all aristocrats, ladies of rank and wealth, none other can afford them ; diamonds or pearls are not more valued, probably, in countries where they are used.

At the several stations were found about two hundred, who attended the schools, nearly all female We sailed from Puamao and cast anchor at Hanatitapa Bay on the 25th ; general meeting and exhibition of two of the schools were attended. At this bay, the entire ship's company attended the exhibitions, which were very creditable to both teachers and scholars. At the close of the exercises, all sat down to a picnic, provided for the occasion—baked pig, breadfruit, popoi, and bananas, were bountifully furnished to all, including the whole ship's company of the *Morning Star*.

The ship *Twilight* was completely broken up by a heavy gale from the north, early in February; a large amount of provisions, in a good state of preservation, were saved at the time by the natives and sold to the Missionaries. Previous to the breaking up of the ship, the French authorities at Tahiti dispatched the armed brigantine *Railleur* to assist Capt. Rousseau, the person who purchased the wreck, in saving the property, and succeeded in saving a large part of the oil, &c. Previous to her arrival the natives were troublesome, and took a new whale boat from Capt. R., as they claimed, for ground rent.

On the arrival of the man of-war, the boat was demanded ; they refused to give her up, and the vessel was getting a spring upon her cable preparatory to a cannonade of the place. Mr. Bicknell happening along about that time, went on shore and succeeded in having the boat restored to her owner without further trouble. The natives declared it to be their intention if they had powder, to fight the vessel. Mr. B. thinks a few hard knocks would have a good effect upon them, a very sensible idea to my own mind ; they might be cured of some of their incorrigible fighting propensities.

It is quite evident, however, that the Missionaries are making large inroads upon this as well as all other wretched customs of tabus, &c., which teach that if a female enters a canoe with a male, he will become instantly stone blind. Many other practices equally ridiculous, are very evidently giving away before the power of truth. No missionaries on earth, in my own opinion, are doing more real good, or deserve more credit [illegible] those of the Marquesas Mission.

This report would be rendered quite incomplete were I to omit to notice the great pleasure we derived from the companionship of Rev. Mr. Coan, which has made our cruise doubly pleasant and interesting.

I am, Sir, yours respectfully,

JOHN W. BROWN.

P. S.—We have ascertained the following, viz., that there is no *h* in Fatuiva, not Fatuhiva. Omoa is correct. Nuuhiva, not Nukuhiva. These are the correct spellings.

MARINE JOURNAL.

PORT OF HONOLULU, S. I.

ARRIVALS.

April 28—Am wh bark Martha 1st, Cornell, of N. B., 19 months out, 50 sp, 200 wh, 1000 bone, last from Huahine via Lahaina.
29—Am wh ship Braganza, Turner, 6 months from N. B., clean ; sailed the 30th for the Ochotsk.
30—Am bark Rover, Draper, 16 days from San Francisco, en route for Japan—sailed same day.
May 1—Am wh ship Tameriane, Winslow, from New Zealand, 300 wh, 2500 bone ; sailed same day for Kodiack.
3—Am bark Yankee, Lovett, 13 days San Francisco, with passengers and freight to D. C. Waterman & Co.
5—Brit bk Isle of France, Ashmore, 65 days from Sydney with coals, en route for San Francisco.
11—Am wh ship Emily Morgan, Whiteside, 5½ months fm New Bedford, 40 brls wh oil. Sailed again on the 14th for the Ochotsk.
15—Am bark Comet, Smith, 13 days from San Francisco, with passengers and freight to Wilcox, Richards & Company.
19—Am missionary packet Morning Star, Brown, 15 days from Marquesas.
22—Haw wh bark Cynthia, Lowe, 41 days from Cape St. Lucas, 575 brls wh oil.
22—Am sch Far West, Porter, 14 days fm Jarvis Island, in ballast.

DEPARTURES.

April 26—Oldenburg wh bark German, Lubbers, for Ochotsk.
26—Haw wh brig Victoria, ———, for Arctic.
26—Haw wh brig Aloha, Stœver, for Arctic.
26—Haw sch Nettie Merrill, Borrer, for Hilo via Lahaina and Kohala.
27—Am wh ship Abram Barker, Slocum, for Kodiack and Arctic.
28—Haw wh brig Antilla, Fehlber, for the Ochotsk.
28—Haw sch Odd Fellow, Candage, for Hanalei, Kauai.
May 1—Am wh ship Ocean, Clark, for Kodiack.
1—Am bark Frances Palmer Paty, for San Francisco.
3—Haw brig Hero, Von Holdt, for Kamtschatka and Japan Seas.
7—Am wh bk Emerald, Pierce, for Kodiack and Arctic.
8—Am sh Charles Phelps, Brown, for M'Kean's Island.
8—Am bark D. Godfrey, Cook, for Hongkong.
9—Am bark Ionia, Stott, for San Francisco.
9—Am ship Charles Phelps, Brown, for M'Kean's Island.
14—Am wh ship Emily Morgan, Whiteside, for Ochotsk.
23—Haw brig Mary Ellen, Bennett, for Victoria, V. I., with cargo of produce.

MEMORANDA.

AMERICAN MISSIONARY PACKET MORNING STAR, CAPT. BROWN, REPORTS :—The *Morning Star* sailed from Honolulu, for the Marquesas via Hilo, Feb. 29 ; we had very rough and stormy weather until our departure from Hilo, which was not until the 17th March ; we encountered very stormy winds off Kohala and Kawaihae, which forced us into Kealakekua, where we remained 36 hours, and sailed for Hilo. From Hilo to the Line, we had fresh trades from N.E. and E.N.E. mostly, with squally weather, and after reaching lat. 8° 30 N., long. 6° 00 W., had thick, rainy weather until we were near the Line, which we crossed April 2d, in long. 143° 00 W. On the previous day, in lat. 2° 00 N., we were currented W.N.W. 50 miles—the westerly current was found in lat. 4° 00 N., but not so strong as near the Line. On the day we passed the Line, we were set *eastward* 15 miles, and this is the only easterly set we have fallen in with on our passage South of the equator, we had fine weather, the wind E. by N. to E. by S. until within a day's sail of the leeward portion of the Marquesas group, when the wind drew toward the south, and continued dead ahead until our arrival. We saw the two islands, Tahuata and Hivaoa, on the 10th, and came to anchor next day, (our twenty-fourth day out) at Resolution Bay. Last year our first anchorage was at Fatuiva, 25 days from Kealakekua. On leaving Resolution Bay, May 3, we passed in sight of Roberts' Island Saturday morning, May 5, which is the N.W. point of the group, stood to the north, with moderate trades from E.N.E. and E., crossed the Line on Tuesday, 8th, in long. 14° 42 W., the weather continuing fine until noon of the 10th, lat. 5° 50 N., long. 141° 30, where the weather became squally, with rain ; next day, took the N.E. trades strong in lat. 8° 20 N., which carried us in sight of Hawaii on the 16th, we arrived at Hilo the same evening, after a calm close in shore.

PASSENGERS.

For SAN FRANCISCO—per Frances Palmer, May 1—H C Graham, M Sylva, Chas Lake, W G Needham, N G Bean, Captain Bonney, Mrs E Ross, N W Tallant, W H Magee, C Johnson, wife and 4 children, Thos Sullings, Frank Sand, John Ritson, Mrs Paty, Messrs Brown, Miner, and Williams—total, 22.

From SAN [illegible] OF H. K. [illegible] Magee
